FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

Our fire will remain Fuels and topography driven. At present primary fire spread is from spot fires caused by rolling material and torching. East west aligned drainages have a high potential for sustained runs once the inversion breaks. Falling snags and rolling material will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire.

Expect rapid acceleration of fire behavior when the inversion lifts. The fire will go from smoldering and creeping to torching as soon as the sun hits the fuels.

Fire will remain active into the night until the RH recovers to 40%.

SPECIFIC:

Frying Pan

- Div. F&H fire progression will continue to the east, spotting has the potential to cross Grider Creek.
- Div. O&I fire progression will continue to the east, high probability both fires will merge.
- West end of the fire no forward progression expected.

Faulkstein

- Expect active backing fire in the areas where the fire has breached Marble Mt. ridge.
- East west drainages north of Rancheria Crk. have high potential for sustained runs.
- South end of the fire will continue to hold on the PCT ridge. Spots from torching will challenge containment.

Air Operations: Poor visibility has a high potential to limit air operations.

SAFETY:

As the inversion lifts, expect a rapid increase of fire behavior.

Steep country means rolling material, watch for spot fires below you!

Safety Message

August 29, 2014

Hazards we face:

- Changing Weather
- Holiday weekend
- Fire behavior
- A-game
- Traffic/ speeding
- Medical plan "A" plan "B"

Some possible mitigations could include:

- Stay current on weather conditions. IMET will monitor and announce on the radio if warranted as conditions change within the fire area
- Bigfoot festival in Happy Camp this Labor Day weekend; be aware of increased public traffic on roads and highways
- Believe the Weather & Fire Behavior Forecast. Alert others to changing conditions, winds, temperature and humidity, this applies to IA also
- Maintain vigilance of work surroundings, continue hazard assessment and control measures, make good decisions and evaluate situations
- Portions of this fire have narrow roads with steep drop offs, be alert to this! **SLOW DOWN!**, watch for the other person.
- We know plan "A" is in the IAP what is **YOUR** plan "B" if medical resources are already engaged?
- IF you need to smoke in base camp, do it on a road way, do not smoke around your sleeping area or go out in the brush, the last thing we want is a fire at base camp. The fuel beds are very receptive to ignition.

Happy Camp Complex Safety Officers: Doug Elliott & Bob Moore

To expedite processing, please avoid waiting until the day of demob to process a claim.

CACHE ITEM CLAIMS

Individuals responsible for or assigned government property are responsible to document loss or damage on the Property Loss or Damage Report, OF-289. The individual, supervisor and a witness must document facts and circumstances on the form in order to gain approval to repair or replace damaged property.

The Supply Unit Leader (SPUL) or Incident Agency Representative approves replacement requests for expendable cache items. If this equipment or supply is not available at the incident AND the requesting resource is being demobilized, an OF-315 Incident Replacement Requisition is completed and signed by the SPUL. An "S" number will be assigned by the incident to be used by the home unit.

NON CACHE ITEM CLAIMS

All non-cache items available through the cache (e.g. sleeping bags, tents, tools, sleeping pads) will be replaced with cache equivalent items. Replacement for normal wear and tear is through home unit project funds. Specialized equipment (non-cache and non-expendable) shall be documented on a resource order and must be appropriate to the incident position. For replacement with incident funds, the item must have been clearly damaged or destroyed on the incident.

The OF-289 will be used to request consideration for replacement or repair of these items. Once approved, the OF-289 will be used by the incident to issue an "S" number to be used by the home unit.

CLAIMS PROCESSING

The incident agency will review all potential claims for accuracy and completeness and forward to the appropriate adjudicating official. This includes forwarding employee claims to the employee's home unit, if different than the incident agency.
