INCIDENT OBJECTIVES	1. Incident Name	2. Date Prepared	3. Time Prepared		
ICS 202	Happy Camp Complex	9/23/2014	2200		
4. Operational Period					
Wednesday, September 24, 2014		DAY SHIFT 0600 - 1800 Hours			
5. General Control Objectives for the Incident (include alternatives)					
<p>MANAGEMENT OBJECTIVES:</p> <ul style="list-style-type: none"> - Provide for the safety of all responders and the public by utilizing nationally recognized risk management principles. - Maintain and enhance community and stakeholder relationships through accurate and timely dissemination of incident information, community and stakeholder meetings. - Minimize damage to natural and cultural resources by using resource advisors and cultural resource specialists. - Protect and minimize fire effects to residential structures, communities, infrastructure, private property and timber lands. - Support and coordinate initial attack within the Temporary Flight Restriction (TFR). - Manage costs commensurate with values at risk. - Assess and implement suppression repair. <p>CONTROL OBJECTIVES:</p> <p>Hold fire within existing containment lines and keep fire:</p> <ul style="list-style-type: none"> - South of the O'Neil Ridge west to Seiad Creek - East of Independence Creek - West of Scott River and Baldy Lookout South to Scott Bar Mountains - North of the line East from the North Fork Camp through Anthony Milne Camp to Man Eaten Lake 					
6. General Weather					
<ul style="list-style-type: none"> - <u>Weather Forecast for Wednesday</u>: Showers. Rain could be heavy at times. - <u>Weather Forecast for Wednesday Night</u>: Showers. Rain could be heavy at times. 					
7. General Safety Message					
<ul style="list-style-type: none"> - Use caution while driving on all roads. 					
8. Resource Protection Guidelines					
<ul style="list-style-type: none"> - Use MIST to preserve wilderness characteristics. - Avoid aerial retardant within 300 feet of wet areas and in areas with threatened, endangered, proposed, candidate or sensitive species. - Use screens on all drafting equipment. - Track and map daily, all tactical burning operations and turn into DIVS/ SIT unit.

Happy Camp Complex Weather Forecast

FORECAST NO: 43
PREDICTION FOR: Day/Night Shift
SHIFT DATE: Wednesday Sept 24, 2014
TIME AND DATE
FORECAST ISSUED: 2030 hrs. Sept 23, 2014

NAME OF FIRE: Happy Camp Complex
UNIT: CA-KNF
SIGNED: *[Signature]*
 David Shallenberger IMET(t)
 Rick Davis IMET

*** Flash Flood Watch Today ***

Weather Discussion: The strong cold front has begun to push inland as moderate to heavy rainfall will continue to overspread the area today and tonight. Southwest gusty winds will continue today through tonight. A prolonged period of rain is expected through Thursday. The total 36 hour rainfall total from this morning through Thursday afternoon is expected to be 1 to 2 inches across the incident area. Some flash flooding is possible if excessive rain falls over one area in a short amount of time or heavy rain falls over a burn scarred area. A cooling trend is expected with temperatures dropping into the 60s by Thursday and Friday.

Weather Forecast For Today (Wednesday):

Sunrise: 0701

Weather: Showers. Rain could be heavy at times.
Max Temperatures: Canyons (1,200 ft) 70-75 °F, Ridges (7,000 ft) 62-70 °F
Min Humidity: Canyons (1,200 ft) 45-50%, Ridges (7,000 ft) 50-55%
Winds (20 foot):
 Lower Slope/Canyons – Southwest 15-20 mph gusts to 28 mph.
 Upper Slope/Ridgetop – Southwest 15-20 mph gusts to 32 mph.
Haines Index (High Level, afternoon): 2 (stability=1; moisture=1)
Stability/Inversion: Weak instability. No radiation inversion. Mixing height 6,000 feet MSL.
Smoke Transport: Southwest around 20 mph.

Weather Forecast For Tonight (Wednesday Night):

Sunset: 1905

Weather: Showers. Rain could be heavy at times.
Min Temperatures: 50-57 F.
Max Humidity: Canyons (1,200 ft) 90-100%, Ridges (7,000 ft) 80-90%
Winds (20 foot):
 Lower Slope/Canyons – West Southwest 8-12 mph.
 Upper Slope/Ridgetop – West Southwest 15-20 mph gusts to 28 mph.
Haines Index (High Level, evening): 2 (stability=1; moisture=1)
Stability/Inversion: Weak evening instability. No radiation inversion. No thermal belt.
Smoke Transport: West Southwest at 8-12 mph.

Outlook For Thursday 9/25: Showers. Rain could be heavy at times in the morning. Weak instability. Max Temps 60-70° Min RH: 40-50%. Max RH: 80-90%. Ridge Wind: West Southwest 12-16 mph Gust up to 25 mph. Haines 3 (stability: 2, moisture: 1).

Extended Forecast:

	<u>Max T</u>	<u>Min RH</u>	<u>Max RH</u>	<u>Ridge Winds</u>	<u>Wx</u>
FRI 9/26:	55-70	30-45%	65-80%	WNW 6-10 Gust 20 mph	Mostly Cloudy, Chance of Showers
SAT 9/26:	65-75	30-40%	65-80%	NNE 4-8 Gust 15 mph	Partly Cloudy, Chance of Showers

Incident RAWS (freq. 163.350): Johnson HG (DTMF 0004) W of Div O; Scott River LO (DTMF 0047) Div R

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 51	TYPE OF FIRE: Wildland Fire
FIRE NAME: Happy Camp Complex	OPERATIONAL PERIOD: 9/24/2014-9/25/2014
DATE / TIME ISSUED: 9/23/2014 2000	Day and Night
UNIT: Klamath NF	SIGNED: 
	Drew Smith FBAN / CALIFORNIA TEAM 4

INPUTS

WEATHER SUMMARY: *Daytime:* Rain and heavy at times. Temps: around 62°-75° depending on elevation. RH: Lower elevations = around 45% Higher elevations = around 55%. Winds (20 foot) = West to Southwest 8- 22 mph with gusts to 28 at the ridgelines. Strong winds are prevalent today...

Nighttime: Rain and heavy at times ... Temps: around 53°.

RH: = around 90% - 100% Winds (20 foot) = West to Southwest 8- 22 mph with gusts to 28 at the ridgelines. Strong winds are prevalent tonight...

ERC= 28 Today...

Haines = 2

GENERAL:

The fire is burning in grass, shrub and intermix timber. Fuel specifics are Ceanothus, Manzanita, Mixed Pine, Cedar and Douglas Fir. Live Fuel Moisture = Timber 125% Shrub 80% (old growth).

The fire to date has been primarily topography driven. The predominant factor of fire spread has been consistently surface fire spread backing, flanking transitioning to headfire alignment. Occasional torching has developed with isolated crownfire runs with slope alignment..

Routine Rates of spread: headfire = 3-8ch/hr with backing 1-3 ch/hr.

When critical fire weather and fine fuel variables are met anticipate 25-40 ch/hr with headfire with crown involvement.

SPECIFIC:

ALL: Due to excellent handline construction and mop-up standards no progression anticipated. Interior smoldering will continue. Areas with no direct line construction limited to non existent fire spread...Moistures of extinctions will be met.

AIR OPERATIONS

Will be limited due to rain and high winds.

SAFETY

Moving water and debris flow may materialize.
Stay on high ground..

FIRE DANGER -- West Side KNF

Maximum, Average, and 43rd Percentile, based on 12 years data

Years to Remember: 2008 2010

Fire Danger Area:

- ◆ 200, 202, 204, 208
- ◆ CA280 & CA281
- ◆ See below
- * Meets NWCG Wix Station Standards

Fire Danger Interpretation:

EXTREME -- Use extreme caution
(Caution) -- Watch for change
Moderate -- Lower Potential, but always be aware

Maximum -- Highest Burning Index by day
for 2000 - 2011

Average -- show's peak fire season over 12 years (2204 observations)

43th Percentile -- Only 43% of the 2204 days from 2000 - 2011
had an Burning Index below 58

Local Thresholds - Watch out: Combinations

of any of these factors can greatly increase fire behavior:
20' Wind Speed over 4 mph, RH less than 40%,
Temperature over 75, 1000-Hour Fuel Moisture less than 13

Remember what Fire Danger tells you:

- ✓ Burning Index gives day-to-day fluctuations
calculated from 2 pm temperature, humidity, wind,
daily temperature & rh ranges, and precip duration.
- ✓ Wind is part of BI calculation.
- ✓ Watch local conditions and variations across
the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially WIND.

Past Experience:

Large fires (>50ac) occur more frequently when BI exceed 58. Fires 50 acres and larger
can readily increase in complexity.
Multiple lightning ignitions can overwhelm suppression resources. 2008 was an active
fire year. 2010 was quiet.

Sawyers Bar, Somes Bar, Slater Butte, Blue Ridge, Oak Knoll, Slater Butte, Collins Baldy
Quartz Hill, Callahan #2, and Dutch-Indy RAWIS data was used.

Responsible Agency: Klamath National Forest

Happy Camp Complex – Safety Message

INCIDENT # CA-KNF-005956

DATE: September 24, 2014

TIME: 0600 – 1800

Rain Event

Crew leaders should know and apply measures to enhance safety during rain events. The basic measures include:

- Seek shelter in vehicle during rain. Park away from hill sides where unstable soil caused by the fire may come down
- Stay away from areas that may be prone to flooding such as drainages
- Reduce speeds and increase braking distances if driving
- Ensure windshield wipers are functioning properly
- Keep distance around hazardous trees
- Follow Thunderstorm Safety as outlined on page 21 of the IRPG
- Stay dry; seek shelter under cover/ tent at base camp, building at ICP, or vehicle
- Place tents in areas not prone to water flow or pooling
- Weight and stake tents to prevent from blowing away in the wind

Winding Down

Stay Sharp - Finish Strong

Human Factor Barriers to Situational Awareness

- Fatigue
 - *Carbon Monoxide*
 - *Dehydration*
 - *Heat Stress*
 - *Fitness Level*
 - *24-hrs awake affects your decision making like .1 blood alcohol content*
- Hazardous Attitude
 - *Invulnerability*
 - *Anti-Authority*
 - *Impulsive*
 - *Macho*
 - *Complacent*
 - *Resigned*
 - *Group Think*

The Drive Home

- Don't be in a hurry, follow posted speed limit signs and slow down when road conditions warrant
- Take breaks as needed / manage fatigue
- All personnel in the vehicle MUST wear seatbelts
- Use safe following distances
- Ensure all headlights, brake lights, turn signals, and windshield wipers are operating correctly

INCIDENT RISK ANALYSIS (ICS 215a)

FIRE	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	Severe Weather/Rain	<ul style="list-style-type: none"> • If driving on incident roads, ensure communications exist with Happy Camp Communications. • Minimize unnecessary driving on incident roads. • When driving on incident roads, use caution in stream crossing areas. • Use caution in the "Narrows Area" on the Scott River Road. • Watch out for debris flows on roadways where the soil has become unstable due to the fire. • Ensure tents are secured; minimize excess gear in tents to prevent things from getting wet. Stay as dry as possible. • Use large designated tents as areas to seek refuge from the rain.
ALL	Camp Crud	<ul style="list-style-type: none"> • See the Medical Unit at the onset of signs/symptoms. • Take vitamins, drink lots of water and juice. • Eat balanced meals. • Get as much rest as possible. • Use hand sanitizers, and take precautions when using "common use" areas.
F,T,O, K/R, M/N	Traffic and Driving	<ul style="list-style-type: none"> • Don't trust other drivers; always expect the unexpected from them. • Use caution on area roads. The roads are very narrow with steep drop-offs. • Use caution while driving on all incident roads. Non fire personnel speeds on Highway 96 are often faster than we normally drive. • Avoid driving thru the "Narrows Area" on the Scott River Road. • Watch out for deer on all roads, especially during the dawn and dusk hours. • Drive defensively! Expect the unexpected around every curve. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available.
ALL	Hazard / Danger Trees	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22). • Limit number of personnel around danger trees and their exposure time; fallers must be qualified for the trees being felled. • Be especially alert around snags during wind events. Large green trees can also be dangerous. • Avoidance may be the best mitigation for risk
ALL	Complacency	<ul style="list-style-type: none"> • Stay mentally engaged on the task at hand. • Give clear briefings. Address complacency in your daily AAR. • Clearly identify the day's mission and purpose. • Use the "Buddy System" and watch out for each other. If you see something unsafe, say something. • Ask yourself: "Are you doing the job safely, the way you were trained?" • Look for a "new" or "fresh" approach for repetitive assignments.
ALL	Rolling Materials	<ul style="list-style-type: none"> • Be alert for materials rolling onto the roads. • Face your danger. • Don't park near stream crossings. • Assess parking areas. • Maintain Communications.
ALL	Fatigue / Smoke Effects	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor incoming resources for level of fatigue. • Allow for extended rest periods if needed. • Avoid working in heavy inversions for prolonged periods if possible. Take occasional breaks in clear air to mitigate build-up of CO, and CO2. • "Over hydrate" to assist in flushing smoke particulates from your system.

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long) _____

GPS Format: WGS84 Degrees, Decimal, Minutes

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

Level of consciousness _____ Resp. _____ Pulse _____ BP _____ Weight _____
 (alert & oriented x 1-4)

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	Disoriented Chest Pain <u>or</u> Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.
 The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

STANDARD OPERATING PROCEDURES—FINANCE SECTION

“How to Earn an Honest Day’s Pay for an Honest Day’s Work”

16 HOURS IS NOT A GUARANTEE – IT IS HOURS WORKED!!

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET a 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don’t exceed the maximum of 16 hrs. Work hours exceeding 16 hrs shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person’s responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit and daily once they are signed by the next level supervisor. Local Government Resources hired under CFAA or Local Agreement w/Forest are also required to submit a Crew Time Report daily. OES resources will be monitored by OES Agency Rep (if assigned) for 2/1 Work Rest compliance. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily.

Supervisor’s - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). **Until the fire is controlled**, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel **after control** of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. **If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation. Kitchen closes at 2200 so dinner break is to be shown unless justified as to why you weren’t able to eat dinner.**

PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs when gender-based unwelcome conduct adversely affects a person's ability to do his or her job, and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following:

- ✦ Unwelcome sexual advances
- ✦ Requests for sexual favors
- ✦ Discussing sexual activities
- ✦ Telling off-color jokes
- ✦ Unnecessary and unwelcome touching
- ✦ Displaying sexually suggestive pictures
- ✦ Using demeaning or inappropriate terms
- ✦ Using indecent gestures
- ✦ Using crude and offensive language
- ✦ Commenting on physical attributes

"Inappropriate behavior is harassment, including sexual and racial harassment, and shall not be tolerated". Fireline Handbook, Chapter 6, Common Responsibilities.

Human Resource Specialist is Alan C. Seago, cell (707) 315-6537.

HR is in the yurt-style tent between Facilities and Ground Support. HR has a lost and found box, and is the outgoing mail collection point.

RECYCLING MATTERS

Your efforts at separating plastic bottles and placing them in or near recycling containers are benefitting our local elementary after-school and sports programs. Scott Valley kids thank you!!

CHANGE IN WEED WASH DIRECTION

The Weed Wash Station will remain in operation at Fort Jones Base Camp, although it is relocated to the new Ground Support Inspection Road.

New criteria for washing equipment:

- Masticators
- Chippers
- Dozers
- ATV's
- Engines
- Water Tenders
- Lowboys, etc.

Any equipment or vehicle that has left an established road surface, whether that surface was paved, gravel, or dirt, should be cleaned of debris that may harbor noxious weed seeds or parts.
