

**SALMON RIVER
COMPLEX**

CA-KNF-005561

TUESDAY

August 20, 2013

Day 0600-2200

Night 2200 – 0600

0600 Briefing at White's Gulch

0700 Radio Briefing for Spike

1800 Night Briefing at White's Gulch

1800 Planning Meeting at Etna ICP

INCIDENT OBJECTIVES	1. Incident Name	2. Date Prepared	3. Time Prepared		
ICS 202	Salmon River Complex	08/19/2013	2000		
4. Operational Period					
Tuesday August 20, 2013		DAY SHIFT 0600-2200	NIGHT SHIFT 2200-0600		
5. General Control Objectives for the Incident (include alternatives)					
MANAGEMENT OBJECTIVES					
<ul style="list-style-type: none"> • Provide for safety of incident personnel and the public. • Provide for protection of private lands and infrastructure within the Salmon River corridor and adjacent communities. • Provide accurate and effective fire information to the public, residents and cooperators. • Minimize impacts to natural and cultural resources by utilizing Resource Advisors. 					
OPERATIONAL OBJECTIVES					
<ul style="list-style-type: none"> • Keep fire North of North Fork Salmon River from Robinson Flat to Forks of the Salmon. • Keep fire South of the North Fork Salmon River from Lost Lake to Mule Bridge. • Keep fire East of Yellow Jacket Ridge north towards Morehouse Meadows. • Keep fire West of Mule Bridge and the 41N37 Road. • Provide initial attack for new fire starts on the Salmon/Scott River Ranger District north of North Fork Salmon River and within the District boundary. 					
6. General Weather					
7. Resource Protection Guidelines					
<ul style="list-style-type: none"> • Follow national policy for retardant avoidance. • Apply fire as needed to maintain even backing down slope so the fire is not susceptible to long uphill runs. • Map and document all areas where burn out was implemented. • Back haul all trash to Idlewild. • Ensure screens and foot valves are used when drafting. • Ensure appropriate approvals are in place for use of helicopters and mechanized equipment for fire related work in the wilderness. • Utilize resource advisors as needed to manage sensitive resource locations.

Fire Weather Forecast

FORECAST NO: 15

NAME OF FIRE: Salmon River Complex

PREDICTION FOR: 0600 Tue-0600 Wed

UNIT: Klamath NF

SHIFT DATE: Tue Aug 20, 2013

SIGNED: *Pa Walth*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 8/19/13

...Red Flag Warning in effect until 5 am Thursday for abundant lightning and dry fuels...

WEATHER DISCUSSION: After triple digit heat the last two days temperatures will drop a few degrees as upper level clouds approach the region. However, expect another hot and dry day across the fire with any inversion lifting by midday or early afternoon. The main feature to watch will be increasing cumulus clouds to the south and east of the fire. With less smoke, lookouts should provide a good set of eyes to watch as any storms approach. The main impact from any storms will be possible new starts and general thunderstorm safety for firefighters. In general storms look dry with less than a tenth of an inch near any cells and light winds aloft keeping outflow winds under 30 mph. Any activity will likely fire after 3pm and end by 8 pm. Should storms not develop expect normal afternoon up-canyon winds along Sawyers Bar Road with gusts 15 -20 mph while ridge winds will turn Southwest around 10 mph.

Weather Forecast for Tuesday: Sunny and warm through early afternoon then cumulus clouds increasing from the south and east that will bring a 20% chance of thunderstorms by afternoon.

TEMPERATURES: High 80-90 above 4500 feet and 90-99 along Sawyers Bar Road.

HUMIDITY: Trending slightly wetter with afternoon minimum humidities 15-24% at lower elevations below 3000 feet and 20-30% above 4500 feet.

20 FT WINDS:

RIDGETOP – Northeast 5-10 mph with gusts to 15 mph in the morning ...turning South by midday then Westerly in the afternoon **but erratic and gusty near any thunderstorms.**

SLOPE/VALLEY – East 4-8 mph through 10 am then upcanyon/westerly 3-6 mph, increasing to 6-12 mph with gusts to 14-18 mph 2 pm - 8 pm.

HAINES INDEX: 5 (Moderate) **LAL:** 2 early then 3 afternoon and early evening **CWR:** 5%

STABILITY/INVERSION: Inversion through midday then breaking by early afternoon.

Tuesday Night: A 20-30% chance of evening thunderstorms.... then mostly clear.

TEMPERATURES: Overnight lows 57-64.

HUMIDITY: Humidity 22-32% at 6 pm across the fire landscape...increasing to 50% by morning above 4500 feet. Higher overnight recoveries of 70% are expected at lower elevations near the river valley.

20 FT WINDS:

RIDGETOP – West 5 to 10 mph through 9 pm then Northeast 4-8 mph overnight.

SLOPE/VALLEY – West winds 5 to 10 mph through 9 pm then East winds 3-6 mph overnight.

LAL: 1 **CWR:** 0%

Extended Forecast: Red Flag Warning continues with a better chance of more storms Weds afternoon and then possibly wetter storms with cooler temperatures and higher humidity by Thursday afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 17	TYPE OF FIRE: Wildland Fire
FIRE NAME: Salmon River Complex	OPERATIONAL PERIOD: 8/20-21 0600-0600
DATE ISSUED: 8/19	TIME ISSUED: 2000
UNIT: Klamath NF	SIGNED: <i>Is! Daniel J. Felix</i> Dan Felix FBAN BDF

INPUTS

WEATHER SUMMARY: A hot, dry pattern persists over the fire through the period with poor humidity recovery beginning the day at higher elevations, but will moderate slightly. **A RED FLAG WARNING IS IN EFFECT FOR THUNDERSTORMS AND GUSTY OUTFLOW WINDS.** Temperatures are expected to reach 95 along the river and humidity values will be down in the teens. Lingering smoke throughout the day will limit visibility. Increasing cumulus in the afternoon could produce a thunderstorm around the fire but may stay to the east.

OUTPUTS

GENERAL: Another day of dry conditions will bring any remaining fire to life if undetected spots or unburned fuels interior exist expect them to show themselves. Fuels will readily consume down assisting with the mop-up and control efforts.

New IAs or Escape: Be aware that fuels are readily available so if fire does get in a position with the aid of slope or wind it will burn actively and will likely outpace resources without support from aircraft or equipment, this is particularly important for those tasked with IA responsibility in the fire area.

SPECIFIC:

Branch I: Activity will be limited to unburned islands interior of control lines. Heat is likely to be found in larger diameter fuels, stumps and ground fuels that haven't consumed. Once again, rolling material will be a factor for Division Alpha with the chance to spread fire across Sawyers Bar Road. Mop-up operations combined with continued consumption of fuels will help to limit the potential of fire escaping the existing control lines.

Branch III: Fire behavior will be active today as it has spread into the Jackass drainage and has and will be expected to cross the drainage by spotting or rollout. The fire has reached the bottom of the slope; expect to see activity decrease drastically as it interacts with the riparian vegetation with much higher fuel moistures. In the higher elevations around Tanners Peak and north of H-4 fire activity will continue to creep and smolder with an occasional flare-up as it finds favorable fuels but it will have a difficult time making a concerted push to containment lines.

Night Branch: Expect poor humidity recovery with very low values as the shift starts. Activity will continue into the evening where fuels remain but the effects of suppression efforts near control lines will be realized with less heat showing. The threat for rolling material will persist through the evening, especially along Sawyers Bar Road.

Portable RAWS in Div B Rx: 171.5000 Tx: 172.4000 Tx Tone: 156.7 Key Up Code: 5553

AIR OPERATIONS

The inversion will weaken around noon with a residual haze in the afternoon. Expect enough visibility to fly but conditions will still be varying and will need re-evaluation throughout the shift. Moderate windspeeds will be present on the ridges and some instability will increase the potential for turbulence.

SAFETY

It is a transition day for both weather and the IMT's. Keep you heads up for both, Thunderstorms possibly moving in from the east and a new IMT moving in from the south. Help keep everyone around you informed of the current and developing situation.

The convention calls for frequency lists to show four digits after the decimal place followed by either an "N" or a "W" depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor to contact Division Supervisor/Operations with patient complaint/condition and location.

Division Supervisor/Operations contacts communications:

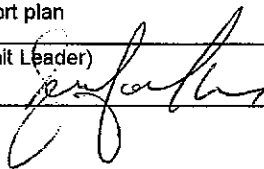

- Division Supervisor/Operations to use "injury or incident communication protocol" on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications contacts Medical Unit Leader on Command channel or (909) 762-9032
- Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan
 4. Notify Safety, Logistics and Operations
 5. Contact YICC for notification of emergency. (530) 842-3515

CAMP MEDICAL EMERGENCY:

Notify Communications of camp emergency

Communications contacts Medical Unit Leader (909) 762-9032 with patient complaint/condition and location.

- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
- Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan

Salmon River Complex

August 20, 2013

USE **L**OOKOUTS, **C**OMMUNICATIONS, **E**SCAPE ROUTES, **S**AFETY ZONE

Weather Environment

- Weather changes very fast with the bands of clouds, and thunderstorms coming through. Be alert and report build ups to your Division.
- Brief crews on Thunderstorm Safety (page 75 IRPG)
- Watch for erratic winds and sudden reversal of wind direction.

Fireline:

- **Hydration 3 Waters 1 Gaterade-DRINK! DRINK! DRINK!**
- Crew briefings must include LCES prior to engagement.
- Heat; Emphasize hydration, stress symptoms and treatment of heat exhaustion, stroke
- Dedicated lookouts, watch for roll out.
 - LCES Check list (page 14 IRPG)
 - Safety Zone Guidelines (page 7 IRPG)

Transportation issues:

- Public in and around the fire, watch for individuals watching the fire instead of the road!!!!
- Lights on, seatbelts, chock blocks.
- Travel distance to the Upper 40N51 West is over 1 hours, plan accordingly.
- Dusty roads and steep drop offs, slow down.

Prepared by: **Doug Elliot Safety Officer** Date: 7/19/2013
Kevin Southerland Safety Officer (T) 

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
County Road 1C01	DRIVING HAZARDS	<ul style="list-style-type: none"> • West end of 40N51 road is a long down hill grade. Conserve brakes and go slow to avoid brake fade. • 1C01 is a narrow windy road with two way traffic and is closed to the public, but open to residents & Butler Fire traffic. • Watch for open range cattle on roads, especially at night. • Be especially mindful at shift change. • Limit traffic to only those that must travel down it. • Drive defensively! Expect the unexpected around every curve. Rocks! • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. • Don't drive when fatigued. Adhere to agency driving SOPs.
ALL	MINES AND ADITS	<ul style="list-style-type: none"> • Abandoned mines are scattered throughout country the fire is in. • They can contain un-used explosives and other hazardous materials • If discovered, flag area and communicate location up through chain
ALL	FATIGUE	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. 2:1 work/rest. • Monitor incoming resources for level of fatigue.
ALL	SNAG HAZARDS	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.20). • Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. • Be especially alert around snags during wind events. • Check for hazard trees & "widow-makers" in sleeping areas prior to occupancy. • All personal must be a minimum of 2 ½ tree lengths away from falling ops.
ALL	STEEP SLOPES	<ul style="list-style-type: none"> • Watch for large rolling rocks • Watch your footing and take your time. • Consider slope and travel time in your LCES plan • Burning rolling material can ignite fuels below. • Post lookouts for rocks and fire.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Review "Severe Fire Behavior Potential" (IRPG p.78). • Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift. • Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate. • Adhere to 10 Std Orders, mitigate 18 situations. • Maintain Situational Awareness.
ALL	HYDRATION	<ul style="list-style-type: none"> • Its never too early to begin hydrating • Drinking water before, during and after shifts, up to 1.5 gal. per shift. • Be alert for signs of heat stress in yourself and others.
A / Z / W	STRUCTURE PROTECTION & HAZMAT ISSUES	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Wildland Urban Interface Firefighting (IRPG p.10) • Utilize Structure Triage Checklist (IRPG p.12). • Follow Structure Protection Tactics (IRPG p. 14).
T	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 6). • Establish adequate safety zones (IRPG p.7). • Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 2-3). • Utilize Risk Management Process (IRPG p.1).
ALL & Camp	Rattle Snakes	<ul style="list-style-type: none"> • This is rattle snake country. • Step on logs and rocks, not over them • Check out stumps or logs before sitting down. • Do not step or put your hands where you cannot see.
ALL	POISON OAK	<ul style="list-style-type: none"> • Poison Oak all over the line and camp • Learn to identify it and avoid • Wash hands often to avoid contact spread to rest of body. • Check with Medical for both preventative and treatment courses. • Exchange exposed PPE at supply for clean set.
ALL & Camp	Thunderstorms	<ul style="list-style-type: none"> • Thunderstorms are projected to move into the fire area. • Post lookouts when thunderstorm development is suspected. • Monitor the command frequency for warning from the IMET. • Seek refuge in vehicles or open spaces avoid peaks, ridges and trees. • Refer to IRPG page 19 for Thunderstorm Safety.
Salmon River Cmplx ICS 215a	DATE PREPARED: August 19, 2013	OPERATIONAL PERIOD Day Shift 08/20/13 Prepared by Doug Elliott and Kevin Southerland

CODE OF CONDUCT INCIDENT PERSONNEL

Each individual on this incident is responsible for:

- Being *ready and able* to perform their assigned duties effectively
- Conducting themselves in a manner that treats people with dignity, equity, courtesy, and respect
- Abiding by agency ethics and conduct regulations
- Reporting any harassment or other inappropriate behavior

Each individual on this incident has the right to:

- Work in an environment characterized by safe work practices
- Work in a fair and harassment free environment
- Say "No" to unwelcome advances or requests for favors
- File complaints or grievances through appropriate avenues

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- Illegal drug use
- Alcohol use
- Unsafe work practices and activities
- Discrimination
- Sexual harassment
- Fighting, threatening and abusive behaviors
- Other violations of USDA and Forest Service standards of conduct

Each firefighter is expected to be physically and mentally prepared to perform emergency duties at any time.

Failure to adhere to the Code of Conduct could result in dismissal from the incident, with notification to your home unit.

The public expects our best efforts; they see us as professionals in what we say and do. Let's continue to show them we are!

Human Resource Message

Hellos

As the Human Resource Specialists assigned to this incident, our role is to facilitate a positive work environment, which for us begins with "Hello"! A simple hello goes a long way toward establishing our human connection and how we relate to others. When we remain silent among strangers, we unwittingly reinforce the feeling of differences, which in turn builds walls that make it harder to recognize our similarities. This often leads to adverse consequences in a work environment.

Our role is also to be a focal point for informal resolution of issues and concerns. You may come to us with any question or concern about any aspect of your work environment while assigned to the incident. We are particularly committed to help assure resolution of issues as they arise, rather than waiting until after the incident is demobilized. High priority is given to resolving issues informally. If you are aware of inappropriate conduct, you have the right and the obligation to do something about it.

Come see us any time you have questions, concerns, or just want to chat.

A sense of humor is part of the art of leadership, of getting along with people, of getting things done. Dwight D. Eisenhower
