INCIDENT Weather Forecast

FORECAST NO:

19

NAME OF FIRE: Walker Fire

PREDICTION FOR:

Wednesday Day SHIFT

UNIT: Plumas NF

SHIFT DATE:

Sept 18, 2019

SIGNED:

Mike Smith Mike Smith

TIME AND DATE

FORECAST ISSUED:

2100 Sept 17, 2019

Incident Meteorologist

WEATHER DISCUSSION: A Pacific low pressure system will be moving through the Pacific Northwest and northern California Wednesday and Wednesday night. Light showers will be a possibility off and on all day Wednesday with a chance of thunderstorms in the afternoon and evening hours. Only light amounts of rainfall are expected with the exception of a heavy shower under an isolated thunderstorm. A slight threat of showers continues into Thursday but any precipitation would be very light. Fair skies and drier conditions are expected on Friday as high pressure builds over the area.

WEATHER FORECAST:

WEATHER: Mostly cloudy with a chance of light showers in the morning. Showers likely in the afternoon with a slight chance of thunderstorms. Up to about \(\frac{1}{2} \) inch of rainfall expected except vicinity of thunderstorms.

TEMPERATURES: Maximum temperatures 53-58.

HUMIDITY: Min RH 50-60% before the rain starts.

20 FT WINDS:

RIDGETOP - Southwest 4-8 gusts to 15 mph through about 1100 then southwest to west 8-15 gusts to 20-25 mph. Gusty and erratic winds in vicinity to thunderstorms.

SLOPE/VALLEY - Downslope to downcanyon to 4 mph becoming upslope to upcanyon mainly southwest to west 3-8 gusts to 15 mph in the afternoon. Higher gusts upper west slopes.

HAINES INDEX: 3

STABILITY/INVERSION: Limited morning inversions breaking to unstable conditions.

Outlook for Wednesday night: Mostly cloudy with a chance of showers through the night and a slight threat of an isolated thunderstorm in the evening. Minimum temperatures 30-40. Maximum humidity recovery greater than 85%. Winds decreasing after about 2100 becoming northwest 1-5 mph on the ridges and downslope to downcanyon to 4 mph on the slopes.

Extended forecast for Thursday: Morning valley fog. Mostly cloudy in the morning becoming partly cloudy in the afternoon. A slight threat of a light shower. Maximum temperatures 54-61. Min RH 35-45%. Ridge winds north to northeast 5-15 mph. Slope winds upslope to upcanyon 3-8 gusts to 12 mph.

Extended forecast for Friday: Morning valley fog...otherwise mostly sunny skies. Maximum temperatures 63-70. Min RH 20-30%. Ridge winds north to northeast 5-15 mph. Slope winds upslope to upcanyon 3-8 gusts to 12 mph.

Sunrise Wednesday: 6:46

Sunset Wednesday: 7:06

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 17 TYPE OF FIRE: Wildfire

OPERATIONAL PERIOD: September 18, 2019, Day FIRE NAME: Walker

DATE ISSUED: September 17, 2019 TIME ISSUED: 2000

UNIT: Plumas NF SIGNED: Diondray Wiley FBAN (T)

INPUTS

WEATHER SUMMARY

Review Incident Weather Forecast

Weather:

Showers likely in the afternoon with a chance of thunderstorms

Day Temps:

53-58 degrees

Day RH:

50-60%

20 FOOT WINDS: Ridges: SW 4-8 gust 15mph through 1100 then SW to W 8-15 gust to 20-25 mph.

Slope/valley: Downslope 4 mph becoming upslope SW to W 3-8 gust to 15.

Higher gust upper gust west slope.

****Gusty and Erratic winds in the vicinity of thunderstorms ****

FIRE BEHAVIOR

INPUTS:

Fuels: Fuel moistures will increase with the upcoming rainstorm.

- Topography: Boulders and fire stressed trees can become dislodged and roll downhill bringing additional debris with them.
- **Weather:** Gusty wind and rainy conditions can adversely affect driving conditions.

FIRE BEHAVIOR: Fire behavior will be minimal throughout the fire perimeter and consist of smoldering in sheltered and large down and dead fuel. The potential for holdovers exists.

BRANCH I: Expect limited fire activity as fuel moistures have increased rendering them less receptive to burning. Sheltered fuels may smolder and creep. Assigned work objectives should be successful. Secondary fire affects (fire weakened trees. rolling material, poor road conditions) may interfere with assigned work objective. Mitigate hazards before engaging,

BRANCH III: Expect limited fire activity as fuel moistures have increased rendering them less receptive to burning Sheltered fuels may smolder and creep. Assigned work objectives should be successful. Secondary fire affects (fire weakened trees, rolling material, poor road conditions) may interfere with assigned work objective. Mitigate hazards before engaging.

BRANCH V: Expect limited fire activity as fuel moistures have increased rendering them less receptive to burning Sheltered fuels may smolder and creep. Assigned work objectives should be successful. Secondary fire affects (fire weakened trees, rolling material, poor road conditions) may interfere with assigned work objective. Mitigate hazards before engaging.

SUPPRESSION REPAIR GROUP: Secondary fire affects (fire weakened trees, rolling material, poor road conditions) may interfere with assigned work objective. Mitigate hazards before engaging.

AIR OPERATIONS

Aviation resources may not be available, have an alternate plan

SAFETY

ENSURE EVERYONE KNOWS THE PROPER PROCEDURE IN CASE OF AN EMERGENCY*

6. Control Operations/Work Assignments:

- · Utilize appropriate suppression tactics to keep fire within current containment lines.
- Balance the risk of exposure to hazards against the Mop Up standards for firefighter safety.
- · Hold and secure completed line.

- · Beware of mine locations.
- Begin suppression repair, following the Suppression Repair Plan. Consult with READ prior to any repair.
- · Back-haul excess equipment and trash.
- SOF2 Berry Hogge will be working in divisions A / C / E and Suppression Repair Group.
- · FBATS will be working throughout all divisions.
- · No repair in areas flagged with Red and Black striped flagging.
- READ, REAF, ARCH, and THSPs will be working in all divisions. They will contact DIVS when crossing divisional boundaries.

Walker Fire - Safety Message

INCIDENT: #CA-PNF-001324

DATE: 09/18/2019

TIME: 0600 - 1800

Keep Your Guard Up!

- Maintaining situational awareness takes effort!
- Continue planning to provide for safety then engage in your mission!
- Watch for complacency in others, and help them stay sharp.
- Traffic is increasing, drive defensively!
- Be methodical and meticulous in your tactics to get the job done safely!

Keep Your Head in the Game!

Driving

- When driving keep speed at or below the posted speed limit and your headlights on.
- Stay as far to the right of the road as is safely possible.
- Stay alert for oncoming traffic that may "cheat" into your lane.
- Schools back in session, watch for school busses and children at bus stops.
- Always fasten your seat belt before the vehicle is set into motion.
- Slow down, slow down, slow down.

There are three main types of distracted driving: Visual-taking your eyes off the road; Manual-taking your hands off the wheel; Cognitive-taking your mind away from the task at hand. Don't drive distracted!

CIRCLE OF SAFETY:

- Walk around the vehicle.
- Check the windshield, wipers, and wiper fluid level.
- Keep windows, mirrors, and lights clean to better see and be seen.
- Check headlights, turn signals, tail lights, reflectors and running lights.
- Adjust mirrors.
- Check front and back tires (including wheels and lug nuts).
- Under the hood, check all fluid levels and especially the Air Filter.

Team 4 Safety

INCIDENT RISK ANALYSIS (ICS 215a) 0600-1800

	HAZARDOUS ACTIONS / CONDITIONS	(ICS 215a) 0600-1800
BR/ DIV	TIAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES Use caution while driving on all incident roads. Non fire personnel speeds in the area
ALL	DRIVING	are often faster than we normally drive Dirt roads may be slippery when wet. Watch out for possible stream debris from the rain Watch out for wildlife on all roads, especially during the dawn and dusk hours Drive defensively! Expect the unexpected around every curve Drive with headlights on; use chock blocks, keep windshields clean; use backers Watch for other vehicles, debris, and wildlife on the roads Use caution on area roads. The roads are very narrow with steep drop-offs
ALL	HAZARD / DANGER TREES	 Refer to Hazard Tree Safety Guidelines (IRPG p.22-23) Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled Be especially alert around snags and green trees during wind events.
ALL	STEEP TERRAIN & ROLLING MATERIAL	 Avoid working below crews and equipment Concentrate on your footing placement; take your time Ensure adequate spacing between crewmembers so they can react to dislodged debris Post lookouts to warn of rolling debris. SHOUT out to warn others Look Up, Down and Around
ALL	MOP UP OPERATIONS	 Evaluate areas for hazard trees and locate stump holes for avoidance Monitor fatigue, shorten shifts to increase rest where appropriate Provide motivation to workers to maintain situational awareness and avoid complacency Evaluate mop up distances against what is safe and necessary Review and follow "Look Up, Look Down, Look Around" Balance the risk of exposure to hazards against the Mop Up objective
ALL	HEAVY EQUIPMENT OPERATIONS	 NEVER work below heavy equipment Ensure communications are established with operators Ensure ground personnel have safety illumination, with light-sticks being the minimum Maintain a 50'-100' exclusion area around equipment In timber increase safety distance to 2 ½ times canopy height
ALL	DEMOB	 Ensure vehicle is ready for the trip home, lights, wipers etc. Obtain adequate rest prior to departure. Travel between 0600 and 2200 hours and don't exceed 10 hours of driving per single driver. Take adequate rests during the trip home. Advise your Communication Center at the completion of the travel.
ALL	CAMP CRUD	 See the Medical Unit at the onset of signs/symptoms Take vitamins, drink lots of water and juice Eat balanced meals Get as much rest as possible Use hand sanitizers, and take precautions when using "common use" areas
ALL	FATIGUE & COMPLACENCY	 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Recognize the symptoms of fatigue and take action as necessary to provide rest and recovery. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	COMMUNICATIONS	Share Situational Awareness (hazards, changes, etc.) to those who also have a need Radio Communications may be poor in some areas: use human repeaters as needed Ensure all personnel are familiar with the incident and IA communications plans Make sure all resources have radios cloned appropriately Ensure that non-agency resources understand radio use and procedures
ALL	WEATHER	 "Keep informed on fire weather conditions and forecasts." Anticipate increasing and gusty winds. Expect increased fire behavior, including spotting. Communicate any increase in wind speed and direction. Be especially alert around snags during wind events.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Walker Fire Personal Mail

It's up to you to pick up and send your personal mail. Below is information that will help you make it happen:

Walker ICP, Taylorsville

Postal Service mail and packages can be sent and received at the Taylorsville Post Office.

Address incoming mail and packages to:

(Your Name) General Delivery Taylorsville, CA 95983

The Taylorsville Post Office will also receive FedEx and UPS packages as a courtesy to you.

FedEx and UPS should be mailed to:

(Your Name) 4368 Main Street Taylorsville, CA 95983

The Post Office only mails US Postal Service packages.

Taylorsville Post Office Hours:

Monday - Friday 1000 - 1400

Saturday 1130 - 1230 Knock on the (closed) retail window where the clerk normally sells stamps.

Sunday - Closed

Four Corners Camp

Address incoming mail and packages to:

(Your Name) General Delivery Portola, CA 96122

No FexEx or UPS arrangements have been made in Portola. The Portola Post Office will not receive FedEx or UPS packages.

Portola Post Office hours: Monday - Friday 0800 - 1700 Saturday and Sunday - Closed

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.

The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

TRAINING SPECIALIST MESSAGE

Beat the Rush!!

The training shop will close Thursday, 9-19-19 at 2000 hours!

TRAINEES:

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob. When as much work (as possible) has been completed in your PTB for this incident – Conduct the "close-out" process with the TNSP to save you time at DMOB.

Bring the following to the Training Sprecialist:

- <u>A completed and signed ICS 225 or 226 Performance</u> Evaluation
 - A completed Exit Interview Form
 - Your filled out position task book

Forms are available in the green Training Trailer

Joe Labak - TNSP 951-202-1627

Summary of Suppression Damage Repair Guidelines

<u>Objectives</u> - The objective of the fire suppression is to repair areas disturbed by fire suppression activities into a condition that does not negatively affect natural and cultural resources and will not create to excessive erosion on the landscape. Without compromising public and firefighter safety.

- Reduce the potential for soil erosion and sedimentation
- Reduce the visual impacts of fire line as well other suppression activities when feasible
- Repair roads and drainage structures to a functioning condition
- Protect natural and cultural resources from additional potential damage

Critical Guidelines

Sensitive Sites are marked with yellow and black or red and black striped flagging.

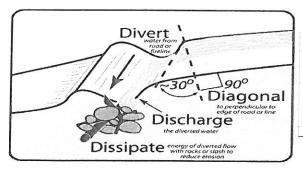

Back-hauled all trash and un-needed flagging. Please leave safety flagging in place.

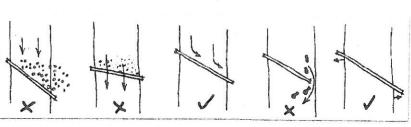

On Firelines, waterbars should be installed as described below, fire line covered with slash, and entrances blocked.

Dozer Line

Fire line Gradient (% slope)	Distance Between Waterbars (A) (feet)
0 to 10	No waterbars needed
10 to 20	100
21 to 40	75
41 to 60 (B)	50 (B)

- (A) These are guidelines and are not intended to restrict the implementation of more or less water bars if the need or lack of need is justified.
- (B) Firefighter safety should be taken into account; if slopes are too steep for safe implementation then waterbars should not be constructed, if sensitive resources are not present.
- DEPTH AND WIDTH: Waterbars need to be cut into surface, do not simply push up soil.
 - Waterbar depths for **dozer lines** should be at least 6 inches; total height from bottom of ditch to the top of the waterbar should average at least 18 inches and not exceed 24 inches.
 - Waterbar depths for **hand lines** should be at least 4 inches; total height from bottom of ditch to top of waterbar should average at least 8 inches and not exceed 12 inches.

Helispots, Safety Zone, Spike Camp, and Staging Areas: These fire suppression activity areas should be repaired to standards similar to fire line repair. Waterbars place where appropriate. Use cleared vegetative material, and slash for soil cover

Watercourses: Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.

- Do not remove large woody debris which was in the channel prior to the fire, bucked limbs and logs in watercourses from fire suppression activities should be removed from the watercourse.
- Where fire lines are constructed within 100 feet of intermittent and perennial streams, use certified weed free straw, wood strands, or slash to increase soil cover and prevent sediment from entering the stream channel.

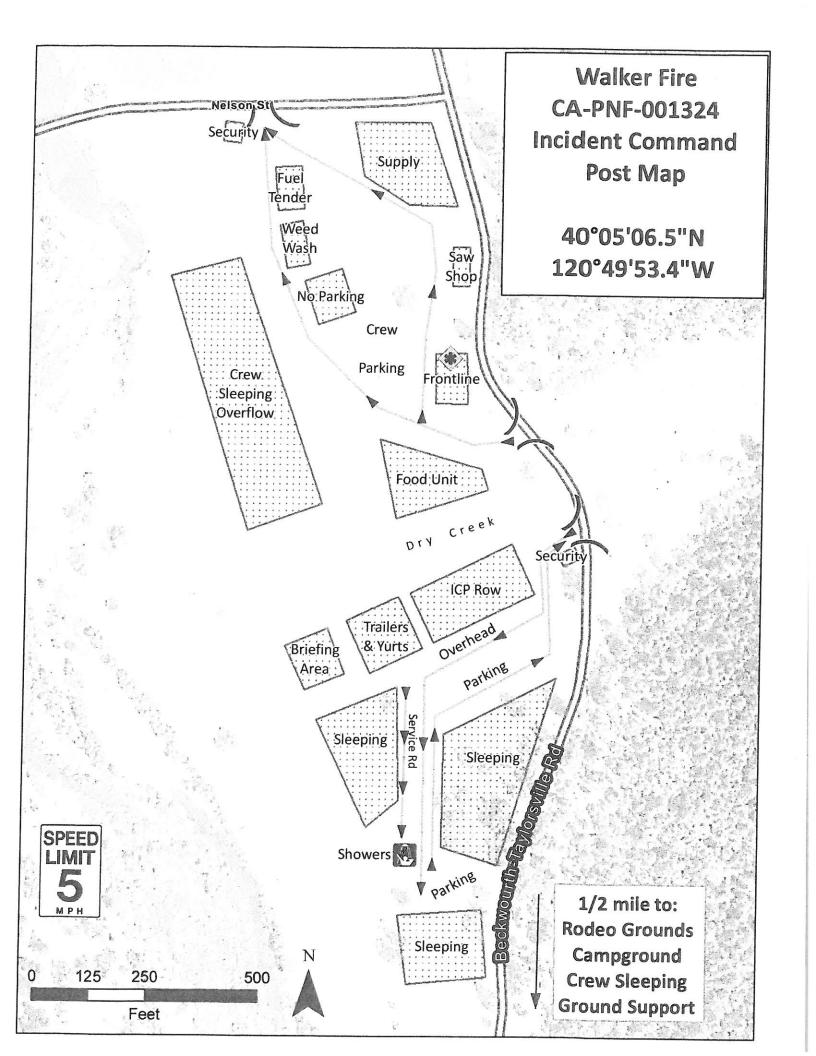

Summary of Suppression Damage Repair Guidelines

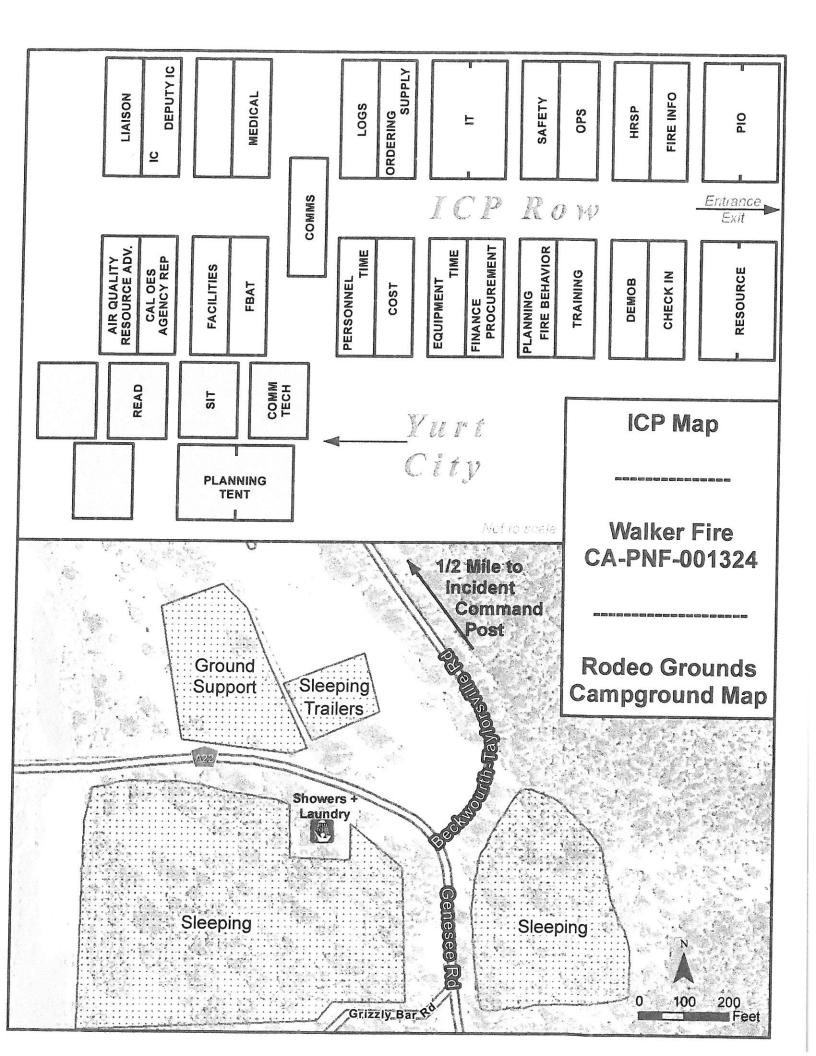

Water Drafting Sites: Water sources developed as a water draft site are to be restored to a condition resembling pre fire use. Remove any dams, dikes, or other impoundments that were created for fire suppression activities.

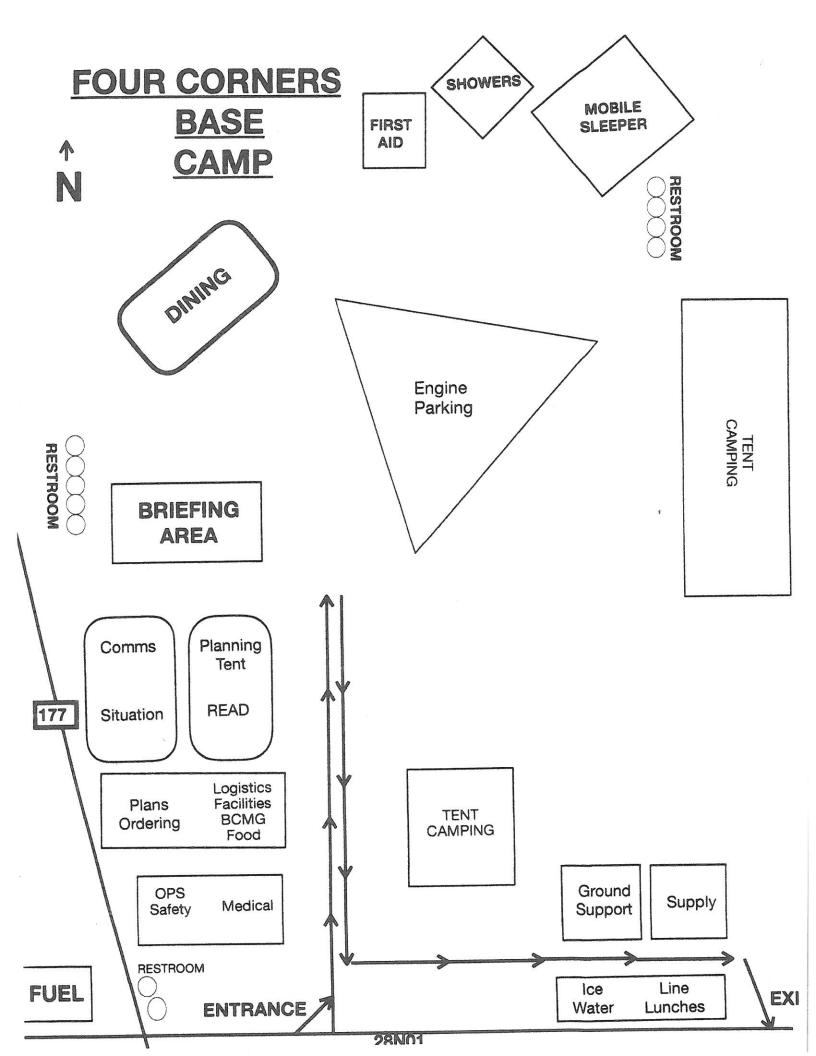

Concentrations of Slash: Concentrations of slash created by fire suppression activities along roadways, developed recreation areas, and among structures should be chipped and spread across the cleared area. Chip piles should not exceed 6 inches in depth. Where appropriate, concentrations of slash can be lopped and scattered, not to exceed 18 inches in height.

OTHER SUPPRESSION DAMAGE REPAIR NEEDS:

- Repair fences, gates, and cattle guards so that they are functional. These repairs must be related to suppression fire activities.
- Hazard trees should be felled if they pose a safety threat to the general public. Hazard trees to be felled will be identified and marked by a Division Group Supervisor or Felling Boss, using the R5 Hazard Tree Guide.
