## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER: 017</b>	<b>TYPE OF FIRE: Wildfire</b>
<b>FIRE NAME: Happy Camp Complex</b>	<b>OPERATIONAL PERIOD: 8/23/14 0600-1800 hrs</b>
<b>DATE ISSUED: 8/22/14</b>	<b>TIME ISSUED: 2000 hrs</b>
<b>UNIT: Klamath National Forest</b>	<b>SIGNED: FBAN,</b> 

### INPUTS

#### WEATHER SUMMARY:

See Weather Forecast for specific information

Sky: Mostly Sunny...Smoke clearing around 1600 ... Temps near 90°(up 5) ...RH around 15%(down 5)

Winds (eye level)...Valley: up slope/up valley 3-6mph...Ridge: NE 4-7mph...w/ gust up to 10 mph

LAL 1... Haines 3...Inversion lifting by approximately 1600.

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

The fire environment will be under the influence of a strengthening high pressure system. Fire will remain active under the inversion due to the prolonged drying of fuels and continued hot and dry weather. Expect to see a noticeable difference in fire behavior when the inversion lifts. General winds will have a NE component to them, so alignment and spread direction may be different from what has been seen previously. Inversions and shading from smoke will moderate fire behavior.

**Local threshold for large growth:** 20' winds over 4 mph, RH less than 40%, Temps over 75\*, 1000 hr FM less than 13% (refer to Pocket Card in IAP).

Probability of Ignition (unshaded) will be high(89% )

### SPECIFIC

##### All Divisions:

The Fires will continue to display ability for moderate surface fire ROS and intensity. Fire will move uphill at 10-15 ch/hr. if aligned with slope and wind. The potential for single/group tree torching will remain a threat due to ladder fuels. Roll-out of burning material remains a high concern and is a main factor in fire growth. Heavy fuels will continue to hold heat until extinguished or consumed. Fire activity will increase with solar heating and the lifting of the inversion. Direct attack along flanks with hose lines and hand crews are favorable.

**Frying Pan Fire:** The main fire spread will continue to push out to the east into the Three Biscuit area, south into and southeast through Upper Grider and into the Huckleberry Mnt area. Heavy fuels and the slight influence of a NE wind will allow for persistent movement to the west into Copper Creek and down to Elk Creek in the next few days. Watch out for fire establishing into drainage bottoms and aligning with slope/wind.

**Falkstein Fire:** This fire has been under a continual smoke shield from the Frying Pan Fire. Today could be the first day this fire receives clear air and sunlight. The lack of solar radiation has been masking the fire spread potential. Expect fire behavior to increase if the fire receives clear air. Otherwise, it will continue to back/flank into Grider Creek towards the north and south into stones valley. The spot fires to the SE should show more heat today.

#### AIR OPERATIONS:

Light winds will allow for good flying conditions once the inversion breaks. Expect the southern portion of the fire to remain hampered by smoke throughout the day, especially in deep drainages.

### SAFETY

**Be mindful of working in areas with unburned fuel between you and the fire. Several locations on the fire have poor visibility of the fire's edge. Post lookouts as necessary and identify escape routes.**

**Fire Danger Area:**

- ◆ 200, 202, 204, 208
- ◆ CA280 & CA281
- ◆ See below

\* Meets NWCG Wx Station Standards

**Fire Danger Interpretation:**

- E: F B: E -- Use extreme caution
- Watch for change
- Moderate -- Lower Potential, but always be aware

Maximum -- Highest Energy Release Component by day for 2000 - 2011  
 Average -- show's peak fire season over 12 years (2204 observations)  
 43th Percentile -- Only 43% of the 2204 days from 2000 - 2011 had an Energy Release Component below 57

**Local Thresholds - Watch out:** Combinations of any of these factors can greatly increase fire behavior:  
 20' Wind Speed over 4 mph, RH less than 40%, Temperature over 75, 1000-Hour Fuel Moisture less than 13

**Remember what Fire Danger tells you:**

- ✓ Energy Release Component gives seasonal trends calculated from 2 pm temperature, humidity, daily temperature & rh ranges, and precip duration.
- ✓ Wind is NOT part of ERC calculation.
- ✓ Watch local conditions and variations across the landscape -- Fuel, Weather, Topography.
- ✓ Listen to weather forecasts -- especially WIND.

**Past Experience:**

Large fires (>50ac) occur more frequently when BI exceed 58. Fires 50 acres and larger can readily increase in complexity.  
 Multiple lightning ignitions can overwhelm suppression resources. 2008 was an active fire year. 2010 was quiet.

Sawyers Bar, Somes Bar, Sater Butte, Blue Ridge, Oak Knoll, Sater Butte, Collins Baldy, Quartz Hill, Callahan #2, and Dutch-Indy RAWS data was used.

**HAPPY CAMP COMPLEX**  
**SAFETY MESSAGE FOR DAY SHIFT**  
**8/23/2014 0600 – 1800**

**Theme for the day:** Let's work together as we continue to ramp up the incident. We have just split into Branches, collapsed Divisions and shifted further out to the east. Be flexible, but vigilant in your assignments and make sure to complete a thorough crew briefing including the Communications Plan prior to engagement.

**PPE's:** Continue to remain 100% compliant with the use of your PPE's. We have had several instances on this fire of serious injury being averted through their use. A helmet saved a FF from a falling event two days ago, resulting in a minor injury vs. certain life threatening injuries.

Stumpholes and root systems remain compromised resulting in a greater chance for a fall or burn injury.

**Briefings:** We need to remain on point with our crew briefings. Many crews are being shifted between divisions as the workflow allows. This is extremely important if you are moving to a piece of line or area you have not worked or are not familiar with.

**Hazards:** Steep Terrain is the prevalent feature for the area. Heavy fuel continuity and horrible footing provides extra hazards to you.

Danger Trees are everywhere. Be aware and of them, flag them and post a standby if necessary. Make sure to close the loop by reporting them to get them handled.

**Environmental:** This is supposed to be one of the cooler days for now. A warming trend over the next several days is going to make the days hotter and harder to work in.

Be aware of heat related illness. Keep an eye on each other and get help early if necessary.

## HUMAN RESOURCES MESSAGE

### The Firefighter's 8 Points of Courage

The badge of a firefighter is the Maltese Cross. Its story began in the crusades when the Knights of St. John of Jerusalem encountered a new weapon unknown to European warriors. The weapon was fire – glass bombs filled with naphtha, followed by lit torches thrown into the midst of the saturated warriors. Hundreds of the knights were burned alive; others risked their lives to save their brothers-in-arms from dying painful, fiery deaths. Thus, these men became our first firefighters. Their heroic efforts were recognized by fellow crusaders who were awarded the badge of honor — a cross similar to the one firefighters wear today.

The Maltese Cross is a symbol of protection. It means that the firefighter who wears this cross is willing to lay down his or her life for you, just as Crusaders sacrificed their lives. It is the firefighter badge of honor, signifying they work in courage.

The Maltese cross has 8 points, to which religious and secular meanings have been attributed over the centuries. To the modern firefighting world, these 8 points generally include honesty, loyalty, bravery, respect, justice, honor, duty and compassion. These are human qualities and they are qualities important that affect how we approach and carry out our jobs.

*"Our lives are what we make them, Mr. Fedderson."*

*God gave Noah the  
rainbow sign,  
No more water  
but fire next time.*

*-Spiritual*

**Are you going to be recommended for certification on this incident?**

**Or**

**Have you already been recommended for certification but still have your taskbook with you at this incident?**

Your FQRC needs your taskbook with all the proper documentation so they can review it and submit it to the certifying official.

**September 5** is the deadline for submitting applications to the R5 Fall Fire Hire

If you have worked hard all summer for an incident qualification that will get you to that next level, don't wait and miss your opportunity.

**Come by and see me and I will get your completed taskbook back to your FQRC.**
