

Incident Action Plan

Beaver Fire

CA-KNF-005497

P5H93T (0505)

Day Shift

08/11/14

0600 - 1800

INCIDENT OBJECTIVES	1. Incident Name Beaver	2. Date 8/10/2014	3. Time 19:02
4. Operational Period 08/11/2014 0600 - 1800			
5. General Control Objectives for the Incident (include alternatives) MANAGEMENT OBJECTIVES <ul style="list-style-type: none"> • Ensure firefighter and public safety in all incident activities. Adhere to all safety standards and implement appropriate risk analysis • Protect values at risk to include watershed, Late Successional Reserve, cultural resources, private timber lands and recreation sites • Coordinate with Forest to maintain timely and accurate communications with communities, county officials and stakeholders. • Effectively manage incident costs by planning strategies and tactics toward a high probability of success. OPERATIONAL OBJECTIVES <ul style="list-style-type: none"> • Keep the fire: <ul style="list-style-type: none"> ○ North of Highway 96 ○ East of Buckhorn Ridge ○ West of Empire Creek Drainage ○ South of Beaver / Dead Cow Creek Canyon 			
6. Weather Forecast for Period See attached forecast			
7. General Safety Message See attached safety message

INCIDENT Weather Forecast

FORECAST NO: 15

NAME OF FIRE: Beaver Fire

PREDICTION FOR: Monday DAY Shift

UNIT: Klamath National Forest

SHIFT DATE: August 11, 2014

SIGNED: Andy Haner/Tim Sedlock (T)

TIME AND DATE

Incident Meteorologists

FORECAST ISSUED: 08/10/2014 at 2100 PDT

****Red Flag Warning for Thunderstorms through Tuesday evening****

WEATHER DISCUSSION: A weak low near the Bay Area will draw upper level monsoonal moisture into northwest California through Tuesday, posing the possibility of significant lightning early this week. Mainly dry thunderstorms are forecast for Monday with more of a wet/dry potential on Tuesday. Storm motion for storms will be from the south or southeast on Monday.

WEATHER FORECAST:

Monday: *****Thunderstorms imply strong gusty and erratic winds*****

Weather: Mostly cloudy with scattered mainly dry thunderstorms.

High Temperature... 90-96 canyon bottom, 78-84 mid-upper slopes (Few degrees cooler than Sunday)

Min RH..... 18-24% canyon bottoms, 25-31% high elevations (1-2 percent wetter than Sunday)

20-FOOT WINDS:

Canyons..... Light morning winds, becoming upslope/upcanyon 6-9 mph in the afternoon.

Ridgetop..... South-southeast winds 4-8 mph into early afternoon increasing to 6-12 mph with gusts to 16 mph late in the afternoon.

CWR (>=0.10")....5%

LAL....6 (Scattered dry lightning)

Haines Index....4 (Low)

Monday Night:

Weather: Mostly cloudy in the evening...becoming partly cloudy overnight. Scattered mainly dry storms.

Low Temperature... 58-65

Max RH..... Fair to Poor Recovery...48-58%

20-FOOT WINDS:

Canyons.....North-northwest 8-12 mph in the evening, becoming light downslope/downcanyon.

Ridgetop.....North-northwest 8-12 mph in the evening, becoming east to southeast and easing to 2-4 mph.

CWR (>=0.10")....5%

LAL...6 (Scattered dry lightning)

Haines Index....4 (Low)

Outlook for Tuesday: RED FLAG WARNING TUESDAY. THUNDERSTORMS IMPLY GUSTY/ERRATIC WINDS.

Weather: Partly cloudy with isolated morning showers and thunderstorms...then scattered afternoon showers and thunderstorms (mix dry/wet).

High Temperature... 88-95 canyon bottom, 75-80 mid-upper slopes (2-4 degrees cooler than Monday)

Min RH..... 20-25% canyon bottoms, 28-35% high elevations (2-4 percent wetter than Monday)

20-FOOT WINDS:

Canyons..... Light morning winds, becoming upslope/upcanyon 6-9 mph early in the afternoon.

Ridgetop..... East to South winds 3-6 mph through early afternoon, becoming south-southwest 8-12 mph with gusts to 18 mph by late afternoon.

CWR (>=0.10")....5%

LAL....3 (Scattered lightning)

Haines Index....3 (Very Low)

EXTENDED OUTLOOK for Wednesday through Friday:

Residual moisture and instability will provide for isolated lightning storm chances for Wednesday. Dry conditions returning Thursday and Friday.

Wednesday...Partly cloudy and cooler. Isolated showers and thunderstorms. Lows 55-61. Highs 83-88 canyon bottom, 72-77 mid-upper slopes. Min RH 24-30% canyon bottoms, 32-38% ridges. Light and variable morning wind, becoming west-northwest 8-12 mph in the afternoon.

Thursday and Friday...Mostly sunny and drier. Lows 55-61. Highs 86-91 canyon bottom, 74-79 mid-upper slopes. Min RH 15-20% canyon bottoms, 22-28% ridges. Light morning winds becoming north-northwest 8-12 mph each afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 19	TYPE OF FIRE: Wildland Fire
FIRE NAME: Beaver	OPERATIONAL PERIOD: 0600-1800, August 11, 2014
DATE ISSUED: August 10, 2014	TIME ISSUED: 2100
UNIT: Klamath NF	SIGNED: /s/ Brian Ebert, FBAN(t)

INPUTS

WEATHER SUMMARY: ***See Attached Fire Weather Forecast***

Discussion: ***RED FLAG WARNING – ABUNDANT LIGHTNING W/DRY FUELS GUSTY OUTFLOW WINDS***

A weak low near the Bay Area will draw upper level monsoonal moisture into northwest California through Tuesday, posing the possibility of significant lightning early this week.

Max Temp: 90-96° canyon bottom, 78-84° mid-upper slopes

Min RH: 18-24% canyon bottom, 25-31% high elevations

LAL: 6 (Scattered Dry Lightning)

20 ft. Winds (Canyons) Light in the morning, becoming upslope/upcanyon 6-9 mph early this afternoon.

(Ridgetop) S-SE to E 4-8 mph into early afternoon, increasing to 6-12 mph by late afternoon with gusts to 20 mph.

FIRE BEHAVIOR

GENERAL

Critical dry fuel conditions, Energy Release Components above 90th percentile weather conditions Oak Knoll ERC: 71
1000 hour fuel moisture < 7% (Down 1% from 7/15) Live Fuel Moisture < 78% (Down 20% from 7/15).

The inversion could lift as early as 1200, watch for *fire behavior indicators that inversion is lifting: increased flame lengths, single tree and group tree torching, increased rates of spread.*

Rates of spread under the inversion in the timber-1-5 ch/hr with 5 foot flame lengths. Brush: up to 13 ch/hr with 4 foot flame lengths. Upslope Rates of spread once inversion breaks: Timber- up to 15 ch/hr with 10' flame lengths. Brush: 50 ch/hr with 8 foot flame lengths. Crown fire activity will increase spread rates up to 50 ch/hr. *Increased rates of spread with any outflow winds from thunderstorms.* As soon as the inversion breaks, opportunities for direct line construction become challenging due to flame lengths, high intensities and spotting outside the main fire.

Probability of Ignition of 60%

Spot Distance: 0.4 miles.

SPECIFIC FIRE BEHAVIOR

West Flank: Fire has reached Buckhorn Ridge; green islands remain in Doggett Gulch as spotting ahead of the main fire occurred and will spread upslope in aligned drainages toward Deer Creek Camp. Spotting will be an issue with receptive fuel beds and column projected to be transported to the NW over any control lines. Significant fuel loads on the west side of Buckhorn Ridge will increase fire activity. Any fires on the west side of Buckhorn Ridge will continue to back downslope with uphill runs in areas align with the wind and the drainage.

South Flank: Unburned fuel West of the 12 road will remain an issue today as fire spreads downslope in Doggett Creek toward Highway 96. Shrubs, light flashy fuels with oak/pine overstory and the updrainage winds along the Klamath may produce increased spread rates; especially lateral spread.

North Flank: Christmas Tree Ridge continues smolder and burn down in heavier fuels. Pay attention to wind direction and strength especially as fire weakened trees may fall with increased wind speeds and jeopardize lines.

East Flank: Fish Trap Creek remain a concern with rollout and potential for upslope winds in the drainage which will spread toward indirect lines. Erratic winds within the drainage will promote spot fires. Fire will continue to smolder and burn down adjacent to control lines. SE wind flow will favor holding forces. Watch out for outflow winds which could impact control lines.

AIR OPERATIONS

Expect poor visibility due to the inversion/smoke present in the fire area. SE wind flow will impact potential use of the Heliwell on Division G/K. Visibility should be best after 1400 on the East flank. Aircraft use may be limited in the morning due to smoke filled drainages. Watch for Thunderstorm development and associated gusty winds. Sunrise: 06:15 Sunset: 20:16

SAFETY

Thunderstorms can produce strong winds; ensure safety zones and escape routes are identified with anticipated fire behavior potential. Watch out for any new fire starts adjacent to the fire area as these can quickly impact control lines.

Watch out for fire weakened trees and snags that may fall with increased winds around thunderstorm activities. With intense burning conditions in ground fuels, root systems can be comprised.

Post lookouts to monitor fire activity and weather conditions. Fire activity has increased each day and conditions with no relief in-sight. Spot fires and rapid rates of spread should be expected.

Fuels and Fire Behavior Advisory

Northern California

August 6, 2014

Subject: Long term drought conditions along with hot and dry weather have led to critically low live and dead fuel moistures. Weather and fuels conditions are contributing to very active to extreme fire behavior in Northern California.

Discussion: The extremely dry and warm conditions of April through July combined with the extreme to exceptional drought conditions have led to critically low live and dead fuel moistures. Numerous large fires experienced extreme fire behavior and rapid growth during the first 4 days of August. Areas receiving precipitation on August 4th and 5th are expected to rebound quickly to extreme conditions.

Difference from normal conditions: Live and dead fuel moistures are approximately 6 weeks ahead of normal and typical of early to mid-September. Extreme to exceptional drought, the highest levels on the Drought Monitor system now cover nearly the entire North state. Live fuel moistures never reached typical seasonal maximums and are approaching or have already reached critical levels. All timelag classes of dead fuels are at moisture levels that allow for easy ignition and rapid spread.

Concerns to Firefighters:

- **Expect fires to ignite easier and spread faster due to low live and dead fuel moistures.** Recent fires have shown almost complete consumption of large dead fuels. **Expect higher probability of ignition and increased spotting** due to increased amount of receptive and available surface and aerial fuels.
- **Current Energy Release Component (ERC) values are reaching maximum seasonal values or setting record highs** for almost all Predictive Service Areas (PSA). ERC is a good indicator of seasonal drying trends. **Anticipate increased spread rates and active night time burning.**
- Anticipate higher resistance to control in all fuel types. **When critical fire weather conditions exist expect very active to extreme fire behavior.**

Mitigation Measures:

- Firefighters should acknowledge and prepare for fire growth and fire behavior that may exceed anything they have experienced before due to the extreme drought. **Normal strategies and tactics may need to be adjusted to account for the drought factor.** Suppression actions need to be based on good anchor points, lookouts, communications, escape routes, and safety zones.
- Local and incoming fire personnel need to be aware that fire behavior is exceeding normal expectations for this time of the year. **Local briefings need to highlight specific fire environment conditions including local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures, and special fuel conditions such as mortality, Sudden Oak Death and frost killed brush, etc.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**
- Review the most current Northern California 7-day Significant Fire Potential along with Daily, Monthly and Seasonal Outlooks at: Predictive Services Outlooks & Fire Potential

Area of Concern: The area of concern is all of Northern California. A map showing the areas of concern described in this advisory can be found at: National Fuels & Fire Behavior Advisories

INCIDENT RISK ANALYSIS

Beaver CA-KNF-005497

(ICS 215A) Day Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	THUNDERSTORMS	<ul style="list-style-type: none"> • Follow the thunderstorm safety procedures in the IRPG p.21 • Observe the 30/30 rule • Take shelter in vehicles if possible • If outdoors, find low spot away from tall trees.
ALL	RED FLAG WARNING	<ul style="list-style-type: none"> • Gusty and erratic winds • Low relative humidity. • Take weather observations to monitor changing conditions.
ALL	DRY FUEL CONDITIONS	<ul style="list-style-type: none"> • Establish and maintain LCES • Anticipate intense burning and rapid rates of spread • Watch for spot fires • Allow for adequate time to escape routes and safety zones
DIVS L, U, W	MOP-UP	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG) • Use all required PPE, including eye protection • Maintain proper spacing and overhead clearance • Be alert for hazard trees, stump holes, and ash pits • Minimize exposure to smoke, and rotate personnel into clean air when practical • Evaluate unburned islands/increase situational awareness
DIVS A, V	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection; IRPG pages 12-16 • Look for propane tanks and other hazardous materials
ALL	TRAFFIC & DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques • Use spotters when backing • Always use headlights • Use warning lights when working on roads or traveling in smoke • Maintain safe following distance from vehicles in front of you
DIVS G/K, Q/T	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> • Establish and maintain LCES. • If possible burn out or backfire as line construction progresses.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow " Aviation Watch-Out Situations" on page 44, IRPG • Don't plan on air resources for medical transport or resupply • Refer to page 57, IRPG for directing bucket drops • Ensure positive communication with all air resources
ALL	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	<ul style="list-style-type: none"> • Drink 2 to 1 water to sports drinks. • Take frequent breaks, minimum of 10 minutes every hour • Recognize symptoms of HEAT RELATED ILLNESS which include <ul style="list-style-type: none"> - Lack of energy, Headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating
DIVS A, C, G/K, Q/T, U, V	FIRING OPERATIONS	<ul style="list-style-type: none"> • A written guideline shall be prepared and approved for burning operations. • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Qualified personnel for all assignments. Trainees to have qualified trainers. • Utilize Risk Mgmt. Process (IRPG p. 1) for implementing the plan. • Required PPE to be worn by all personnel involved. • Establish LCES prior to implementing burning operations (IRPG p. 6).
DIVS A, C, G/K, Q/T, U	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators • Use hand signals if other communications are unavailable • Maintain a 50'-100' exclusion area around equipment • Use a spotter when backing
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking • Don't work above any personnel • Evaluate necessity to send personnel in areas with limited access
ALL	HAZARD TREES	<ul style="list-style-type: none"> • Follow "Hazard Tree Safety" guidelines; IRPG pages 22 • Post lookouts, or use a spotter in mop-up areas with personnel • Don't park vehicles or take breaks in high concentrations of hazard trees. • Establish trigger points for disengagement during high wind events"

SAFETY MESSAGE

DECISION MAKING

Effective decision making includes; assessing the problem, verifying information, identifying solutions, anticipating consequences of decisions, informing others of the decision and rational, evaluating decisions, and weighing the probability of success.

FACTORS THAT PROMOTE GOOD DECISION MAKING

- INFORMATION AVAILABLE
- TIME
- EXPERIENCE
- SITUATIONAL AWARENESS
- RISK/BENEFIT ASSESSMENT

BARRIERS TO GOOD DECISION MAKING

- TIME
- INACCURATE INFORMATION
- PRESSURE TO PERFORM
- ASSUMPTIONS
- POOR COMMUNICATIONS

MAJOR HAZARDS AND RISKS

RED FLAG WARNING DRY FUELS SPOT FIRES	INDIRECT FIRELINE HAZARD TREES AIRCRAFT OPERATIONS	HEAVY EQUIPMENT THUNDERSTORMS DEHYDRATION
---	--	---

Be sure all elements of your safety plan are in place prior to engagement

Weather Observations

- Communicate the fire weather and fire behavior forecast to your personnel
- Take local weather observations at your place of work
- Communicate the local weather to all of your personnel
- Establish decision points to monitor weather issues that can compromise your safety

Communication Responsibilities

- All Firefighters have five communication responsibilities
- ***Briefings** – All resources require briefings. Use briefing checklist in pocket guide.
 - ***Debrief Actions** – as necessary. Use pocket guide After Action Review to stimulate discussion and provide guidance.
 - ***Communicate Hazards to Others** –
 - ***Acknowledge messages** –
 - ***Ask if you do not know** –Ask questions in unfamiliar situations. The only dumb question is the one you did not ask.
- The greatest problem with communication is the illusion that it has been achieved*

ICS 206 WF	IAP Page		

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		Describe the injury (Ex: Broken leg with bleeding)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
Incident Commander		Name of IC
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: What caused the injury?			
Lat/Long (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24'			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE .
<input type="checkbox"/> PRIORITY-YELLOW Serious injury or illness. Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED .
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.	Non-Emergency. Evacuation considered. Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport:

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. EVACUATION LOCATION:

Lat/Long (Datum WGS84) EX: N 40 42.45' x W 123 03.24'	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

8. CONTINGENCY:

Aerial Ignition PSD	Have 503 ready to PSD	As Needed		

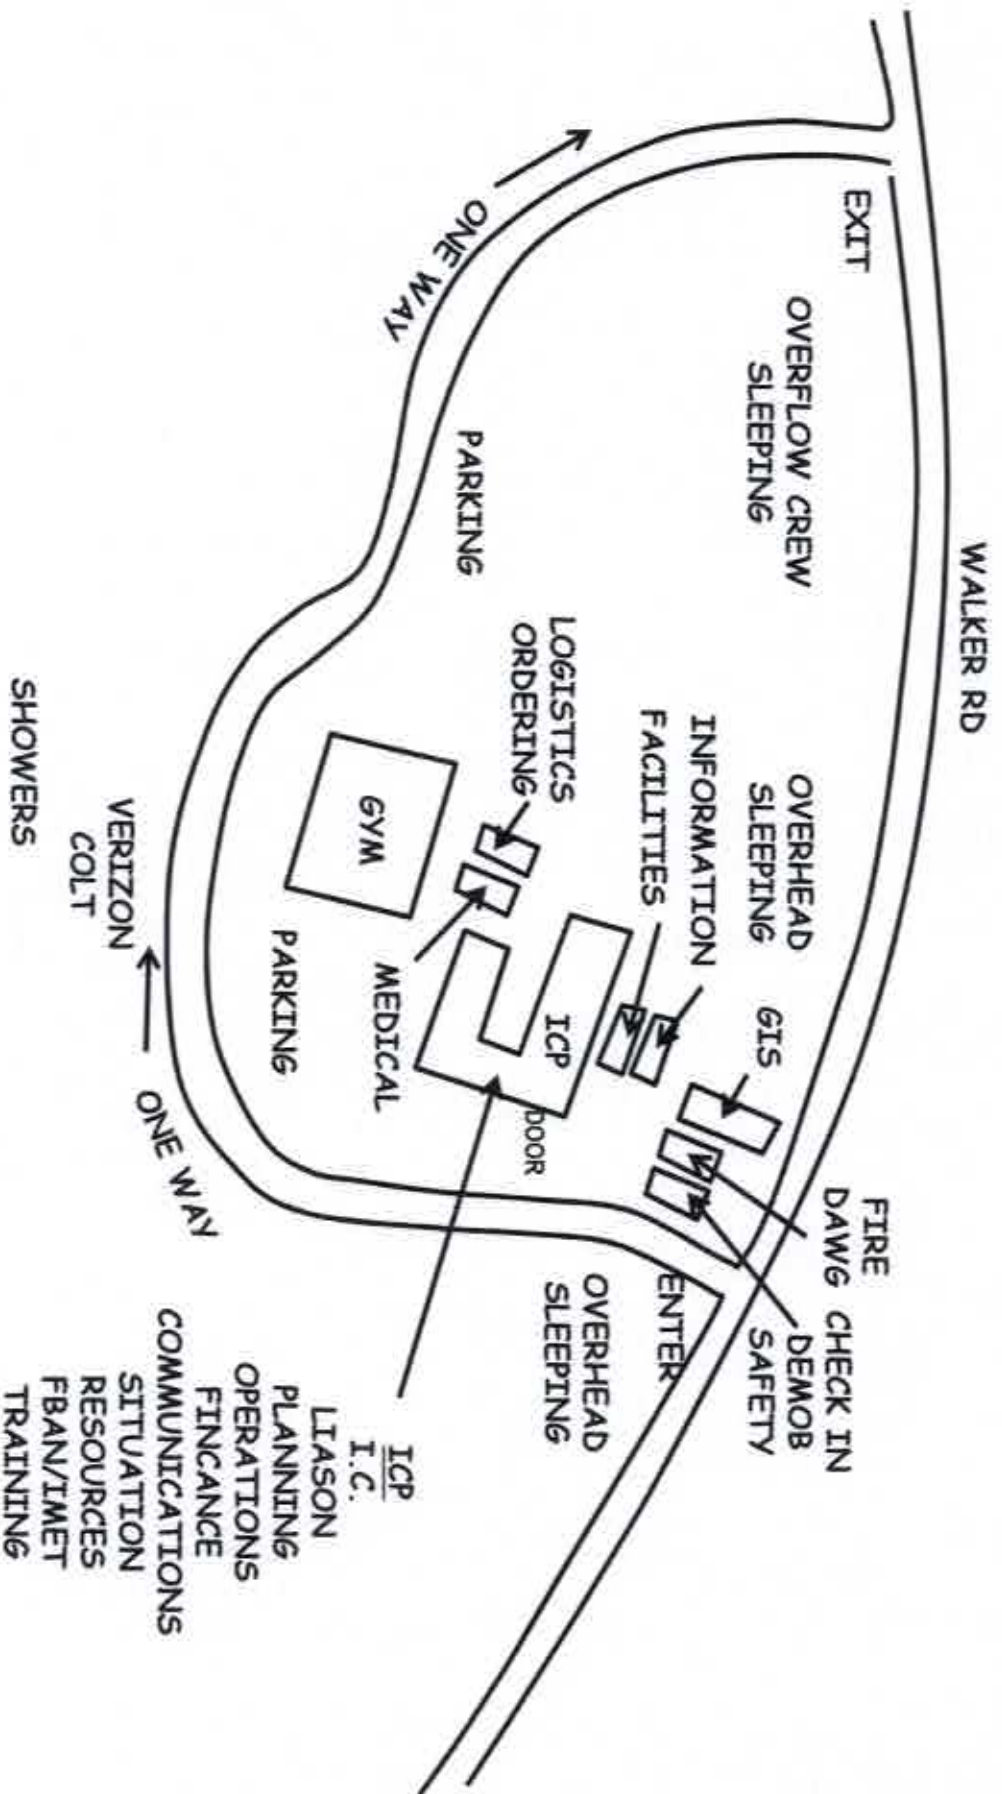

Incident Training Program

Trainee/ Mentor Activities

The following contains information for both trainee and trainer/ evaluator regarding the Incident Training Program. The information is intended to assist you in planning your incident activities.

1. Trainee and Mentor/ Evaluator register with the Training Specialist (TNSP)
2. It is only necessary to follow up with the TNSP during your assignment if you have any significant issues... ie: Changes in assignment/trainer, problems with the assignment etc.
3. The trainer and evaluator must "close-out" with the TNSP prior to DEMOB. The close out process involves:
 - The Trainer completing an Individual Performance Evaluation (ICS 225 or 226)
 - The Trainee will complete an Exit Interview form. Forms are available at the TNSP desk.
 - The evaluator should have all work completed in the position task book at the time the training assignment close-out including a recommendation as to the outcome of the assignment, ie; recommend certification, needs more assignments.
4. If you reach a point that as much work has been done in the position task book as possible, on this incident, you may perform the close-out process with the TNSP saving you time and a potential wait in line at time of DEMOB.
5. Pay close attention to TNSP IAP messages and briefing announcements concerning time lines and issues regarding the Incident Training Program.
