INCIDENT Weather Forecast

FORECAST NO:

17

NAME OF FIRE: Walker Fire

PREDICTION FOR:

Monday Day/Night SHIFT UNIT: Plumas NF

SHIFT DATE:

Sept 16/17, 2019

SIGNED:

Mike Smith Mike Smith

TIME AND DATE

FORECAST ISSUED:

2100 Sept 15, 2019

Incident Meteorologist

...Red Flag warning through mid morning today..Rain showers likely mid morning through evening...

WEATHER DISCUSSION: A strong for the season Pacific cold front will sweep across northern California today bringing early morning gusty winds then rainfall to the fire area this morning. Significant wetting rain is expected with this system. This front will also bring a threat of thunderstorms to the fire area this afternoon as well. The threat of showers should end by this evening as the frontal system passes eastward. Tuesday will see some warming and drying but it now appears another low pressure system will be dropping through northern California on Wednesday bringing a chance of more, although lighter, rainfall as early as Wednesday afternoon. A more extended period of drying is expected for the end of the week.

WEATHER FORECAST:

WEATHER: Mostly cloudy with rain showers likely by mid morning. Isolated thunderstorms possible in the afternoon. Expected rainfall amount today about one half inch.

TEMPERATURES: Highs 52-57.

HUMIDITY: Minimum humidity 40-50% occurring early morning before the rain begins.

20 FT WINDS:

RIDGETOP – Southwest 10-15 mph with gusts to 30 mph decreasing in the afternoon.

SLOPE/VALLEY - Southwest to northwest 6-10 gusts to 15 mph.

HAINES INDEX: 3

STABILITY/INVERSION: Weak Inversions in the early morning hours.

Outlook for Monday night, A chance a showers or isolated thunderstorms through the evening hours then. mostly cloudy becoming partly cloudy by morning. Fog likely developing in the canyons. Minimum temperatures 30-40. Max RH recovery greater than 85%. Ridge winds southwest to west 10-15 gusts to 20 mph in the evening dropping off after about 2000 to west 5-10 gusts to 15 mph. Slope winds southwest to northwest 6-10 gusts to 15 mph dropping off after 2000 to light downcaryon to 5 mph. .

Extended forecast for Tuesday: Valley fog in the morning clearing to fair skies by late morning. Maximum temperatures 60-65. Min RH 28-38%. Afternoon ridge winds southwest to west 5-10 gusts 15 mph. Slope winds upslope to upcanyon 3-8 gusts to 12 mph in the afternoon.

Extended forecast for Wednesday: Increasing clouds with a chance of rain by afternoon. Wetting rain possible through the night. Maximum temperatures 55-60. Min RH 30-40%, Afternoon ridge winds southwest to west 5-10 gusts 15-20 mph. Slope winds upslope to upcanyon 3-8 gusts to 12 mph in the afternoon. Higher gusts upper west slopes.

> Sunrise Monday: 6:44 Sunset Monday: 7:10

FIRE BE	EHAVIOR FORECAST
FORECAST NUMBER: 15	TYPE OF FIRE: Wildfire
FIRE NAME: Walker	OPERATIONAL PERIOD: September/16, 2019, Day/ Night
DATE ISSUED: September 15, 2019	TIME ISSUED: 2000
UNIT: Plumas NF	SIGNED: Diondray Wiley FBAN (TV)

INPUTS

WEATHER SUMMARY

Review Incident Weather Forecast

Weather: Day Temps: Mostly cloudy with rain showers likely by mid morning

52-57 degrees

Day RH:

55-65%

20 FOOT WINDS: Ridges: SW 10-15 mph gust to 30mph decreasing in the afternoon.

Slope/valley: SW to NW 6-10 gust to 15mph.

See Incident Weather Forecast for overnight weather

FIRE BEHAVIOR

INPUTS:

- Fuels: Fuel moistures will increase over time with the forecasted wetting rains.
- Topography: Soft shoulders will form as roads erode during the wet weather. Boulders and fire stressed trees can become dislodged and roll downhill bringing additional debris with them.
- Weather: Be aware of hazards associated with wet weather (decreased visibility, slick surfaces, dangerous driving conditions etc.). If thunderstorms produce any lighting ground strikes, there will be a potential for holdovers.

FIRE BEHAVIOR: Fire behavior will consist of creeping in sheltered fuels and large down and dead fuel.

Day/Night DIV A: Expect a decrease in fire activity as the area receives a wetting rain, cooler temps and the wind moderates. Sheltered fuels may smolder and creep.

Day/Night DIV C/E: Expect a decrease in fire activity as the area receives a wetting rain, cooler temps and the wind moderates. Sheltered fuels may smolder and creep.

Day/Night DIV F/G: Expect a decrease in fire activity as the area receives a wetting rain, cooler temps and the wind moderates. Sheltered fuels may smolder and creep.

Day/Night DIV I/K/M: Expect a decrease in fire activity as the area receives a wetting rain, cooler temps and the wind moderates. Sheltered fuels may smolder and creep

Day/Night DIV Q/V/X: Expect a decrease in fire activity as the area receives a wetting rain, cooler temps and the wind moderates. Sheltered fuels may smolder and creep.

AIR OPERATIONS

Have an alternate plan in place if the rescue copter is unable to lift

Walker Fire - Safety Message

INCIDENT # CA-PNF-001324

DATE: 09-16/17-2019 TIME: 0600-0600 24 Hour Shift

RAIN EVENT

Crew leaders should know and apply measures to enhance safety during rain events. The basic measures include:

- Seek shelter in vehicle during rain. Park away from hill sides where unstable soil caused by the fire may come
 down
- Stay away from areas that may be prone to funneling water such as drainages
- · Reduce speeds and increase braking distances if driving, be cautious of slick road conditions
- Ensure windshield wipers are functioning properly, headlights are on for your visibility and others
- Keep a safe distance from hazardous trees
- Stay dry; seek shelter, find cover in your tent or building at base camp, or inside your vehicle
- Winds at higher elevations are predicted to reach 30 mph early in the shift, increasing the threat of aerial hazards

RISK OF HYPOTHERMIA

- The condition of having an abnormally low core body temperature
- Occurs with core body temperature below 95 degrees
- Symptoms:
 - Shivering slow shallow breath, slow weak pulse
 - Altered level of consciousness, drowsiness and slurred speech
- Mitigations:
 - Remove wet clothing, protect against wind
 - Move to a warm dry shelter, begin gentle rewarming
 - o Offer warm liquids only if conscience and alert
 - SEEK MEDICAL ATTENTION!

HUMAN FACTOR BARRIERS TO SITUATIONAL AWARENESS

- Fatigue
 - Carbon Monoxide
 - Dehydration
 - o Heat Stress
 - Fitness Level
 - 24-hrs awake affects your decision making like 0.1 blood alcohol content
- Hazardous Attitude
 - Invulnerability
 - Anti-Authority
 - o Impulsive
 - Over confident
 - o Complacent
 - o Resigned
 - Afraid to speak up, or disagree

THE DRIVE HOME

- Cumulative fatigue is a reality, many resources have been here since it first started
- Don't be in a hurry, follow posted speed limit signs and slow down when road conditions warrant
- Take breaks as needed / manage fatigue
- All personnel in the vehicle MUST wear seatbelts
- Use safe following distances
- Ensure all headlights, brake lights, turn signals, and windshield wipers are operating correctly
- The assignment isn't concluded until you're home, safe!

Prepared by the,

Team 4 Safety Group

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES	
ALL	HAZARD / DANGER TREES	 Refer to Hazard Tree Safety Guidelines (IRPG p.22-23) Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled Be especially alert around snags and green trees during wind events. 	
ALL	WEATHER	 "Keep Informed on fire weather conditions and forecasts." Anticipate increasing and gusty winds. Expect increased fire behavior, including spotting. Communicate any increase in windspeed and direction. Be especially alert around snags during wind events. 	
ALL	MOP UP OPERATIONS	 Evaluate areas for hazard trees and locate stump holes for avoidance Monitor fatigue, shorten shifts to increase rest where appropriate Provide motivation to workers to maintain situational awareness and avoid complacency Evaluate mop up distances against what is safe and necessary Review and follow "Look Up, Look Down, Look Around" Balance the risk of exposure to hazards against the Mop Up objective 	
ALL	COMMUNICATIONS	Share Situational Awareness (hazards, changes, etc.) to those who also have a need Radio Communications may be poor in some areas: use human repeaters as needed Ensure all personnel are familiar with the incident and IA communications plans Make sure all resources have radios cloned appropriately Ensure that non-agency resources understand radio use and procedures	
ALL	DRIVING	Use caution while driving on all incident roads. Non fire personnel speeds in the area are often faster than we normally drive Dirt roads may be slippery when wet. Watch out for possible stream debris from the rain Watch out for wildlife on all roads, especially during the dawn and dusk hours Drive defensively! Expect the unexpected around every curve Drive with headlights on; use chock blocks, keep windshields clean; use backers Watch for other vehicles, debris, and wildlife on the roads Use caution on area roads. The roads are very narrow with steep drop-offs	
ALL	STEEP TERRAIN & ROLLING MATERIAL	Avoid working below crews and equipment Concentrate on your footing placement; take your time Ensure adequate spacing between crewmembers so they can react to dislodged debris Post lookouts to warn of rolling debris. SHOUT out to warn others Look Up, Down and Around	
ALL	CAMP CRUD	 See the Medical Unit at the onset of signs/symptoms Take vitamins, drink lots of water and juice Eat balanced meals Get as much rest as possible Use hand sanitizers, and take precautions when using "common use" areas 	
ALL	FATIGUE & COMPLACENCY	 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident 	
ALL	HEAVY EQUIPMENT OPERATIONS	 NEVER work below heavy equipment Ensure communications are established with operators Ensure ground personnel have safety illumination, with light-sticks being the minimum Maintain a 50'-100' exclusion area around equipment In timber increase safety distance to 2 ½ times canopy height 	
ALL	LINE CONSTRUCTION	Conduct thorough briefing for all personnel involved (inside rear cover IRPG). Ensure LCES in place prior to engagement (iRPG p. 7) Establish adequate safety zones (IRPG p.7) and escape routes Use Downhill Line Checklist (IRPG p. 8) Use "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4) Utilize Risk Management Process (IRPG p.1)	
ALL	BEARS	 Pick up and remove all trash from fire line, return to camp & place in dumpsters. Do not store any food in tents, back of trucks or inside you vehicle. Don't domesticate the bears! 	
	Walker Fire	Operational Period: 0600-0600 September 16/17, 2019

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training

Be Alert - Keep Calm - Think Clearly - Act Decisively

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

	- 1	·			<u> </u>	
		RED / PRIORITY	1 Life or limb three	atening injury o	r iliness. Evac	uation need is
			ficulty breathing, bleeding	severely, 2° – 3° burns	more than 4 palm si	zes, heat stroke, disoriented.
Severity of Emergency / Tra	insport	YELLOW / PRIOR	liTY 2 Serious Injui	ry or lilness. Ev	acuation may l	be DELAYED if
Priority	İ	necessary. Ex: Significant trauma	a, unable to walk, 2° – 3° bi	urns not more than 1-3	R nalm sizes	
			TY 3 Minor Injury o ninor heat-related illness.	r Iliness. Non-E	mergency tran	sport

Walker Fire Personal Mail

It's up to you to pick up and send your personal mail. Below is information that will help you make it happen:

Walker ICP, Taylorsville

Postal Service mail and packages can be sent and received at the Taylorsville Post Office.

Address incoming mail and packages to:

(Your Name) General Delivery Taylorsville, CA 95983

The Taylorsville Post Office will also receive FedEx and UPS packages as a courtesy to you.

FedEx and UPS should be mailed to:

(Your Name) 4368 Main Street Taylorsville, CA 95983

The Post Office only mails US Postal Service packages.

Taylorsville Post Office Hours:
Monday - Friday 1000 - 1400
Saturday 1130 - 1230 Knock on the (closed) retail window where the clerk normally sells stamps.
Sunday - Closed

Four Corners Camp

Address incoming mail and packages to:

(Your Name) General Delivery Portola, CA 96122

No FexEx or UPS arrangements have been made in Portola. The Portola Post Office will not receive FedEx or UPS packages.

Portola Post Office hours: Monday - Friday 0800 - 1700 Saturday and Sunday - Closed

WALKER FIRE FINANCE - SEE EQUIPMENT TIME

E-267	DAVID PERRY
E-191	J3 CONTRACTING
E-362	SPENCE IND
E-264	RIDGE LOGGING
C-9	PACIFIC OASIS

^{****}PLEASE PUT YOUR RESOURCE ORDER # ON YOUR SHIFT TICKETS AND CREW TIME REPORTS

<u>DEMOB PROCESS FOR WALKER INCIDENT</u> <u>Starting Monday, September 16, 2019</u>

Pick up the Demob Checkout Form ICS-221 from Demob Unit.

Go to Finance and drop off SIGNED documents including todays travel (Shift Tickets, CTRS)

Look at your demob form and see which Unit boxes you need checked off.

Supply: return items you checked out

Communications: return any com equipment ie. Radios

Ground Support:

VIPR equipment does not need release inspections

Contract Crews Transportation Do need inspections

Cooperators (in State or out of State) whatever your agreement says.

Office of Emergency Services (OES) equipment need inspections

Overhead and Federal equipment need inspections

<u>Documentation:</u> Any documentation that needs to go in Doc Box (unit Logs etc)

<u>Time:</u> Go back to finance, review your invoice verifying times are correct, sign, copies will be provided to you.

<u>Demob</u>: This is your last stop! Return form and you are on your way!

Logistics will discuss Weed Wash

WALKER FIRE Human Resource Message September 16, 2019

ATTITUDE

There are a lot of choices that we don't get to make, like how tall we are, what color our eyes are, what assignment we're given and what time we have to report to that assignment.

The one thing each one of us do have a choice of and control over in is our attitude. We have choice every day regarding the attitude we will embrace for that day.

So make it your intent to assume a positive attitude even in adversity. It will allow you to deal with those adversities and to move past them quicker.

There are certain things we don't have control over but we do have control over our own attitude in all our interactions.

Adam Alvarez, HRSP - 707-373-8715 Julie Nelson HRSP (T)

Summary of Suppression Damage Repair Guidelines

Objectives - The objective of the fire suppression is to repair areas disturbed by fire suppression activities into a condition that does not negatively affect natural and cultural resources and will not create to excessive erosion on the landscape. Without compromising public and firefighter safety.

- Reduce the potential for soil erosion and sedimentation
- Reduce the visual impacts of fire line as well other suppression activities when feasible
- Repair roads and drainage structures to a functioning condition
- Protect natural and cultural resources from additional potential damage

Critical Guidelines

Sensitive Sites are marked with yellow and black or red and black striped flagging.

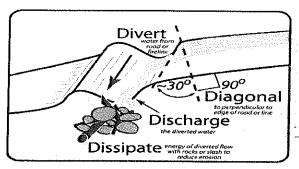

Back-hauled all trash and un-needed flagging. Please leave safety flagging in place.

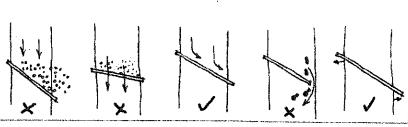

On Firelines, waterbars should be installed as described below, fire line covered with slash, and entrances blocked.

Dozer Line

Fire line Gradient	Distance Between
(% slope)	Waterbars (A) (feet)
0 to 10	No waterbars needed
10 to 20	100
21 to 40	75
41 to 60 (B)	50 (B)

- (A) These are guidelines and are not intended to restrict the implementation of more or less water bars if the need or lack of need is justified.
- (B) Firefighter safety should be taken into account; if slopes are too steep for safe implementation then waterbars should not be constructed, if sensitive resources are not present.
- DEPTH AND WIDTH: Waterbars need to be cut into surface, do not simply push up soil.
 - Waterbar depths for dozer lines should be at least 6 inches; total height from bottom of ditch to the top of the waterbar should average at least 18 inches and not exceed 24 inches.
 - Waterbar depths for **hand lines** should be at least 4 inches; total height from bottom of ditch to top of waterbar should average at least 8 inches and not exceed 12 inches.

Helispots, Safety Zone, Spike Camp, and Staging Areas: These fire suppression activity areas should be repaired to standards similar to fire line repair. Waterbars place where appropriate. Use cleared vegetative material, and slash for soil cover

Watercourses: Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.

- Do not remove large woody debris which was in the channel prior to the fire, bucked limbs and logs in watercourses from fire suppression activities should be removed from the watercourse.
- Where fire lines are constructed within 100 feet of intermittent and perennial streams, use certified weed free straw, wood strands, or slash to increase soil cover and prevent sediment from entering the stream channel.

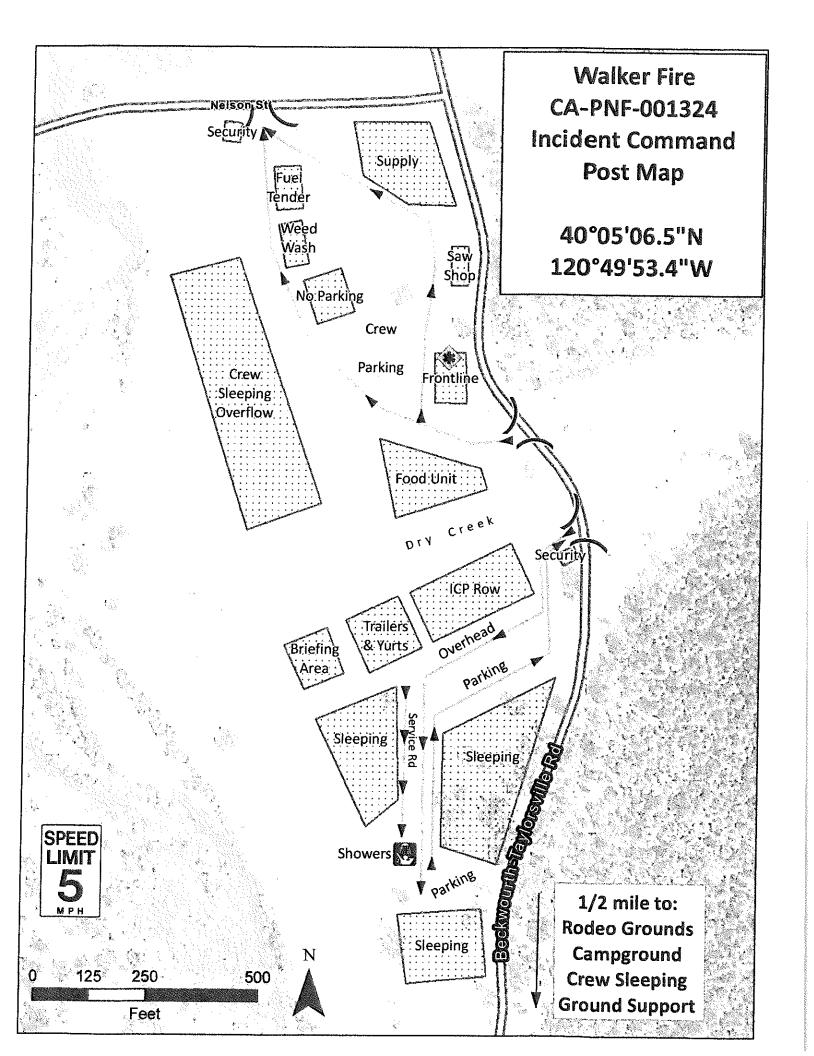

Summary of Suppression Damage Repair Guidelines

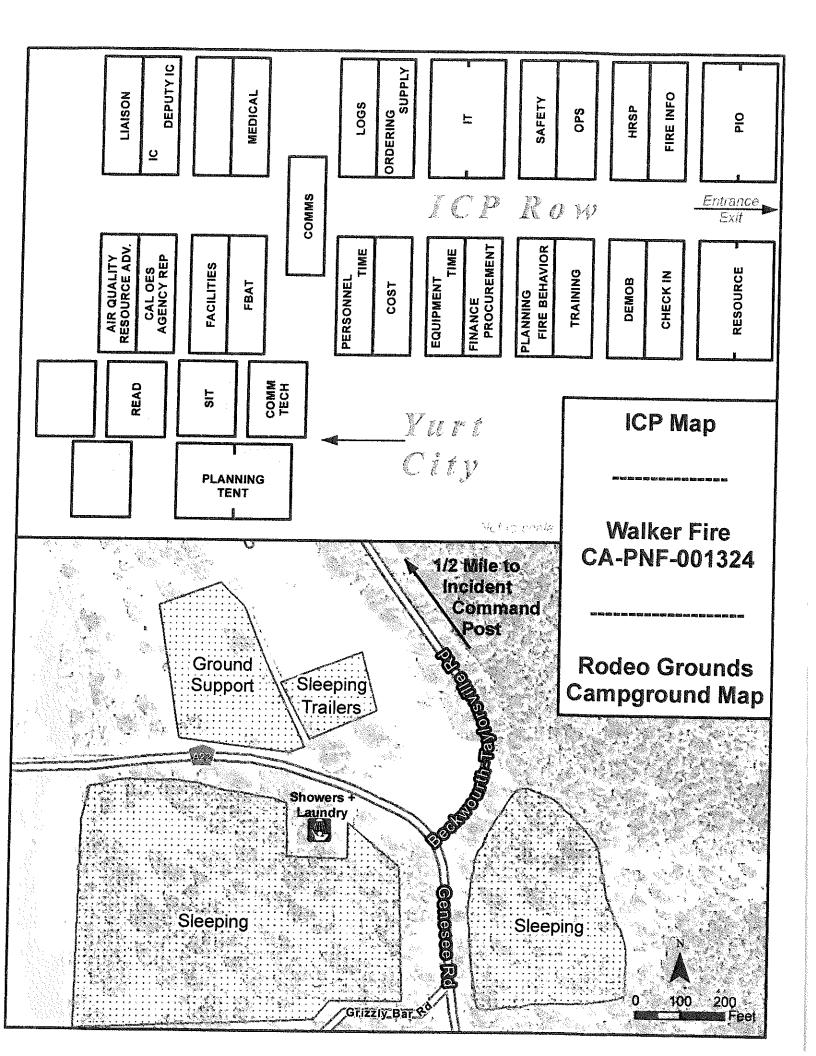

Water Drafting Sites: Water sources developed as a water draft site are to be restored to a condition resembling pre fire use. Remove any dams, dikes, or other impoundments that were created for fire suppression activities.

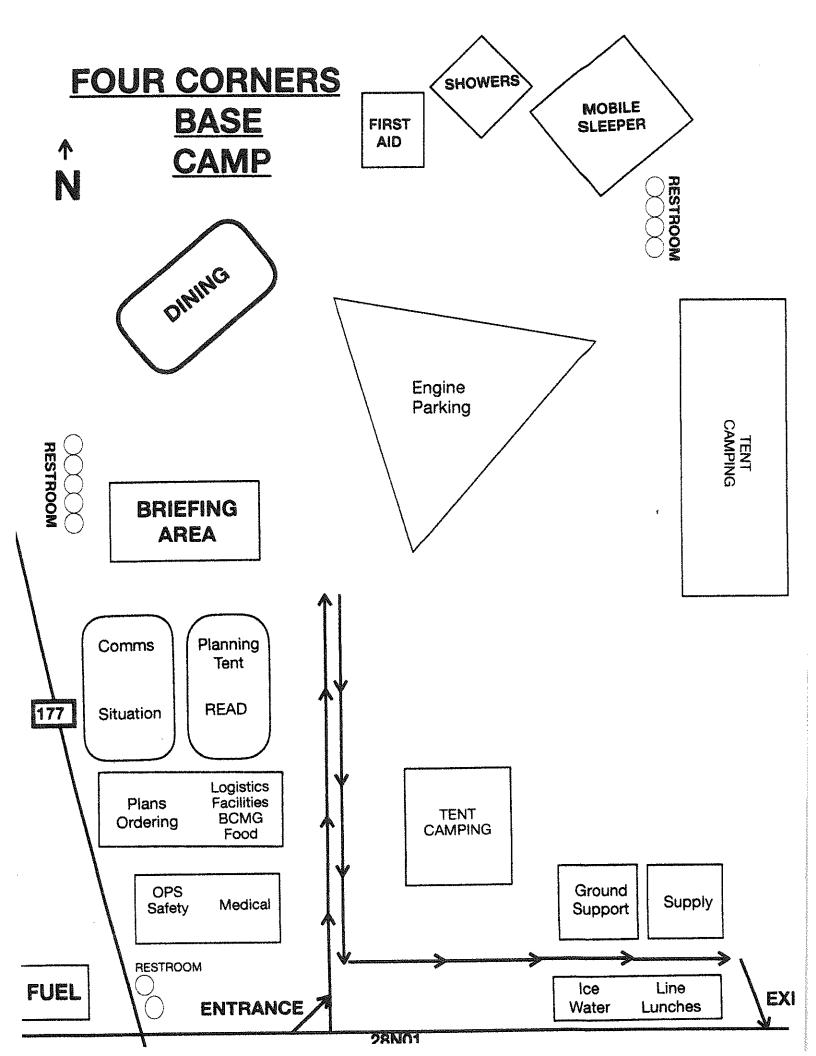

Concentrations of Slash: Concentrations of slash created by fire suppression activities along roadways, developed recreation areas, and among structures should be chipped and spread across the cleared area. Chip piles should not exceed 6 inches in depth. Where appropriate, concentrations of slash can be lopped and scattered, not to exceed 18 inches in height.

OTHER SUPPRESSION DAMAGE REPAIR NEEDS:

- Repair fences, gates, and cattle guards so that they are functional. These repairs must be related to suppression fire activities.
- Hazard trees should be felled if they pose a safety threat to the general public. Hazard trees to be felled will be identified and marked by a Division Group Supervisor or Felling Boss, using the R5 Hazard Tree Guide.
