

INCIDENT ACTION PLAN

AMERICAN INCIDENT

CA-TNF-001562
P5HU11 (0517)

SAFETY

THREE STRIPES AND YOU ARE OUT!

OPERATIONAL PERIOD

Monday, August 19, 2013
DAY 0600 - 1800 Hours

INCIDENT OBJECTIVES	1. Incident Name AMERICAN	2. Date Prepared 08/18/2013	3. Time Prepared 1700
4. Operational Period DAY 08/19/2013 0600 – 1800 HOURS			
5. General Control Objectives for the Incident (include alternatives) Objectives: <ol style="list-style-type: none"> 1. Our highest priority is to provide for public and firefighter safety. 2. Use the safest and most cost effective perimeter control. 3. Protect private property and structures. 4. Protect infrastructure and other resources under special use permit or contract. 5. Establish suppression control lines in areas with highest probability of success. Ensure firefighter exposure is commensurate with expected benefits. 6. Maintain a high level of collaboration with local communities, neighboring, and cooperating agencies. 7. Minimizing impacts to natural and cultural resources during fire suppression operations. 8. Initiate suppression rehabilitation actions where possible and in accordance with Resource Advisor. CONTROL OBJECTIVES: Keep the fire: North of Road 96 (Mosquito Ridge) East of Deadwood Ridge / Deadwood Ridge Road South of the North Fork of the American River West of Road 44 (Barney Cavanah Ridge)			
6. Weather Forecast for Period RED FLAG WARNING 1100 TODAY THROUGH 2200 WEDNESDAY Partly to mostly cloudy. A chance of showers and thunderstorms (LAL4). Temperatures above 5500 feet: 80-90 degrees. Below 5500 feet: 90-98 degrees. Minimum Humidity: 15-25%. 20 ft winds: Ridgetops- 0600-1200: Northeast to east 3-6 MPH. 1200-1800: South to southwest 4-8 MPH gust 15 MPH. Slope/Valley- 0600 Variable/ upslope 3-6 MPH. 1200-1800: Upvalley 4-8 MPH gust 15 MPH.			
6. General Safety and Risk Management Message <ul style="list-style-type: none"> • Ensure everyone understands the plan during team transitions. • Red flag warnings – heads up for down drafts.

ORGANIZATION ASSIGNMENT LIST	
1. Incident Name AMERICAN	
2. Date 8/19/2013	3. Time 1700
4. Operational Period DAY 08/19/2013 0600-1800 HOURS	
Position	Name
5. Incident Commander and Staff	
Incident Commander	ROCKY W. OPLIGER
Deputy	SCOTT VAIL
Safety Officer	JOHN KRAUSHAAR / DAN SNOW
Information Officer	FRANK MOSBACHER / TRICIA MAKI / SEAN COLLINS
Liaison Officer	DANA SIMPSON
Human Resources	MARY McDONOUGH
6. Agency Representative	
Agency	Name
USFS	TOM QUINN
Agency Admin Rep	ELI ILANO
TNF FMO	JEANNE PINCHA-TULLEY
Placer Co. & OES	BILL WALTON / JOHN McELDOWNEY
Placer Co. SO	KURT WALKER
CALFire & CDCR	CHRIS DESENA / BOBBY WALKER
Air Quality ARA	ANDREA HOLLAND
Resource Advisor	VICTOR LYON
USFS Union Rep	DANI SWANTIC
7. Planning Section	
Chief	PHIL COCKER/ SIG PALM
Resources Unit	D. GERBOTH/ M. VETTI/ B. McGRATH (t)/ J. MARTEL/ G. BALD (t)/ H. MEYERS (t)
Situation Unit	L. KOEGLER/ G. MAKI/ R. COCKERHAM/ M. HOOSE/ T. MARCHANT (t)
GISS	C. CLERVI/ M. EISTER/ C. BARRETT/ C. ENGLISH/ K. WILTSHIRE (t)
Demobilization Unit	KATHY STARKE
Documentation Unit	ALICIA SANCHEZ/ PENNY BEALE (t)
Fire Behavioral Analyst	BRENDAN RIPLEY/ TIM HOWELL
Training Specialist	TOM REAVES/ SHATIBA BRADLEY (t)
CTSP	CAROLYN HIGGINS/ JAMES WHITESIDE
IMET	RICH THOMPSON
8. Logistics Section	
Chief	ROSS PECKINPAH
Deputy	X KELLOGG/ DAVE TAYLOR
Supply Unit	ROB GRIFFITH
Facilities Unit	MARK RATEKIN
Ground Support Unit	TOM O'CONNELL/ KERMIT JOHANSSON
Communications Unit	SAL BONILLA

Medical Unit	JOHN VAN MANNEKES / ERIC WILLIAMS
Security Unit	STEVE ANDERSON
Food Unit	TONY MARTINEZ
9. Operations Section	
Chief	KIT BAILEY / PAT TITUS (t)
Planning Ops	BRIAN RHODES
A. Branch I	
Branch Director	MARK HIGGINS
Division B	JAKE CAGEL
Division F	KEVIN BOHALL
B. Branch II	
Branch Director	NEIL METCALF
Division H	SCOTT HOWE / MIKE KLINGER (t)
Division R	VINNIE PLUMMER
Division Z	STEVE BARAN / TROY NELSON / BRYON HART (t)
Division A	RICK COWELL
Contingency	DAVID NEELS / JEB PRONTO / STEVE MURPHY
C.	
D.	
E.	
G. Air Operations Branch	
Air Operations Branch Director	DENISE BLANKENSHIP
Air Attack Supervisor	GARY MONDAY
Air Support Supervisor	KERRY KOSKELA
Helicopter Coordinator	
Air Tanker Coordinator	
10. Finance Section	
Chief	SHERRIE BENNETT
Deputy	
Time Unit	LONI DUNNIGAN/SHEILA MINER
Procurement Unit	DON TINSLEY
Compensation/Claims Unit	SCOTT PARSONS
Cost Unit	KIM PARSONS
Prepared by (Resource Unit Leader) ALICIA SANCHEZ	

INCIDENT Weather Forecast

FORECAST NO: 8
PREDICTION FOR: Day SHIFT
SHIFT DATE: 8/19/13 (0600-1800)

NAME OF FIRE: American

UNIT: USFS (TNF)

SIGNED:

[Signature]
Richard Thompson
Incident Meteorologist

TIME AND DATE
FORECAST ISSUED: 8/18/13 @ 2030

WEATHER DISCUSSION: Moisture and instability...associated with an upper low moving across Central CA...will bring a threat of showers and thunderstorms to the fire through the operational period. **With any thunderstorms gusty/erratic outflow winds...abundant lightning and brief moderate rainfall can be expected.** Otherwise...RH will be a bit higher while temperatures remain persistent.

For Tuesday and Wednesday...the upper level low will move inland...keeping a chance of thunderstorms across the fire. Abundant lighting and gusty/erratic outflow winds will continue to be a threat. Also...any thunderstorms that develop will be capable of producing brief heavy rainfall which could result in flooding issues in and around the fire.

WEATHER FORECAST:

...Red Flag Warning 1100 AM Today through 1100 PM Wednesday...

WEATHER: Partly to mostly cloudy. A chance of showers and thunderstorms (LAL 4).

MAX TEMPERATURES: Above 5500 feet: 80-90.
Below 5500 feet: 90-98.

MIN HUMIDITY: 15-25%.

20 FT WINDS:

RIDGETOP - 0600-1200: Northeast to east 3-6 MPH.
1200-1800: South to southwest 4-8 MPH Gust 15 MPH.

SLOPE/VALLEY - 0600-1200: Variable/upslope 3-6 MPH.
1200-1800: Upvalley 4-8 MPH Gust 15 MPH.

STABILITY/INVERSION: Inversion 500 feet AGL dissipating around 1100.

OUTLOOK FOR MONDAY NIGHT: Partly cloudy. A chance of showers and thunderstorms (LAL 4). Lows: 58-68. Max RH: 40-60%. Ridgetop winds: south to southwest 4-8 MPH Gust 15 MPH becoming northeast to east 3-6 MPH. Slope/valley winds: downslope/downvalley 3-6 MPH.

EXTENDED FORECAST TUESDAY THROUGH THURSDAY:

Tuesday through Wednesday: Partly cloudy. A chance of showers and thunderstorms (LAL 4). Highs: 72-82 (above 5500 feet)...82-90 (below 5500 feet). Lows: 53-63. Min RH: 20-35%. Max RH: 45-65%. Ridgetop winds: southwest 4-8 MPH Gust 15 MPH daytime...northeast 3-6 MPH nighttime. Slope/valley winds: upvalley 4-8 MPH Gust 15 MPH daytime...downslope/downvalley 3-6 MPH night.

Thursday: Mostly clear. Highs: 72-82 (above 5500 feet)...82-90 (below 5500 feet). Lows 55-65. Min RH: 15-30%. Max RH: 35-55%. Ridgetop winds: south to southwest 4-8 MPH Gust 15 MPH daytime...northeast to east 3-6 MPH nighttime. Slope/valley winds: upvalley 4-8 MPH Gust 15 MPH daytime...downslope/downvalley 3-6 MPH nighttime.

*****Please Review Page 19 of the IRPG (Thunderstorm Safety)*****

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 009

TYPE OF FIRE: Wildland

FIRE NAME: American

OPERATIONAL PERIOD: Day Shift Monday 8/19/2013

DATE ISSUED: 08/18/2013

TIME ISSUED: 2200

UNIT: Tahoe National Forest CA-TNF-001562

SIGNED: Brendan Ripley, FBAN 

INPUTS

WEATHER SUMMARY: ...RED FLAG WARNING IN EFFECT FROM 1100 MONDAY TO 11 PM PDT
WEDNESDAY FOR LIGHTNING...

OUTLOOK Partly cloudy. A chance of showers and thunderstorms (LAL 4).

Above 5500': Maximum Temp 80°-90°, Minimum RH 15-25%

Below 5500': Maximum Temp 90°-98° degrees, Minimum Humidity 14-22%

WINDS 20 FT: Ridge-top 0600-1200 Northeast to east 3-6 mph
1200-1800 South to Southwest 4-8 mph G15
Slope/Valley 0600-1200 Variable/upslope 3-6 mph
1200-1800 Up-valley 4-8 mph G15

(See attached weather forecast)

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Primary fire perimeter is burning in an area that has no recorded fire behavior. North portion of the fire has burned into the 2008 Westville Burn scar.

Local Thresholds – Watch Out: Combinations of any of these factors can greatly increase fire behavior.

20' wind Speed over 5 mph, RH less than 20%, Temperature over 80°, 10hr Fuel Moisture less than 4.

Fire Spread in the absence of wind is associated with fuel and topography.

Fine dead Fuel Moisture: 6-8% Probability of Ignition: 40-60% Short Range Spotting: 1/3 mile

SPECIFIC:

BRANCH I

Div-B Fire behavior is moderating in the bottom of the river drainage upstream from Devils Gate. Low intensity heat along the edge with isolated interior heat associated with the heavy dead fuels. Don't expect to see any perimeter growth under diurnal wind conditions. Watch for rollout.

Div-F Along the Deadwood road interior fire behavior will be creeping and possible single tree torching. Watch for spot fires across the line from outflow winds.

BRANCH II

Div-A: Fire located in Grouse Creek running up through Springs Canyon is burning in heavy surface fuels. Very steep terrain subject to roll out along with short crown runs as fire moves up the drainage. Area may be subject to up-slope/canyon winds promoting rapid rates of spread and short crown runs.

Div-H: Fire in this division is in the 2008 Westville Burn scar. Fire spread is slow targeting down heavy fuels and grass. Isolated heat along Whiskey Hill and adjacent ridge.

Div-R The fire will continue to move north and east working across the canyons. Fire behavior limited to surface fuels in the flats in the absence of wind. Fire currently in Screwauger Canyon and lower portion of Antione and Manila Canyon and may make an aggressive runs up canyon.

Div-Z Fire continues to make runs out of river drainage at the plantation. Fire behavior may be extreme when making runs in alignment with up canyon winds and slope. Evaluate re-burn potential south west of the plantation at the A)(Z) break.

All areas subject to rapid rates of spread and extreme fire behavior associated with outflow winds.

AIR OPERATIONS: Local inversion may hamper air operations early in the morning.

SAFETY

Lookout Points: Roll out... Fire coming into alignment with canyon and drainages... Change in wind condition associated with outflow winds... Additional starts associated with lightning. Limited resources due to Initial Action activity associated with lightning strikes.

7. Control Operations
Mop-up and patrol perimeter where safe to do so.
Continue direct suppression where possible towards "A".

8. Special Instructions
Use only designated water sources marked by blue flagging.
Watch for open mine shafts.
Avoid traveling thru noxious weeds (identified with flagging).
SOFR John Morlock will cover both Div B and Div F as the line safety.

American Incident Safety Message

August 19, 2013

SAFETY is our first and most important priority on this incident, and all the time! A job that can not be done safely does not need to be done. Every employee has the right of a safe work environment, and every supervisor has the obligation to provide a safe work environment. Don't become complacent to the things or routines around you. Maintain your situational awareness to all the surroundings, and don't get tunnel vision by just focusing on the immediate present single event in front of us.

BRIEFINGS: Start the shift or new work assignment with a briefing. Review the Safety Message and the appropriate Risk Analysis. Ensure that everyone completely understands their assignment. Be guided by the Basics: Don't violate the 10 Standard Fire Fighting Orders, Mitigate the 18 Situations, Have LCES in place, Use the Look Up, Look Down, Look All Around process, and use your Incident Response Pocket Guide until it has to be replaced!

LCES is probably the most critical during the first day or two on a new incident. Take the time to be sure a very strong LCES is in place. Consider the fire behavior, terrain, fuels, and winds in placing the lookout. Ensure everyone is on the same channel, or is within adequate voice communication range. Locate, clear, and time your travel time on the escape routes to your safety zones. Do your safety zones meet the guidelines on page 6 in the IRPG?

SNAGS and HAZARD TREES: There are many hazard trees and snags. Follow the Hazard Tree Safety guidelines in the Incident Response Pocket Guide (page 20). Evaluate the potential hazards before starting work. Use the "Look Up, Look Down, Look All Around" process (page 2). Minimize exposure by limiting the number of personnel around and under the hazard trees, and the time under the hazardous conditions. Pay particular attention during windy periods.

DRIVING: Driving is usually very difficult and hazardous on every fire: This fire is not an exception. The use of headlights, chock blocks, and backers is mandatory. Watch your speeds: The roads are narrow, dusty, and rough, there is a lot of traffic, and wildlife is also a threat. Remember, the speed limit is vary-pay attention! Be especially careful when other vehicles are approaching-slow down! Expect the unexpected from other drivers!

DEHYDRATION: Dehydration is a real threat with warmer and drier weather. Start drinking water before you become thirsty: start downing water at the beginning of the shift. If you are thirsty, you are showing signs of dehydration.

FIRE BEHAVIOR: The potential and actual fire behavior is EXREME! The combination of record dry conditions, high temperatures, low relative humidity's, and potential for thunderstorm related strong and gusty winds can creating extremely dangerous conditions. Spot fires can become new flaming fronts within minutes.

California Team 4 Safety Group

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	HAZARD TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.20). • Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. • Be especially alert around snags during wind events. • Check for hazard trees & "widow-makers" in sleeping areas prior to occupancy. • Night time complicates hazard tree identification
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> • Drive defensively! Expect the unexpected around every curve. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. • Watch for debris on the roads. • Increase following distances on dusty roads. Slow down when you meet opposing traffic or encounter washboard surfaces. • Monitor drivers fatigue due to long driving distances.. • Speeds vary, monitor posted speed limits.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Long Range Spotting has greatly increased Fire behavior, plan for increased ROS • Review "Severe Fire Behavior Potential" (IRPG p.78). • Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift. • Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate. • Adhere to 10 Std Orders, mitigate 18 situations. • Maintain Situational Awareness. LCES in place always.
ALL	FATIGUE	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor incoming resources for level of fatigue.
ALL	HYDRATION	<ul style="list-style-type: none"> • Drinking water before, during and after shifts, up to 1.5 gal. per shift. • Be alert for signs of heat stress in yourself and others.
ALL	AIRCRAFT OPERATIONS	<ul style="list-style-type: none"> • Keep personnel out of drop zones. • Use air-to-ground frequency to communicate with aircraft. • Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective. • Don't engage in "heli-mopping". Eliminate unnecessary pilot exposure.
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 6). • Establish adequate safety zones (IRPG p.7). • Use Downhill Line Checklist (IRPG p. 8). • Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3). • Utilize Risk Management Process (IRPG p.1).
ALL	THUNDERSTORMS	<ul style="list-style-type: none"> • Heads up for thunder storm potential and associated downdrafts. • Refer to IRPG page 19 for Thunderstorm safety guidelines. • Monitor the command channel for thunderstorm warnings. • Conduct thunderstorm safety briefing. • Brief lookouts on thunderstorm trigger points.
ALL	INITIAL ATTACK	<ul style="list-style-type: none"> • Do the Risk Management process prior to any engagement • LCES will be in place during any operation. • This country requires you to LOOK UP, LOOK DOWN AND AROUND. • The weather can change instantly, always be observant. • Base all actions on current and expected fire behavior
	MINE SHAFTS	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Avoid all mine shafts and adits • Three Stripes You're Out: 3 Stripes of flagging tape means STAY OUT!

10. REVIEWED BY (SAFETY OFFICER - SOF1)

ICS 206 – Block 8, Emergency Medical Procedures (cont'd)

In the event of a medical emergency provide the following information to the Communications Unit

1. Declare the nature of the emergency.
 - a. Medical injury/illness? If injury/illness is it Life Threatening?
2. If Life Threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene Point of Contact (POC) by Resource and Last name (i.e. POC is TFLD Smith).
4. Identify nature of incident, number injured, patient assessments and location (geographic and GPS coordinates).
5. Identify on-scene medical personnel by position and name (i.e. EMT Jones).
6. Identify preferred method of patient transport.
7. Request any additional resources and/or equipment needed.
8. Document all information received and transmitted on the radio or phone.
9. Identify any changes in the on-scene Point of Contact or medical personnel as they occur.

Selecting an On-Scene LZ

First, determine if the area is large enough to land. The landing surface should be flat, firm, and free of debris that could blow into the rotor system.

The touchdown area for the helicopter should be 125' x 125'.

The landing site should be clear of people, vehicles, trees, poles, wires, posts, stumps, brush, and large rocks.

Consider the wind direction. Helicopters land and take off into the wind.

Touchdown area should be marked, (an X to mark the center and one indicating wind direction).

Radio Terminology

“Medivac” is for life threatening injuries only.
“Medical Transport” is for non-life threatening injuries.

John W. Kraushar

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (Project 25) ***Last Clone 08-17**

TRAINING SPECIALIST MESSAGE

Training Specialist's is on the incident.
All federal, state, and local government agency
trainees working on position task books will need to
register with the Training Specialist's in order to
receive proper credit for your assignment.
The TNSP desk is in the ICP - and is located next to
Fire Information.

*Please see the Training Specialist's as soon as
possible!!*

THANK YOU
