FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 3	TYPE OF FIRE: Wildfire
FIRE NAME: American	OPERATIONAL PERIOD: Day Shift 8/16/2013
DATE ISSUED: August 15, 2013	TIME ISSUED: 2200
UNIT: Tahoe National Forest	SIGNED: Stewart Turner FBAN 

INPUTS

WEATHER SUMMARY: Clear. Areas of smoke.

Day: Maximum Temp 85°-92°, Minimum RH 14-22%, winds upvalley 4-8 mph gusting to 15 mph, ridgetop southwest 4-8 mph gusting 15 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire behavior will active, very active to extreme around the fire area. Expect to see single and group tree torching with short crown runs where fuels, topography and winds line up. On the ridge tops and plantations expect to see more surface fire with active fire behavior. Rollouts and spotting will be a problem contributing to the rapid spread of the fire. Most of the daytime movement will be to the north and northeast following the canyons. At night expect to see more southerly movement with the downslope winds. Rapid runs up the canyon walls following the timber stringers will introduce fire to the ridge tops. **The Probability of Ignition will be 88% The fine dead fuel moisture will be 3%. Currently the dead fuel moistures are low with the 1000 hour fuels around 8%. Expect spotting up to 1/3 mile.**

SPECIFIC:

Division A: Watch for rollouts from the Division B side and from below the Pacific Mine site. Rapid upslope runs are possible if the fire gets established in the drainage bottom. The fire will want to move to the south actively backing downslope into the winds.

Division B: Watch for spots across the line. The fire will want to move to the south actively backing downslope into the winds. Keep an eye on the opposing slopes for fire that might outflank the lower portion of this Division. Moderate to active fire behavior can be expected on the ridges and in the plantations.

Division H: Expect to see the fire to continue to move up Secrete Canyon Towards Ford Point and up the Little Secret Canyon. Very active to extreme fire behavior can be expected throughout the day.

Division Y: As fire becomes established in the aligned canyons expect to see rapid rates of spread and very active to extreme fire behavior. Fire will move into and up Lost Canyon.

AIR OPERATIONS: Smoke may limit air operations in some divisions for a period of time.

SAFETY

Take weather observations frequently. Base all actions on current and expected fire behavior. Reexamine your plan and risk analysis as fire behavior increases. Post more lookouts, if more warning time is needed.

Human Resource Message – American Fire

STRESS

This incident, the American Fire, is filled with steep rocky canyons, and in the afternoon a HUGE plume of grey smoke and ash develops against a beautiful blue sky. It sounds idyllic to the ears and eyes— BUT to firefighters and those in support of the fire, it can be very stressful. Camp personnel become incredibly fatigued by the desire to meet expectations.

However, stress is caused by how we respond to events—not the events themselves. Each person may respond differently to the same event. In this time of stress, each individual needs to find a way to deal with her or his stress.

Here are a few suggestions:

- Relax
- Make fruit and vegetables part of your diet
- Get enough sleep
- Laugh, dance, sing

If you (or someone you know) are having difficulty lowering the stress level, contact:

Human Resource Specialist, Mary McDonough, (559) 593-3905
Room 9, Human Resources, IC Camp
