# FIRE BEHAVIOR FORECAST

**FORECAST NUMBER: Butler - 4, Dance - 8**

**TYPE OF FIRE: Wildland Fire**

**FIRE NAMES: Butler and Dance**

**OPERATIONAL PERIOD: 1800 - 0600, August 3 - 4, 2013**

**DATE ISSUED: August 3, 2013**

**TIME ISSUED: 1100**

**UNIT: Butler - Klamath NF, Ukonom RD; Dance - Six Rivers NF, Orleans RD**

**SIGNED: /s/ Taro Pusina FBAN (t)**

## INPUTS

**WEATHER SUMMARY: See attached Incident Weather Forecast #1N**

### Discussion:

The trough will slowly lift out of the region through the weekend and temperatures will trend upward with dropping RH's. Winds will generally remain light and terrain driven. Inversion will cause smoke to hang low in valleys until around 1100.

Sky/Weather: Mostly clear with areas of smoke in valleys after 2200

Min Temp: 49 - 55°

Max RH: 63 - 68%

Winds:

Eye level: 1800 - 2100 West or upslope 4 - 7 mph, gusts to 12

2100 - 0600 East or downslope 2 - 4 mph, gusts to 8 after 1400

## FIRE BEHAVIOR

**GENERAL: ERC is 65 and at the 97<sup>th</sup> percentile and the area is at near record dryness for this time of year.**

**Butler:** Fire will burn actively with moderate behavior until about 2100. Burning conditions should moderate significantly between 2100 and 0600.

### Divisions A, E, H:

**1800 - 2100:** Moderate fire behavior as fire crosses Lewis Creek, reverses slope and burns up-drainage. Isolated torching and short up slope runs can occur. Expect flame lengths of 4 - 6' and rates of spread of 5 - 10 chains per hour. Spotting distance 1/8 - 1/4 mile with probability of ignition at 50%.

**2100 - 0600:** Fire activity will significantly decrease after 2100. Light downcanyon winds will push the fire downslope at slow rates of spread. 1 - 2' flame length and rate of spread < 2 chains per hour.

### Divisions K, T, W, Z:

Fire will continue to back and flank toward Salmon River Rd, Lewis and Grant Creeks. Any rollout could result in subsequent uphill runs or the fire crossing Salmon River Rd. Moderate to low fire behavior until 2100, then low activity for the remainder of the evening. Max flame lengths of 2 - 4' with low to moderate rates of spread of between 2 - 6 chains per hour.

**Dance:** 300' + mop-up efforts have significantly reduced fire activity. A few interior pockets, stumpholes and heavies will continue to burn themselves out. An escape to the north in Divisions B or M would result in headfire with flame lengths of 1 - 4' and a rate of spread of 4 - 6 chains per hour. Isolated torching would result in spotting up to 1/4 mile. Significant reduction in fire behavior after 2200 hrs.

## AIR OPERATIONS

Morning inversion will create smoky conditions in valley bottoms.

08/03 Sunset - 20:28

08/03 Sunrise - 06:12

## SAFETY

- Watch for rolling material igniting unburned vegetation below.
- Fire will be more active prior to onset of inversion.
- Rates of spread and fire behavior will increase in steep chutes and narrow canyons, particularly when wind, aspect and terrain features are in alignment.
- Be aware of slope reversal in drainage bottoms and subsequent rapid rates of spread.
