**Weather Discussion:** Thermal trough will strengthen up the coast and move toward the incident this evening. Unfortunately, even the Easterly winds have not been enough to scour out the trapped smoke. Thus, expect more of the same today. Better heating of the surrounding areas will still bring the up canyon winds. Northwest winds arrive Friday as the thermal trough pushes east. A weak trough could swing by Monday/Tuesday but so far no rain expected.

**Weather Forecast For Today (Thursday):**

**Weather:** Warming and drying. Smoke stuck in most of the canyon bottoms.  
**Max Temperatures:** Canyons (1,200 ft) 88-98 °F, Ridges (5,000 ft) 81-85 °F  
**Min Humidity:** Canyons (1,200 ft) 8-13%, Ridges (5,000 ft) 15-19%  
**Winds (20 foot):**  
 Lower Slope/Canyons – Variable winds 0-2 mph becoming terrain driven 3-7g19 mph in the afternoon.  
 Upper Slope/Ridgetop – East 8-10 mph becoming variable 3-6 mph around 1200.  
**Haines Index (High Level, afternoon):** 5 (stability=2; moisture=3)  
**Stability/Inversion:** Weak Low Level instability. Inversion lifting 1200, but smoke remaining trapped. Afternoon Mixing Height 8,000 feet MSL.  
**Smoke Transport:** East around 9 mph becoming Variable 2-5 mph favoring NW around 1600.

### INPUTS

**WEATHER SUMMARY:** (Please see attached fire weather forecast)

**High Temperature:** 81-98° **Minimum temperature:** 50-66°

**Minimum RH:** 8-19% **Maximum RH:** 25-72%

**Winds (20'):** Day, Ridges east 8-10 mph becoming variable 3-6 around 1200. Night, variable 3-6 mph

*Red Flag Warning Today until 1000 Today for Wind and Low Humidity at Elevations Above 3000'*

*Fire Weather Watch in effect for Wind and Low Humidity from Thursday Evening through Friday Morning*

### GENERAL:

***POI: 80-90% Predicted ERC: 85 Predicted BI: 77 Live Fuel Moisture Brush: 80%***

Warming and drying today and smoke lingering in most of the canyon bottoms. Light east, then variable light winds in the forecast today. Smoke in the canyon bottoms will shade fuels and decrease fire behavior. Fire will continue to back under these conditions. Unburned islands within the fire perimeter will continue to consume.

If and when the smoke lifts, fire activity will increase. Fire movement will be influenced by the terrain driven winds, dry fuels, and topography.

As smoke lifts and the fuels become exposed to sunlight, the fire could become active including torching, and active crown fire especially when in alignment with the wind and slope. Moderate column growth is possible. Variable ridgetop winds in the afternoon means that spot fires could occur in any direction. Keep eyes on the direction of any developing column to anticipate a spotting direction. Expect spot fires up to 1 mile.

**Night Shift Personnel:** Fire behavior probably will not be as active as it has been the past two shifts as fuels are consuming. Conditions should be favorable for firing operations. Low RH recovery on the ridgetops will enable residual fuels to consume.

### SPECIFIC:

**Division Q, T, Z, D, F, G,H, J,K:** Minimal fire behavior anticipated

**Division L:** Spotfires from Monday are contained and were not producing much smoke. Islands on the west side of Scotts Bar Rd. will continue to consume. In the event of a spot fire east of Scott River the **ROS could be up to 1-25ch/r.**

**Division M and N:** Fire will continue to back north of Turk Lake. Spot fire south of Hummingbird Ck. will continue to spread.

**Division R:** Minimal fire activity expected.

**Division S:** Fuels from yesterday firing operation will continue to back into Kelsey Ck.

**Division O:** Fire will continue to move south and southeast

### AIR OPERATIONS

Smoke cover could limit air operations throughout the day

### SAFETY

Scout work areas for fire weakened trees

## **Happy Camp Complex**

September 11, 2014

USE **L**OOKOUTS, **C**OMMUNICATIONS, **E**SCAPE ROUTES, **S**AFETY ZONE  
**LCES IN PLACE EVERY TIME**

### **Weather Environment:**

**Red Flag Warning to 10:00 AM today.** VERY DRY WITH LOW LEVEL OFFSHORE FLOW AND A WARMING TREND OVER THE NEXT SEVERAL DAYS. THE PRIMARY CONCERN IS POOR RH RECOVERIES AND GUSTY WINDS OVER THE RIDGES

- Take weather observations, watch for trends share with all folks on your Division.

### **Fireline:**

#### **A piece of LCES**

**Lookout(s)** or scouts (roving lookouts) need to be in a position where both the objective hazard and the firefighter (s) can be seen. Lookouts must be trained to observe the wildland fire environment and to recognize and anticipate wildland fire behavior changes. Each situation determines the number of lookouts that are needed. Because of terrain, cover and fire size one lookout is normally not sufficient. The whole idea is when the objective hazard becomes a danger the lookout relays the information to the firefighter so they can reposition to the safety zone. Actually, each firefighter has the authority to warn others when they notice an objective hazard which becomes a threat to safety.

- Working under power lines a major concern..... Brief your crews.
- Snags and burned green trees—have now had a long time to burn and become unstable. Flag and avoid what you cannot drop.

### **Transportation issues:**

- HWY 96 is always a big concern **Watch for distracted drivers.**
- If you don't need to be on Scott River Rd stay off, lots of firefighters working right on the road. Use Highway 96 if heading to Happy Camp.
