

Butler Fire

Incident Action Plan
8/19/2013 Day Shift

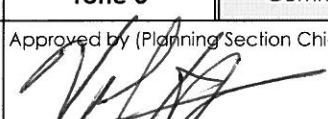

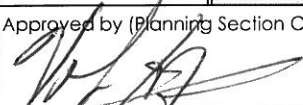

- **Spot Fires - Are most or all of resources “committed”?**
Are lookouts finding additional spotting?
- **Critters – Big and Small ones are out there, maintain your Situational Awareness**
- **Footcare/Poison Oak-Practice good personal hygiene.**

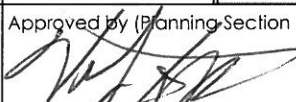

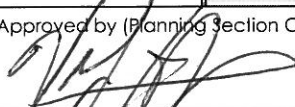

INCIDENT OBJECTIVES	1. Incident Name Butler	2. Date 8/18/2013	3. Time 20:51
4. Operational Period <p style="text-align: center;">8/19/2013 1800 - 0600</p>			
5. General Control Objectives for the Incident (include alternatives) OPERATIONAL OBJECTIVES <ul style="list-style-type: none">• Provide for firefighter and public safety through the application of the risk management process.• Utilize tactics which provide for the protection of private property and infrastructure.• Keep the Butler fire:<ul style="list-style-type: none">○ South and west of the Salmon River to Hotelling Ridge.○ East of Somes Mountain down to Orleans Mountain continuing to Salmon Summit.○ South of the line from Somes Mountain to Butler Flats.○ North of the Siskiyou / Trinity County line from Salmon Summit to Hotelling Ridge.			
6. Weather Forecast for Period <p style="text-align: center;">See attached forecast</p>			
7. Resource Protection Guidelines MANAGEMENT OBJECTIVES: <ul style="list-style-type: none">• Ensure fire suppression operations minimize negative fire effects.• Utilize minimum impact suppression tactics (MIST) within the Wilderness areas and in other land use designations as appropriate.• Prevent transportation of noxious weeds into the incident location.• Utilize Resource Advisors to assess impacts to sensitive historic, cultural, wildlife, and plant resources.• Manage the fire in a cost effective manner commensurate with values at risk.• Keep cooperators, communities, and concerned citizens informed.

Butler Fire Incident Weather Forecast

FORECAST NO: 17 D
PREDICTION FOR: Monday Day Shift
SHIFT DATE: August 19th, 2013
FORECAST ISSUED: 2100 August 18th, 2013

NAME OF FIRE: Butler Fire
UNIT: SRF
Incident Meteorologists: Bob Tobin
Christian Cassell (T)

WEATHER DISCUSSION: Warm and dry conditions with generally north to northeast winds persist through Tuesday morning. Thunderstorm chances increase Tuesday afternoon and peak Wednesday afternoon and evening. Frequent lightning, gusty and erratic winds, small hail, and heavy downpours are possible with any thunderstorm.

Fire Weather Watch Tuesday afternoon through Wednesday evening for Thunderstorms

WEATHER FORECAST MONDAY DAY SHIFT:

WEATHER: Areas of smoke. Sunny with increasing cumulus in the afternoon. Inversion breaking 1100 to 1400 PDT.
MAX TEMP: 92 - 107F...warmest in lower elevations
MIN HUMID: 13 - 23%...lowest along ridges and mid-slopes during the morning
WIND (EYE-LEVEL): Northeast 6 to 9 mph with gusts to 15 to 18 mph becoming Northwest or Upslope/Upvalley 4 to 7 mph with gusts to 12 mph around midday.
LAL: 1 CWR: 0%

WEATHER FORECAST TONIGHT (MONDAY NIGHT SHIFT):

WEATHER: Areas of smoke. Poor temperature/RH recoveries especially toward mid-slopes and ridges.
MIN TEMPERATURES: 55 - 65F drainages to 65 - 75F ridges.
MAX RH: 35 - 45% ridges diminishing to 20 - 30% toward morning. 70 - 80% drainages.
WIND (EYE-LEVEL): Northeast 6 to 9 mph with gusts to 15 to 18 mph.

WEATHER FORECAST FOR TUESDAY:

WEATHER: Areas of smoke. Warm and dry. A slight chance of thunderstorms in the afternoon and evening. Inversion breaking 1100 to 1400 PDT. Poor temperature/RH recoveries mid-slopes and ridges Tuesday night. ***Gusty and erratic winds near thunderstorms.***
WIND (EYE-LEVEL): East 5 to 8 mph with gusts to 15 to 18 mph becoming West or Upvalley/Updrainage 4 to 7 mph with gusts to 12 mph in the afternoon.
MAX TEMPERATURES: 85 - 97F. MIN RH: 15 - 25%
MIN TEMPERATURES: 60 - 70F. MAX RH: 25 - 40%
LAL: 2 CWR: 5%

OUTLOOK FOR WEDNESDAY THRU FRIDAY:

WEATHER: Chance of thunderstorms Wednesday and Thursday mainly in the afternoons and evenings. Brief heavy downpours, gusty and erratic winds, and hail are possible.
WIND (EYE-LEVEL): Southeast wind 3 to 5 mph becoming Southwest 4 to 7 mph with gusts to 12 mph in the afternoons. ***Gusty and erratic winds near thunderstorms.***
MIN TEMPERATURES: 57 - 67F. MAX RH: 80 - 90%
MAX TEMPERATURES: 78 - 95F...coolest toward the ridges. MIN RH: 20 - 35%...highest toward ridges.
LAL: 3 Wednesday → 1 Friday. CWR: 20% Wednesday → 0% Friday

FIRE BEHAVIOR FORECAST

FORECAST NO. 35

UNIT: CA-SRF

PREDICTION FOR: 8/19/13 Day

NAME OF FIRE: Butler Fire

DATE & TIME ISSUED: 8/18/13 2000

SIGNED: Jessica Wade-FBAN, John Wood-FBAN(t)

WEATHER AND FUELS SUMMARY:

>> Max. Temps: 92-107; Min. RH: 13-23%; Very unstable atmosphere

>> Winds (Eye Level): Northeast 5-8 mph with gusts to 15 mph becoming Northwest or upslope/up valley 4-7 mph with gusts to 12 mph.

>> Forecasted ERC 56, slightly below the 90th percentile

>> 1000 hr fuels average 8% (Measured in Div. F on 8-7-13)

GENERAL FIRE BEHAVIOR:

Conditions are forecast to be warm and dry today, however the smoke conditions may start mixing out around 1600. While smoke is over the incident, relative humidity may not reach the forecast lows and moderate fire behavior. Group torching is likely in the mixed conifer and Knob cone pine stands. Toward the ridge tops, brush is not carrying fire because of the high fuel moistures and sparse fuels.

>> Rates of spread: 4 to 6 ch/hr surface. 8 to 10 ch/hr upslope runs fueled by wind and clear skies.

>> Flame Lengths: 3-4 feet, higher with upslope runs

>> Probability of Ignition: 60% (shaded) to 90% (unshaded)

>> Spotting Distance: ¼ to ½ mile under column development, 500 feet with torching trees, and the steep slopes are likely to cause rollout and uphill runs.

Specific Fire Behavior:

DIV A – No significant fire behavior in this division today.

DIV B -. Spread will continue to move up McNeal drainage by flanking and head surface fire. Also, expect surface fire to get to the ridge top and start backing into Knownothing drainage by the afternoon. Torching and spotting are likely and will become established as the air is clear.

DIV F & G – The fire will continue up drainage spread in China Creek and Granite Creek. The mixed conifer and knob cone pine stands will burn actively with group torching and spotting. Torching should diminish as the fire burns up to the control lines because of sparse brushy fuels on the ridge tops. Northeast winds early in the shift may increase wind speeds in China and Granite Creeks leading to potential upslope runs in the AM.

DIV H & K – Fire that has reached the control line will continue to flank along the line in mixed conifer and knob cone pine which have potential for torching and may lead to spotting. The drainages at the head of Hammel Creek are likely paths for fire to reach the control line. Within the Somes Fire foot print, fuels are lighter and may not be continuous enough to support fire spread.

DIV W - Fire will continue to flank and back toward Drop Point 6 and Drop Point 8, however rates of spread will be slow at less than 2 ch/hr. Where dead and down fuels are present, firing is likely to be effective.

Air Operations: East and Northeast winds are expected to push smoke toward the West side of the fire which may impact use of aircraft in Div F, G, H and K.

SAFETY: Base all actions on current and expected behavior of the fire. Fire activity is increasing with the warm and dry weather, take some time to pay attention to your surroundings.

AIR OPERATIONS SUMMARY PREPARED BY: Dustan Mueller

PREPARED DATE/TIME: 8/18/13 1900

1. INCIDENT NAME: **Butler**

2. OPERATIONAL PERIOD DATE: 8/19/13

START TIME: 0600

END TIME: 2200

SUNRISE: 0627 SUNSET: 2010

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.):
 Watch for wires in the Salmon river canyon.
 Beware of rapidly changing VFR conditions due to smoke.
 Stay ready for PSD operations.
 Avoid no-fly zone over Orleans unless unsafe starting 8/20/13.

Medical History/Allergies _____

On Scene Medic: _____

Air Transportation Triage **Coordinate with Air Ambulance on:** _____

	Air Ambulance	Ground Transport
Mechanism	Struck by tree Fall of 10' or more Snake bite with pain and swelling Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains
Symptoms	Disoriented Chest Pain or Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

Medivac Sites (WGS 84 datum) use Degrees, Decimal Minutes (Lat 00° 00.000' – Long 00° 00.000')

DP-1 Nordheimer- N 41°17.865 / W 123°21.723

DP-34 Div. C- N 41°12.896 / W 123°16.759

DP-39 Div. E- N 41°10.847/ W 123°22.445

If air or ground ambulance is DELAYED:

DO NOT DELAY in Packaging and transporting the patient to rendezvous with the Ambulance.

Re-route EMS helicopter to rendezvous point as appropriate.

When declaring an "Incident within the Incident"

The closest DIVS or designee will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response. The closest Safety Officer and Line EMS will respond to the scene to assist. The Safety Officer will secure the site and begin initial investigation when situation is stabilized.

INCIDENT RISK ANALYSIS

Butler (ICS 215A) Day Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	HAZARD TREES/SNAGS	<ul style="list-style-type: none"> • Identify and communicate hazard to personnel • Mitigate using qualified personnel only • Personnel not involved with felling ops need to be a minimum of 2 1/2 tree lengths away
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> • Narrow dusty roads exist. • Establish one-way traffic or coordinate traffic flow if necessary. • Drive Defensively! Expect the unexpected around every curve. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. • Salmon River Rd (FH 93) open to residents, use traffic control • Use care when traveling on Highway 96.
ALL	HYDRATION	<ul style="list-style-type: none"> • Drinking water before, during and after shifts, up to 1.5 gal. per shift. • Be alert for signs of heat illness in yourself and others. • Drink 2 to 1 water to sports drinks.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Be alert for snakes, watch footing and hand placement around rocks. • Protect exposed skin from contact with poison oak, avoid smoke from burning poison oak if possible, shower, trade wash nomex, exchange.
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> • Watch your footing; take your time. • Ensure adequate spacing between crewmembers. • Post lookouts to warn of rolling debris.
DIV B	MINE SHAFTS	<ul style="list-style-type: none"> • Shaft openings and vent holes. Identify, Flag area, Make known to personnel • Keep heavy equipment clear of area. • Hazardous Materials and explosives can often be found around mine sites.
DIV D, G	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> • Utilize appropriate PPE and equipment safety mechanisms. • Maintain safe working distances, ensure operator knows where you are. • Utilize observer or spotter. • Ensure the use of communication with operator (radio, hand signals).
DIV B, C, D F, G, H K, W	INDIRECT LINE	<ul style="list-style-type: none"> • Insure that communications between lookouts and line resources are maintained. • Escape routes are identified and reevaluated continuously. • Establish trigger points for disengagement.
ALL	AIRCRAFT OPERATIONS	<ul style="list-style-type: none"> • Keep personnel out of drop zones when bucket work in progress. • Use air-to-ground frequency to communicate and with aircraft. • Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective, utilize mirror flashes and panels. • Consider the pilots safety and yours. Risk vs Gain
DIV W	FIRING OPERATIONS	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Qualified personnel for all assignments. Trainees to have qualified trainers. • Utilize Risk Mgmt. Process (IRPG p. 1) for implementing the plan. • Establish LCES prior to implementing burning operations (IRPG p. 6). • Assign an over-all Firing Boss to coordinate ignitions when simultaneous burning operations are planned for multiple locations.
All	Thunderstorms / Lightning	<ul style="list-style-type: none"> • Monitor changing weather condition, Post Lookouts. • Observe 30/30 rule. • Pre-Plan "Shelter Up" area. • Move down before roads become wet and slick.
DIV A, B, H K, W	SPOT FIRES	<ul style="list-style-type: none"> • Utilize the Risk Mgt Process before initiating any suppression actions (IRPG page 1) • Establish LCES • Consider Risk vs Gain
DIV A, B, W	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Conduct thorough briefing of all personnel (Inside rear cover IRPG). • Utilize Structure Assessment Checklist (IRPG p.10) • Follow Structure Protection Guidelines (IRPG p.14) • Develop Evacuation Plan
INCIDENT NAME: Butler ICS 215a		DATE PREPARED: <p style="text-align: center;">August 18, 2013</p> TIME PREPARED: 1830 HOURS
		OPERATIONAL PERIOD Day Shift 08/19/2013 0600 - 1800 Prepared by: G. Madden M. Tanzi, D. Kirste

Today's discussion is from the
Weather / Fire Behavior
Category.

Six Minutes Home Page

INITIATE ALL ACTIONS BASED ON CURRENT AND EXPECTED FIRE BEHAVIOR

- Can the resources you are replacing give you a thorough briefing? What information will you want to get from resources you are replacing?
- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- To reduce risk, initiate the following:
 - Post lookouts.
 - Check communications.
 - Retreat if you have doubts about your escape routes or safety zones or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.

Incident Trainee/Trainer Data Form

Complete and drop off with the Training Specialist for entry into database before end of assignment.
Remember to close out all training packages with the Training Specialist prior to going through DEMOB.

A. Trainee Data

Trainee Name: _____ ICS Trainee Position: _____

Were you ordered as a Priority Trainee? Y N If yes, specify: IFPM FS-FPM REGIONAL

Request # (A, C, E or O): _____ Agency Designator (Example: CA-KNF): _____

Agency: _____ Crew/Module Name: _____ Cell Phone: _____

Fire Name: _____ Date Assigned: _____

Person and location your training package should be mailed to: (Chief, Training Officer, etc.):

Name: _____ Title: _____ Home Unit: _____

Agency Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

B. Trainee Prerequisites

1. Valid Red Card or agency certification card? ___ Yes ___ No

2. Trainee has current position task book issued by home unit? ___ Yes ___ No

C. Trainer/Evaluator Data Trainer / Evaluator Name: _____

ICS position on fire: _____ Home Unit: _____

Address: _____ City: _____

State: _____ Zip Code: _____ Cell / Contact While on Incident: _____

D. Trainee Goals - (3 tasks or objectives you would like to address).

1. _____

2. _____

3. _____

MESSAGE FROM YOUR HUMAN RESOURCE SPECIALIST

Teamwork:

“Winning isn't everything, but wanting to win is”.

Cooperation:

“Success is the sum of small efforts, repeated day in and day out”.

Respect:

“You must look into people as well as at them”

Team work, cooperation and respect are KEY issues on this or any other incident.

This incident needs your efforts in maintaining a positive work environment. If I can be of any assistance please don't hesitate to come by and visit with me.

**Your Human Resource Specialist,
Daniel Gonzalez**

M.I.S.T. GUIDELINES (SRF – KNF – SHF)

MINIMUM IMPACT SUPPRESSION TECHNIQUES

Wilderness areas are areas that are protected by law and are managed to preserve their natural conditions for present and future generations. The following Minimum Impact Suppression Techniques (MIST) are guidelines intended to significantly reduce the impacts associated with fire suppression and incident management activities in Wilderness areas.

SAFETY

Safety is of paramount importance. Incident personnel should constantly be aware of their surroundings and the Eight Principles of Safety, the 10 Standard Firefighting Orders and the 18 Watchout Situations when applying MIST techniques.

LINE OPERATIONS

- Use natural barriers, wet line or cold trail techniques, rather than constructing line. Consider burnout from natural barriers to minimize line construction.
- When constructed line is necessary, use the minimum width, depth and canopy clearance necessary to check fire spread, based on fire behavior. Locate line to minimize impacts. Consider use of fireline explosives for line construction.
- Do not put line construction debris in streams.

GREEN TREES, BURNED TREES AND SNAGS

- Scrape around tree bases near fireline if hot and likely to cause fire spread.
- Inside fireline: remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Identify hazardous trees with an observer or flagging.
- Use Saw Use guidelines.

SAW USE

- Minimize the amount of cutting.
- Live trees will not be cut, unless it is determined they will cause fire spread across the fireline or endanger workers or the public.
- Slope/angle saw cuts away from line of sight to minimize visual impacts. Rub dirt or ash on stumps and log ends to camouflage them. Do not crosshatch/etch.
- If trees must be felled inside the line, do not limb or buck them. Allow the fire to consume them.

INDIRECT ATTACK

- Do not fall snags on the intended unburned side of the constructed fireline, unless they are safety hazard to crews or the public.
- On the unintended burn-out side of the line, fall only those snags that would reach the fireline should they burn and fall over.
- Consider alternative means to falling, i.e., fireline explosives, bucket drops.
- Consider all items in Section B, the Fire Line Phase.

AIR OPERATIONS

- Limit the use of retardant. Use water drops (preferred) or foam instead. When foam or retardant use is appropriate, avoid dropping near surface water.

HELISPOT CONSTRUCTION

- Minimize the number of helispots constructed in Wilderness.
- Evaluate carefully whether it is necessary to construct a helispot or whether an alternative outside Wilderness can be used.
- If a helispot is only needed for logistical support to deliver and retrieve supplies or gear, consider using a long line remote hook in lieu of constructing a helispot. If a helispot is needed for crew shuttle, consider the minimum size helicopter that could do the job and still meet suppression objectives.
- Use natural openings as much as possible. If some tree falling or cribbing is necessary, avoid high visitor use locations unless the modifications can be rehabilitated to be generally unnoticeable. Feather the opening so that it appears more natural looking.
- Whenever possible, the Resource Advisor should provide specific instructions and observe the construction of helispots.
- Naturalize helispots before abandoning

SPIKE CAMPS AND CAMP ACTIVITIES

- Camps and other facilities will be located outside of wilderness whenever possible.
- A Resource Advisor will be consulted prior to establishing spike camps and use will be discontinued if resource damage occurs.

MOP-UP PHASE

- Cold trail rather than scraping or digging whenever possible to detect hot areas.
- Roll or drag fuels into the interior and allow them to burn out, rather than mopping them up and roll logs rather than bucking.
- Pull hot material away from the bases of trees, rather than felling them.
- Remove or limb only those fuels that if ignited, have potential to spread outside the fireline.

PERSONAL CONDUCT

Leave No Trace – Pack it in - Pack it out

Confirmed approval for use of mechanized equipment – Chainsaws / Helicopter Use

Nor Cal #1

Expectations for Operational Periods and Shift Length

- The expectations of the I.C. and the team are that all operational resources will proceed directly to their shift assignments at the conclusion of the operational briefing / division break-out. Individuals attending the briefing should attend dressed fire-ready (nomex pants and boots).
- ICS 204 Division Assignment Lists will display anticipated shift duration. The assigned Division Supervisor has the authority to modify these time frames as the situation dictates.
- A minimum of 1 meal break should be taken each day when the fire situation permits. When meals are not recorded, rationale is needed on the CTR. Non fireline assigned resources should plan for a 30 minute break every 6 hours when the situation permits. Command and General Staff will manage workloads to allow for breaks when appropriate.
- Individuals shall only drive if they have had at least 8 consecutive hours off duty before beginning a shift. *Example: if it becomes essential to work until 2300 hours, the individual should not return to duty before 0700 the following day.* Exceptions to this policy should only be to accomplish immediate and critical suppression objectives or critical firefighter / public safety missions as approved by the I.C.
- The Incident Management Organization is committed to a “zero tolerance” policy against inappropriate behavior during incident operations. We expect an attitude of mutual respect for all incident personnel and the public we serve. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated and will be dealt with appropriately. Illegal drug use or other illegal activities will not be tolerated and will be turned over to local law enforcement authorities. Alcohol is strictly prohibited from the fire camp and all other incident locations. Violation of these standards of conduct can result in prompt dismissal from the incident. Individuals who are aware of any inappropriate behavior of incident personnel should tell their supervisor or contact the Human Resource Specialist.
