FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

Condition will continue to be warm and dry, expect to see active interior burning. The fire continues to be fuels driven. 1000 and 10,000hr fuel moistures are in the single digits and they will continue to be the primary carrier of fire. Spot fires from rollout will continue to be a possibility. If fire were to get established outside of containment lines expect Rates of spread of 1 to 15 chains per hour with flame lengths 3-16 feet in the timber. Brush R.O.S. 15-60 chains per hour and F.L. 15-45feet.

Probability of ignition will be 80% to 90%

SPECIFIC:

South End

No forward fire progression expected. Heavier fuels will continue to burnout. Expect to see some interior islands continue to burn, well inside the lines. Watch for rollout.

Branch II

No forward progression is expected. Heavy interior fuels continue to burn out. Some unburned interior islands can be expected to torch out.

Air Operations: Smoke from our fire has the potential to limit air ops.

Inversion will usually lift by 1100hrs

SAFETY:

Rollout will continue to challenge containment.

This country is very broken ensure Lookouts are posted with good eyes on the fire.

Coffee Incident Safety Message

Prepared For: August 11 -15, 2014

Maintain Safe Operations

Fight Fire Safely!

Remember you are surrounded by issues:

- Fire Fighter Care / Hydration
- Hazard Trees
- Steep Terrain
- Accountability and Crew Integrity
- Road Management
- Vehicle Travel

Some possible indicators/mitigations could include:

- Take time to care for yourself- personal hygiene is important
- Fire weakened trees will be affected by winds associated with thunder storms, and weakened root structures due to the fire.
- Accountability of your crew members is a good habit to get into.
- Monitor Coffee Creek Rd between DP-1 and DP-2 for rolling debris.
- Review and know your procedures if a medical incident should occur including evacuation options.
- We continue to have snake and bear sightings, let others know if seen., know your mitigation/clean up plan.
- Travel at safe speeds, be aware of the public, be a defensive driver.
- Initial attack activities will pick up. The local unit is counting on help. Pay attention to the basics and remember any new start has potential to get large fast. Keep Operations informed!
- Lightning activity is still a factor, be prepared to take shelter when needed, the 30/30 rule is a good guideline.
- ERC's are at record high, adjust normal strategies and tactics .

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
