**FIRE DANGER -- West Side KNF**  
 Maximum, Average, and 43th Percentile, based on 12 years data

**Fire Danger Area:**

- ◆ 200, 202, 204, 208
- ◆ CA280 & CA281
- ◆ See below
- ◆ Meets NWCG Wild Station Standards

**Fire Danger Interpretation:**

**EXTREME** -- Use extreme caution (Caution) -- Watch for change  
**Moderate** -- Lower Potential, but always be aware

Maximum -- Highest Energy Release Component by day for 2000 - 2011  
 Average -- shows peak fire season over 12 years (2204 observations)  
 43th Percentile -- Only 43% of the 2204 days from 2000 - 2011 had an Energy Release Component below 57

**Local Thresholds - Watch out:** Combinations of any of these factors can greatly increase fire behavior:  
 20+ Wind Speed over 4 mph, RH less than 40%,  
 Temperature over 75, 10000-Hour Fuel Moisture less than 13

**Years to Remember: 2008 2010**

**Fuel Model: G - Short-Needle (Heavy Dead)**

**Remember what Fire Danger tells you:**

- ✓ Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & rh ranges, and precip duration.
- ✓ Wind is NOT part of ERC calculation.
- ✓ Watch local conditions and variations across the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially WIND.

**Past Experience:**

Large fires (>60ac) occur more frequently when BI exceed 68. Fires 50 acres and larger can readily increase in complexity  
 Multiple lightning ignitions can overwhelm suppression resources. 2008 was an active fire year. 2010 was quiet.

Sawyers Bar, Somes Bar, Slater Butte, Blue Ridge, Oak Knoll, Slater Butte, Collins Baldy, Quartz Hill, Callahan #2, and Dutch-Indy RAWNS data was used.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 014	TYPE OF FIRE: Wildfire
FIRE NAME: Happy Camp Complex	OPERATIONAL PERIOD: 8/21-22/14 1800-0600 hrs
DATE ISSUED: 8/21/14	TIME ISSUED: 1000 hrs
UNIT: Klamath National Forest	SIGNED: FBAN 

## INPUTS

### WEATHER SUMMARY:

See Weather Forecast for specific information

Sky: Smokey ... Temps: near 50°(down 5) ...RH: 65% ridges, 75% drainages(down 10)

Winds: Ridgetops: light NW transport winds Valleys: down-slope/down-valley up to 4mph ...LAL 1 ... Haines 3

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

Persistent drought has created a situation where fuels are critically dry and abundant. Scattered tree mortality is about 5%. Fires will continue to be influenced by the severe fuels condition and complex topography. Fuels consist mainly of Shrubs and Heavy Timber Understory (FM 9, 10). Live Fuel Moisture is estimated at 90%. 1000 hr. fuels are @ 8%.

Head-fire ROS may be 3 to 4 chains/hr. with flame lengths of 1-3 feet during the part of the evening. Probability of Ignition will be low(20%).

Expect fire behavior to drop at sunset. Fire will continue to back and consume surface fuels well into the night. Heavy fuels will hold heat throughout the night.

**Local threshold for large growth:** 20' winds over 4 mph, RH less than 40%, Temps over 75\*, 1000 hr FM less than 13% (refer to Pocket Card in IAP).

## SPECIFIC

#### All Divisions:

Fire will continue to display low surface fire ROS and intensity. Expect fire to continue backing towards drainages and to retain heat in heavy fuels. Roll-out of burning material remains a high concern and has been a large factor in fire growth. Direct attack along flanks with hose lines and hand crews are favorable.

**Night:** Inversion will begin to settle in around 2400 and should moderate fire behavior. In locations of active burning, established heat will burn under the inversion until early morning hours.

### AIR OPERATIONS:

Expect poor visibility over the fire area until the inversion lifts, likely around 1200-1300.

## SAFETY

- As fire continues to burn ground fuels and roots, be heads up of the hazard of fire weakened trees.
- Pay attention to the evening wind shift and the possibility for an increase in fire activity when winds shift in your division.
- Evaluate the Fire's potential for upslope runs

**HAPPY CAMP COMPLEX**  
**SAFETY MESSAGE FOR DAY SHIFT**  
**8/21/2014 1800 – 08/22/14 0600**

**Theme for the day:** Congratulations, we have had an excellent Safety record for not just our fires, but the entire area. This is very commendable and due strictly to your diligence. Keep it up!!!

**PPE's:** Continue to remain 100% compliant with the use of your PPE's. They are there for your safety and reinforce the ability for you to go home safely!

Stumpholes and root systems remain compromised resulting in a greater chance for a fall or burn injury.

**Briefings:** We need to remain on point with our crew briefings. Many crews are being shifted between divisions as the workflow allows. This is extremely important if you are moving to a piece of line or area you have not worked or are not familiar with.

Remember to review your communications plan and perform checks if moving divisions.

**Hazards:** Steep Terrain is the prevalent feature for the area. Heavy fuel continuity and horrible footing provides extra hazards to you. Take the time to address your needs before you engage.

Danger Trees are everywhere. Be aware and of them, flag them and post a standby if necessary. Make sure to close the loop by reporting them to get them handled.

**Environmental:** Be cognizant of hydration needs. If you are thirsty, you are already behind the curve. Energy drinks DO NOT provide you with adequate hydration.

Be aware of heat related illness. Keep an eye on each other and get help early if necessary.
