

CORRAL COMPLEX

CA-SRF-001494
P5HU49

Aug 30, 2013
Day Shift 0600 - 2000

INCIDENT OBJECTIVES	1. Incident Name Corral Complex	2. Date Prepared 8-29-13	3. Time Prepared 1600
----------------------------	---	------------------------------------	---------------------------------

4. Operational Period

8-30-13 0600 to 2000

5. General Control Objectives for the Incident (include alternatives)

Incident Objectives:

- Provide for firefighter and public safety in all incident operations.
- Protect property and infrastructure. Control fire closest to communities.
- Keep stakeholders, the public, and cooperators informed of fire status.
- Keep costs commensurate with identified values at risk.
- Protect cultural and natural resources.
- Protect wilderness values and utilize MIST in the Trinity Alps Wilderness.
- Protect the Hoopa Valley Indian Reservation Community at Risk as listed in the Federal Register.
- Protect Communities at Risk including Denny, Trinity Village, Burnt Ranch, Hawkins Bar, Salyer, and Willow Creek.
- Protect the De-No-To Trail as listed in the Federal Register of National Historic Places.

Control Objectives:

- Keep the fire:
 - North of Hwy 299
 - East of the Hwy 96
 - South of the Siskiyou / Trinity County Line
 - West of the New River

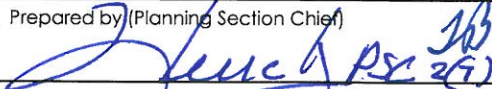

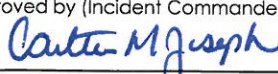

6. Weather Forecast for Period

See Attached Weather Forecast.

7. General Safety Message

INCIDENT Weather Forecast

FORECAST NO: 15
PREDICTION FOR: Friday
SHIFT DATE: 08/30/2013 0600-2000
TIME AND DATE
FORECAST ISSUED: 08/29/2013 1900

NAME OF FIRE: Corral Complex
SHIFT Day **UNIT:** CA-SRF
SIGNED: Ryan Leach (T)/Jeff Tonkin
Incident Meteorologist

WEATHER DISCUSSION: Dry air starts to push into the area this afternoon depressing the humidity a few percent below yesterday. Significant change begins tomorrow when temperatures are 5-7 degrees warmer than today with the lower elevation portions of the fire approaching 90F. Relative humidity will start to drop with dry and light northeast flow overnight, causing humidity to drop below 30% Saturday afternoon.

WEATHER FORECAST (TODAY):

WEATHER: Areas of smoke. Mostly clear.

HAINES INDEX: 3

LAL: 1

CHC RAIN: 0 %

MAX TEMP:	Elev. 3500 ft: 79 – 83 F	Elev 6000 ft: 67 - 71 F	New River Area: 92 – 96 F
MIN RH:	Elev. 3500 ft: 30 – 34 %	Elev 6000 ft: 38 – 42 %	New River Area: 24 – 29 %

WINDS: Slope: Upslope / up-valley 3 – 4 mph. New River valley, up-valley 5-7 gust 14 mph.

(EYE LEVEL) Ridges: Northwest to north 5 – 7 gust 14 mph.

TRANSPORT WIND: Southwest 8 – 10 mph

VISIBILITY: 2 – 3 mi becoming 3 – 5 mi after 1200.

STABILITY: Inversion break between 1100 and noon, mixing height 6,000 feet.

FORECAST (TONIGHT):

WEATHER: Areas of smoke. Mostly clear.

MIN TEMPERATURES: 52 – 56 F

RH: 85 – 90% below 4,000 feet, maximum above 4,000 feet around 2200 at 85% decreasing to around 45% at 0600.

WIND: Slope: Down slope/down valley 1 – 3 mph.

(eye level) Ridges: North to northeast 3 – 5 mph.

OUTLOOK FOR SATURDAY:

WEATHER: Areas of smoke. Mostly clear.

MAX TEMP:	Elev. 3500 ft: 86 – 90 F	Elev 6000 ft: 74 - 78 F	New River Area: 93 – 97 F
MIN RH:	Elev. 3500 ft: 26 – 30 %	Elev 6000 ft: 34 – 38 %	New River Area: 21 – 25 %

WINDS: Slope: Upslope / up-valley 3 – 4 mph. New River valley, up-valley 5-7 gust 15 mph..

(EYE LEVEL) Ridges: West to southwest 5 – 7 gust 10 mph.

OBSERVATIONS THURSDAY:

Big Hill RAWS (9 mi WNW – 3570 ft): Temp: MAX: 74. RH: MIN: 50%. Winds (20ft): W 5-7 gusts 15 mph.

Brush Mtn. RAWS (13 mi SW – 3941 ft): Temp: MAX: 75. RH: MIN: 49%. Winds (20ft): WSW 5 - 7 gusts 18 mph.

IRAWS 4- Trinity GS (6145 ft): Temp: MAX: 63. RH MIN: 63%. Winds (eye level): WNW 3-5 mph.

IRAWS 16 – Grand Slam (2428 ft): Temp: MAX: 88. RH MIN: 29%. Winds (eye): WSW 5-7 gusts 14 mph.

Incident RAWS Data --- SCAN Code with Smart Phone

Brush Mountain RAWS – Div A/F/X

IRAWS 16 (Grand Slam) – Div W/X

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #16	TYPE OF FIRE: Wildfire
FIRE NAME: CORRAL COMPLEX	OPERATIONAL PERIOD: August 30 2013 0600-0600
DATE ISSUED: August 29, 2013	TIME ISSUED: 2000 hrs
UNIT: Six Rivers NF	SIGNED:  Mike Beasley FBAN

INPUTS

WEATHER SUMMARY

(Refer to Weather Forecast for details) DAY: Mostly clear. Max Temp: 67-83°. Min RH: 30-42%.
Slope/Valley – Upslope 3-4 mph, Ridges – Northwest to North 5-7 mph with gusts to 14 mph.
NIGHT: Mostly clear. Min Temp: 52-56° Max RH: 45-90% Winds: N to NE 3-5 mph ridges.

FUELS

Fire is burning within the boundaries of the Megram Fire (1999) and Back Bone Fire (2009). Fuels consist of abundant heavy dead and down, snags and shrubs (snowbrush/ceanothus) in areas that burned with a high severity. Mature timber w/ a lifted canopy in Div. Lima where Megram burned with low severity. Live FMC lower on S/SE/W aspects. Live and dead fuel moistures noticeably higher in the drainages below 4000ft elevation.
Minimum fine fuel moisture: 6-8%, 1000 hour FMC: 9-11%, Live fuel moisture: 80-100%.

OUTPUTS - FIRE BEHAVIOR

➤ **Forecasted Indices (Big Hill RAWs) ERC: 49 (Down 2) BI: 46 (Down 6)**

Thresholds for Active Fire Behavior in the Corral Complex area:

20ft Winds > 7 mph. RH < 31%. Temperature > 82°. 1000hr FMC < 13%. BI > 50. ERC > 47.

GENERAL: Yesterday's fire spread was minimal as humidities remained above 40% across most of the fire area. Today's fire behavior potential will be greater as a result of the slightly lower relative humidity and clear skies. There is a potential for low to moderate spread rates and fire behavior across the higher elevations and east of the crest after noon. Fire behavior at the lower elevations and west of the crest will be generally low. Most fire behavior will be backing and flanking at 1 ch/hr. or less with smokes showing after noon.

DIV F & H (W Flank, Tish Tang Ridge area) – Expect the fire to spread very slowly to the west and back off the ridge to the north and south of the South Fork Tish Tang Ck. Rollout will not likely result in any rapid upslope runs. Heavy fuels continue to smolder and consume.

DIV L (NW Flank, Tish Tang Point area) – Expect low spread to the NW towards and around Tish Tang Point. Suppression efforts on the spot fire in the bottom of Tish Tang Ck will keep that fire in check. Rollout will not likely result in any rapid upslope runs. Heavy fuels continue to smolder.

DIV M & P (NE Flank, Trinity GS/H-2 area) – This edge is largely cold, especially inside the Backbone Fire footprint from 2009. Spot fire east of the crest is not showing IR heat, but don't bet on that, keep a close eye for this area for signs of heat in the heavy fuels.

DIV R & W (E/SE Flank, South of Grizzly Camp) – This is a problematic area with heat and a high potential for rollout at the head of Quinby Creek, however the rest of the Division west of the crest and H-3 looks cold, and can likely be cold trailed. Fire spread potential is fairly low, and both retardant and bucket drops have been effective.

DIV X & A (Horse Linto Ck area) – Fire is established at the bottom of Horse Linto Ck. There is a slight potential of the fire making a slope reversal and heading upslope to the ridge top to the south, but rates of spread will stay low, unless torching brush provides a source of spotting.

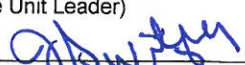

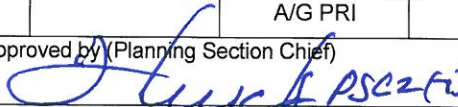

**Maximum Fire Behavior (head fire upslope): Rate of Spread: 5-10 chains/hour (10 ft/min),
Flame Length: 4-6 ft. Probability of Ignition: 40-60%. Maximum spotting distance of 1500 feet.**

AIR OPERATIONS

Potential for a mild inversion in the morning breaking between 1100 and noon. Plan accordingly.

SAFETY

- Don't get complacent after multiple days with low fire behavior. Other dangers exist, besides fire behavior.
- *I long to accomplish a great and noble task, but it is my chief duty to accomplish small tasks as if they were great and noble.* - Helen Keller (1880-1968) American Writer

SAFETY MESSAGE CORRAL COMPLEX

August 30, 2013

DRIVING – Slowing down is the best mitigation for numerous safety issues. Learn to recognize and pay attention to the warning signs of fatigue. Take a break if you experience wandering or disconnected thoughts, yawn repeatedly, have difficulty focusing or keeping your eyes open, or find yourself missing traffic signs or tailgating other drivers. **Be alert for trucks, civilian vehicles and wildlife on roads in all areas!**

SNAGS: There are numerous snags throughout the entire incident area. Maintain a strong situational awareness at all times. Look up, look down, and look around and be especially alert when the wind picks up. When falling operations are in progress, keep nonessential personnel at least 2 ½ tree lengths away from the activity.

HAZARDOUS WILDLIFE, INSECTS AND PLANTS: For bears, pick up and remove all trash from fire line. Don't allow storage of food in tents. Manage trash in spike camps to avoid attracting bears

For cougars, travel in pairs, especially at night. If confronted, stand erect, extend arms. Don't crouch. Don't run or assume the prone position. If confronted while with another FF, one FF can crouch to get rocks or limbs to throw at the cougar. If attacked, go to a prone position and protect head/neck.

Incidents of bee/yellow jacket stings/bites are on the rise. Find out whom of your subordinates are allergic and if they carry epi-pens.

Try to avoid contact with poison oak when possible. Emphasize pre-treatment, change clothes frequently, take cool showers, and see medical unit for treatments.

HYDRATION: Encourage your crew to drink plenty of water before, during, and after every shift, up to one and a half gallons a day. Be alert for signs of heat stress in yourself and others. Treat for symptoms early by providing rest under shade and continuing to push water consumption.

FATIGUE: Be alert for signs of fatigue in your crew and have them take breaks as often as necessary. Make sure they are maintaining a 2:1 work/rest ratio.

Safety Officers: Marty Hamel and Brian Savage

Corral Complex- Bear Safety Information Sheet

Black Bear Facts

- The only species of bears in California and Nevada are Black Bears. However, they do range in color from blonde to black, with cinnamon brown being the most common color.
- Black Bears will seek to avoid confrontation with humans. If encountered, always leave them an escape route.
- Males are much larger than females and can weigh up to 500 pounds, although the average weight is about 300 pounds.
- Black Bears can sprint up to 35 mph and they are strong swimmers and great tree climbers.
- Black Bears are omnivores. A typical wild bear diet consists of berries, plants, nuts, roots, honey, honeycomb, insects, larvae, carrion and small mammals.
- Bears that are accustomed to people can become too bold and lose their fear of humans. To avoid this behavior, do not let bears become habituated to human sources of food.

Spiking or Working Around Bears

- Never leave food, toiletries and/or anything with a scent in your tent, sleeping bag or car.
- Keep sleeping bags, tents and sleeping areas free of food and beverage odors.
- The trunk of your car and coolers are not bear-proof!
- Do not leave out food, stored drinks. The smell will attract bears.
- Clean everything after preparing a meal.
- Dispose of garbage properly.
- **Remember, never feed a bear! A fed bear is a dead bear.**

Bear Encounters

In Spike Camp: Do not run. Be aggressive and assert your dominance by standing tall and making noise that will scare the bear away. Banging loud objects together and shouting loudly works well.

On The Line: This is the bear's territory, respect that and do not run. Make eye contact but don't stare, make yourself appear as large as possible, stay calm and quiet, back away. Communicate the information to your supervisor and personnel in the area.

Anywhere: If the bear attempts to get away, do not block the bear's escape route!

- Never get between a mom and her cubs.
- Slowly walk away and make a loud noise.
- Though attacks are very rare, if you are attacked, fight back aggressively!

8. MEDICAL EMERGENCY PROCEDURES

When an injury occurs, initiate care with available resources at scene and notify DIVS. The DIVS shall coordinate the incident and direct necessary actions. The following steps shall be taken to mitigate the incident:

- Determine the nature of the emergency.
- If the emergency is a medical injury/illness, determine if the injury/illness is life threatening.
- If the injury is life threatening, then clear designated frequency for emergency traffic.
- Identify the on-scene point of contact by position.
- Ensure that the Medical Unit Leader is contacted immediately.
- Identify number injured, patient assessment(s) and location (geographic and/or GPS coordinates).
- Identify on-scene medical personnel by position and last name (i.e. EMT Jones).
- Identify preferred method of patient transport.
- Determine any additional resources or equipment needed.

The Evacuation Plan should be continually evaluated, and contingencies developed in the event the first plan is not effective.

MEDICAL TRANSPORTATION CHECKLIST

DATE / / MEDEVAC INCIDENT NUMBER _____

1. COMMAND/CONTROL

INCIDENT NAME (Geographic Name + 'Medical')			
POC/IC NAME:	The individual that is the Primary Point of Contact (POC) or IC for the Incident	MEDIC IN CHARGE :	The individual that is overseeing medical care at the scene.

2. PATIENT ASSESSMENT

PATIENT #__of__	AGE:	SEX :	WEIGHT:
	INJURIES/ILLNESS:		
	RESPIRATION:	PULSE:	CONSCIOUS: YES/NO

PATIENT SEVERITY: SEVERE MODERATE MILD NONE

FOR MULTY CASUALTY:	IMMEDIATE:	DELAYED:	MINOR:
---------------------	------------	----------	--------

3. PATIENT LOCATION :

Datum NAD 83	Example: N 0° 00.00' x W 0° 00.00'
LAT/LONG:	
GEOGRAPHIC LOCATION (i.e. DP 1, H-2, ICP, Camp, Road, etc.)	

4. MEDICAL TRANSPORT NEEDED

MEDEVAC	IMMEDIATE EVACUATION IS CRITICAL; URGENT NEED FOR ADVANCED LIFE SUPPORT GROUND OR HELICOPTER TRANSPORT (Unstable patient that has a life threatening injury or illness) ** Medevac is an incident within an incident, one on scene point of contact needs to take charge.**
NON-EMERGENCY MEDICAL TRANSPORT	EVACUATION IS NOT CRITICAL; NON-URGENT NEED FOR GROUND OR HELICOPTER TRANSPORT (Typically utilized for stable, non-life threatening emergencies.)

5. ADDITIONAL RESOURCES AND EQUIPMENT (Check as applicable)

<input type="radio"/> TRAUMA KIT	<input type="radio"/> PARAMEDICS
<input type="radio"/> SPINAL IMMOBILIZATION DEVICE(S)	<input type="radio"/> PERSONNEL (Crews/Helitak Modules/etc for Manpower)

TRAINING MESSAGE

8/30/2013

!!! CORRAL COMPLEX TRAINEES !!!

If you have not checked in with the Training Specialists, the time is NOW.

There will be an upcoming Incident Management Team transition, trainers and trainees demobbing, and a new Incident Training Specialist assigned.

**Make your trainee experience easy,
check in now.**

CORRAL COMPLEX HUMAN RESOURCE MESSAGE

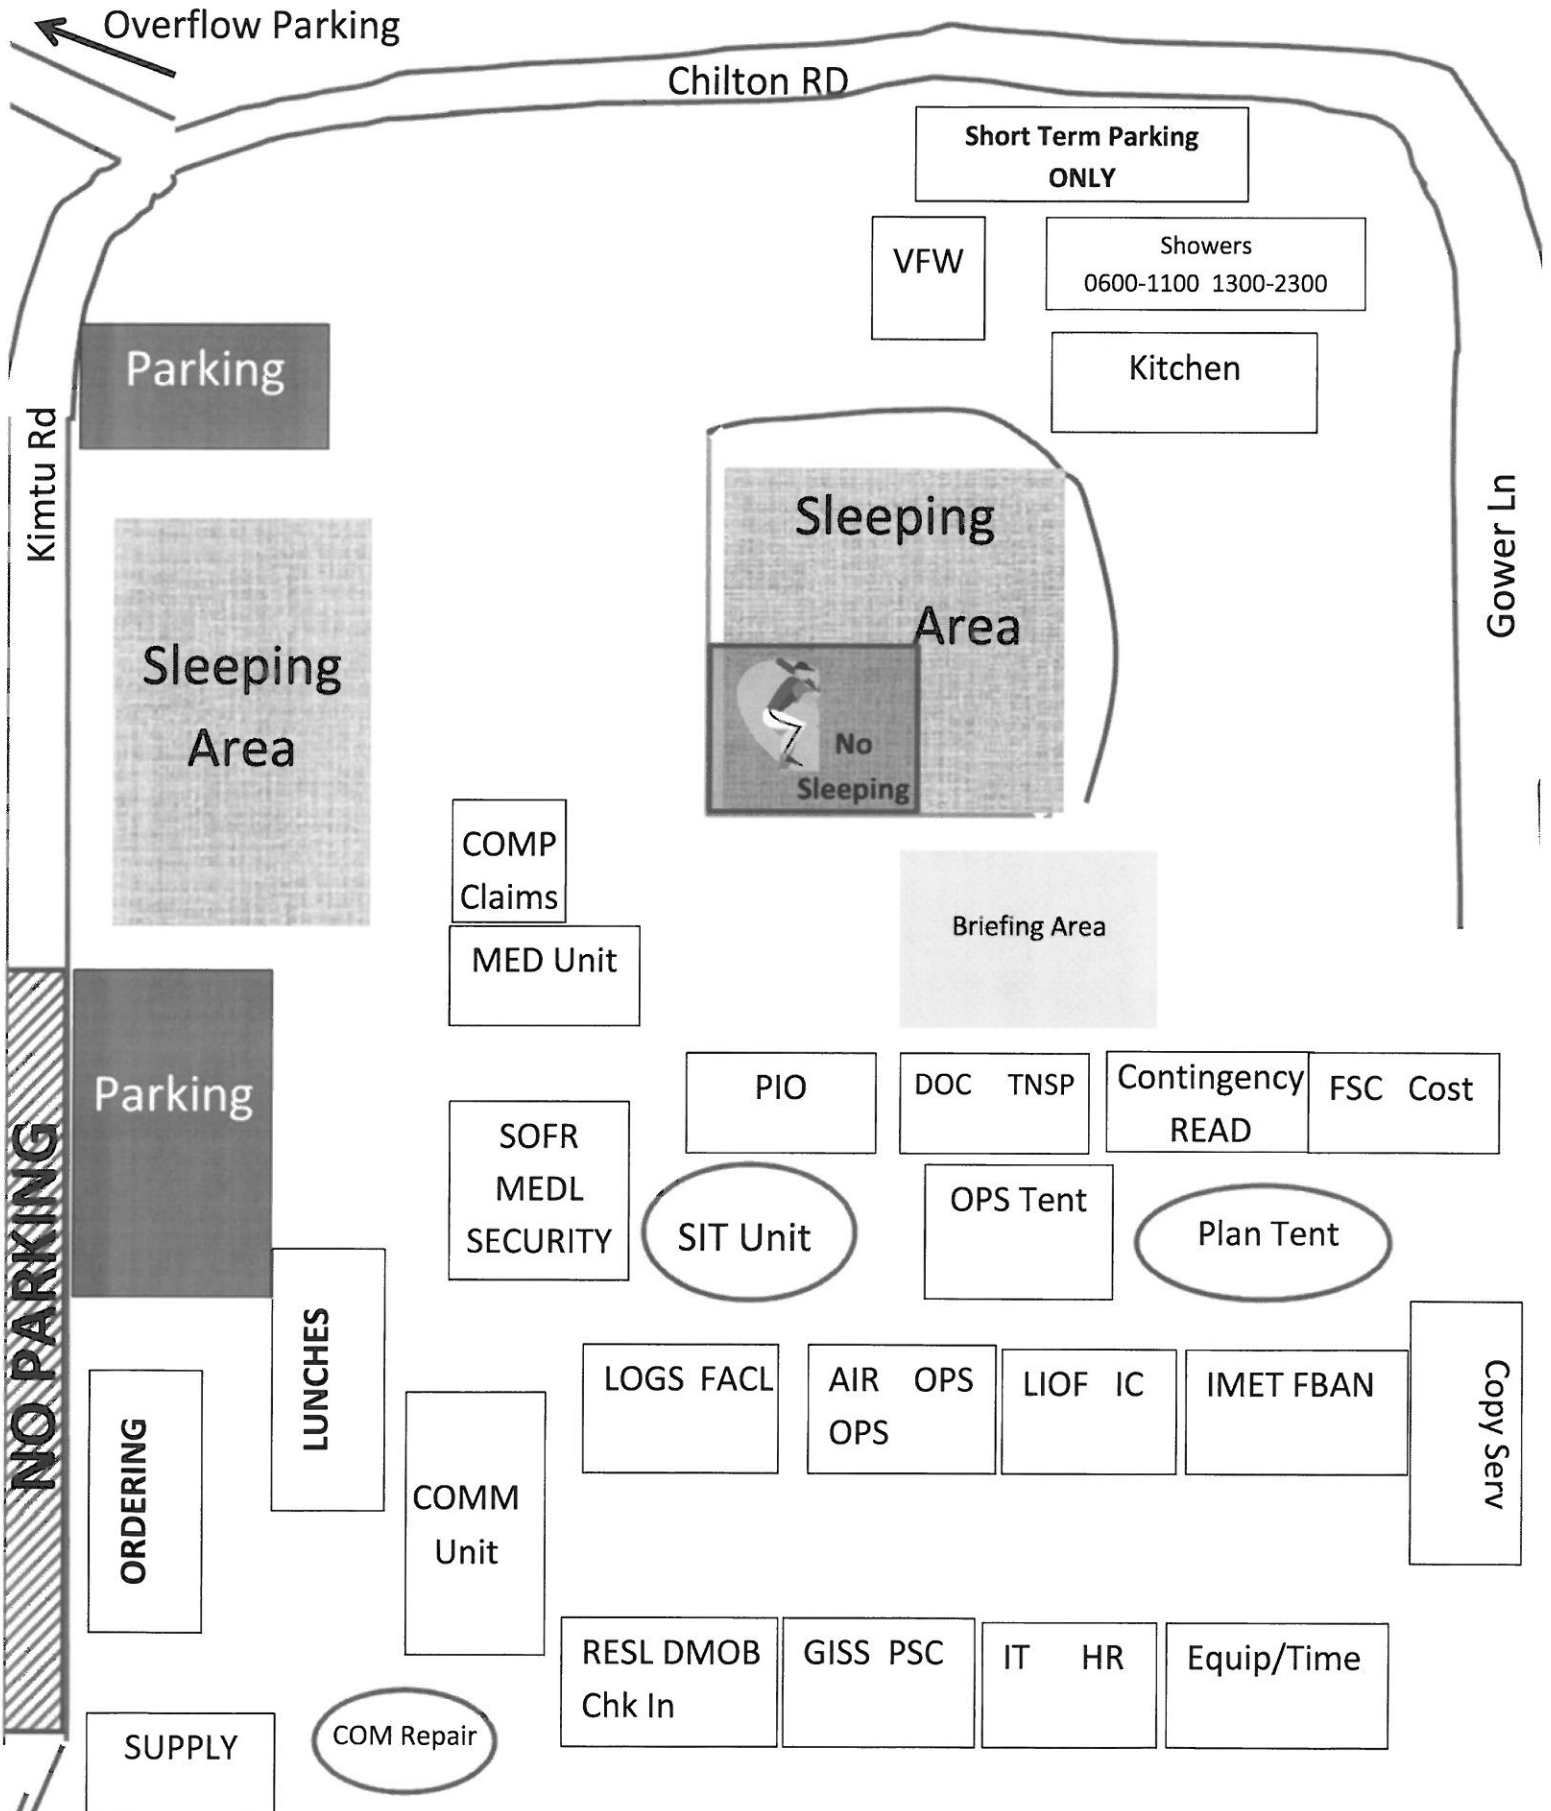

**If there is any way I can assist you,
give me a call!**

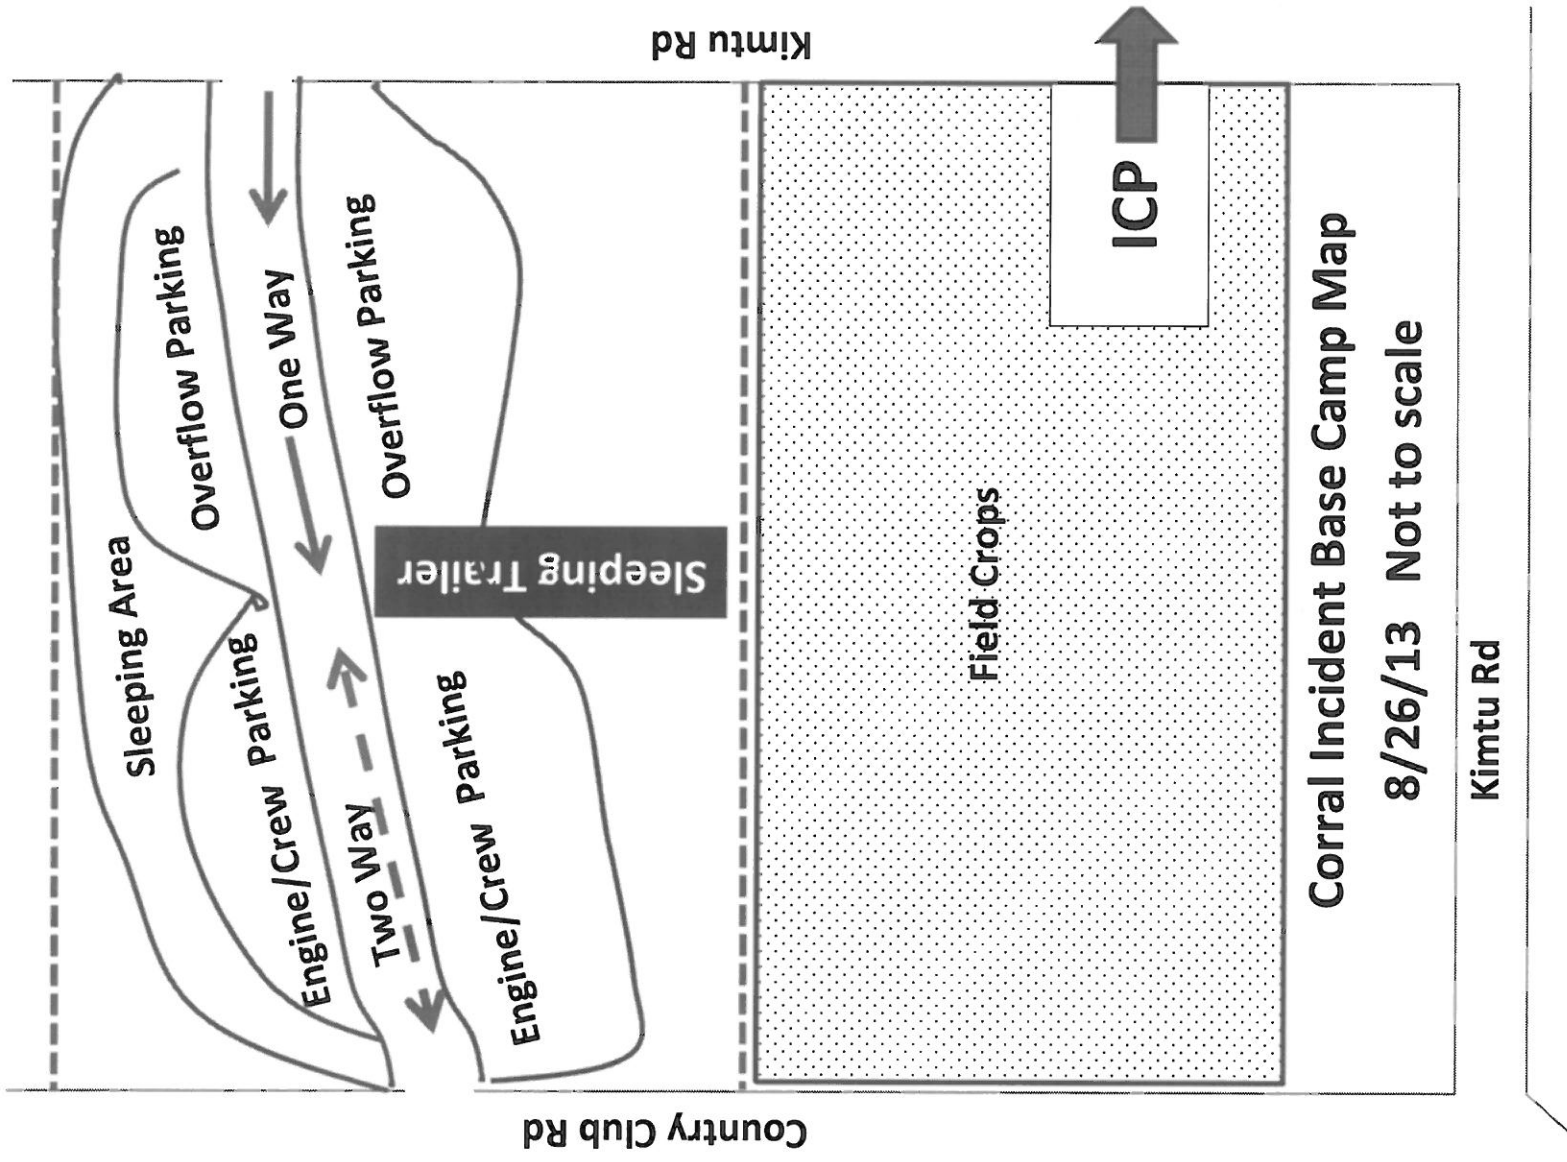

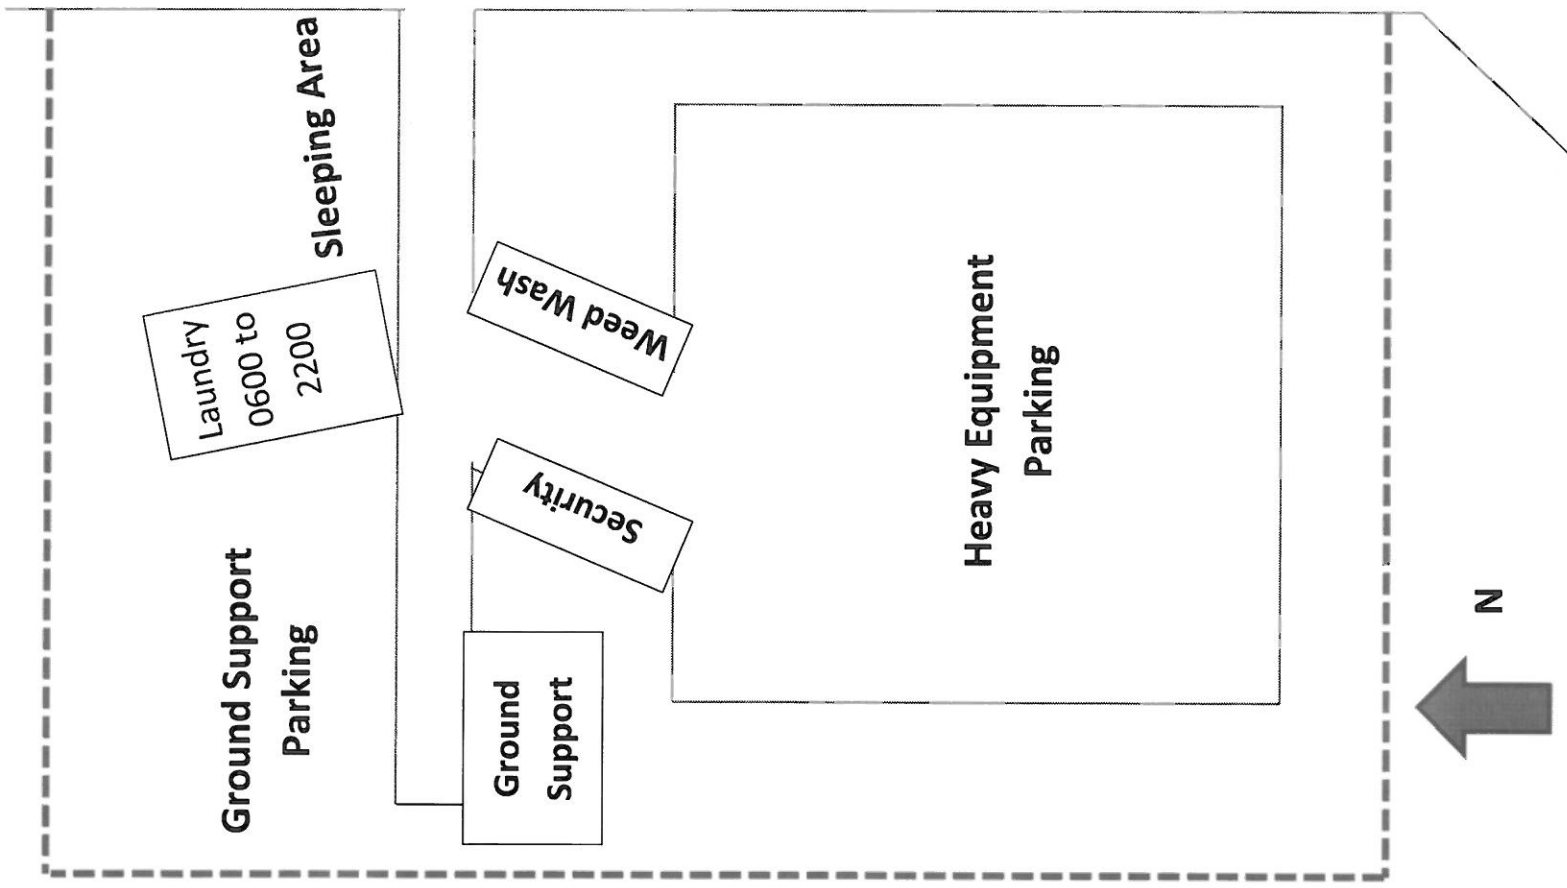

**Your Human Resource Specialist
Mike Baines, 724-678-6147**
