Divisions O/Q/T/Z/D/F/G/H, J, and Hwy 96 Structure Group

NIGHT SHIFT

September 5-6, 2014 1800 - 0600

CA-KNF-005956

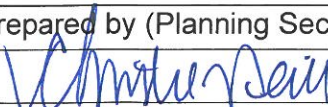

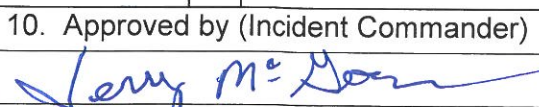

P5JB1F-0505

IAP

AIR OPS

INCIDENT OBJECTIVES	1. Incident Name	2. Date Prepared	3. Time Prepared		
ICS 202	Happy Camp Complex Zone 1	9/5/2014	1000		
4. Operational Period					
Friday, September 5-6, 2014		NIGHT SHIFT 1800 - 0600			
5. General Control Objectives for the Incident (include alternatives)					
<p>MANAGEMENT OBJECTIVES:</p> <ul style="list-style-type: none"> -Provide for firefighter and public safety by utilizing the risk management process. -Minimize damage to natural and cultural resources by using resource advisers and cultural resource specialists. -Protect and minimize fire effects to residential structures, communities, infrastructure, private property and timber lands. -Provide timely and accurate fire information to key stakeholders, the public, and cooperators. -Support and coordinate initial attack within the TFR. -Manage costs commensurate with values at risk. <p>CONTROL OBJECTIVES:</p> <ul style="list-style-type: none"> -Hold fire within existing containment lines and keep fire: <ul style="list-style-type: none"> South of the O'Neil Ridge west to Seiad Creek East of Elk Creek West of Scott River and Baldy Lookout. North of Cayenne Ridge, Big Ridge & Norcross Campground 					
6. General Weather					
RED FLAG WARNING REMAINS IN EFFECT					
The thermal pressure trough that has been impacting the fire will continue to remain mostly stationary resulting in continued warm, unstable and dry conditions with gusty East to Northeast winds.					
7. Resource Protection Guidelines					
<ul style="list-style-type: none"> -Use MIST to minimize impacts to wilderness characteristics. - Avoid aerial retardant within 300 feet of wet areas and in areas with threatened, endangered, proposed, candidate or sensitive species. -Use screens on all drafting equipment. -Track and map daily all tactical burning operations and turn into DIVS/ SIT unit.

INCIDENT Weather Forecast

FORECAST NO: 23

NAME OF FIRE: Happy Camp Complex

PREDICTION FOR: DAYSHIFT

UNIT: KNF

SHIFT DATE: Sept 5, 2014

SIGNED:

TIME AND DATE

FORECAST ISSUED: 2000 Sept 4, 2014

Steven M. Reedy
Incident Meteorologist

...A RED FLAG WARNING REMAINS IN EFFECT FOR GUSTY EAST TO NORTHEAST WINDS AND LOW RELATIVE HUMIDITIES THROUGH 11 PM FRIDAY NIGHT...

WEATHER DISCUSSION: The thermal pressure trough that has been impacting the fire will continue to remain mostly stationary once again today, resulting in continued warm, unstable and dry conditions in addition to continued gusty East to Northeast winds. These winds will start the day strong...but will slowly diminish through the day. Afternoon high temperatures will continue to increase both today and Saturday and, as such, minimum RH values are expected to remain in the single digits. Overnight RH recoveries will remain poor in higher elevations as well. A shift in the thermal trough will allow for very weak onshore flow, slightly decreasing temperatures on Sunday.

WEATHER FORECAST FOR TODAY (FRIDAY):

WEATHER: Continued very dry conditions with gusty winds. Areas of smoke.

MAX TEMPERATURES: Valleys (1,200 ft) 86 – 91 F, Ridges (4,000 ft) 75 – 82 F

MIN HUMIDITY: Valleys (1,200 ft) 5 – 10%, Ridges (4,000 ft) 7 – 12%

WINDS (EYE LEVEL):

Lower Slopes/Drainages – Downslope/downcanyon 2–5 mph in the morning, becoming upslope/upcanyon 3–7 mph in the afternoon. (NE to SW oriented drainages 7-11 mph with gusts to 17 mph)

Ridgetop – East-Northeast 8 – 13 mph with gusts up to 20 mph.

HAINES INDEX: 5

STABILITY/INVERSION: Inversion, if present, is expected to break around 1100.

SMOKE TRANSPORT: East 5 – 10 mph.

WEATHER FORECAST FOR TONIGHT (FRIDAY NIGHT):

WEATHER: Areas of smoke...otherwise mostly clear.

MIN TEMPERATURES: 55 – 65 F...upper slopes and ridges warmest.

MAX HUMIDITY: Valleys (1,200 ft) 45 – 55%, Ridges (4,000 ft) 25 – 35%

WINDS (EYE LEVEL):

Valleys – Northeast or Downslope/downvalley 3 – 6 mph.

*Strongest winds in East-West oriented drainages.

Ridgetop – Northeast 5 – 9 mph with gusts up to 12 mph.

HAINES INDEX: 5

STABILITY/INVERSION: Inversion may develop after 2200.

SMOKE TRANSPORT: Northeast 7 – 12 mph.

OUTLOOK FOR SATURDAY: Sunny with areas of smoke. Max Temps: 82 to 92. Min RH:3-13%.

Ridge Wind: Northeast 5-10 mph. Haines 5.

EXTENDED FORECAST:

	Max T	Min RH	Max RH	Ridge Winds	Wx
SUN:	85-90	13%	35%	NW 4-8	Clear w/ Smoke
MON:	83-88	15%	40%	W 4-8	Clear w/ Smoke
TUE:	81-86	18%	50%	W 3-7	Clear w/ Smoke

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 31	TYPE OF FIRE: Wildland Fire
FIRE NAME: Happy Camp	OPERATIONAL PERIOD: 9/5/2014-9/5/2014
DATE ISSUED: 9/4/2014	TIME ISSUED: 2000
UNIT: Klamath NF	SIGNED: /S/ Chris Naccarato Chris Naccarato FBAN(T)

INPUTS

WEATHER SUMMARY: (Please see attached fire weather forecast)

Red Flag Warning for Gusty East and Northeast Winds, Low Relative Humidity's, and Unstable Conditions Through 1100 PM Tonight

Maximum Temperature: 75-91°

Minimum RH: 5-12%

Winds (eye level): Valleys becoming upslope/upcanyon 3-7 mph after noon. Northeast to southwest oriented drainages 7-11 with gusts to 17

Ridgetop winds 8-13 mph with gusts to 20 mph

Tonight:

Minimum temperature: 55-65°

Maximum RH: 25-55%

Winds (eye level): Valleys becoming downslope/downvalley 3-6 mph, Strongest winds in east-west oriented drainages.

Ridgetop east 5-9mph with gusts with gusts to 12 mph

GENERAL:

POI: 60-90% Afternoon southerly aspects **ERC:** 90th percentile **Live Fuel Moisture Brush:** 80%

Today atmospheric stability will be similar to yesterday, there is still potential for large column development with long range spotting (up to 2 miles). Slopes with a south and west component aligned with northeasterly winds could exhibit active surface fire, torching and active crown fire. The remainder of the fire will be fuels and topography driven. At present primary fire spread is from lateral fire movement across slope, and spot fires caused by rolling material and torching.

Night Shift Personnel: Fire behavior could be active on ridgetops and adjacent slopes as the shift begins due to low RH and slow recovery. East to west oriented drainages may experience increased activity and could be active throughout the evening and early morning hours. Fire behavior on the slopes backing into the drainages should decrease by early morning as the RH begins to rise after 2100 hrs.

SPECIFIC:

Division O,I: If slopover is not contained by start of shift, active fire behavior could include torching and spotting where slope and the forecast northeast winds align.

Division Q, T, Z, D, F and I: These Divisions are still indicating scattered and isolated heat on the IR, however minimal fire activity is anticipated.

Division G and H: Isolated heat sources are still present; however minimal fire activity is anticipated.

Division J: Firewill continue to burn out in Kuntz Ck and Mill Ck drainages. Spotting is still possible to the southwest over the ridge. Fire is established in Muck-a-Muck Creek, and could keep moving easterly and southwesterly into China Doctor Ck.

AIR OPERATIONS

Ridgetop winds could hamper air operations

SAFETY

Ensure lookouts are well placed and are keyed into changes in the weather and increases in fire behavior.

AIR OPERATIONS SUMMARY

PREPARED BY: Billy Monahan

PREPARED DATE/TIME: 09/04/14

1. INCIDENT NAME: Happy Camp Complex

2. OPERATIONAL PERIOD DATE: 09/05/14

START TIME: 0700 END TIME: 1930 SUNRISE:0612 SUNSET:1947

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.)
 Thunderstorms, erratic winds. Low wires and cables
 Numerous aircraft in confined areas. MTR's & MOA's near fire area.
 Flight following procedures at Cave Helibase will be done with Cave Tower, 125.725
 Track all retardant usage, location & gallons. Scott Valley Temp. Tower, 120.200
 Expect some Type2&3 Missions Supporting Happy Camp Fire from Scott HB (Recons,IR)
Note: Cave Helibase at Illinois Valley airport now has a Temporary Tower, "Cave Tower" 125.725

4. MEDEVAC A/C:
 408 (NVG, ALS, Hoist) @ Cave HB,
 503 Litter Capable at Happy HB
 506 litter capable at Cave HB

SAFETY MESSAGE

September 5, 2014
Happy Camp Complex
Zone 1

“The Whole Goal is to Get Home Safe”

Transportation Issues

- Traffic control on Hwy 96 is still ongoing, watch for the public standing outside their vehicles while waiting to go through the controlled area. Fire vehicles please slow down when passing the public waiting at the traffic control stops.
- Deer are frequently on the roads, especially at dusk and throughout the night.

Risk Management

Fire operations risk management is outlined in the NWCG Incident Response Pocket Guide (IRPG). The five step process provides firefighters and fire managers a simple, universal, and consistent way to practice risk management by:

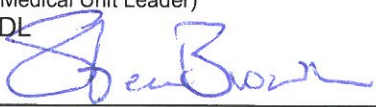

- Establishing situation awareness by identifying hazards
- Assessing hazard potential.
- Developing hazard controls and making risk management decisions.
- Implementing hazard controls.
- Supervising implementation and evaluating effectiveness. If situation has changed significantly, restart Risk Management Process.

Fireline

- Snags continue to come down and block roads, if the road is your Escape Route monitor constantly to ensure a quick and rapid exit.
- LCES is built on two guidelines: Before safety is threatened, each firefighter must know the LCES system will be used, and LCES must be continuously reevaluated as fire conditions change.

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: Ambulance Helicopter Vehicle

Location _____

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

LOC _____ Resp. _____ Pulse _____ BP _____ Weight _____

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	Disoriented Chest Pain <u>or</u> Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

Medivac Sites

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with Ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response. The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

Medical Pre-Incident Planning:

- Identify EMTs and Equipment imbedded in suppression recourses.
- Review the Incident or Forest Emergency reporting procedures
- Review the Incident's assigned Medical resources and their location. (note radio call sign)
- Assure that all assigned supervisors have reviewed and understand the Medical Plan. (if none is available develop a quick plan before engaging)

Arriving at work site:

- Assess access and egress for medical ground units.
- Assure that all resources can clearly articulate their location. (update as they move)
- GPS potential Drop Points or Landing Zones.
- Note weather changes and check on availability of air resources.
- Pre-Position medical supplies

During Response to a Medical Emergency:

- Contact Communications and declare a **MEDICAL EMERGENCY!!**
 - Identify the Unit needing help and their location
 - Insure that LCES are maintained.
 - Obtain patient info and severity.
 - Develop a resource list
 - Initial care
 - Sustained care
 - Extrication/evacuation
 - Report the Emergency and request anticipated resources needs
 - Put two plans in place and start both plans clearly identifying the primary and backup plan to resources assigned.
- During the Evacuation (every 15 min.)**
- Reassess the treatment and the patient response (Are they getting better?) Do you have the right level of care?
 - Assess the evacuation plans progress and adjust as needed.
 - Assure that additional personnel are available for relief.
 - Up-date Comm/Disp of the progress of the rescue.

Happy Camp Complex - Zone 1 (Happy Camp, CA) Incident Trainee/Trainer Data Form

Training Specialist: Robert Rivelle 707-498-1761
Training Specialist (t): Karen Brent 706-260-7964

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist.
- Prior to DEMOB, meet with the Training Specialist to close-out your training package.
- You may open or close your training package at either Fort Jones, Ca – Zone 2 or in Happy Camp, Ca – Zone 1. Training Specialist s from both ICP's are in daily contact with each other.

A. Trainee Data

Trainee Name: _____ ICS Trainee Position: _____

Request Number: (circle one: A,C,E or O) # _____ Agency Designator (Example CA-ANF): _____

Cell / Contact # While on Incident: _____ Home Unit Position: _____

Date Assigned: _____ Fire Name / Order Number: Happy Camp Complex / KNF-5956

Trainees home unit contact to mail your training package (Fire Chief, Training Officer):

Name: _____ Agency/Unit: _____

Agency/Unit Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

B. Trainee Prerequisites

1. Possesses valid Red Card or agency certification card? _____ Yes _____ No

2. Trainee has current position task book issued by home unit? _____ Yes _____ No

C. Trainer/Evaluator Data Trainer / Evaluator Name: _____

ICS position on fire: _____ Agency: _____

City: _____ State: _____

Cell / Contact While on Incident: _____

D. Trainee Goals - (2 tasks or objectives you would like to address).

1. _____

2. _____

When something isn't going right, look for what is wrong not who is wrong, and how everyone can help make it better

The Human Resource Specialist (HRSP) is Alan Seago. He is in the same trailer as CTSP , next to Fire Information. Al's cell phone number is (707) 315-6537.
