PFEIFFER SAFETY MESSAGE

“SAFETY is a CORE VALUE to be integrated into ALL incident activities!”

DAY SHIFT

12-18-2013

0600-1800

MAJOR HAZARDS:

- INCIDENT DRIVING
- POTENTIAL FOR EXTREME FIRE BEHAVIOR
- SNAGS

- ❖ **Fire Behavior** – Steep topography and canyon systems, monitor fire weather and indicators of extreme fire behavior. Potential for reburn. Post lookouts when working in drainages and out of sight of main fire.
- ❖ **Complacency**- Stay alert of snags, downed power lines and rolling debris
- ❖ **Driving** – Keep lights on and drive slowly due to inversion, darkness and public still in the area. Use caution when entering the highway. Roads will remain open until otherwise stated.
- ❖ **Weather**- CHANGE IN WEATHER CONDITIONS WITH INCOMING FRONT Maintain Situational Awareness and be alert of wind shifts. Plan ahead and utilize escape routes and safety zones. Predict the weather and obtain spot weather forecasts. Notify adjoining resources and divisions with critical weather changes. Post lookouts as needed
- ❖ **Structures**- Follow WUI guidelines, pass along critical information to adjoining resources and divisions. Be aware of toxic gases and structural stability in structures that have been burned.
- ❖ **Review IAP:** Conduct “Tailgate Briefings”, review frequency changes to 205 and Incident Emergency Plan in 206

Key Points:

The Ten Standard Orders are **FIRM**. There is no compromise.

Establish and Maintain your LCES. Each element needs to be established AND maintained throughout the shift, if LCES is compromised, mitigate it.

Become familiar with adjoining resources and notable hazards in the area

Empower your trainees, have them deliver the tailgate safety briefings.

Follow Dutch Creek Protocol for all emergencies on the fireline, located in ICS 206

LEVELS OF ENGAGEMENT

CONSIDER PACE

Primary Plan (Offense)

- Focused on FF safety and objectives

Alternative Plan (Offensive)

- Fallback plan that closely resembles primary plan

Contingency Plan (Defense)

- Focused on FF safety, move to safety zone, temporary refuge areas.

Emergency Plan (Defense)

- FF survival
- Deployment zones/Refuge area
- Fire shelters

CONSIDER DRAW-D

Defend-Reinforce-Advance-Withdraw-Delay

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25). All channels are shown as if programmed in a portable or mobile radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
