

Hough Complex

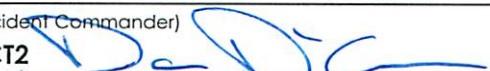

CA-PNF- 001324

(0511) P5HV99

AUGUST 23, 2013

Night Operational Period

1800 - 0600

INCIDENT OBJECTIVES	1. Incident Name Hough Complex	2. Date Prepared 8/23/2013	3. Time Prepared 1400															
4. Operational Period August 23, 2013 Night Operations: 1800 – 0600																		
5. General Control Objectives for the Incident (include alternatives) Management Objectives <ol style="list-style-type: none"> 1. Provide for firefighter and public safety as the highest priority. 2. Provide and coordinate protection of structures, timber lands, and infrastructure on public and private lands within the complex. 3. Provide timely information, notification and communications regarding fire activity and effects on air quality. 4. Minimize effects of fire and fire suppression activities on sensitive resources through effective use of resource advisors and close collaboration with cooperators and administering agencies. 5. Maintain a high level of collaboration with local communities, neighboring and cooperating agencies. 6. Minimize disruption to local economies with local communities, neighboring and cooperating agencies. 7. Provide IA response and resources for new starts through the Central Coast Incident Commander. Control Objectives Suppress fires within the complex in the smallest area that can be safely accomplished with available resources.																		
6. Weather Forecast for Period See Attached Weather Forecast																		
7. General Safety Message See Attached Safety Message

INCIDENT Weather Forecast

FORECAST NO: 5

NAME OF FIRE: Hough Complex

PREDICTION FOR: Friday Night SHIFT

UNIT: Hough RD, Plumas NF

SHIFT DATE: Aug 23/24, 2013

SIGNED: Mike Smith

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 1200 Aug 23, 2013

WEATHER DISCUSSION: Stable conditions will continue over the region Friday night as stable southwest flow aloft remains over the region. With the stable conditions, inversions will develop quickly again this evening continuing through the night. This will bring another night of cool temperatures but only moderate humidity recovery. There may be a slight increase in ridgetop winds but the inversions will likely keep these winds from reaching the lower elevations. An upper trough dropping into the eastern Pacific will move a weak frontal system towards the norcal coast late Saturday and Sunday. The main impact for the Hough complex will be some increased southwest winds over the ridges and upper slopes. The strongest winds are likely to occur Sunday. The area will also see a little cooling with slightly higher humidity especially on Sunday and a few high clouds.

*** Increased ridge winds from Saturday afternoon through Sunday afternoon ***

WEATHER FORECAST:

WEATHER: Fair skies with smoke settling into the valleys by early evening.

TEMPERATURES: Minimum temperatures 45 lower elevations to 50 upper slopes.

HUMIDITY: Maximum humidity recovery 70-75% lower elevations to around 58% upper slopes.

20 FT WINDS:

RIDGETOP – Southwest winds up to 5 mph with occasional gusts to 10 mph through the early evening decreasing after 2100 to variable to 4 mph.

SLOPE/VALLEY – Upslope to upcanyon 3-8 mph becoming light downslope after about 2100.

STABILITY/INVERSION: Moderate valley inversions settling in quickly after sunset. Moderately stable aloft.

OUTLOOK FOR (Saturday): Mostly sunny. Maximum temperatures 83 to 90. Minimum humidity 18 to 25%. Ridge winds increasing after about 1000 to southwest 8 to 15 mph. Occasional gusts to 20 mph in the late afternoon. Ridge gusts decreasing after sunset. For the slopes...Winds becoming upslope to upcanyon 3-8 mph after about 1000 except upper south slopes winds southwest 4 to 8 gusts to 12 mph.

OUTLOOK FOR Saturday Night: Fair skies. Minimum temperatures 45-50. Max RH recovery 60 to 75%. Ridge winds southwest to 5 mph with occasional gusts to 10 mph. Slope winds downslope to downcanyon to 5 mph.

Extended forecast for Sunday: Mostly sunny with some scattered clouds. Maximum temperatures 83 to 90. Minimum humidity 20-26%. Ridge winds increasing after about 1000 to southwest 10-15 mph with gusts up to 20 mph. Some gusts up to 25 mph in the late afternoon. Slope winds mainly upslope to upcanyon 3-8 mph but variable with occasional southwest gusts to 15 mph. For upper south slopes winds southwest 5 to 10 mph with occasional gusts to 15 mph in the afternoon.

EXTRA INFORMATION: Sunrise 6:23 Sunset 7:48

INCIDENT WEATHER FORECAST

NAME OF FIRE: Hough Canyon

FORECAST FOR: 08/28/2018

UNIT: Hough Canyon Plumas NF

PREDICTION FOR: Early Night Shift

SIGNED: Mike Smith

SHIFT DATE: Aug 28/2018

Incident Meteorologist

TIME AND DATE
FORECAST ISSUED: 12:00 Aug 28, 2018

WEATHER SITUATION: Stable conditions will continue over the region. Early night as stable conditions will remain over the region. With the stable conditions, inversions will develop quickly after dawn and continue through the night. This will bring another night of cool temperatures but only moderate humidity recovery. There may be a slight increase in ridge winds in the afternoon. Inversions will move a ways from reaching the lower elevations. An upper level ridge will bring the best of the day. The ridge will be somewhat southwest winds over the ridge and upper slopes. The strongest winds are likely to come Sunday. The area will see a little fogging with slightly higher humidity especially on Sunday and a few high clouds.

Increased ridge winds from Saturday afternoon through Sunday afternoon.

WEATHER FORECAST:

WEATHER: Fog rises with smoke settling into the valleys by early evening.
TEMPERATURE: Minimum temperatures 45-50 lower elevations to 50 upper slopes.
WINDS: Maximum in ridge recovery 10-15 mph lower elevations to around 20 mph upper slopes.
 20 FT WINDS:

DISCUSSION: Southwest winds up to 15 mph with occasional gusts to 20 mph through the evening decreasing to 10-15 mph by 4 pm.

ADDITIONAL: Fog rises to upper slopes 3-5 mph becoming light downpours after about 10 pm.

STABILITY: Moderate to heavy inversions settling in quickly after sunset. Moderate to heavy stable conditions.

OUTLOOK FOR SUNDAY: Mostly sunny. Maximum temperatures 55 to 60. Minimum humidity 45 to 50. Ridge winds increasing to about 1000 to southwest 5 to 15 mph. Occasional gusts to 20 mph in the afternoon. Fog gradually clearing after sunset. For the slopes. Winds becoming light to disappear after noon after about 1000 except upper south slopes winds southwest 5 to 8 gusts to 12 mph.

OUTLOOK FOR SATURDAY NIGHT: Fog rises. Minimum ten per cent 45-50. Max RH recovery 60 to 70%. Ridge winds southwest to 8 mph with occasional gusts to 10 mph. Slope winds downpours to downpours to 5 mph.

EXTENDED OUTLOOK FOR SUNDAY: Mostly sunny with some scattered clouds. Minimum temperatures 55 to 60. Minimum humidity 45-50%. Ridge winds increasing after about 1000 to southwest 10-15 mph with gusts up to 20 mph. Some gusts up to 25 mph in the late afternoon. Slope winds mainly light to moderate 5 to 10 mph with occasional southwest gusts to 15 mph. For upper south slopes winds southwest 5 to 10 mph with occasional gusts to 15 mph in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 8	TYPE OF FIRE: Wildfire
FIRE NAME: Hough Complex	OPERATIONAL PERIOD: Night Shift 8/23/2013
DATE ISSUED: August 23, 2013	TIME ISSUED: 1100
UNIT: Plumas National Forest	SIGNED: Stewart Turner FBAN 

INPUTS

WEATHER SUMMARY:

Fair skies with smoke settling into the valleys by early evening.

Minimum Temp 45°-50°, Maximum RH 70-75%, winds slope/valley downslope light after about 2100, ridgetop southwest 5 mph with occasional gusts to 10 mph through the early evening decreasing after 2100 to variable to 4 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire behavior will be low to moderate. Most of the fire will be in the heavy fuels, stumps, logs and snags. Rollouts and falling snags will continue to be a problem contributing to the spread of the fire. Local threshold for fire weather: Winds greater than 6 mph, humidity less than 20%, temperature greater than 80°, and 10 hour fuel moisture less than 5%. **The Probability of Ignition will be 76% at the beginning of shift to 13% by morning. The fine dead fuel moisture will be 4% to 14%. Currently the dead fuel moistures are low with the 1000 hour fuels around 8%.**

SPECIFIC:

Ridge: Stump holes and larger fuels will continue to burn. Rollouts will still threaten the line.

Evens: Rollouts will continue to threaten the line.

Initial Attack: Most of the new starts have been single trees or logs with some surface fire. With the dry fuel bed expect the fire behavior to be more active than seen in the past. Active fire behavior can be expected.

The larger fuels will hold fire through the higher humidity periods. New strikes on dry large fuels can hold for several days.

AIR OPERATIONS: No expected limitations to air operations during the beginning of the shift.

SAFETY

Common Denominators of fire behavior on tragedy fires:

- *Most incidents happen on the smaller fires or on isolated portions of larger fires.*
- *Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in "flare-ups" or "extreme fire behavior." In some cases, tragedies occur in the mop-up stage.*
- *Flare-ups generally occur in deceptively light fuels, such as grass and light brush.*
- *Fires run uphill surprisingly fast in chimneys, gullies, and on steep slopes.*
- *Some suppression tools, such as helicopters or airtankers, can adversely affect fire behavior. The blasts of air from low flying helicopters and airtankers have been known to cause flare-ups.*

Hough Complex – Safety Message

INCIDENT: # CA-PNF-001324

DATE: 08-23-13

TIME: 1800 – 0600 NIGHT

Major Hazards and Risks:

Environment

- Local temperatures can fluctuate 40 to 50 degrees in a relatively short period
- Rugged steep terrain/ Beware! Rolling rocks and other materials
- Watch for snags on the line, roads and in camp. Mark them and make them known. Look up and live!
- MINES –There are vertical and horizontal mines, unmarked, on this fire.
- Natural asbestos can get airborne when broken up by dozers (Serpentine rock, looks wet and glossy)

Human Factors

- Driving - Keep speeds down, seatbelts on and your headlights on. People on road in front of base camp
- Backing - Use spotters when backing large vehicles in tight areas/give assistance if you see someone needs it
- Fatigue - Possible long travel distances for initial attack and the growing fatigue factor for all personnel
- Remember to wash hands and remove dirty fire clothing before entering food area/cover sneeze with sleeves

Animals, Insects and Other Pests

- Ticks (Lyme Disease), Bees (aggressive), Mice (Hanta Virus), Rattle Snakes, Mountain Lions and Bears
- Numerous Deer on public roads during early morning and early evenings

Fire Order of the Day: Base all actions on current and expected behavior of the fire.

The original ten Standard Firefighting Orders were developed in 1957 by a task force commissioned by the USDA-Forest Service Chief Richard E. McArdle. The task force reviewed the records of 16 tragedy fires that occurred from 1937 to 1956. The Standard Firefighting Orders were based in part on the successful "General Orders" used by the United States Armed Forces. The Standard Firefighting Orders are organized in a deliberate and sequential way to be implemented systematically and applied to all fire situations. Shortly after the Standard Firefighting Orders were incorporated into firefighter training, the 18 Situations That Shout Watch Out were developed. These 18 situations are more specific and cautionary than the Standard Fire Orders and described situations that expand the 10 points of the Fire Orders. If firefighters follow the Standard Firefighting Orders and are alerted to the 18 Watch Out Situations, much of the risk of firefighting can be reduced.

This could be you!

The 2&7 Tool:

TWO ERRORS:

- 1-Underestimating hazards and using inadequate safety measures (i.e., inadequate LCES)
- 2-Failing to notice changing conditions and adjust tactics accordingly

SEVEN BARRIERS:

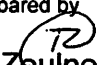

- 1-Inexperience
- 2-Getting too comfortable (complacency, Inattention, (false sense of security, autopilot)
- 3-Distracted from primary duty
- 4-Priorities out of order
- 5-Social influences (groupthink, peer pressure)
- 6-Stress reaction
- 7-Physical impairment (from fatigue, carbon monoxide, heat stress, medication, etc.)

HOUGH COMPLEX INCIDENT ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Re-clone radios if needed, check radio before going to line
ALL	HAZARD TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines IRPG p.20 • Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. • Be especially alert around snags during wind events. • Check for hazard trees & "widow-makers" • Night time complicates hazard tree identification
ALL	MINES	<ul style="list-style-type: none"> • Stay on assignment, do not wander off • Focus on the terrain while walking • Scan the area with your headlamp prior to walking in a direction • Stop often and look for irregularities in the terrain, - ex. Collapses • GPS spot, contact division, flag it off and ensure others notified
ALL	HAZARDOUS WEATHER	<ul style="list-style-type: none"> • Watch for changes in wind direction and intensity
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift. • Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate. • Adhere to 10 Std Fire Orders, mitigate 18 situations that shout... • Maintain Situational Awareness. LCES in place always.
ALL	FATIGUE	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor incoming resources for level of fatigue. • Be alert for signs of heat stress in yourself and others. • Drinking water before, during and after shifts, 3 to 1 water to Gatorade
ALL	DRIVING	<ul style="list-style-type: none"> • Watch for logging trucks on local roads. • Keep speeds down, don't drive distracted • Watch out for people crossing street by base camp...stay alert!
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Ensure LCES in place prior to engagement IRPG p. 6. • Establish adequate safety zones IRPG p.7. • Use Downhill Line Checklist IRPG p. 8. • Follow "Look Up, Look Down, Look Around" procedures IRPG p. 2-3 • Utilize Risk Management Process IRPG p.1.
ALL	INITIAL ATTACK	<ul style="list-style-type: none"> • Do the Risk Management process prior to any engagement • LCES will be in place during any operation. • This country requires you to LOOK UP, LOOK DOWN AND AROUND. • The weather can change instantly, always be observant. • Base all actions on current and expected fire behavior

Fire Information

Just a friendly reminder, when you are out in the community and are approached by the public, please answer only questions that you are certain of. If uncertain of a question asked, please refer the community to the Public Information Officers in the ICP.

Also, please advise the community of the following information resources:

InciWeb – www.inciweb.org

Twitter – Central Coast IMT7

Thanks for your help,

CCIIMT7 PIOs

Logistics Message

Weed Washing Requirements

Please go through weed wash prior to first assignment and when Demobing.

DIVS Y & W must go through weed wash before you go to another division.

Water Sources

Use only approved water source sites.

Please use caution opening and closing hydrant valves. Water hammer can seriously damage water systems. Water hammer occurs when a valve is opened or closed too fast and the sudden change in water pressure hammers the system. Your cooperation in avoiding damage to the water systems is greatly appreciated

Incident Trainee / Trainer Data Worksheet

PLEASE PRINT LEGIBLY!

A: Trainee Data

Trainee Name: _____

Trainee Position: _____ Order Number (E, O, C, A) ____--_____

State Abr. ____ + 3 Letter Designator _____ Agency Type: Federal State Local

USFS BLM BIA FWS DOD NWS NPS Date Assigned: ____--____--_____

Ordered as a Trainee for the incident? Yes No Ordered as a PRIORITY trainee? Yes No

**Person's name and title that is responsible for tracking your qualifications:
(Where do you want the packet mailed to?)**

Name: _____ Title: _____ Home Unit: _____

Agency Address: _____ City: _____

State: _____ Zip: _____ Phone Number: () ____--_____
