FIRE BEHAVIOR FORECAST					
FORECAST NUMBER: 13	TYPE OF FIRE: Wildland				
FIRE NAME: Caldor	OPERATIONAL PERIOD: September 29 <sup>th</sup> 24 hour				
DATE ISSUED: September 28, 2021	TIME ISSUED: 1900 Hours				
UNIT: CA Eldorado National Forest/Lake	SIGNED: Lauren Blake/ FBAN(t) 909-573-6065				
Tahoe Basin Management Unit Robert Scott FBAN					
INPUTS					

WEATHER SUMMARY: ... See detailed Fire Weather Forecast in IAP

#### **FUELS:**

Needle and leaves from dry and underburned trees are creating a fresh fuel bed. Fire will move easily through these fuels, often undetected, until reaching heavy fuels. The Eldorado National Forest is classified as "Extreme to Exceptional" drought, with Energy Release Components dropped briefly after the recent moisture but expected to near the 90<sup>th</sup> percentile very quickly due to return to low relative humidity's. Heavy dead and down fuels will likely burn completely, holding heat and actively consuming through all hours of the day. Fine dead fuel moisture is calculated at 6% or less.

#### OUTPUT

#### GENERAL:.

- Atmospheric moisture has reduced available fuels. Spotting distances and spread rates will also be reduced. Surface fire in fine fuels will still be possible but transition to group torching will confined to full sun locations and warmer slopes.
- Probability of Ignition =~ 55%

Fuels and Wx inputs: Temp:74 deg., RH: 9-25% Winds 1Hr-6, 10hr-7, 100hr-8

#### SPECIFIC:

**Branch 1-** Fire continues to consume interior fuels. Green islands could produce isolated group torching during the afternoon hours.

**Branch 3:** Light easterly winds will be favorable but could energize interior heat where exposed and push into green islands that were not a threat previously.

Divisions India and Mike: Pockets of heat well interior could produce fire movement to green islands as fire finds fresh fuels to move through. Repopulation of Highway 50 corridor will continue to bring an increase in service calls; potential for reburn remains in the green islands and heavy fuel concentrations.

Division Quebec and Romeo: Stringers of fuels in mostly rocky terrain will continue to consume.

Divisions Oscar and Papa: Burn down of heavy fuels continues along the ridges of Papa.

**Nightshift:** Expect very cold conditions tonight. Low laying areas, especially on the east side fo the crest will experience temperatures below freezing. Secure sensitive equipment that will be exposed throughout the night.

**AIR OPERATIONS**: Conditions will be favorable for aviation operations.

#### **SAFETY**

Change in wind direction, even light winds, can breath life into hidden heat into available fuels that have not been challenged in a while.

# Prevention and Management of COVID-19 During Wildland Fire Operations Keep yourself and your peers safe by practicing these measures whenever possible

#### **Practice Social/Physical Distancing**

- · Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.

- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.

 Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.

#### Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/ sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

#### Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.

· Only discontinue isolation after meeting CDC criteria.

## **Understand Different Face Coverings**

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

### Caldor Fire September 29, 2021 Human Resource Message

#### Rights and Responsibilities While On Assignment

#### You have a right to:

- A safe work environment
- Adequate information, food, sleep, equipment, and transportation
- Answers to your questions

But it's not one-sided. Your help, cooperation and commitment are needed. In order for all fire personnel to be effective, here is an outline of your responsibilities:

#### **Promote and Maintain Good Communications**

Adequate and accurate communications and information flow are essential for efficient fire suppression efforts and effective interpersonal relations.

Maintain an Attitude of Respect and Concern for your Colleagues. Fire suppression efforts can only be accomplished by accessing the skills and abilities of a wide variety of people. An attitude of mutual respect and appropriate behavior is essential for all personnel. Civil Rights violations will be dealt with promptly. If you have a concern, please report it to the Human Resource Specialist, your supervisor, or any member of the Management Team.

Fire camp will be a Drug and Alcohol-Free workplace. Here are the rules:

From the Fire line Handbook, Chapter 6 – Common Responsibilities: Non-prescription unlawful drugs and alcohol are not permitted at the incident. Possession or use of these substances will result in disciplinary action.

Remember, YOU are responsible for your conduct and behavior.

\*\*Our lives are not determined by what happens to us but by how we react to what happens, not by what life brings to us, but by the attitude we bring to life. A positive attitude causes a chain reaction of positive thoughts, events, and outcomes. It is a catalyst, a spark that creates extraordinary results.

Janine Summy, Human Resource Specialist, 509-429-1206

Interagency Incident Management

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and the news media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the Information Office if there are any issues.

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – Please refrain from posting incident related videos to your personal social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness. When this happens it could reflect poorly on all that are attached to this incident.

Please email photo and video submissions to 2021.Caldor@firenet.gov

**MAIL** – If you need to send or receive mail, please see the mailing address below. Sending letters, cards to your loved ones, or mailing bills. Please stamp your mail and it will be taken to the post office for you. If you don't have a stamp, we will provide one.
