INCIDENT OBJECTIVES	1. Incident Name	2. Date Prepared	3. Time Prepared		
ICS 202	Salmon River Complex	08/17/2013	2000		
4. Operational Period					
Sunday August 18, 2013 DAY SHIFT 0600-2200 NIGHT SHIFT 2200-0600					
5. General Control Objectives for the Incident (include alternatives)					
MANAGEMENT OBJECTIVES <ul style="list-style-type: none"> • Provide for safety of incident personnel and the public. • Provide for protection of private lands and infrastructure within the Salmon River corridor and adjacent communities. • Provide accurate and effective fire information to the public, residents and cooperators. • Minimize impacts to natural and cultural resources by utilizing Resource Advisors. 					
OPERATIONAL OBJECTIVES <ul style="list-style-type: none"> • Keep fire within existing containment lines. • Provide initial attack for new fire starts on the Salmon/Scott River Ranger District north of North Fork Salmon River and within the District boundary. 					
6. General Weather					
<p>Very warm and dry conditions will occur in the fire area today with a northeasterly flow on the ridges. The northeast winds on the upper slopes will be up to 10 mph with gusts to 15 mph and the usual upslope/upcanyonwinds along the North Fork of the Salmon River. Temperatures will be into the 90s with humidity values down into the mid-teens. Cumulus clouds will be around today.</p>					
7. Resource Protection Guidelines					
<ul style="list-style-type: none"> • Follow national policy for retardant avoidance. • Apply fire as needed to maintain even backing down slope so the fire is not susceptible to long uphill runs. • Map and document all areas where burn out was implemented. • Back haul all trash to Idlewild. • Ensure screens and foot valves are used when drafting. • Ensure appropriate approvals are in place for use of helicopters and mechanized equipment for fire related work in the wilderness. • Utilize resource advisors as needed to manage sensitive resource locations.

Fire Weather Forecast

FORECAST NO: 13

NAME OF FIRE: Salmon River Complex

PREDICTION FOR: 0600 Sun-0600 Mon

UNIT: Klamath NF

SHIFT DATE: Sun Aug 18, 2013

SIGNED: *Bar Wull* *Har Keena (T)*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 8/17/13

WEATHER DISCUSSION: A hot and dry weather pattern is developing over the fire. Recoveries this morning should trend 10 to 20 percent lower than yesterday. Smoke should continue through the day under an inversion which will weaken some by 12 pm. Temperatures will be in the upper 90s at Sawyer's Bar today with afternoon humidities trending 5 to 10 percent lower than yesterday. Dry northeast winds will affect most of the ridges while the rest of the fire continues to experience slope and valley-driven winds. Humidity recoveries tonight will trend lower yet again.

Weather Forecast for Sunday: Drier and hotter. Smoke will continue to affect the fire landscape.

TEMPERATURES: High 80-87 above 4500 feet and 94-98 along Sawyers Bar Road.

HUMIDITY: Trending lower with afternoon minimum humidities 12-18% at lower elevations below 3000 feet and 18-28% above 4500 feet.

20 FT WINDS:

RIDGETOP – Northeast 5-10 mph with gusts to 15 mph Div B, E, M, S and T. Winds likely strongest in the morning.

SLOPE/VALLEY – East 4-8 mph through 11 am then upcanyon/westerly 3-6 mph, increasing to 4-8 mph with gusts to 12 mph 2pm-8pm.

HAINES INDEX: 5 (Moderate) **LAL:** 1 **CWR:** 0%

STABILITY/INVERSION: Inversion through 12 pm...then weakening.

Sunday Night: Smoke under the inversion...mostly clear above 5000 feet.

TEMPERATURES: Overnight lows 61-66.

HUMIDITY: Humidity 22-32% at 6 pm Div B and T along Tanner Ridge...rising to around 45% by early Monday morning. The lowest recoveries are expected to be 30% at the highest elevations of the fire. The highest recoveries are expected along Sawyer's Bar road, reaching 50% by morning.

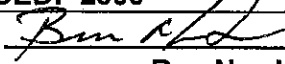

20 FT WINDS:

RIDGETOP – Northeast 5 to 10 mph through 9 pm then East 3-5 mph overnight.

SLOPE/VALLEY – West winds 4 to 8 mph through 9 pm then east winds 4-8 mph overnight.
LAL: 1 **CWR:** 0%

Extended Forecast: Even hotter temperatures are expected on Monday, while dry conditions continue for most of the day. **A Fire Weather Watch has been issued for Siskiyou County for Monday afternoon through Wednesday for abundant lightning with dry fuels.** A mix of wet and dry thunderstorms is possible Monday while storms will trend wetter Tuesday and Wednesday. Humidities will increase late Monday into Wednesday, temperatures will decrease, and winds will shift to a more westerly direction across the fire.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 15	TYPE OF FIRE: Wildland Fire
FIRE NAME: Salmon River Complex	OPERATIONAL PERIOD: 8/18 0600-0600
DATE ISSUED: 8/17	TIME ISSUED: 2000
UNIT: Klamath NF	SIGNED:  Ben Newburn

INPUTS

WEATHER SUMMARY: Very warm and dry conditions will occur in the fire area today with a northeasterly flow on the ridges. The northeast winds on the upper slopes will be up to 10 mph with gusts to 15 mph and the usual upslope/upcanyon winds along the North Fork of the Salmon River. Temperatures will be into the 90s with humidity values down into the mid-teens. Cumulus clouds will be around today with a Haines Index of 5 indicating the potential for good mixing conditions.

OUTPUTS

GENERAL: The dry weather associated with the northeasterly winds will make fuels that much more receptive with fine fuel moisture as low as 3% and P(ig) up to 90%. Combined with clearing conditions allowing for more radiant heating from the sun expect fire activity to increase. Even backing fire will be more aggressive with continued isolated torching. With the dry conditions leading to fuels being highly receptive spotting will be a concern where heat remains near control lines. Expect lingering fire to show itself today and continued consumption at an accelerated pace.

SPECIFIC:

Branch I: Unburned islands will carry fire today as the various flanks of fire come together well interior of the lines. Fire activity along the Sawyers Bar Road in Division Alpha will diminish quickly as the light fuel loading consumes down but rolling material from further up the slope will still threaten to cross the road. Elsewhere in the branch fire behavior near containment lines will be limited to large diameter fuels and stumps that have not consumed or seen mop-up.

Branch III: Activity will be limited to spread interior of control lines throughout the branch with the most active areas being in Division Tango where a large amount of unburned fuels remain. The northeast wind in the higher elevations will test control lines near Tanner Peak. Backing and flanking on the east side of Jackass Gulch will be observed as fire spreads closer to the drainage bottom with 2-4 foot flame lengths and isolated single tree torching. The dry conditions will allow for increased fire behavior around Tanner Peak and north through the bowl at the top of Jackass Gulch. Expect to see the brush become more active under these drier conditions but the northeast flow at the ridge top will help push the fire back into the black as it reaches the top.

Night Branch: The dry conditions during the day will not relax into the evening with poor humidity recovery overnight. Expect 1-hr fuel moistures to stay below 10% into the early morning hours allowing for fire to continue to spread slowly on its own. Interior islands will continue to carry fire well into the shift making themselves visible on the hillside. Fire will keep on to trying to back down into Jackass Gulch from the Tanner Line through the night with more activity than previous shifts.

Portable RAWS in Div B Rx: 171.5000 Tx: 172.4000 Tx Tone: 156.7 Key Up Code: 5553

AIR OPERATIONS

Conditions will clearer after lunch time with clear air at the higher elevations but a thick haze will persist in lower elevations along the river. The northeast winds will be gusty making for rough conditions while flying.

SAFETY

Watch for complacency with your actions and remain vigilant around areas with active fire and those that have already burnt. Don't let holding and mop-up activities lull you into inattentiveness. Take the opportunity to review the Common Denominators of Fire Behavior on Tragedy Fires (IRPG pg 4).

SAFETY MESSAGE

Salmon Complex

August 18, 2013

“A MOMENT OF SAFETY CAN LAST A LIFETIME.”

- **VERY HOT TEMPS** Predicted today (Over 100 degrees). Start your crews hydrating early and often.
- **DRIVE DEFENSIVELY.....lights on.... WATCH OUT FOR THE OTHER GUY**
- **EXPECT THE UNEXPECTED** when driving. Drive slowly, use relief drivers when available. Use back-up guides.
- **COMPLACENCY:** The fire still has potential..... Maintain your Situational Awareness
- Take care of your feet and they will take care of you. Treat hot spots on your feet before they become blisters. Utilize line EMTs and Med Unit in preventive and post injury/illness needs.
- Be alert for signs of **FATIGUE** in yourself and those you work with. Take periodic breaks, get plenty of sleep, and eat well balanced meals.

Watch Out Situation of the Shift

17.TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

Symptoms & Signs of Heat Illness

Heat Exhaustion: Victim will have cool, clammy skin; pale coloring; feel weak, dizzy and/or nauseous.

Treatment – Have individual sit in shade or cool area; administer fluids; loosen clothing and assure rest.

Heat Stroke: This is a medical emergency!!

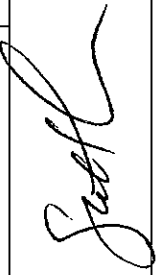

Victim will hot, dry, red skin and possible convulsions. These symptoms can progress to unconsciousness and death!

Treatment – Immediately cool individual's body by pouring water over them, especially the head and upper body. Contact the medical unit. Monitor the victim and provide whatever medical support necessary. Placing ice around the neck, groin and armpits can help speed the cool down.

“TRUST SAFETY, NOT LUCK.”

Doug McKelvey SOF2 August 17, 2013

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor to contact Division Supervisor/Operations with patient complaint/condition and location.

Division Supervisor/Operations contacts communications:

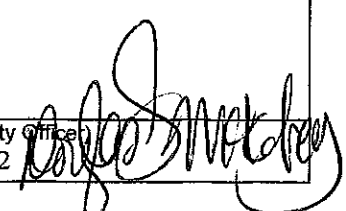

- Division Supervisor/Operations to use "injury or incident communication protocol" on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications contacts Medical Unit Leader on Command channel or (949)812-8695
- Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan
 4. Notify Safety, Logistics and Operations
 5. Contact YICC for notification of emergency. (530)842-3515

CAMP MEDICAL EMERGENCY:

Notify Communications of camp emergency

Communications contacts Medical Unit Leader (949)812-8695 with patient complaint/condition and location.

- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
- Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: Ambulance Helicopter Vehicle

Patient Stable or Unstable? _____

Location _____

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

LOC _____ Resp. _____ Pulse _____ BP _____ Weight _____

Injury _____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	Disoriented Chest Pain or Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

Day/Night approved Medivac Sites

H-1	Forks of Salmon	N 41 15.60 x W 123 19.66
H-2	Sawyers Bar	N 41 17.84 x W 123 07.82
H-3	Idlewild Camp	N 41 19.61 x W 123 03.78

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with Ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.
