ICS 203

INCIDENT Weather Forecast

FORECAST NO:

16

NAME OF FIRE: Walker Fire

PREDICTION FOR:

Sunday Day/Night SHIFT UNIT: Plumas NF

SHIFT DATE:

Sept 15/16, 2019

SIGNED:

Mike Smith Mike Smith

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED:

2100 Sept 14, 2019

...Red Flag warning mid morning Sunday through mid morning Monday for strong wind & low RH...

WEATHER DISCUSSION: An approaching Pacific frontal system will bring strong southwest winds across the fire area today. The area out ahead of this front will be quite dry and unstable so another day of very low humidity is expected. The combination of strong winds and low humidity will produce Red Flag conditions today. The strong winds will continue into the Sunday night period as the Pacific front continues to approach the area. At this time it appears the main cold front will begin bringing rainfall to the fire area sometime mid morning Monday. Wetting rain is expected Monday with a threat of thunderstorms in the afternoon. Any shower threat should end by Monday evening with dry conditions expected Tuesday.

WEATHER FORECAST:

WEATHER: Fair skies. Limited morning valley fog. Some high clouds in the afternoon. .

TEMPERATURES: Highs 75 to 82.

HUMIDITY: Min RH 10-18%

20 FT WINDS:

RIDGETOP - Southwest 8-12 gusts to 20 mph in the morning increasing through the morning and afternoon. Afternoon ridge winds 15-20 mph with gusts up to 40 mph

SLOPE/VALLEY - Morning slope winds mainly southwest to northwest 2-6 gusts to 10 mph increasing late morning and afternoon to southwest to northwest 6-12 mph gusts to 30 Mph.

HAINES INDEX: 5 with very dry air aloft and moderate instability.

STABILITY/INVERSION: Weak Inversions clearing by mid morning.

Outlook for Sunday night, High clouds in the evening, becoming mostly cloudy by sunrise Monday. Minimum temperatures 40-50. Max RH recovery 55-65% possibly climbing before sunrise. Ridge winds and upper west slopes southwest 10-15 gusts 20-25 mph. Slope winds mostly southwest to northwest 6-10 gusts to 15 mph.

Extended forecast for Monday: Mostly cloudy with rain or showers likely by mid morning. Isolated thunderstorms possible in the afternoon. Wetting rain likely. Max Temps 52-57. Minimum RH occurring early morning before rain begins at 55-65%. Southwest ridge and upper west slope winds 10-15 gusts 30 decreasing in the afternoon. Slope winds Southwest to northwest 6-10 gusts to 15 mph decreasing in the afternoon.

Extended forecast for Tuesday: Valley fog in the morning clearing to fair skies by late morning. Maximum temperatures 60-65. Min RH 28-38%. Afternoon southwest ridge winds southwest to west 5-10 gusts 15 mph. Slope winds upslope to upcanyon 3-8 gusts to 12 mph in the afternoon.

Sunrise Sunday: 6:43

Sunset Sunday: 7:11

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14 TYPE OF FIRE: Wildfire

FIRE NAME: Walker OPERATIONAL PERIOD: September 15, 2019, Day

DATE ISSUED: September 14, 2019 TIME ISSUED: 2100

UNIT: Plumas NF SIGNED: Diondray Wiley FBAN (T)

INPUTS

WEATHER SUMMARY

Weather:

Fair skies, morning valley fog and high clouds in the afternoon

Day Temps:

75-82 degrees *10hr fuels: 5 *ERC: 77

Day RH:

*12-18%. *****Exceeds Local Thresholds*****

20 FOOT WINDS: Ridges: SW to 8-12mph increasing around 20mph increasing through the afternoon. Afternoon ridge

winds 15-20mph gust 40

Slope/valley: Morning slope winds SW-NW 2-6 gust 10 increasing in late morning and afternoon to SW

to NW 6-12 gust to 30

See Incident Weather Forecast for overnight weather

INPUTS:

FIRE BEHAVIOR

- Fuels: Live and dead fuel moistures continue to decline. 10Hr fuels are in the single digits, current RAWS observations are 5-7% (7% is critical). Fuels above 4500' will be drier then fuels below 4500'.
- Topography: Be aware of the alignment of wind and topography. Wind speeds traveling through steep canyons can become compressed and increase in speed.
- Weather: Red Flag Warning for Strong winds. Atmospheric instability.

FIRE BEHAVIOR: We're entering a critical burn environment with wind being the key component coupled with low RH. Expect an increase in surface spread. All divisions in the East Zone will see the greatest potential for isolated torching, small slope runs and spotting. Spotting distances may excess .5 miles. When the inversion lifts by mid-morning, fire behavior may increase over the entire fire area.

Day-DIV A: There is and increased potential for small slope runs and moderate fire behavior in receptive fuel beds. Antelope dip is an area of vulnerability. Fuels burning near the line are a threat for spotting.

Night-DIV A: Expect a decrease in activity as cooler temps and wind moderates.

Day-DIV C/E: Fire behavior will be minimal on both divisions, with the Wheeler peak area having the greatest potential. Any open line could experience slope runs. Be mindful of wind vortices caused by steep terrain.

Night-DIVC/E: Minimal fire activity. Direct suppression should be successful.

Day-DIV F/G: Winds have proven to become unpredictable throughout the intersecting drainages. Expect and increase in fire behavior and activity.

Night-DIV F/G: Fire activity may be minimal. The potential still exists for flanking and creeping

Day-DIV I/K/M: Burning islands near the fire line can cast embers up to and possibly exceed .5 miles. Conditions will change in the afternoon as wind gust develop. Expect an increase in fire behavior throughout the shift in the Clover Dip, Railroad Dip and Beaver Dip area.

Night-DIV I/K/M: the potential for nighttime fire activity is possible with the predicted wind. Expect upslope runs, Flanking and spotting.

Day-DIV Q/V/X: Containment lines may be tested by strong winds. Spotting can occur up to and may exceed .5 miles. Night-DIV Q/V/X: Fire activity should be less as strong winds subside and temps decrease.

AIR OPERATIONS

The inversion is forecasted to lift by mid-morning

SAFETY

6. Control Operations/Work Assignments:

- · Utilize appropriate suppression tactics to keep fire in current foot print.
- Balance the risk of exposure to hazards against the Mop Up standards for firefighter safety.
- · Hold and secure completed line.

- * Denotes resources identified to respond to IA within the TFR.
- · Beware of mine locations.
- · Begin suppression repair, following the Suppression Repair Plan. Consult with READ prior to any repair.
- · FBATS will be working throughout all divisions.
- SOF2 Galin Young will be working in divisions A, C and Suppression Repair Group.

6. Control Operations/Work Assignments:

- · Utilize appropriate suppression tactics to keep fire in current foot print.
- Balance the risk of exposure to hazards against the Mop Up standards for firefighter safety.
- Hold and secure completed line.

Walker Fire - Safety Message

INCIDENT: # CA-PNF-001324 DATE: 09-15/16-2019 TIME: 0600-0600 24 Hour Shift

Reeb Lour Enard Abi

- Maintaining situational awareness takes effort!
- Continue planning to provide for safety then engage in your mission!
- Watch for complacency in others, and help them stay sharp.
- Traffic is increasing, drive defensively!
- Be methodical and meticulous in your tactics to get the job done safely!

Keep Your Head in the Game!

Driving

- When driving keep speed at or below the posted speed limit and your headlights on.
- Stay as far to the right of the road as is safely possible.
- Stay alert for oncoming traffic that may "cheat" into your lane.
- Schools back in session, watch for school busses and children at bus stops.
- Always fasten your seat belt before the vehicle is set into motion.
- Slow down, slow down, slow down.

There are three main types of distracted driving: Visual-taking your eyes off the road; Manual-taking your hands off the wheel; Cognitive-taking your mind away from the task at hand. Don't drive distracted!

Stump Holes/ Ash Pits

- Situational Awareness: Be alert for stump holes and ash pits when mopping up.
- Identify stump holes and ash pits to all personnel.
- Work with extreme caution in the area:
 Wear and use all approved PPE properly.
 Use the Risk Management Process (IRPG p. 1) to engage.
- Be alert for hidden hazards: Burning root systems near stump holes can collapse when stepped on.
- Beat the Odds: Most significant burns occur from stump holes and ash pits.

Prepared by,

Team 4 Safety Group

	RISK ANALYSIS	(ICS 215a) 24 Hour Shi
BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	HAZARD / DANGER TREES	 Refer to Hazard Tree Safety Guidelines (IRPG p.22-23) Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled Be especially alert around snags and green trees during wind events.
ALL	WEATHER	"Keep Informed on fire weather conditions and forecasts." Anticipate increasing and gusty winds. Expect increased fire behavior, including spotting. Communicate any increase in windspeed and direction. Be especially alert around snags during wind events.
ALL	FIRE BEHAVIOR	Are you seeing what we have predicted? Conduct thorough assessments before starting work Ensure LCES is in place Plan & Communicate your exit strategy with your crew and adjacent resources provide additional briefing for new resources and maintain communications
ALL	COMMUNICATIONS	Share Situational Awareness (hazards, changes, etc.) to those who also have a need Radio Communications may be poor in some areas: use human repeaters as needed Ensure all personnel are familiar with the incident and iA communications plans Make sure all resources have radios cloned appropriately Ensure that non-agency resources understand radio use and procedures
ALL	DRIVING	Use caution while driving on all incident roads. Non fire personnel speeds in the area are often faster than we normally drive Dirt roads may be slippery when wet. Watch out for possible stream debris from the rain Watch out for wildlife on all roads, especially during the dawn and dusk hours Drive defensively! Expect the unexpected around every curve Drive with headlights on; use chock blocks, keep windshields clean; use backers Watch for other vehicles, debris, and wildlife on the roads Use caution on area roads. The roads are very narrow with steep drop-offs
	STEEP TERRAIN	Avoid working below crews and equipment
ALL	ROLLING MATERIAL	 Concentrate on your footing placement; take your time Ensure adequate spacing between crewmembers so they can react to dislodged debris Post lookouts to warn of rolling debris. SHOUT out to warn others Look Up, Down and Around
ALL	MOP UP OPERATIONS	 Evaluate areas for hazard trees and locate stump holes for avoidance Monitor fatigue, shorten shifts to increase rest where appropriate Provide motivation to workers to maintain situational awareness and avoid complacency Evaluate mop up distances against what is safe and necessary Review and follow "Look Up, Look Down, Look Around" Balance the risk of exposure to hazards against the Mop Up objective
ALL	HEAVY EQUIPMENT OPERATIONS	NEVER work below heavy equipment Ensure communications are established with operators Ensure ground personnel have safety illumination, with light-sticks being the minimum Maintain a 50'-100' exclusion area around equipment In timber increase safety distance to 2 ½ times canopyheight
ALL	LINE CONSTRUCTION	Conduct thorough briefing for all personnel involved (inside rear cover IRPG). Ensure LCES in place prior to engagement (IRPG p. 6) Establish adequate safety zones (IRPG p.7) and escape routes Use Downhill Line Checklist (IRPG p. 8) Use "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3) Utilize Risk Management Process (IRPG p.1)
ALL	FIRING OPERATIONS	Only personnel trained in the use of each device will be authorized to use firing equipment Ensure all personnel are aware of firing operation that may affect them Wear appropriate PPE Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed
ALL	AIRCRAFT OPERATIONS (DAY ONLY)	Use risk analysis to determine if any given flight is necessary Keep personnel out of drop zones Use air-to-ground freq, to communicate with aircraft Use concise statements & clock directions when directing aircraft Maintain good separation between ground forces & aerial ignition Avoid "heli-mopping". Eliminate unnecessary pilot exposure

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

	IMMEDIATE	Life or limb threatening culty breathing, bleeding severely, 2			
Severity of Emergency / Transport		TY 2 Serious injury or ill	ness. Evacuatio	n may be D	ELAYED IF
Priority	necessary. Ex: Significant trauma,	unable to walk, 2° – 3° burns not m	nore than 1-3 palm size	s.	
	GREEN / PRIORITY Ex: Sprains, strains, mi	Y 3 Minor injury or illnes	s. Non-Emergen	cy transpor	rt

Walker Fire Personal Mail

It's up to you to pick up and send your personal mail. Below is information that will help you make it happen:

Walker ICP, Taylorsville

Postal Service mail and packages can be sent and received at the Taylorsville Post Office.

Address incoming mail and packages to:

(Your Name) General Delivery Taylorsville, CA 95983

The Taylorsville Post Office will also receive FedEx and UPS packages as a courtesy to you.

FedEx and UPS should be mailed to:

(Your Name) 4368 Main Street Taylorsville, CA 95983

The Post Office only mails US Postal Service packages.

Taylorsville Post Office Hours:

Monday - Friday 1000 - 1400

Saturday 1130 - 1230 Knock on the (closed) retail window where the clerk normally sells stamps.

Sunday - Closed

Four Corners Camp

Address incoming mail and packages to:

(Your Name) General Delivery Portola, CA 96122

No FexEx or UPS arrangements have been made in Portola. The Portola Post Office will not receive FedEx or UPS packages.

Portola Post Office hours: Monday - Friday 0800 - 1700 Saturday and Sunday - Closed

Human Resource Message

Helping One Another

Everyone here today is playing a critical role in fighting the Walker fire. We all have our assignments that must be met in order to achieve our mission of protecting life, resources and property. Of course, we cannot accomplish our mission when one of our fellow team members may be experiencing a work and/or personal matter that is impacting their ability to keep focused and remain positive.

If we witness a team member who is having a rough go at it, become their "listening ear." Ask them how things are going. See if they want to take a break to talk. Give them the opportunity to vent and to share with you their concern. You may be the person that brings them back to where we need them to be by just listening and not talking. Just don't hug them like Smokey Bear below without the person's permission ©

Listening is often the thing needed to help someone.

Summary of Suppression Damage Repair Guidelines

Objectives - The objective of the fire suppression is to repair areas disturbed by fire suppression activities into a condition that does not negatively affect natural and cultural resources and will not create to excessive erosion on the landscape. Without compromising public and firefighter safety.

- Reduce the potential for soil erosion and sedimentation
- Reduce the visual impacts of fire line as well other suppression activities when feasible
- Repair roads and drainage structures to a functioning condition
- Protect natural and cultural resources from additional potential damage

Critical Guidelines

Sensitive Sites are marked with yellow and black or red and black striped flagging.

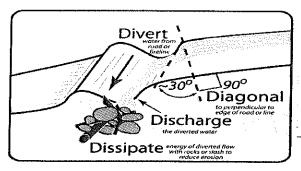

Back-hauled all trash and un-needed flagging. Please leave safety flagging in place.

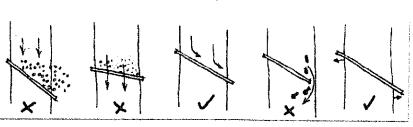

On Firelines, waterbars should be installed as described below, fire line covered with slash, and entrances blocked.

Dozer Line

Distance Between	
Waterbars (A) (feet)	
No waterbars needed	
100	
75	
50 (B)	

- (A) These are guidelines and are not intended to restrict the implementation of more or less water bars if the need or lack of need is justified.
- (B) Firefighter safety should be taken into account; if slopes are too steep for safe implementation then waterbars should not be constructed, if sensitive resources are not present.
- DEPTH AND WIDTH: Waterbars need to be cut into surface, do not simply push up soil.
 - Waterbar depths for dozer lines should be at least 6 inches; total height from bottom of ditch to the top of the waterbar should average at least 18 inches and not exceed 24 inches.
 - Waterbar depths for hand lines should be at least 4 inches; total height from bottom of ditch to top of waterbar should average at least 8 inches and not exceed 12 inches.

Helispots, Safety Zone, Spike Camp, and Staging Areas: These fire suppression activity areas should be repaired to standards similar to fire line repair. Waterbars place where appropriate. Use cleared vegetative material, and slash for soil cover

Watercourses: Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.

- Do not remove large woody debris which was in the channel prior to the fire, bucked limbs and logs in watercourses from fire suppression activities should be removed from the watercourse.
- Where fire lines are constructed within 100 feet of intermittent and perennial streams, use certified weed free straw, wood strands, or slash to increase soil cover and prevent sediment from entering the stream channel.

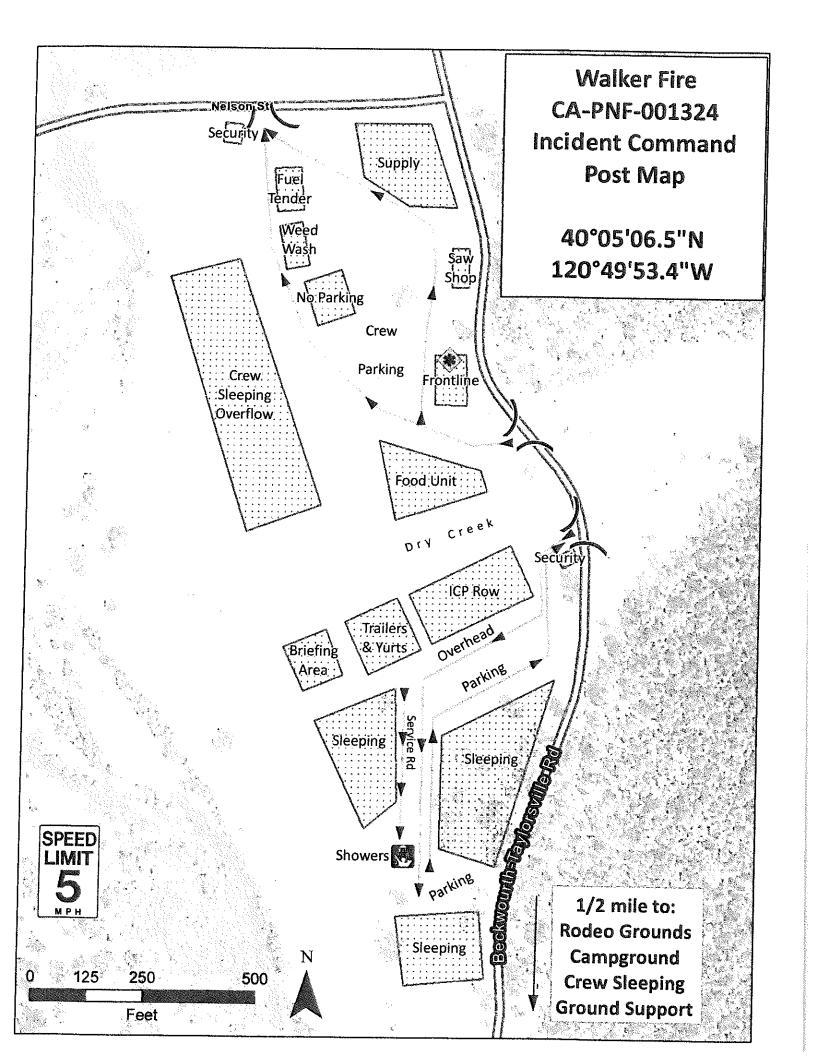

Summary of Suppression Damage Repair Guidelines

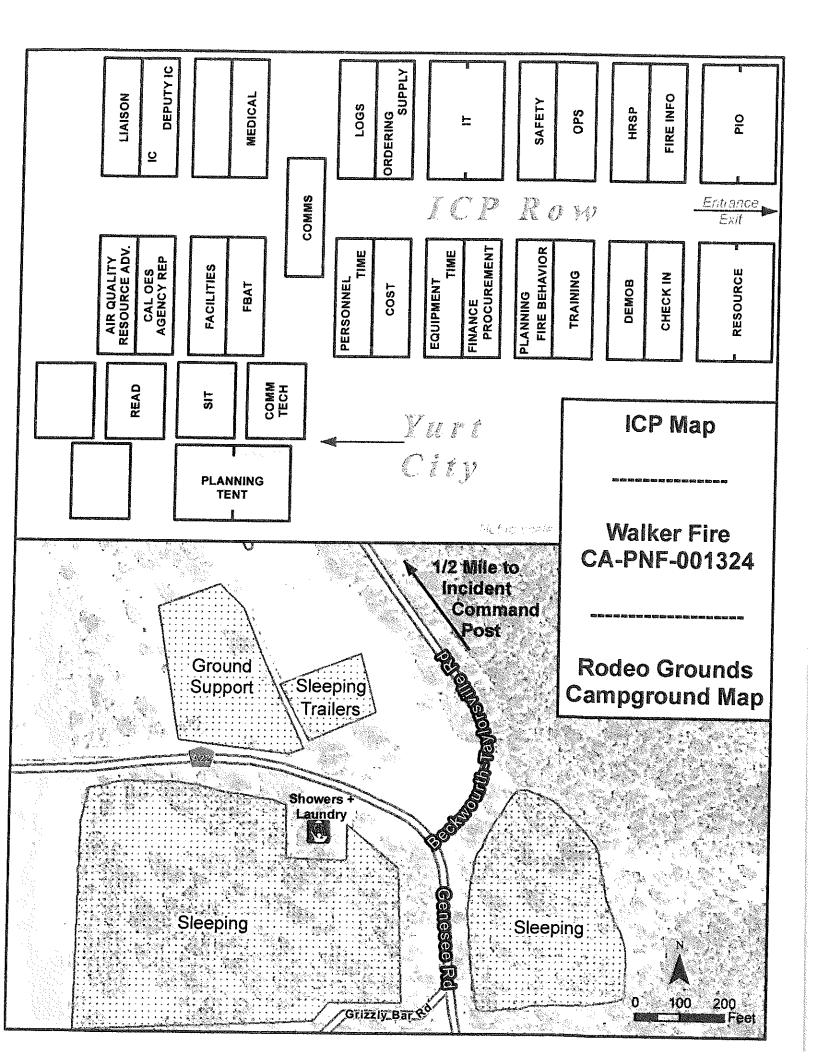

Water Drafting Sites: Water sources developed as a water draft site are to be restored to a condition resembling pre fire use. Remove any dams, dikes, or other impoundments that were created for fire suppression activities.

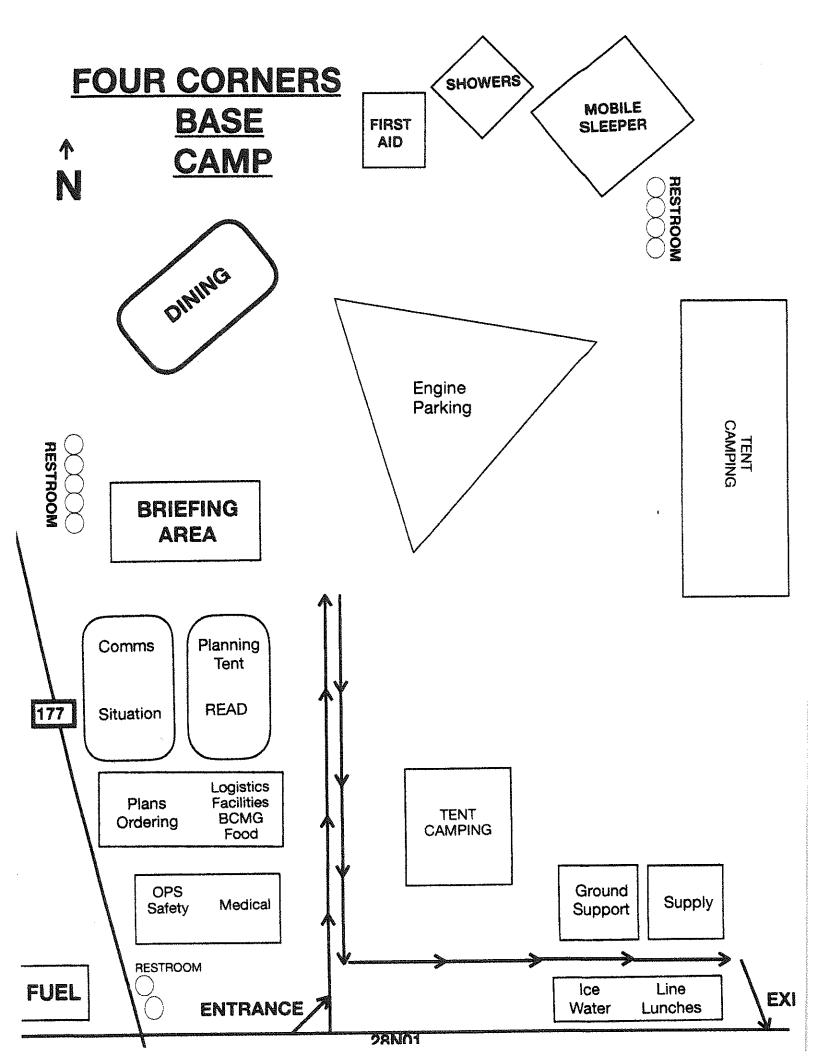

Concentrations of Slash: Concentrations of slash created by fire suppression activities along roadways, developed recreation areas, and among structures should be chipped and spread across the cleared area. Chip piles should not exceed 6 inches in depth. Where appropriate, concentrations of slash can be lopped and scattered, not to exceed 18 inches in height.

OTHER SUPPRESSION DAMAGE REPAIR NEEDS:

- Repair fences, gates, and cattle guards so that they are functional. These repairs must be related to suppression fire activities.
- Hazard trees should be felled if they pose a safety threat to the general public. Hazard trees to be felled will be identified and marked by a Division Group Supervisor or Felling Boss, using the R5 Hazard Tree Guide.
