Day Shift 0600 - 2000

<b>INCIDENT OBJECTIVES</b>	1. Incident Name <b>Corral Complex</b>	2. Date Prepared <b>8-27-13</b>	3. Time Prepared <b>1600</b>
----------------------------	---	------------------------------------	---------------------------------

4. Operational Period

**8-28-13      0600 to 2000**

5. General Control Objectives for the Incident (include alternatives)

**Incident Objectives:**

- Provide for firefighter and public safety in all incident operations.
- Protect property and infrastructure. Control fire closest to communities.
- Keep stakeholders, the public, and cooperators informed of fire status.
- Keep costs commensurate with identified values at risk.
- Protect cultural and natural resources.
- Protect wilderness values and utilize MIST in the Trinity Alps Wilderness.
- Protect the Hoopa Valley Indian Reservation Community at Risk as listed in the Federal Register.
- Protect Communities at Risk including Willow Creek, Salyer, Hawkins Bar, Burnt Ranch, Trinity Village and Denny.
- Protect the De-No-To Trail as listed in the Federal Register of National Historic Places.

**Control Objectives:**

- Keep the fire:
  - North of Hwy 299
  - East of the Hwy 96
  - South of the Siskiyou / Trinity County Line
  - West of the New River

### INCIDENT Weather Forecast

**FORECAST NO:** 13  
**PREDICTION FOR:** Wednesday  
**SHIFT DATE:** 08/28/2013 0600-2000  
**TIME AND DATE**  
**FORECAST ISSUED:** 08/27/2013 1900

**NAME OF FIRE:** Corral Complex  
**SHIFT** Day **UNIT:** CA-SRF  
**SIGNED:** Ryan Leach (T)/Jim Wallmann  
*Incident Meteorologist*

**WEATHER DISCUSSION:** Warming and drying trend continues as the marine layer erodes and becomes shallower each day. On the top of the fire, or above 4,000 feet, expect falling humidity overnight with a minimum around 0700. Watch out for early downslope winds, around 1600, in the Quinby drainage in the vicinity of DIV R. Under the closed canopy in Quinby creek humidity will likely not fall below 60%, though humidity on the slopes above may drop to 35 to 40% in the afternoon.

#### WEATHER FORECAST (TODAY):

**WEATHER:** Areas of smoke. Mostly clear.

**HAINES INDEX:** 3

**LAL:** 1

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #14	TYPE OF FIRE: <del>Wildfire</del>
FIRE NAME: CORRAL COMPLEX	OPERATIONAL PERIOD: August 28, 2013 0600-0600
DATE ISSUED: August 27, 2013	TIME ISSUED: 2000 hrs
UNIT: Six Rivers NF	SIGNED:  Shelly Crook FBAN

## INPUTS

### WEATHER SUMMARY

(Refer to Weather Forecast for details) **DAY:** Mostly clear. Max Temp: 78-82°. Min RH: 26-30%.  
Slope/Valley – Upslope 3-4 mph, Ridges – West/Northwest 5-7 mph with gusts to 10 mph.  
**NIGHT:** Mostly clear. Min Temp: 50-54° Max RH: 40-70% Winds: NE 5-7 mph ridges, gusts to 14 mph.

### FUELS

Fire is burning within the boundaries of the Megram Fire (1999) and Back Bone Fire (2009). Fuels consist of abundant heavy dead and down, snags and shrubs (Ceanothus/Snow Brush). Mature timber on the west flank. Live FMC lower on S/SE/W aspects. Live and dead fuel moistures noticeably higher in the drainages below 4000ft elevation. Minimum fine fuel moisture: 4-10%, 1000 hour FMC: 8-10%, Live fuel moisture: 120%.

## OUTPUTS - FIRE BEHAVIOR

➤ **Forecasted Indices (Big Hill RAWs) ERC: 52 (Down 1) BI: 46 (Down 9)**

**Thresholds for Active Fire Behavior in the Corral Complex area:**

**20ft Winds > 7 mph. RH < 31%. Temperature > 82°. 1000hr FMC < 13%. BI > 50. ERC > 47.**

**GENERAL:** Yesterdays fire spread was fairly low with the minimum RH remaining above 40% across most of the fire area. Today's fire behavior potential will be slightly higher as a result of the lower relative humidity. Potential for low to moderate spread rates and fire behavior across the higher elevations and east of the crest. Fire behavior at the lower elevations and west of the crest will be generally low. Night time fire behavior will be higher than daytime as the marine air compresses, especially above 4000 ft elevation.

**DIV F & H (W Flank, Tish Tang Ridge area)** – Expect the fire to spread rather slow to the west and back off the ridge to the north and south of the South Fork Tish Tang Ck. Roll out may result in short up slope runs.

**DIV L (NW Flank, Tish Tang Point area)** – Expect low spread to the NW towards and around Tish Tang Point. The superhuman suppression efforts on the spot fire in the bottom of Tish Tang Ck should keep that fire in check. Slight chance of the fire making a rapid upslope run towards the Knob road/DP-2 area, more likely during the night if the marine layer compresses below 3500 ft resulting in lower RH's.

**DIV M & P (NE Flank, Trinity GS/H-2 area)** – As a result of the outstanding suppression efforts the fire perimeter has held in place for a few days, infinitesimal spread potential today. Spot fire east of the crest is not showing IR heat, but don't bet on that, keep a close eye for this area for signs of heat in the heavies. Potential for upslope runs to the ridge top.

**DIV R & W (E/SE Flank, South of Grizzly Camp)** – The recent direct suppression efforts have rocked. Fire spread potential is fairly low but until the heavy fuels finish burning, it remains. The greatest fire activity will likely occur at night when the RH drop below 40% and the winds get gusty.

**DIV X & A (Horse Linto Ck area)** – Fire is established in Horse Linto Ck. There is a potential of the fire making a rapid run upslope to the ridge top to the south, but only if the inversion breaks and relative humidity drops below 40%. Pay very close attention to the fire south of Horse Linto Creek. No IR heat has been showing, but in those heavy fuels, heat will may come back to life with the lower RH.

**Maximum Fire Behavior (head fire upslope): Rate of Spread: 4-6 chains/hour (6 ft/min),  
Flame Length: 2-4 ft. Probability of Ignition: 30%. Maximum spotting distance of 500 feet.**

## AIR OPERATIONS

Potential for a mild inversion in the morning breaking around 1100. Plan accordingly.

## SAFETY

- You have all done a great job but it's still too early to pat yourself on the back. Don't let your guard down.

7. Control Operations

Prep control line for firing operations. Utilize water handling resources to keep tanks and pumpkins full.

8. Special Instructions

All resources report to the wash station upon arrival and demobilization.  
 BEARS- Don't leave your food unattended at any time of day to reduce availability to bears. Store your food at least 100 feet away from your sleeping area. The food stash should be downwind of your site, where possible. Keep vehicle windows closed when storing food inside.

**OPERATIONAL PERIOD:** 08/28/2013

**TOPICS:**

**DRIVING, SNAGS, DRUG CULTIVATION, WORKING AROUND HEAVY EQUIPMENT, FATIGUE**

**NARRATIVE:**

**DRIVING:** Driving continues to be a major hazard on this incident. Expect the unexpected. Defensive driving is essential. Reducing speed is the best mitigation for most driving hazards encountered. Keep windows clean. Use headlights, seat belts, and chock blocks. Utilize backers when available. If necessary, get out of your vehicle and check clearances before backing. When parking, check area for hazard trees.

**SNAGS:** There are numerous snags throughout the entire incident area. Maintain a strong situational awareness for snag issues in your work area at all times. Look up, look down, and look around and be especially alert when the wind picks up. When falling operations are in progress, keep nonessential personnel at least 2 ½ tree lengths away from the activity.

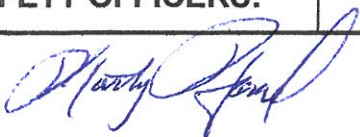

**DRUG CULTIVATION:** Be alert for any signs of illegal cultivation. If found, leave area and request law enforcement, advise DIVS and warn all personnel to stay clear of area. Signs could include: pvc pipes, hose lines, drip irrigation lines; gardening supplies and tools; containers for fertilizers, insecticides, and animal poisons; signs of camping, cooking, and sleeping areas; signs of human activities in remote areas; food cached near trailheads or along roads; or similar unusual sites in remote areas. Entering a grow site or encountering growers could be life threatening.

**WORKING AROUND HEAVY EQUIPMENT:** Stay at least 100' in front or 50' behind equipment. Never approach without making eye contact with operator. Avoid working below equipment. Establish visual and radio communications with operator before engaging. Communicate all hazards to operator.

**FATIGUE:** Be alert for signs of fatigue in yourself and others and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor incoming resources for level of fatigue. Check reporting resources for length of time worked prior to this assignment. Assess cumulative fatigue level.

**SAFETY OFFICERS:**

**Marty Hamel and Brian Savage**

**Black Bear Facts**

- The only species of bears in California and Nevada are Black Bears. However, they do range in color from blonde to black, with cinnamon brown being the most common color.
- Black Bears will seek to avoid confrontation with humans. If encountered, always leave them an escape route.
- Males are much larger than females and can weigh up to 500 pounds, although the average weight is about 300 pounds.
- Black Bears can sprint up to 35 mph and they are strong swimmers and great tree climbers.
- Black Bears are omnivores. A typical wild bear diet consists of berries, plants, nuts, roots, honey, honeycomb, insects, larvae, carrion and small mammals.
- Bears that are accustomed to people can become too bold and lose their fear of humans. To avoid this behavior, do not let bears become habituated to human sources of food.

**Spiking or Working Around Bears**

- Never leave food, toiletries and/or anything with a scent in your tent, sleeping bag or car.
- Keep sleeping bags, tents and sleeping areas free of food and beverage odors.
- The trunk of your car and coolers are not bear-proof!
- Do not leave out food, stored drinks. The smell will attract bears.
- Clean everything after preparing a meal.
- Dispose of garbage properly.
- **Remember, never feed a bear! A fed bear is a dead bear.**

**Bear Encounters**

**In Spike Camp:** Do not run. Be aggressive and assert your dominance by standing tall and making noise that will scare the bear away. Banging loud objects together and shouting loudly works well.

**On The Line:** This is the bear's territory, respect that and do not run. Make eye contact **b**ut don't stare, make yourself appear as large as possible, stay calm and quiet, back away. Communicate the information to your supervisor and personnel in the area.

**Anywhere:** If the bear attempts to get away, do not block the bear's escape route!

- Never get between a mom and her cubs.
- Slowly walk away and make a loud noise.
- Though attacks are very rare, if you are attacked, fight back aggressively!

**8. MEDICAL EMERGENCY PROCEDURES**

When an injury occurs, initiate care with available resources at scene and notify DIVS. The DIVS shall coordinate the incident and direct necessary actions. The following steps shall be taken to mitigate the incident:

- Determine the nature of the emergency.
- If the emergency is a medical injury/illness, determine if the injury/illness is life threatening.
- If the injury is life threatening, then clear designated frequency for emergency traffic.
- Identify the on-scene point of contact by position.
- Ensure that the Medical Unit Leader is contacted immediately.
- Identify number injured, patient assessment(s) and location (geographic and/or GPS coordinates).
- Identify on-scene medical personnel by position and last name (i.e. EMT Jones).
- Identify preferred method of patient transport.
- Determine any additional resources or equipment needed.

The Evacuation Plan should be continually evaluated, and contingencies developed in the event the first plan is not effective.

## Human Resource Message

**Warning!** When people fail to display mutual respect for others, they hasten the coming of *Karmageddon!*

### **KARMAGEDDON:**

**IT'S LIKE, WHEN EVERYBODY  
IS SENDING OFF ALL THESE  
REALLY BAD VIBES, RIGHT?  
AND THEN, LIKE, THE EARTH  
EXPLODES AND IT'S , LIKE,  
A SERIOUS BUMMER.**

- Don't send off bad vibes!
- Don't cause the earth to explode!
- Don't be a serious bummer!
  
- Do practice Mutual Respect!
