INCIDENT Weather Forecast

FORECAST NO: 3

NAME OF FIRE: Eiler Incident

PREDICTION FOR: DAY SHIFT

UNIT: Lassen N.F.

SHIFT DATE: 8/8/2014

SIGNED:

TIME AND DATE FORECAST ISSUED: 2000 local 8/7/2014

Incident Meteorologist: Pam Szatanek

WEATHER DISCUSSION: Expecting a warming trend with the chance for afternoon thunderstorms through Saturday. Another Pacific system will move out of the Gulf of Alaska and into northern CA later this weekend. Remain confident that RH recovery will be moderate at night. .

WEATHER FORECAST:

WEATHER: Mostly sunny to partly cloudy with areas of smoke. Isolated thunderstorms in the afternoon.

TEMPERATURES: MAX 78-88 F MIN 59-62 F

MINUMUM HUMIDITY: 20 to 35 percent.

20 FT WINDS:

RIDGETOP - Southwest 8 to 12 MPH.

SLOPE/VALLEY - Light and variable in the morning...southwest 5 to 8 MPH in the afternoon.

CHANCE OF WETTING RAINS: 0% **LAL (Lightning Activity Level):** 1 becoming 2 by 1400.

MIXING HEIGHT: 4,500 to 6,000 feet.

OUTLOOK FOR SATURDAY: Partly cloudy. Isolated showers and thunderstorms in the afternoon. 10 to 20 probability of precipitation. **LAL** 2. High Temperatures 78 to 88 F with lows 60 to 65 F.

EXTENDED FORECAST: A new pacific system will move into the western U.S. bringing instability to northern CA. This disturbance will increase the threat of thunderstorms for Sunday and Monday. Main concern will be outflow boundaries and enhanced lightning activity. Stay tuned for more details.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	**TYPE OF FIRE: Wildland Fire**
FIRE NAME: Eiler	**OPERATIONAL PERIOD: 08/08 (0700-0700)**
DATE ISSUED: 08/07/2014	**TIME ISSUED: 2000**
UNIT: SHU	**SIGNED:** Scott Jones **Typed/printed: Scott Jones**

INPUTS

WEATHER SUMMARY:

Expect a warming trend with chance of afternoon thunderstorms through Saturday
Mostly Sunny (patchy clouds and smoke) – Max Temp 77 - 88 RH 20 to 35% LAL 1 until 1400 hrs, then LAL 2
20ft Wind –
Slope/Valley -- Light and variable in the morning. Southwest 5 to 8 MPH in the afternoon
Ridgetop Wind -- Southwest 8 to 12 mph

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The moisture from the rain received on Mon and Tue will be nullified by the end of today's operational period. Perimeter growth remains limited to the 1000 Trails Wilderness as crews employ minimal impact suppression tactics. For the rest of the fire, fire activity remains limited to an extensive amount of heavy down fuels and tree roots. As these fuels continue to smolder and burn out, the increased exposure to the solar radiation increases the opportunity noticeable fire behavior.

New Growth Fire Behavior in Optimal Alignment

Fuel Type	ROS FWD	ROS LAT	FL (Ft)	P(i)G
Brush	30 - 45 ft/min	6 - 8 ft/min	5 - 12	77%
Timber Litter	5 - 9 ft/min	1 – 2 ft/min	2 – 8	77%

Expect Extreme Fire Behavior During any Thunderstorm Event

SPECIFIC:

Fire weakened landscape will continue to create rolling materials (large rocks / stumps / logs). Watch out for snags as cat faces continue to smolder and root bases may still be smoldering. There is the opportunity for thunderstorms to develop in the afternoon as breaks in the cloud coverage heat the surface. If the surface has an opportunity to heat up there is sufficient residual moisture to trigger thunderstorms.

Branch I – DIV I will have the greatest chance for an increase in fire activity as unburned or partially burned fuels (dirty burn) will be in alignment with the predicted wind pattern. The down slope orientation should help to check fire growth. Specific for this area **(ROS 11-34'/min; FL 6-12; RH<30% P(i)G 65%; RH>30% P(i)G 57%).**

Branch II -- The 1000 Lakes Wilderness Area due to the unknown natural fuel loading and the Minimal Impact Suppression Tactics (MIST) provides the best opportunity for any increased fire behavior.

During the initial operational periods the ERC's (RAWS – 40630) were at a 10 yr high 93%. Due to the rain ERC's dropped to a 10 yr low of 50% WED and are forecasted to spike to mid 70% by the start of the weekend. Crews should not assume that the rain received will have a lasting effect on short term fire behavior.

QR code to ERC Definition Area Graphs

AIR OPERATIONS:

Morning smoke and residual haze throughout the day should not inhibit air operations.

SAFETY

Previous and current suppression efforts have the potential to further weaken terrain creating fire line hazards; rolling material, hot ash root cavities and snags.

8/8/2014

ICS 204 Special Instructions All Divisions

Thunderstorms are possible throughout the fire area today. Review and follow **Thunderstorm Safety,** pg. 21 in your IRPG.

Take frequent hydration and nutrition breaks; document your breaks in your ICS214.

EILER HEALTH AND SAFETY MESSAGE

We Are **ALL** accountable for **SAFE** behaviors

INCIDENT: Eiler Incident	DATE: August 8, 2014 TIME: **0700-0700**

Major Hazards and Risks: Driving Hazards, Heat, Hazard Trees, Thunderstorms, Fatigue, Drought Stricken Fuels, Narrow Roads, Terrain.

Heat / Fatigue: Days are becoming warmer and drier, take frequent nutrition and hydration breaks throughout the day. Hydrate with a 2 water to 1 electrolyte drink ratio. Utilize the buddy system and monitor for excessive fatigue.

Driving: Roads are opened to the public, be alert for traffic. Park off roadways and use warning lights/flaggers as necessary. Keep your speeds down on all roads. Watch out for loose, dusty roads, unstable shoulders and fire debris. Wear your seatbelts!

Stump Hole Ash Pits: Watch your footing, extensive stump hole ash pits are in the fire area.

PPE: Wear the appropriate PPE for the assignment you are given; don't become complacent.

Fire Behavior: Fuels are drought stricken and are receptive to fire spread. As the weather pattern changes with increased temperatures and decreasing RH anticipate changes in fire behavior and plan accordingly. Consider P.A.C.E and know your L.C.E.S.

Hazard Trees: Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow **Hazard Tree Safety**, pg. 22-23 in your IRPG.

Review your ICS 206 and know what to do in the event of a medical emergency

Lookouts, **C**ommunication, **E**scape routes, **S**afety zones

Hazard Tree Safety

Hazard tree indicators:

- Trees burning for any period of time
- Dead broken or burning tops and limbs overhead, leaning or hung-up
- Numerous downed trees

Hazard Tree Control:

- Eliminate the hazard trees with qualified sawyers
- Avoid high risk areas
- Post lookouts to secure high risk areas
- Keep clear of air drops near trees/snags
- Take breaks out of hazard tree locations
- Follow ***Hazard Tree Safety**, pg. 22-23 in your IRPG*

Escape Route/Safety Zone Checklist

Escape Routes:
*More than one escape route
*Scouted – soils, vegetation, slope
*Timed – slowest person, fatigue, dozer speed
*Marked – flagged for day and night use

Safety Zone:
*Survivable without a shelter
*Natural – clean burn, water, bare soil/rock
*Manmade – constructed sites, roads
*Scouted for size and hazards
*Close enough considering escape time needed

Remember and Follow:
*The 10 Standard Fire Orders
*The 18 Situations That Shout Watch Out
*The Common Denominators of Fire Behavior on tragedy Fires
*The Downhill Line Construction Guidelines

Incident Safety Officer: Scott Hansen

Incident Commander: Billy See

EILER INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	**THUNDERSTORMS**	• Brief all personnel on ***Thunderstorm Safety*** (IRPG pg. 21). • Anticipate outflow winds and plan accordingly (LCES and PACE).
ALL	**DRIVING HAZARDS**	• Use caution operating near re-opened roadways. Park off the roadway when possible. • Use warning devices when operating near traffic. • Drive defensively! Expect the unexpected around every curve. • Drive with headlights and seatbelts on. • Slow Down! Narrow dirt roads with limited passing room. Coordinate your movements on one lane roads. • Increase following distances. Maintain Situational Awareness.
ALL	**COMPLACENCY**	• Ensure clear leaders intent is understood by all. • Maintain high standards and provide performance feedback to counteract complacency. • Don't let your guard down near the end of the mission, remain focused.
ALL	**EXTREME FIRE BEHAVIOR POTENTIAL**	• Know your LCES and maintain Situational Awareness. • Use experienced lookouts. • Adhere to the downhill line construction guidelines. • Monitor weather for changes in the wind, temp, and RH. Expect rapid rates of spread with long range spotting, have a contingency plan (PACE) with established decision points and safety zones.
ALL	**FATIGUE/HEAT/DEHYDRATION**	• Be alert for signs of fatigue and take breaks as necessary. • Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. • Be alert for signs of heat stress in yourself and others; use the buddy system. • Eat small meals often and when possible. • Drink electrolyte drinks at a 2 water to one sport drink ratio.
ALL	**AIRCRAFT OPERATIONS**	• Keep personnel out of drop zones. • Use air-to-ground freq. to communicate with aircraft. • Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective. • Avoid "heli-mopping". Eliminate unnecessary pilot exposure.
ALL	**POWER LINES**	• Follow ***Power Line Safety,*** pg. 24 in your IRPG. • Communicate power line hazards to immediate supervisor and hazard flag accordingly. • Flag area around downed power lines and deny access. • Treat all downed power lines as energized.
ALL	**TACTICAL HAZARDS**	• Follow 10's and 18's. • Complete Go no Go checklist for firing operations. • Follow the Downhill Checklist. • Know your LCES.
ALL	**DOZER SAFETY**	• Watch for rolling material. • Monitor safe working distances. • Avoid working below Dozer. • Utilize communication with the operator (radio or hand signals)
ALL	**HAZARD TREES**	• Identify and Isolate the area to provide for the safety of others. • Flag and make proper notifications. • Do Not Fall trees out of your certification level. • Follow **Hazard Tree Safety**, pg. 22-23 in your IRPG
ALL	**COMMUNICATIONS**	• Ensure instructions are clear and understood. Clearly communicate the leader's intent. • Brief others as needed, ask if you don't know. • Communicate hazards to others. • Utilize assigned frequencies only; know the communications plan (ICS 205).
ALL	**STUMP HOLE ASH PITS**	• Watch your footing and avoid areas of ash pits and stump holes.

7. Control Operations

-Construct line.
-Mop up 200 feet.
-Back haul trash.

8. Special Instructions

-Thunderstorms are predicted throughout the fire area today. Review and follow Thunderstorm Safety, pg. 21 in your IRPG.
-Take frequent hydration and nutrition breaks; document your breaks in your ICS214.
-Avoid ground disturbing activities in sensitive areas marked with one strip of red and one strip of white flagging.

Incident Location: SHU

County Shasta Co. State CA Latitude N Longitude W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

EMERGENCY FREQUENCY:

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:
Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
  1. Communications
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

CAL FIRE INCIDENT MANAGEMENT TEAM 5

Division / Group Supervisor Operational Period Expectations

Your participation as a Division Group Supervisor is a key component of the success of Incident Management Team 5. While serving as a member of this team we expect you to meet the following expectations.

- Provide Leadership and Supervision
- Implement and think safety at all times
- Maintain situational awareness at all times
- Be Creative and look for solutions to problems
- Attend briefings
- Obtain a thorough briefing from a team member of the Operations Section
- Complete and turn in your ICS-215 information by 1400 each day
- Complete shift tickets for all hired equipment.
- Participate and debrief daily with the finance unit when in Cost Apportionment
- Debrief with the plans section after each operational period.
- Provide accountability for all line personnel
- If available provide GPS data to the Situation Unit by established deadlines.
- Monitor work progress
- Backhaul all trash and supplies
- Release resources as the job is completed.

CAL FIRE
INCIDENT MANAGEMENT TEAM
WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, IMT3 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.

INCIDENT MANAGEMENT TEAM

Fire Suppression Repair

It is time to begin planning for the fire suppression repair efforts. A fire suppression repair plan will be developed for the SHU EILER Incident. To accomplish our goals we need to identify problem areas, prescribe the needed work, and ensure that the work is completed.

In an effort to identify problem areas we have created the attached form for use by the Branches and Divisions. As noted on the form, items to consider include: fences and gates damaged during the incident; road and watercourse crossings repairs; culverts and watercourses needing cleanout; fire breaks in need of waterbarring; trash and equipment pickup.

Use the attached form(s) to document locations where repair work may be necessary. Use maps to show locations. GPS's can be down loaded by GIS. Return forms to the Suppression Repair Unit at the end of your shift.

Fire Suppression Repair Checklist
