## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 14	<b>TYPE OF FIRE:</b> Wildland Fire
<b>FIRE NAME:</b> King	<b>OPERATIONAL PERIOD:</b> 10/04 2014(0700-1900)
<b>DATE ISSUED:</b> 10/3/2014	<b>TIME ISSUED:</b> 1830
<b>UNIT:</b> ENF	<b>SIGNED:</b>  <b>Typed/printed:</b> Bob Patton

### INPUTS

**WEATHER SUMMARY:**

Mostly sunny, warm and dry  
Temps and RHs – Max Temp 74-89° RH 10-15% LAL 1  
20ft Wind –  
Slope/Valley – Downslope/downcanyon 4-9 mph until 1000, then upslope/upcanyon 7 mph gusts to 15 mph  
Ridgetop –East to southeast to 5 mph gusts to 9 mph until 1000-1200, then southwest to west-southwest 7 mph gusts to 15 mph.

### OUTPUTS

**FIRE BEHAVIOR****GENERAL:****FUELS**

Predominantly mature mixed conifer with heavy shrub loading. Fuel loadings are generally heavy. Live fuels moistures remain dry; however the dead fuels still remain moist in sheltered areas.  
Thresholds for Active Fire Behavior in the King Fire area (Eldorado NF Pocket Card): 20ft Winds (over 5 mph), RH (under 22%), Temperature (over 84°) and 1000hr FMC (under 9%). *Currently ERC's from local RAWS stations are 50% and 1000 hr fuel moisture is 13% which is above the threshold for active fire behavior.*

**FIRE BEHAVIOR**

Warmer, drier, and lower windspeeds today. As the ERC's continue to rise and 1000 hour fuel moisture continues to drop, fuels are drying out on multiple sunny exposed aspects, and the soil is beginning to dry out as well. However the fuels are still holding moisture under the canopy on all aspects. Heavy fuels continue to burn out throughout the interior.

Unburned islands adjacent to heat sources on exposed southerly aspects could carry fire, if inline with slope and wind. Single tree torching maybe possible in plantations. Maximum rate of spread could be up to 6 ch/hr with 2' flame lengths on unshaded southerly aspects. Probability of ignition on southerly exposed aspects is 32%, otherwise 1% on cooler aspects.

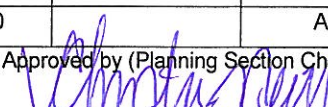

The attached QR code will reference the North Region Predicted Services updated 7- day forecast for additional information on the extended forecast.

**AIR OPERATIONS:**

Stay clear of bucket operations

**SAFETY**

Maintain focus, especially as the plan is in development. Rushing can result in losing sight of the bigger picture.

## King Fire

October 4, 2014

USE **L**OOKOUTS, **C**OMMUNICATIONS, **E**SCAPE ROUTES, **S**AFETY ZONES

### Transportation issues:

- Mosquito Rd is still the fire line Div E, also lots of chipping on Soda Springs rd, don't drive on them unless you have work in the area. Drive slowly and prepare for oncoming traffic, repair equipment and firefighters on the road.
- Headlights on; creep around blind curves and corners.
- Expect heavy traffic on Highway 50 over the weekend. Apple Hill just east of Placerville is a very popular attraction and draws large crowds from the Sacramento area.
- Engines patrolling and working along Wentworth Springs use extreme caution, its open to the public. Watch for people looking at the fire damage not the road...
- Deer are common along the roads, dusk and dawn times are the worst.

### Fireline:

- Suppression Rehab is in full swing watch for lots of heavy equipment dozers, excavators working the fireline.
- Watch for rolling debris beneath the rehab operations, keep crews clear.
- Be familiar with Medical plan. Don't commit to ground you can't get someone out of.

### Spike Camps:

- Bears are very attracted to trash and any food smells. Keep your camps clear of all trash and food. Trash cans must be emptied every day before nighttime into bear proof dumpsters.
- No food or personal hygiene products in your tent.
- Keep the bears wild.
