FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

The fire will remain fuels & topography driven. Fire spread continues to be from heavier fuels burning log to log and rolling material. Falling snags will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire. Rates of spread will be from 1 to 8 chains per hour with flame lengths 1-4 feet in the timber. With the present alignment of our fire expect mainly backing and flanking fire. Short uphill runs are probable where heavy fuels, brush and slope align. Spotting if any will be short range less than 400feet.

SPECIFIC:

West Side DIV F&H, Tish Tang Ridge:

- Expect the fire to continue to slowly back off of the ridge, log to log. Rollouts will result in short uphill runs.

South – Eastside DIV R&W:

- No Forward fire progression expected. Watch for holdover heat and rollouts.

North West DIV L:

- Heavier fuels continue to hold heat. Forward progression will be mainly from rollout. Fire is still in a backing alignment. Lima spot is in a backing alignment watch for rollouts and snags.

Horse Linto Crk. DIV A&X:

- There is some heat holding in the creek bottom Div.X/W break. With the aircraft working it there is a low potential for it to cross the creek.

Northeast DIV M&P:

- No forward fire progression expected.

Air Operations: Expect smoke inversion to lift by 1000hrs.

Safety:

Steep country means rolling material, watch for spot fires below you!

Local Concerns

Local Schools Open Today

- Effects for the incident will be:
 - Increased traffic on all local roads
 - Slow moving busses making frequent stops in Willow Creek and Hoopa.
 - Pedestrian traffic in Willow Creek and Hoopa.
 - Expect Congestion at Willow Creek Elementary, Hoopa High and Hoopa Elementary between 8:30 & 9:00am and 2:30 & 3:30pm.
 - Additional Law Enforcement presence adjacent to the schools.
 - Likely additional civilian traffic going through the check points.
 - Extra caution in these areas is necessary.

Emergency Procedures

- Are you familiar with the emergency evacuation procedures in the Medical Plan? What is your backup plan?

Preventing Heat Stress

- Energy drinks -Avoid them completely! They dehydrate you and make you susceptible to heat stress and other medical problems.
- Gatorade - Use in moderation. While it has essential electrolytes, it also has sugar! You should be drinking at least two bottles of water to every bottle of Gatorade.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL DIV's	SNAG HAZARDS	Follow Hazard Tree Safety Guidelines (IRPG p. 20). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. Be especially alert around snags during wind events. Use lookouts. Maintain Situational Awareness.
ALL DIV's	DRIVING HAZARDS	Drive defensively! Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. Be alert for wildlife, heavy trucks, & high speed opposing traffic crossing into your lane. BRAKE CHECK: Prior to steep, long descents allow brakes to cool, all heavy vehicles without Jake brakes or retarders must stop and remain parked for at least 20 minutes allowing brakes to cool down before proceeding down the rest of the grade. Use appropriate vehicle gear ratios to help control speed.
ALL DIV's	FATIGUE	Maintain 2:1 work/rest ratio. Monitor incoming resources for level of fatigue. Check reporting resources for length of time worked prior to this assignment. Assess cumulative fatigue level.
ALL DIV'S	HYDRATION	Drinking water before, during and after shifts, up to 1.5 gal. per shift. Include sports drinks to maintain electrolyte levels. Be alert for signs of heat stress in yourself and others. Avoid drinking energy drinks.
DIV'S F, H, L, W, Z & SS	WORKING AROUND HEAVY EQUIPMENT	Maintain safe working distances when working around equipment. Never approach without making eye contact with operator. Avoid working below equipment. Communicate all hazards to operator. Personnel involved with chipper use to review & sign JHA; follow JHA direction; Utilize recommended PPE; review operator's manual. Never operate chipper alone.
ALL DIV's	DRUG CULTIVATION AND LAB SITES	Be alert for any signs of illegal cultivation or drug labs. If found, leave area and request law enforcement, advise DIVS and warn all personnel to stay clear of area.
ALL DIV's	BEAR PRECAUTIONS	BEARS: Pick up and remove all trash from fire line. Do not store food, food wrappers, empty lunch bags, tooth paste, etc. in parked vehicles, unattended personal gear bags, or tents. Strictly adhere to bear mitigation measures prescribed for spike camps or coyote operations.
ALL DIV's	POISONOUS INSECTS, SNAKES	Identify, avoid, and get treatment for any bites or stings. Use caution (for bees, wasps, etc.) when drinking from opened cans.
ALL DIV's	AVIATION USE	Confirm each mission is necessary to minimize pilot exposure. Communicate with aircraft per communications plan. Keep drop zones clear of personnel. Review "Aviation Watch Out Situations," page 52 in IRPG.
ALL DIV's	STEEP TERRAIN AND ROLLING MATERIAL	Watch your footing; take your time; ensure adequate spacing between crewmembers. Post lookouts to warn of rolling debris if necessary.
DIV L & M	COYOTE OPERATIONS	Pick a snag free area for camp, scout and identify locations for medevac site. Perform a radio test with Communications; provide Communications with Lat/Long. Backhaul trash as soon as practical to prevent bear issues. Be prepared for the 0700 radio briefing.
ALL DIV's	POISON OAK	Review identification of poison oak. Avoid poison oak, wash as frequently as possible. Obtain medication from Med Unit. Change into clean clothing as often as possible.
ALL	SAFETY ZONES	Follow safety zone guidelines (IRPG p. 7). Carefully evaluate burned areas before designation as safety zones due to snags and re-burn potential. When safety zones are distant from work site, set trigger points to allowing personnel to reach them in a timely manner. Post lookouts when working in an unburned area.

Understanding Common Cold and its Symptoms

What Are the Symptoms?

One to three days after catching a cold virus, symptoms begin suddenly. They start with a burning feeling in the nose or throat. Next comes sneezing, a runny nose, and the feeling of being tired, sounds like working on the fire line in smoke and dust, don't it.....

For the first few days, your nose teems with watery nasal secretions. Later, these become thicker and darker. Dark mucus does not necessarily mean that you have developed a bacterial infection.

You may get a mild cough. It won't get much worse, but it is likely to last into the second week of your illness. If you suffer from chronic bronchitis, a cold will make it worse. If you are coughing up dark material -- or if you are feeling a lot of distress low down in your lungs -- you may have a bacterial infection. These symptoms can also be caused by a cold virus other than a rhinovirus.

Usually there is no fever -- in fact, fever and more severe symptoms may indicate that you have the flu and not a cold.

Cold symptoms settle in between **one and four days** after you are infected by a cold virus and **typically last for about three days**. At that point the worst is over, but you may feel congested for a week or more. During the first three days that you have symptoms, ***you are contagious***. Please try to wash your hands often, order Clorox Disinfecting Wipes from supply and clean the common areas you are working in, Crew Buggy, Engine Cab, work station.

Colds themselves are not dangerous. They usually ***go away in four to 10 days*** without any special medicine. Unfortunately, colds do wear down your body's resistance, making you more susceptible to bacterial infections.

If your cold is nasty enough, seek medical attention. Medical Unit will likely examine your throat, ears and check your temp. If your symptoms have lasted for over 5 days or you have a fever you may be sent down to the clinic for a throat culture, this is done by brushing your throat with a long cotton-tipped swab. This will show whether you have a bacterial infection, which requires treatment with antibiotics.

See the Medical Unit if:

- You notice an inability to swallow.
- You have a sore throat for more than five days.
- You have an earache.
- You have a stiff neck or sensitivity to bright lights.
- Your throat hurts and you think you have a fever.
- Your cold symptoms worsen after the third day. You may have a bacterial infection.

What Can You do for Fast Relief from a Cold or the Flu?

Most cold and flu drugs attack symptoms, not the specific viruses. They don't cure, but they can bring relief, lighter symptoms, or shorten your illness. There's no one right way to treat a cold or the flu. Rest, Nutrition, and Hygiene are all important in reducing the spread and impact of colds on your crew.

PLEASE REPORT ALL CASES OF COLDS TO THE LINE EMTS OR THE MEDICAL UNIT SO WE CAN PLAN FOR YOUR CARE!!!!

Human Resource Message

PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs whenever unwelcome conduct on the basis of gender, adversely affects a person's ability to do their job, and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following types of conduct:

- Unwelcome sexual advances
- Requests for sexual favors
- Discussing sexual activities
- Telling off-color jokes
- Unnecessary touching
- Displaying sexually suggestive pictures
- Using demeaning or inappropriate terms
- Using indecent gestures
- Using crude and offensive language
- Commenting on physical attributes

"Inappropriate behavior is harassment including sexual and racial harassment and shall not be tolerated".
Fireline Handbook, Chapter 6, Common Responsibilities.

"We are caught in an inescapable network of mutuality, tied in a single garment of destiny"

-Martin Luther King Jr.
