

CORRAL COMPLEX

CA-SRF-001494
P5HU49 (0510)

Sept 3, 2013
Day Shift 0600 - 2000

INCIDENT OBJECTIVES	1. INCIDENT NAME Corral Complex	2. DATE 9/2/2013	3. TIME 2200																				
4. OPERATIONAL PERIOD (DATE/TIME) 9/3/2013, 0600-2000																							
5. GENERAL CONTROL OBJECTIVES Incident Objectives: <ul style="list-style-type: none"> • Provide for firefighter and public safety in all incident operations. • Protect property and infrastructure. Control fire closest to communities. • Keep stakeholders, the public, and cooperators informed of fire status. • Keep costs commensurate with identified values at risk. • Protect cultural and natural resources. • Protect wilderness values and utilize MIST in the Trinity Alps Wilderness. • Protect the Hoopa Valley Indian Reservation Community at Risk as listed in the Federal Register. • Protect Communities at Risk including Denny, Trinity Village, Burnt Ranch, Hawkins Bar, Salyer, and Willow Creek. • Protect the De-No-To Trail as listed in the Federal Register of National Historic Places. Control Objectives: <ul style="list-style-type: none"> • Keep the fire: <ul style="list-style-type: none"> ▪ North of Hwy 299 ▪ East of the Hwy 96 ▪ South of the Siskiyou / Trinity County Line ▪ West of the New River 																							
7. WEATHER FORECAST FOR OPERATIONAL PERIOD Upper low pressure residing off the Oregon/Washington coast will remain offshore until Thursday afternoon. West to Southwest winds of 10 to 20 mph can be expected for the mid and upper slopes Tuesday afternoon through sunset. Min RH Tuesday will range from 35% mid slopes to around 50% at ridge tops. Max temperatures 65 ridges to 75 mid slopes.																							
8. GENERAL SAFETY MESSAGE Spike camps - Keep personal items and trash secured, haul back trash frequently

INCIDENT Weather Forecast

FORECAST NO: 19
PREDICTION FOR: Tuesday
SHIFT DATE: 09/03/2013 0600-2000
TIME AND DATE
FORECAST ISSUED: 09/2/2013 1900

NAME OF FIRE: Corral Complex
SHIFT Day **UNIT:** CA-SRF
SIGNED: Jeff Tonkin/Ken Simosko (T)
Incident Meteorologist

WEATHER DISCUSSION: Upper level low pressure continues to circulate off the Washington/Oregon coast and will come ashore Thursday afternoon. Until then, expect a southwest wind 10 to 20 mph on the mid and upper slopes from 1300L through sunset, along with scattered clouds between 5000ft and 10,000ft. Little change in the overall max and min temperatures through Thursday. Humidity's will range between 35%-40% mid slopes to around 50% ridges. Looking ahead...a much warmer and drier pattern is still expected Friday and into next week. Northeast to easterly winds look to remain light...less than 10 mph, with max temps well into the 90s and min RH between 15 and 20%.

WEATHER FORECAST (TODAY):

WEATHER: Partly Sunny...scattered cumulus. Highest gusts mid slopes in the afternoon through early evening.
HAINES INDEX: 2-3 **LAL:** 1 **CHC RAIN:** 0 %

MAX TEMP:	Elev. 3500 ft: 73 – 77 F	Elev 6000 ft: 63 - 67 F	New River Area: 83 – 88 F
MIN RH:	Elev. 3500 ft: 35 – 40 %	Elev 6000 ft: 45 – 50 %	New River Area: 24 – 29 %

WINDS: *Slope:* West or Upslope 2 – 4 mph, increasing to 8 to 12 mph...gusts to 20 mph after 1300 PDT.
(EYE LEVEL) *Ridges:* Southwest to South 3 – 6, increasing to 10 to 15 mph after 1300 PDT.

TRANSPORT WIND: West-Southwest 10 – 15 mph **VISIBILITY:** greater than 5 mi.

STABILITY: Shallow Inversion breaking between 1100 and noon, mixing height 6,000 feet.

FORECAST (TONIGHT):

WEATHER: Mostly Clear. Patchy Fog.
MIN TEMPERATURES: 50 – 55 F
RH: 89 – 99%.
WIND: *Slope: Down slope/down valley* 2 – 5 mph.
(eye level) *Ridges: Northwest* 5 – 10 mph.

OUTLOOK FOR WEDNESDAY:

WEATHER: Mostly Sunny. Light Cumulus.

MAX TEMP:	Elev. 3500 ft: 74 – 78 F	Elev 6000 ft: 63 - 67 F	New River Area: 83 – 88 F
MIN RH:	Elev. 3500 ft: 36 – 41 %	Elev 6000 ft: 45– 50 %	New River Area: 24 – 29 %

WINDS: *Slope:* West or Upslope 2 – 4 mph. Increasing to 4 to 8 mph...gusts to 13 mph after 1300 PDT.
(EYE LEVEL) *Ridges:* Southwest to west 3 – 6 mph. Increasing to 10 to 15 mph after 1300 PDT.

OBSERVATIONS MONDAY:

IRAWS 16 – Grand Slam (2428 ft): Temp: MAX: 83. RH MIN: 30%. Winds (eye): WSW 7 gusts 18 mph.
Big Hill RAWs (9 mi WNW – 3570 ft): Temp: MAX: 74. RH: MIN: 51%. Winds (20ft): WSW 8 gusts 17 mph.
Brush Mtn. RAWs (13 mi SW – 3941 ft): Temp: MAX: 70. RH: MIN: 50%. Winds (20ft): W 11gusts 26 mph.
IRAWS 4- Trinity GS (6145 ft): Temp: MAX: 62. RH MIN: 57%. Winds (eye level): NW 4 gusts 10 mph.

FIRE BEHAVIOR FORECAST

FORECAST NO. 20

PREDICTION FOR: 9/3/13 24hr.

NAME OF FIRE: Corral

UNIT: CA-SRF 1494

SIGNED: /s/ Dennis Burns

DATE & TIME ISSUED: 09/02 2200 hr

FIRE BEHAVIOR ANALYST

WEATHER SUMMARY: Continued Cool with Moderate RH

Winds: Day, Ridges SW 10-15mph, Lower slopes Upslope 4-8mph.

Min. RH: Day 35-50% Night 89-99%

Temperatures: Day 69-79 Night 50-55

LAL 1 Pig40-60% ERC 46(up1)

BI 50 (up 4)

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

The fire will remain fuels & topography driven. At present primary fire spread is from heavier fuels burning log to log and rolling material, watch for fire below you. Falling snags will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire. Rates of spread will be from 1 to 8 chains per hour with flame lengths 1-4 feet in the timber. With the present alignment of our fire expect mainly backing and flanking fire. Short uphill runs are probable where heavy fuels, brush and slope align. Spotting if any will be short range less than 400feet.

SPECIFIC:

West Side DIV F&H, Tish Tang Ridge:

- Expect the fire to continue to slowly back off of the ridge, log to log. Rollouts will result in short uphill runs.

South – Eastside DIV R&W:

- No Forward fire progression expected. Watch for holdover heat and rollouts.

North West DIV L:

- Heavier fuels continue to hold heat. Forward progression will be mainly from rollout. Fire is still in a backing alignment.

Horse Linto Crk. DIV A&X:

- There is a low potential for the fire to cross the creek and make a slope reversal and burn up slope to the south. ROS will be low to moderate if this was to occur.

Northeast DIV M&P:

- No forward fire progression expected.

Air Operations: Expect smoke inversion to lift by 1100hrs.

Safety:

Steep country means rolling material, watch for spot fires below you!

Corral Complex Safety Message

September 3, 2013

KEEP YOUR GUARD UP

Keep your mind focused on fighting fire safely.

Hazards We Deal With:

- Heat/dehydration
- Localized Fire Behavior
- Driving Hazards
- The 18 Situations
- Situational Awareness

3. SAFETY ZONES AND ESCAPE ROUTES
NOT IDENTIFIED

Some possible mitigations could include:

- Heat/dehydration issues are avoidable, push fluids along with food, take care of your people, monitor fluid intake, allow breaks if overly exhausted. Stage extra water in your vehicle for use during the day.
- The 18 Situations were developed for a reason, they are part of our basic firefighting practices, review those that fit with your assignment prior to engagement. Use these tools to your advantage!
- Prior to engagement review the Medical Plan and know how to manage medical emergencies, including placement of Line EMT's and the REM Crews.
- Situational awareness- Know the fire location when going indirect and where your safety zone is! Have your lookouts in place and ensure they know the trigger points when to evacuate the crew.
- Vehicle operators use low ratio gears on steep descents.

Ca Incident Mgt Team 3 Safety Officer: Bob Moore, Don Stukey

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL DIV's	SNAG HAZARDS	Follow Hazard Tree Safety Guidelines (IRPG p. 20). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. Be especially alert around snags during wind events. Maintain Situational Awareness.
ALL DIV's	DRIVING HAZARDS	Drive defensively! Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. Be alert for wildlife, heavy trucks, & high speed opposing traffic crossing into your lane. BRAKE CHECK: Prior to steep, long descents allow brakes to cool, all heavy vehicles without Jake brakes or retarders must stop and remain parked for at least 20 minutes allowing brakes to cool down before proceeding down the rest of the grade. Use appropriate vehicle gear ratios to help control speed.
ALL DIV's	FATIGUE	Maintain 2:1 work/rest ratio. Monitor incoming resources for level of fatigue. Check reporting resources for length of time worked prior to this assignment. Assess cumulative fatigue level.
ALL DIV'S	HYDRATION	Drinking water before, during and after shifts, up to 1.5 gal. per shift. Include sports drinks to maintain electrolyte levels. Be alert for signs of heat stress in yourself and others. Avoid drinking energy drinks.
DIV'S F, H, L, W, Z & SS	WORKING AROUND HEAVY EQUIPMENT	Maintain safe working distances when working around equipment. Never approach without making eye contact with operator. Avoid working below equipment. Communicate all hazards to operator. Personnel involved with chipper use to review & sign JHA; follow JHA direction; Utilize recommended PPE; review operator's manual. Never operate chipper alone.
ALL DIV's	DRUG CULTIVATION AND LAB SITES	Be alert for any signs of illegal cultivation or drug labs. If found, leave area and request law enforcement, advise DIVS and warn all personnel to stay clear of area.
ALL DIV's	BEAR PRECAUTIONS	BEARS: Pick up and remove all trash from fire line. Do not store food, food wrappers, empty lunch bags, tooth paste, etc. in parked vehicles, unattended personal gear bags, or tents. Strictly adhere to bear mitigation measures prescribed for spike camps or coyote operations.
ALL DIV's	POISONOUS INSECTS, SNAKES	Identify, avoid, and get treatment for any bites or stings. Use caution (for bees, wasps, etc.) when drinking from opened cans.
ALL DIV's	AVIATION USE	Confirm each mission is necessary to minimize pilot exposure. Communicate with aircraft per communications plan. Keep drop zones clear of personnel. Review "Aviation Watch Out Situations," page 52 in IRPG.
ALL DIV's	STEEP TERRAIN AND ROLLING MATERIAL	Watch your footing; take your time; ensure adequate spacing between crewmembers. Post lookouts to warn of rolling debris if necessary.
ALL DIV's	POISON OAK	Review identification of poison oak. Avoid poison oak, wash as frequently as possible. Obtain medication from Med Unit. Change into clean clothing as often as possible.
ALL	SAFETY ZONES	Follow safety zone guidelines (IRPG p. 7). Carefully evaluate burned areas before designation as safety zones due to snags and re-burn potential. When safety zones are distant from work site, set trigger points to allowing personnel to reach them in a timely manner. Post lookouts when working in an unburned area.

7. Control Operations

Complete contingency line construction along Lone Pine Ridge. Backhaul excess equipment/trash.

8. Special Instructions

All resources report to the wash station upon arrival and demobilization.
 BEARS- Don't leave your food unattended at any time of day to reduce availability to bears. Store your food at least 100 feet away from your sleeping area. The food stash should be downwind of your site, where possible. Keep vehicle windows closed when storing food inside.

Request type of evacuation resources needed: Air Ambulance/Ground/Transportation/REM Give rendezvous location, DP, RD or Lat/Log 					
ICS 206 8-78		9. PREPARED BY (MEDICAL UNIT LEADER) Scott Mckenney, Mike Hazlett, MEDL				10. REVIEWED BY (SAFETY OFFICER) Bob Moore, SOF1					

Looking at medical emergencies that have had bad outcomes several contributing factors come into play. Many of these by themselves are not a problem when several of these occur together the effect can be tragic.

Being in an unfamiliar area with poor access not having the normal medical response available requires a different approach require far greater situational awareness to mitigate these issues.

We have provided you with a check list of things to do before and during a medical evacuation. Please review these cards. Cut the cards out and laminate them for your line gear.

Remember Pre-Incident Planning, good situational awareness and size up when you arrive at the work site, having a plan for your Div. regarding (EMT) Equipment, Manpower, and Transportation may save a life. If you wait to plan it may be too late.

If you have any questions or concerns please come by the Medical Unit and speak with the on duty MEDL.

Medical Pre-Incident Planning:

- Identify EMTs and Equipment imbedded in suppression recourses.
- Review the Incident or Forest Emergency reporting procedures
- Review the Incident’s assigned Medical resources and their location. (note radio call sign)
- Assure that all assigned supervisors have reviewed and understand the Medical Plan. (if none is available develop a quick plan before engaging)

Arriving at work site:

- Assess access and egress for medical ground units.
- Assure that all resources can clearly articulate their location. (update as they move)
- GPS potential Drop Points or Landing Zones.
- Note weather changes and check on availability of air resources.
- Pre-Position medical supplies

During Response to a Medical Emergency:

- Contact Communications and declare a **MEDICAL EMERGENCY!!**
- Identify the Unit needing help and their location
- Insure that LCES are maintained.
- Obtain patient info and severity.
- Develop a resource list
 - o Initial care
 - o Sustained care
 - o Extrication/evacuation
- Report the Emergency and request anticipated resources needs
- Put two plans in place and start both plans clearly identifying the primary and backup plan to resources assigned.

During the Evacuation (every 15 min.)

- Reassess the treatment and the patient response (Are they getting better?) Do you have the right level of care?
- Assess the evacuation plans progress and adjust as needed.
- Assure that additional personnel are available for relief.
- Up-date Comm/Disp of the progress of the rescue.

**Corral Complex
Human Resource Message
September 3, 2013**

High Employee Motivation

Key assumptions about people:

1. People do what makes sense to them.
2. No one really wants to fail.
3. Everyone wants to grow personally.
4. Everyone needs and responds to encouragement.
5. All have the need for security, esteem and self-actualization.

Please remember to maintain your professionalism, patience, and flexibility.

**Janine Summy
Human Resource Specialist**

If one advances confidently in the direction of his dreams, and endeavors to live the life which he has imagined, he will meet with a success unexpected in common hours.

-Henry David Thoreau-

TRAINING SPECIALIST MESSAGE

All Corral Complex Trainees

BEAT THE RUSH!

If as much work as possible has been completed in your position task book, you may close your training assignment with the TNSP.

In order to receive documented credit for your training assignment, you must close out with the Training Specialist

Bring the following to the “exit interview”

- **A completed and signed ICS 225 or 226 Performance Evaluation**
- **A completed Exit Interview Form**

Forms are available at the Training Office

Remember: No documentation – it didn't happen!

Greg Kurtz-TNSP
9/3/2013
