

# **KING INCIDENT**

## **Incident Action Plan**

**CA-ENF-023461**

**P5JEE9 (0503)**

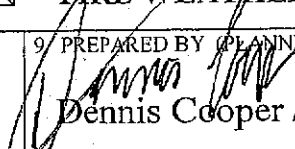

**NIGHT SHIFT**

**9/19/14 – 9/20/14**

**Operational Period 1800 - 0600**

INCIDENT OBJECTIVES	1. INCIDENT NAME	2. DATE PREPARED	3. TIME PREPARED
	KING	9/19/14	1200
<b>4. OPERATIONAL PERIOD (DATE/TIME)</b> <p style="text-align: center;"><b>NIGHT SHIFT      9/19/14 – 9/20/14      1800 - 0600</b></p>			
<b>5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT</b>  <b>Management Objectives:</b>  Provide for safety of responders and the public Ensure an appropriate evacuation and repopulation plan is in place and communicated Establish and maintain positive relationships with cooperating agencies and the public Provide timely and accurate incident information Protect economic and watershed values with safe and aggressive firefighting efforts Keep costs commensurate with values at risk  <b>Control Objectives:</b>  Keep fire North of Forebay Road and Highway 50 east of Pollock Pines Keep fire East of Pino Grande Keep fire West of Ice House Road Keep fire South of the Middle Fork of the American River			
<b>6. WEATHER FORECAST FOR OPERATIONAL PERIOD</b>  <p style="text-align: center;">See Attached</p>			
<b>7. GENERAL/SAFETY MESSAGE</b>  <p style="text-align: center;">See Attached</p>

# FIRE WEATHER FORECAST

FORECAST NO: 7  
PREDICTION FOR: Friday Night SHIFT

INCIDENT NAME: King Fire  
UNIT: Eldorado National Forest

SHIFT DATE: 19/20 Sep 2014

SIGNED: *Jason Clapp*

TIME AND DATE  
FORECAST ISSUED: 1200 / 19 September 2014

Jason Clapp  
Incident Meteorologist

**WEATHER TONIGHT:** \*\*\*\*Some increase in easterly/downcanyon winds tonight\*\*\*\*

**WEATHER:** Clear with smoke settling in after 2000. Downcanyon winds will keep RH recovery to a minimum. Smoke also into the ICP near sunrise.

**TEMPERATURES:** 58-63 Thermal belts/Ridges... 52-58 Valleys  
**RELATIVE HUMIDITY:** **South/West Flanks:** 40-50% Thermal belts/Ridges ... 50-70% Valleys  
**North/East Flanks:** 25-40% Thermal belts/Ridges ... 40-50% Valleys

### 20 FT WINDS:

#### South/West Flanks:

**RIDGETOP** - NW-N 3-7 shifting NE after 2100, **increasing 5-8 with gusts to 12 mph from 0400-0900.**

**SLOPE/VALLEY** - Downslope 3-6 mph. Then downcanyon 5-10 mph after 2100 with **strongest from 0400-0800.**

#### North/East Flanks:

**RIDGETOP** - E 10-15 shifting ESE after 2400 increasing 15-20 with gusts to 25-30. **Strongest wind from 0500-1100.**

**SLOPE/VALLEY** - Downslope 3-8 mph. Then downcanyon 5-9 mph gusting to 10-15 mph after 2400. **Strongest wind from 0400-0800**

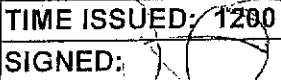

LAL: 1.

**STABILITY/INVERSION:** Inversion setting up after 2200 in south/west flanks.

**WEATHER DISCUSSION:** Tonight into Saturday, enhanced E-ESE winds will impact the east flank and potential down the Rubicon with lighter winds making it down to Slab Creek. Again, Saturday afternoon will likely have the battling wind directions from easterly flow near and above ridges to more westerly winds coming up the west slopes of the Sierra. Potential isolated afternoon thunderstorms Saturday near the crest that would likely move toward the fire area. Sunday is a transition day from the exiting Low to broad SW winds aloft.

**WEATHER FOR SATURDAY:** Low drifts south of the fire with warming temps, lowering RH, and a partly cloudy sky. High temps: 80-85. Min RH: 25-30%. Ridge winds: Battling winds from ESE 5-8 with 15 mph gusts on northeast side and WNW 4-7 on west side with westerly afternoon gusts 10-15 mph. Valley/Slope winds: Downslope 4-7 mph shifting upslope/upcanyon 4-8 mph by late morning.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #8	TYPE OF FIRE: Wildfire
FIRE NAME: King Fire	OPERATIONAL PERIOD: Friday 9/19/2014 Night Shift
DATE ISSUED: September 19, 2014	TIME ISSUED: 1200
UNIT: CA State, Eldorado National Forest	SIGNED:  Shelly Crook - FBAN

## INPUTS

### WEATHER SUMMARY

(Refer to Weather Forecast for details) DAY: Partly cloudy. Min Temp: 50-60°. Max RH: 40-60%.  
Ridgetop winds – Southerly 4-6 mph with gust to 10 mph shifting to Easterly 15-20 w/ gusts.  
Slope/Valley Winds – Downslope/down valley 3-6 mph becoming downslope 5-10 mph after 2100 hours.

### FUELS

Predominantly mature second growth mixed conifer (ponderosa pine, cedar, Douglas fir) with heavy shrub loading. Oaks common in the drainages. Fuel loadings are generally heavy. Representative Fuel Models 9, 10, TU5, TL8, TL9. Fuels moistures, live and dead, are extremely dry and are currently under a Fuels and Fire Behavior Advisory due to the sustained drought conditions. Minimum fine dead fuel moisture: 4-6%, 1000 hr FMC: 6%, 10 hr FMC: 4-5%, Live fuel moisture: 55-65%.

### OUTPUTS - FIRE BEHAVIOR

#### DAY SHIFT:

Thresholds for Active Fire Behavior in the King Fire area (Eldorado NF PocketCard):

\* 20ft Winds (over 5 mph), \*RH (under 22%), \*Temperature (over 84°) and \*1000hr FMC (under 9%).

- Forecasted Indices (Bald Mt RAWS, FM-G) ERC: 73 (up 5) BI: 43 (up 6)

Maximum Fire Behavior Potential (head fire upslope): Rate of Spread: 4-10 chains/hour (1/4 mile),  
Flame Length: 3-7 ft. Probability of Ignition: 60%. Maximum spotting distance of 1/4 mile.

**GENERAL:** Yesterday and last night's fire behavior was moderate to low as a result of the cloud cover and increased humidity. Expect tonight's fire behavior potential to increase with a potential for active spread where slopes and winds align. The easterly winds will remain throughout the night and are fair dry, bringing lower RH's in general. Expect the humidity recovery will be less than last night especially at the mid and upper elevations. An inversion will begin to set up in the lower drainage starting at around 2100.

**BRANCH I, South Flank:** The critical area remain in the SE corner in the American Canyon area adjacent to Highway 50 (DIV AA). The potential for spot fires and upslope runs on the south side of the American Canyon remains. Until the fire in this area is contained it has the potential to continue to put pressure on Highway 50, with spot fires over the road possible. The down canyon winds will be challenging tonight.

**BRANCH III, West Flank:** The critical area remains in the SW corner in DIVISIONs A, D and G. If the fire does get established here today, it could be set up for a run up the Slab and Yankee John drainages towards State Mt. Tonight the downslope winds will encourage spread down towards the American Canyon. There is a possibility the fire could put pressure on the east edge of the Mosquito Community if the fire crossing to the west of slab creek. To the north expect the fire will continue to burn actively eastward in with 1-2 miles spread possible especially about 3000ft.

**BRANCH V, North Flank:** Tonight's easterly winds should limit spread to the west and be advantageous for any burning operations. Potential for fire spread around Hell Hole Res. as well as over the ridge to the north toward French Meadow Res. This will depend on the amount of activity during the day shift, which was likely fairly active.

**BRANCH VII, East Flank:** Tonight, the downslope winds combined with the east winds will push the fire downslope, and generally back into the fire. The downslope/down canyon winds should be advantageous for burning operations, but the potential for spot fires remains. Expect good RH recovery in the canyon bottom, but not so good recovery just a few hundred feet up the slope.

**FEEDBACK:** Collect WX obs hourly and turn in to FBAN or IMET at end of shift. Please include fire behavior observations.

### AIR OPERATIONS

Smoky conditions may limit operations in the evening. Plan accordingly. Sunset at 1906. Sunrise at 0648.

### SAFETY

- Pay special attention to changing and increasing fire behavior as the night progresses.
- Monitor the weather frequently for changing conditions, poor RH recovery possible. Winds are highly variable.

7. Control Operations

Construct direct and indirect line from the DD and BB/CC break to the Branch I/III break.

8. Special Instructions

Identify resources to respond for initial attack.

Noxious weeds are marked by orange "noxious weed" flagging. Minimize or avoid activities in these areas.

Sensitive areas are marked with pink/black checkerboard flagging. Minimize ground disturbing activities in these areas.

Indicates a 24 hour resource 0600-0600

# SAFETY MESSAGE

"SAFETY is a CORE VALUE to be integrated into ALL incident activities"

King Fire CA-ENF-023461

Night Shift 09/19-20/2014

## LCES--Don't just say it—PRACTICE IT.

- Post Experienced Lookouts.
- Confirm Communications and insure they are understood by **everyone**.
- Establish escape routes and set trigger points for using them!

**POTENTIAL FOR EXTREME FIRE BEHAVIOR:** Review "Severe Fire Behavior Potential" (IRPG p.68). Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift.

**MAINTAIN ADEQUATE ESCAPE ROUTES AND SAFETY ZONES:** Review "Safety zones" (IRPG, P.8). Advise all personnel if these are compromised or changed. Set trigger points and reevaluate continuously.

**SNAGS AND HAZARD TREES:** There are many snags in the area, especially in bug kill areas. Review Hazard Tree Safety, (IRPG p.22). Evaluate potential hazards. Areas should either be cleared of snags prior to allowing crews to work there, or kept totally clear of personnel. Pay particular attention to snags during windy periods. Post lookouts if necessary.

**SITUATIONAL AWARENESS:** Go into your areas today/tonight with a fresh set of eyes. Whether it is vehicle or equipment use, mop-up or rehab, ask yourself "Are my actions Safe and effective?" If not re-evaluate your plan. Keep an eye on other personnel; it is **EVERYONE'S** responsibility to stop an unsafe act.

**AFTER ACTION REVIEW:** A thorough and concise AAR at the end of a shift or after a significant event is a good idea. Determine the causal factors that led up to the event, what worked well and what did not work. How would you have done things differently? A good debriefing will improve efficiency & **SAFETY**.

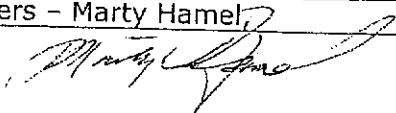

### How to Drive Slowly

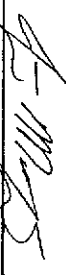

- Allow ample time to get where you are going.
- Assess conditions that might make faster driving hazardous.
- Practice accelerating and decelerating gently and gradually.
- Be patient.
- Drive the speed of traffic, provided it is safe for conditions.
- Give others the space to pass.
- Use lower gears and let the engine slow the vehicle when descending longer hills.
- Work on keeping an even, moderate speed.

### Accountability

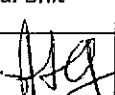

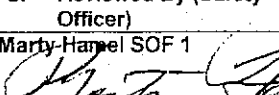

- Know where your crewmembers are at all times.
- Have crewmembers work in pairs.
- Inform Division or your Supervisor of changing locations.
- Review radio procedures, and ensure your radio is properly cloned.
- Check IN with the Division Supervisor on site if not assigned there
- Check OUT with your supervisor (or Division) at the end of shift.

Safety Officers - Marty Hamel

When an injury occurs, initiate care with available resources at scene and notify DIVS.

The DIVS shall coordinate the incident and direct necessary actions. The following steps shall be taken to mitigate the incident:

1. Determine the nature of the emergency.
2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening.
3. If the injury is life threatening, then clear designated frequency for emergency traffic.
4. Identify the on-scene point of contact by position.
5. Ensure that the Medical Unit Leader is contacted immediately.
6. Identify number injured, patient assessment(s) and location (geographic and/or GPS coordinates).
7. Identify on-scene medical personnel by position and last name (i.e. EMT Jones).
8. Identify preferred method of patient transport.
9. Determine any additional resources or equipment needed.

The Evacuation Plan should be continually evaluated, and contingencies developed in the event the first plan is not effective.

Medical Incident Report

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha: Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		Describe the injury (Ex: Broken leg with bleeding)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
Incident Commander		Name of IC.
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES	<input type="checkbox"/> NO = MEDEVAC!		
Breathing? <input type="checkbox"/> YES	<input type="checkbox"/> NO = MEDEVAC!		
Mechanism of Injury: What caused the injury?			
Lat/Long (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24'			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> <b>URGENT-RED</b> Life threatening injury or illness. Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.	Ambulance or MEDEVAC helicopter. Evacuation need is <b>IMMEDIATE</b> .
<input type="checkbox"/> <b>PRIORITY-YELLOW</b> Serious injury or illness. Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.	Ambulance or consider air transport if at remote location. Evacuation may be <b>DELAYED</b> .
<input type="checkbox"/> <b>ROUTINE-GREEN</b> Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.	Non-Emergency. Evacuation considered <b>Routine of Convenience</b> .

5. TRANSPORT PLAN:

**Air Transport:** (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

**Ground Transport:** Click here to enter text.

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
Ex: Command	Forest Rpt, Ch. 2	168.3250	110.9	171.4325	110.9
COMMAND					
AIR-TO-GRND					
TACTICAL					

\*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) EX: N 40 42.45' x W 123 03.24'	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...

**REMEMBER:** Confirm ETA's of resources ordered  
Act according to your level of training  
Be Alert. Keep Calm. Think Clearly. Act Decisively.
