Faint, illegible text or markings, possibly a signature or date.

Incident Objectives	1. Incident Name HAPPY CAMP COMPLEX	2. Date Prepared 08/16/14	3. Time Prepared 1824
----------------------------	--	------------------------------	--------------------------

4. Operational Period
08/17/14 Sunday Day Shift 0600 - 1800

5. General Control Objectives for the incident (include alternatives)

MANAGEMENT OBJECTIVES:

1. Fight fire with emphasis on firefighter and public safety.
2. Minimize suppression caused damage to natural and cultural resources.
3. Keep costs commensurate with values at risk.

CONTROL OBJECTIVES:
Given the firefighting resources available:

1. Defend structures from fire
2. Exercise full suppression of fires with the highest spread potential.
3. Manage all new fires within the Happy Camp Ranger District.

6. Weather Forecast for Period

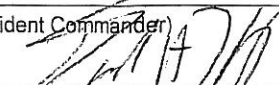

SEE ATTACHED FORECAST

Happy Camp Complex Weather Forecast

FORECAST NO: 4 D
PREDICTION FOR: Sunday Day Shift
SHIFT DATE: August 17, 2014
FORECAST ISSUED: 1900 August 16, 2014

NAME OF FIRE: Happy Camp Complex
UNIT: KNF / SoCal 2
Incident Meteorologist: Ryan Leach

***** Fire weather watch for thunderstorms in effect Monday afternoon and evening. *****

WEATHER DISCUSSION: Unstable conditions above the inversion affecting most fires, except Frying Pan, early in the day. Expect the inversion around Frying Pan to break at 1700. There is a chance of thunderstorms over the mountains to the west tomorrow, and a slight chance that some of those storms may cause erratic winds or directly impact the fire. Monday, there is a chance of high base thunderstorms.

WEATHER FORECAST TODAY (SUNDAY DAY SHIFT):

WEATHER: Mostly clear, areas of smoke in the morning. Becoming unstable in the afternoon. Slight chance of thunderstorms.

MAX TEMPERATURES: Valleys (1,200 ft) 95 – 100 F, Ridges (4,000 ft) 88 – 93 F

MIN HUMIDITY: Valleys (1,200 ft) 15 – 20%F, Ridges (4,000 ft) 17 – 22%

WINDS (EYE LEVEL): Valleys – up slope / up valley 3 – 6 mph gusts 8 – 10 mph
Ridges – NW 5 – 8 mph gusts 10 – 15 mph

LAL: 2 CWR: 5% HAINES: 2

STABILITY / INVERSION: Ridges unstable, valley remains stable and until 1600.

SMOKE TRANSPORT: N 10 mph

WEATHER FORECAST SUNDAY NIGHT:

WEATHER: Mostly clear, smoky.

MIN TEMPERATURES: Valleys (1,200 ft) 55 – 60 F, Ridges (4,000 ft) 60 – 65 F

MAX HUMIDITY: Valleys (1,200 ft) 55 – 65%F, Ridges (4,000 ft) 45 – 60%

WINDS (EYE LEVEL): Valleys – down slope / down valley 0 – 3 mph
Ridges – NE 4 – 6 mph gusts 8 – 10 mph

OUTLOOK FOR MONDAY: Sunny and smoky, chance of thunderstorms. Max Temps: 94 to 99. Min RH: 16 - 21%. Ridge Wind: NW 6 – 8 mph gusts 10 – 15 mph. LAL 2. CWR 5%. Haines 3.

THREE DAY EXTENDED (TUESDAY – THURSDAY 1,200 FT)

	<u>Max T</u>	<u>Min RH</u>	<u>Max RH</u>	<u>Ridge Winds, Afternoon</u>	<u>LAL</u>	<u>WX</u>
TUE	90 – 95	20%	60%	NW 8 G 12 mph	1	SMK
WED	90 – 95	25%	65%	NW 8 G 14 mph	1	SMK
THU	90 – 95	25%	65%	N 9 G 16 mph	1	SMK

Observations from Saturday Afternoon:

	<u>Max Temp</u>	<u>Min RH</u>	<u>Wind Dir</u>	<u>Wind Spd</u>
KNF92 (1,161 ft)	95	21%	SW - SE	2 – 3 mph
Dutch – Indy (2,281 ft)	94	18%	W	3 mph gust 11
Slater Butte (4,621 ft)	87	16 %	W	2 -7 mph

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 005	TYPE OF FIRE: Wildfire
FIRE NAME: Happy Camp Complex	OPERATIONAL PERIOD: 8/17/14 0600-1800 hrs
DATE ISSUED: 8/16/14	TIME ISSUED: 2000 hrs
UNIT: Klamath National Forest	SIGNED: Richard Gonzales, FBAN 

INPUTS

WEATHER SUMMARY:

See Weather Forecast for specific information

Sky: Mostly Sunny...smoke trapped in valleys ... Temps near 89° ...RH around 20%...

Winds (eye level)... Valley: up slope/up valley 3-5mph... Ridge: NW 8-10 mph...w/ gust up to 12 mph...

LAL 1... Haines 2...Inversion lifting approximately 1600 hrs

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The Fires main influence has been fuel and topography dominated. They are primary being driven by dead and down fuels. Fuels burning consist of Grass, Shrubs and Heavy Down (FM 1, 4, 10). Large dense stands of mixed Conifer are dominant throughout. Live Fuel Moisture is estimated at 90%. 1000 hr fuels are @ 8%. Headfire has displayed ROS @ 7-12 chains/hr with flame lengths of 4-8 feet. Single/group tree torching has occurred. Heavy fuels are holding large amounts of heat under canopy.

ERC is predicted @ 70 today (up 2).....Local threshold for large growth: 20' winds over 4 mph, RH less than 40%, Temps over 75*, 1000 hr FM less than 13% (refer to Pocket Card in IAP).

Scattered Tree Mortality is under 5%.

Probability of Ignition (shaded) will be 60% into receptive fuels for the better part of the operational period.

SPECIFIC

All Divisions:

The Fires will continue to display a low to moderate surface fire intensity. They will continue to back towards drainages and retain heat. Fires will make uphill runs as it establishes itself and slope/wind become into alignment. The potential for single/group tree torching will remain a threat due to ladder fuels being pre-heated by surface fire. Roll-out of burning material remains a high concern and has led to the growth of the Fires. Heavy fuels will continue to hold heat until extinguished or consumed. The forecasted weather will thread to a period of warmer temperatures and lower humidity. Lighter fuels (1hr and 10hr) will continue to lose moisture and burn more readily. Increased fire activity will increase as solar heating and lifting of inversion becomes a factor. Be particularly cautious on South, Southwest and Southeast slopes coupled with any southerly wind component. Direct attack along flanks with hose lines and hand crews are favorable. We could see spotting distance of up to 1/4-1/2 mile at the ridges.

Frying Pan Fire: will slowly back towards elk creek/china grade roads and move to the east along frying pan ridge...heads up for increase spotting as fire makes up hill runs that align with northwest winds

Falkstein Fire: will continue to back and flank into grider creek towards the northeast...heads up on fire stacking up and moving towards the ridgeline west...fire will continue to work its way north along grinder creek

AIR OPERATIONS:

Air support may be limited due to Inversion or diversion to new initial attack fire.

SAFETY

- Identify your vulnerability on an advancing fire front when working hotspots
- Consider the potential for re-burning of available fuels
- Look for an increase in fire activity when winds shift in your division
- Evaluate the Fire's potential for upslope runs
- **STOP...Stop Think Observe and Predict**

Fire Danger Area:

- ◆ 200, 202, 204, 208
- ◆ CA380 & CA281
- ◆ See below
- ◆ Meets NWCG Wx Station Standards

Fire Danger Interpretation:

EXTRME -- Use extreme caution
 (Extreme) -- Watch for change
 Moderate -- Lower Potential, but always be aware

Maximum -- Highest Energy Release Component by day for 2000 - 2011
 Average -- shows peak fire season over 12 years (2204 observations)
 43th Percentile -- Only 43% of the 2204 days from 2000 - 2011 had an Energy Release Component below 57

Local Thresholds - Watch out:

Combinations of any of these factors can greatly increase fire behavior:
 20' Wind Speed over 4 mph, RH less than 40%,
 Temperature over 75, 1000-Hour Fuel Moisture less than 13

Remember what Fire Danger tells you:

- ✓ Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & rh ranges, and precip duration.
- ✓ Wind is NOT part of ERC calculation.
- ✓ Watch local conditions and variations across the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially WTRD.

Past Experience:

Large fires (>50ac) occur more frequently when 81 exceed 58. Fires 50 acres and larger can readily increase in complexity
 Multiple lightning ignitions can overwhelm suppression resources. 2008 was an active fire year. 2010 was quiet.
 Sawyers Bar, Somes Bar, Slater Butte, Blue Ridge, Oak Knoll, Slater Butte, Collins Baldy, Quartz Hill, Callahan #2, and Dutch-Inby RAWS data was used.

Responsible Agency: Klamath National Forest
 FF+4.1 Beta 11/082012-13.38 (F:KNF_period_of_record_v2\$gmt2)
 Design by NWCG Fire Danger Working Team

Fuel Model: G - Short-Needle (Heavy Dead)

Fuels and Fire Behavior Advisory
Northern California
August 6, 2014

Subject: Long term drought conditions along with hot and dry weather have led to critically low live and dead fuel moistures. Weather and fuels conditions are contributing to very active to extreme fire behavior in Northern California.

Discussion: The extremely dry and warm conditions of April through July combined with the extreme to exceptional drought conditions have led to critically low live and dead fuel moistures. Numerous large fires experienced extreme fire behavior and rapid growth during the first 4 days of August. Areas receiving precipitation on August 4th and 5th are expected to rebound quickly to extreme conditions.

Difference from normal conditions: Live and dead fuel moistures are approximately 6 weeks ahead of normal and typical of early to mid-September. Extreme to exceptional drought, the highest levels on the Drought Monitor system now cover nearly the entire North state. Live fuel moistures never reached typical seasonal maximums and are approaching or have already reached critical levels. All timelag classes of dead fuels are at moisture levels that allow for easy ignition and rapid spread.

Concerns to Firefighters:

- Expect fires to ignite easier and spread faster due to low live and dead fuel moistures. Recent fires have shown almost complete consumption of large dead fuels. Expect higher probability of ignition and increased spotting due to increased amount of receptive and available surface and aerial fuels.
- Current Energy Release Component (ERC) values are reaching maximum seasonal values or setting record highs for almost all Predictive Service Areas (PSA). ERC is a good indicator of seasonal drying trends. Anticipate increased spread rates and active night time burning.
- Anticipate higher resistance to control in all fuel types. When critical fire weather conditions exist expect very active to extreme fire behavior.

Mitigation Measures:

- Firefighters should acknowledge and prepare for fire growth and fire behavior that may exceed anything they have experienced before due to the extreme drought. Normal strategies and tactics may need to be adjusted to account for the drought factor. Suppression actions need to be based on good anchor points, lookouts, communications, escape routes, and safety zones.
- Local and incoming fire personnel need to be aware that fire behavior is exceeding normal expectations for this time of the year. Local briefings need to highlight specific fire environment conditions including local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures, and special fuel conditions such as mortality, Sudden Oak Death and frost killed brush, etc.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates.
- Review the most current Northern California 7-day Significant Fire Potential along with Daily, Monthly and Seasonal Outlooks at: Predictive Services Outlooks & Fire Potential

Area of Concern: The area of concern is all of Northern California. A map showing the areas of concern described in this advisory can be found at: National Fuels & Fire Behavior Advisories

AIR OPERATIONS SUMMARY

PREPARED BY: Ted Visser

PREPARED DATE/TIME: 08/16/14 2100

1. INCIDENT NAME: Happy Camp Comp.

2. OPERATIONAL PERIOD DATE: 08/17/14

START TIME: 0700 END TIME: 2000 SUNRISE:0620 SUNSET:2016

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.)

Thunderstorms, erratic winds. Low wires and cables
 Numerous aircraft in confined areas. Military training routes near fire area.
 Flight following procedures at Cave Junction: Aircraft will contact (call sign) "Medford Interagency" when transitioning from Helibase through OR-MIC airspace on 168.6500 Tone 110.9. Aircraft are to remain on the OR-MIC frequency until over the Siskiyou Crest. At the Crest, aircraft are to contact Happy Camp Complex Air Attack for hand off. If ATGS is not present contact will be made on YICC Forest Net, RX 164.1750, Tx 164.9750 Tone 114.8 - Unicom at Cave Junction is 122.9
 Track all retardant usage and location.

4. MEDEVAC A/C: 408

I/A A/C: H-503
 503 litter capable
 At Happy Camp Helibase
 510 is available at Cave Junction

Health & Safety Message

Incident: Happy Camp Complex CA-KNF-005956	Date/Op Period: 8/17/14 Day Shift 0600-1800
--	---

Hazards & Risks

Heavy Equipment Operations: Working with dozers presents unique hazards to firefighters. Reference pg. 80 of your 2014 IRPG to review safety considerations when using dozers on the fireline. Also, understand the performance capabilities of heavy equipment and establish good communications between the operator and swamper while they are operating in your work area.

Cumulative Fatigue: With each passing day of work, fatigue becomes a factor in work performance and decision-making. Make an effort to increase rest times for crewmembers and evaluate their physical and mental health each day. Good nutrition and hydration also play into staying healthy and alert while working in potentially dangerous situations.

Felling Operations: Follow the *Procedural Felling Operations* guide found on pg. 79 of your 2014 IRPG when performing felling ops. Apply sound risk management practices to assess the risk and need to drop high-risk trees. Reference *Hazard Tree Safety* pg. 22 in the IRPG for additional safety considerations.

Flip-Flop/Shower Shoe Safety!

While foot care is important to maintain healthy feet; wearing you flip-flops, sandals, and shower shoes around fire camp is NOT appropriate. Boot vs. flip-flop is no match. Wearing your flip-flops from the shower unit to your sleeping area is acceptable, just watch out for trip and stubbed-toe hazards.

Incident within an Incident Action Plan

When the scope or complexity of the emergency exceeds division resource needs

This plan is designed to identify the initial actions that should be taken by the first arriving personnel on a serious accident. This person may be a single resource, engine boss, or a crew boss. Accidents or incidents within an incident happen rapidly and require sound, calm initial decisions to handle the problem, while still focusing on the main incident. The following checklist provides some key thoughts and actions.

The first arriving person to any accident should notify their Division Supervisor, or the Div Sup assigned to that location.

Advise of the critical information needed:

- Accident scene safety assessment and advise incoming personnel
- Number of injuries and their severity
- Special equipment needs (extrication, low/high angle rescue, fire protection or suppression)
- Assist the injured as necessary without endangering yourself or other personnel
- Do not move trauma victims unless their safety is in jeopardy
- Utilize PINK pages of the Incident Response Pocket Guide (IRPG) for patient assessment/medical procedures

Remain aware of surroundings and delegate personnel to monitor the main fire

The **Division Supervisor** will assume command of the accident/incident scene upon arrival. The following list outlines the general duties and tasks that should be completed on most accidents/incidents.

1. Delegate division oversight to another Division Supervisor or other qualified person.
2. Request a clear frequency from Comm and consider switching to designated Emergency Tactical (Incident Comm will notify the MEDL who will initiate the medical plan for injuries)
3. Order/delegate resources appropriate for the accident/incident (crew EMT's, Line EMT's or Line Medics, rescue equipment, patient transport needs, manpower)
4. Notify Operations Section Chief and Safety Officer on all accidents/incidents.
5. Begin to document the event accurately and completely. Use ICS form 201 if the event is large or complex.
6. Protect the scene for Investigators

Reference the full Incident Medical Emergency Plan for additional

Incident within an Incident Action Plan

Position Assignment Supportive Actions

Division Supervisor

- See items 1-6 on page one
- If unable to access accident/incident location, delegate command to a closer qualified resource

Medical Unit Leader

- Respond to Comm Unit as soon as possible
- Coordinate with Division Supervisor to ensure proper resources are rapidly ordered
- Assign a MEDL to the scene and other positions to support the response as needed
- Monitor condition updates of patient(s) and coordinate response with Operations

Communications Unit Leader

- Maintain clear radio traffic and monitor communications to support response
- Recommend appropriate security and investigative process
- Assess the need for critical Incident Stress Response

Safety Officer

- Provide for Safety personnel on scene as needed
- Recommend appropriate security and investigative process
- Assess the need for critical Incident Stress Response

Air Attack Supervisor

- Obtain coordinates of the emergency location
- Coordinate air-medical response
- Assist and support the designated Point of Contact with communications and coordination of the emergency response as necessary

IC, Command & General Staff

- Manage the emergency and direct specific responsibilities to individual positions to provide an appropriate response
- Notify the host unit and host dispatch center of the size-up information
- Constantly monitor and assess the appropriate response and adapt direction as needed
- Submit all documentation pertaining to the emergency to the Plans Chief

Reference the full Incident Medical Emergency Plan for additional

Human Resource Message

Valuing Diversity, Collaboration, and Fire Use

Bear grass is a key resource in Karuk baskets and is only harvested after it has been burned, as burning the bear grass makes it more pliable and easier to work with when weaving. Basket weavers have been known to go three or more years, without a bear grass harvest, waiting for the right conditions.

For the first time since a 2013 Klamath National Forest prescribed burn, basket weavers of the Karuk Tribe returned to harvest the burned bear grass.

The Forest Service commonly prepares prescribed burns with the goal of reducing hazardous undergrowth. By taking opportunities to incorporate ecosystem management together with cultural uses, such as Karuk basket weaving, multiple objectives can be accomplished.
