FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 11	TYPE OF FIRE: Wildland Fire
FIRE NAME: King	OPERATIONAL PERIOD: 10/01/2014(0700-1900)
DATE ISSUED: 09/30/2014	TIME ISSUED: 1830

INPUTS

WEATHER SUMMARY:

Mostly sunny. Areas of smoke in the morning
Temps and RHs – Max Temp 69-79° RH 13-20% LAL 1
20ft Wind –
Slope/Valley – East 20-25 mph gusts to 35 until 1300, then decreasing to 12-20 mph.
Ridgetop – East 20-25 through 1300, then decreasing to 15-25

OUTPUTS

FIRE BEHAVIOR**GENERAL:****FUELS**

Predominantly mature mixed conifer with heavy shrub loading. Fuel loadings are generally heavy. Live fuels moistures are dry; however the dead fuels have moistened up as a result of the rain from a few days ago.

Thresholds for Active Fire Behavior in the King Fire area (Eldorado NF PocketCard): 20ft Winds (over 5 mph), RH (under 22%), Temperature (over 84°) and 1000hr FMC (under 9%).

FIRE BEHAVIOR

Warmer, drier, and east-northeasterly winds with gusts up to 35 mph! Today will be a test for our westerly and southerly control lines. This will be the third day of drying since the precipitation, and fortunately the fuel moisture on most aspects are still very high. *Exposed southerly aspects could carry fire especially if they are lined up with the wind and will need to be monitored. Rate of spread could be up to 15 ch/hr or more on unshaded southerly aspects.* Southerly aspects that are shaded by canopy still have higher fuel moisture and will not burn as readily. Heavy fuels will continue to burn out throughout the entire fire area.

The attached QR code will reference the North Region Predicted Services updated 7- day forecast for additional information on the extended forecast.

**AIR OPERATIONS:**

Gusty east-northeast winds could hamper air operations today

SAFETY

Gusty east-northeast winds could push fire weakened trees over without warning

SAFETY MESSAGE

King Fire

October 1, 2014

LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES, SAFETY ZONES
Transition Day CIIMT 1 takes over the entire King Fire

Transportation

- **Driving on the Incident** - Hazardous mountain roads are common.
 - **The right vehicle for the right road for the right reason.**
 - Eleven Pines down into the Rubicon, watch for burnt out trees and debris coming down on the road.
 - Scout roads before sending up large suppression vehicles.
 - Mosquito is narrow, winding and has few wide spots for turning around or getting by opposing traffic. The bridge on Mosquito that crosses the South Fork of the American is very narrow, nothing bigger than a pickup will fit over the bridge.
 - Inattention, distracted driving, or nodding off due to fatigue could easily result in tragedy. Keep your speed down.
 - Driving through the communities Georgetown and Placerville please slow down.

Fireline

- Heat; Emphasize hydration, stress symptoms and treatment of heat illness.
- Brief crew on working with Helicopter bucket drops; get out of the drop zone "No exceptions".
- As winds increase **snag awareness** should be emphasized.
- **Consider increased focus on securing the perimeter.** Hot spotting without follow-up patrol, cold trailing, and mop-up will not put the fire out in these fuel conditions
