FIRE BEHAVIOR FORECAST								
FORECAST NUMBER: #21	TYPE OF FIRE: Wildfire							
FIRE NAME: King Fire	OPERATIONAL PERIOD: Friday 9/26/2013 Day Shift							
DATE ISSUED: September 25, 2014	TIME ISSUED: 2/00							
UNIT: Eldorado & Tahoe National Forests	SIGNED: Shelly Crook - FBAN							
INPUTS								

#### WEATHER SUMMARY

(Refer to Weather Forecast for details) DAY: Partly to mostly cloudy. 30% chance of thunderstorms in the afternoon. Max Temp: 50-60°. Min RH: 50-60%. Ridgetop winds – SE/E 3-6 mph in the AM to mid-day becoming SW/NW 5-7 with gusts to 15 mph in the afternoon. #### **FUELS**

Predominantly mature second growth mixed conifer (ponderosa pine, cedar, Douglas fir) with heavy shrub loading. Oaks common in the drainages. Fuel loadings are generally heavy. Representative Fuel Models 9, 10, TU5, TL8, TL9. The live fuels moistures are extremely dry and are currently under a Fuels and Fire Behavior Advisory due to the sustained drought conditions. However the dead fuels have moistened up as a result of the rain from yesterday. Minimum fine dead fuel moisture: 10-12%, 1000 hr FMC: 11%, 10 hr FMC: 10-12%, Live fuel moisture: 55-65%.

#### **OUTPUTS - FIRE BEHAVIOR**

#### DAY SHIFT:

Thresholds for Active Fire Behavior in the King Fire area (Eldorado NF PocketCard):

- \* 20ft Winds (over 5 mph), \*RH (under 22%), \*Temperature (over 84°) and \*1000hr FMC (under 9%).
- Forecasted Indices (Bald Mt RAWS, FM-G) ERC: 46 (up 19) Bl: 35 (up 35)

Maximum Fire Behavior Potential (head fire upslope): Rate of Spread: 1-3 chains/hour (1-3 feet/minute), Flame Length: 0-2 ft. Probability of Ignition: 30%. Maximum spotting distance of 500-1000 feet.

GENERAL for the Entire Zone 1 Fire Area: Yesterday the entire fire area received ½ to ¾ inch of rain. As a result, today's fire behavior potential has decreased significantly. Expect predominately smoldering and creeping fire behavior within the interior with little to no perimeter spread across the entire North Zone. Pay special attention for snags and stump holes and snags as the mopup efforts move further into the interior. The heavy fuels will continue to hold heat for several days.

Bald Mountain ERC (27) and BI (0) as of 9/25 1400 hours

FEEDBACK: Collect WX obs hourly and turn in to FBAN or IMET at end of shift. Please include fire behavior observations.

#### AIR OPERATIONS

Cloudy conditions may limit operations. Plan accordingly. Sunrise at 0653. Sunset at 1854.

#### SAFETY

- · As the fire behavior wanes, don't let your guard down, focus on the mission and your crews attitude.
- · As the mop-up efforts progress to the interior of the fire, the threat of falling snags increases.

### King Fire

SAFETY MESSAGE
September 26,2014
DAY OPERATIONAL PERIOD

#### MAJOR HAZARDS

Road Conditions
Fatigue and Health

Vehicle Operation Spike camp Wildlife

#### HAZARD MITIGATION

Vehicle Operations and Road Conditions: Driving is one of the greatest hazards on this fire. Keep your speeds down and drive defensively. Be alert for potential muddy and slick road surfaces. Avoid parking on soft surfaces. Stay off secondary roads in wet conditions. Increase following distances on slick road surfaces. Send a scout to evaluate roads and work area prior to personnel engagement.

Fatigue and Health: Pace yourself. Think about what you are going to do before you do it. Check the health and welfare of your people often. Make sure they get plenty of rest, and ensure their aches and pains are taken care of. Preventative maintenance does prevent injuries. Ensure people are protecting themselves from the weather.

**Situational Awareness:** Sometimes we tend to let our guard down when working on the same fire for a while. The same hazards that existed yesterday may not be the same today. Check your communications before starting your work assignment. Situational awareness must be maintained throughout the work shift. Work safely and keep your head in the game.

**Spike Camp Wildlife:** It is the responsibility of everyone at the spike camps to help maintain the camp. The unmaintained garbage and trash at the campground will attract bears and other critters that we don't want. Once the animals get a taste of the food in the garbage they will not leave.

Be certain that you can satisfy LCES for every operation. Maintain good SITUATIONAL AWARENESS at all times. Work safe.

Drive Safe!!!!!

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

When an injury occurs, initiate care with available resources at scene and notify DIVS.

The DIVS shall coordinate the incident and direct necessary actions. The following steps shall be taken to mitigate the incident:

- 1. Determine the nature of the emergency.
- 2. If the emergency is a medical injury/illness, determine if the injury/illness is life threatening.
- 3. If the injury is life threatening, then clear designated frequency for emergency traffic.
- 4. Identify the on-scene point of contact by position.
- 5. Ensure that the Medical Unit Leader is contacted immediately.
- 6. Identify number injured, patient assessment(s) and location (geographic and/or GPS coordinates).
- 7. Identify on-scene medical personnel by position and last name (i.e. EMT Jones).
- 8. Identify preferred method of patient transport.
- 9. Determine any additional resources or equipment needed.

The Evacuation Plan should be continually evaluated, and contingencies developed in the event the first plan is not effective.

### Human Resource Message King Fire

The thought for the day is **communication**. Effective communication helps us better understand a person or situation and enables us to resolve differences, build trust and respect, and create environments where ideas and problem solving can flourish. As simple as communication may seem, much of what we try to communicate to others—and what others try to communicate to us—can be misunderstood, which can lead to conflict and frustration between the parties. Effective communication is not lecturing, the key component is listening to each other.

"It sounds so trite but in relationships, you have to communicate"—Peter Krause

If you have issues, report them to your supervisor. If you need additional help, contact the Human Resources Specialist Office located on Main Street (next to Documentation).
