Fire Weather Forecast

FORECAST NO: 54 Fire: Caldor

PREDICTION FOR: Monday-Monday Night UNIT: USFS Eldorado NF

DATE: October 11th, 2021 Incident Meteorologist: Derek Williams

FORECAST ISSUED: 1900 October 10th, 2021 Signed:

RED FLAG WARNING IN EFFECT THROUGH TUESDAY FOR STRONG NORTHEAST WINDS

<u>WEATHER DISCUSSION</u>: A strong cold front will move through the area today resulting in increasing northeast winds and chances for snow showers in the morning. Snow will end later this morning with less than one inch expected and will be confined to areas east of the Sierra crest. Clouds will clear somewhat during the afternoon. Stronger northeast winds are expected to develop overnight into early Tuesday morning with ridgetop gusts around 45 mph. Wind chills today will be in the 20s and 30s. Very cold temperatures tonight across eastern portions of the fire are expected tonight with lows in the lower teens and wind chills in the 10-15° range. Western portions of the fire will remain dry with relative humidity dropping into the 20s this afternoon.

TODAY:

SKY/WEATHER: Cold and blustery with morning snow showers along and east of Sierra crest.

MAX TEMP: Below 5000 feet: 46-52° MIN RH: Below 5000 feet: 22-27% Above 5000 feet: 30-40° Above 5000 feet: 35-45%

WIND CHILL: Below 5000 feet: 25-35°

Above 5000 feet: 5-15°

CHC WTG RAIN: 10% LAL: 1

WINDS: Slope/Valley: Increasing northeast winds through the day to 15-20 mph with gusts to 25 mph.

(20 feet) Ridgetop: Northeast 10-20 mph in the morning increasing to 20-25 mph with gusts to 35 mph late

afternoon.

HAINES: 3 (Low).

MIXING HEIGHT: Rising to 10000 feet by 1500. **INVERSION:** Little to no morning inversion.

TONIGHT:

WEATHER: Windy and cold! Diminishing clouds.

MIN TEMP: East Valleys: Around 10 MAX RH: Below 5000 feet: 45-50%

Below 5000 feet: 30-35° Above 5000 feet: 75-85%

Above 5000 feet: 15-22° WIND CHILL: Below 5000 feet: 20-30°

Above 5000 feet: -5 to +10°

CHC WTG RAIN: 0% LAL: 1

WINDS: Slope/Valley: Northeast 10-15 mph with gusts to 20-25 mph.

(20 FEET) Ridgetops: Northeast winds increasing to 30-40 mph with gusts to 40-50 mph by early Tuesday

morning.

INVERSION: Weak inversion developing.

EXTENDED OUTLOOK: Tuesday through Saturday: Gusty northeast winds will gradually diminish Tuesday after a very cold start to the day. A gradual warmup beginning Wednesday, drier conditions and lighter winds overall are expected for the remainder of the week. High temperatures are expected to be back into the 70s by Saturday with mostly clear skies each day.

FIRE BEHAVIOR FORECAST							
FORECAST NUMBER: 23	TYPE OF FIRE: Wildland						
FIRE NAME: Caldor	OPERATIONAL PERIOD: October 11 th						
DATE ISSUED: October 10, 2021	TIME ISSUED: 1600 Hours						
UNIT: CA Eldorado National Forest/Lake Tahoe Basin Management Unit	SIGNED: /s/ Teresa Riesenhuber FBAN						

INPUTS

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP
-- Red Flag Warning for west Caldor fire area --

FUELS:

All fuel classes (live, dead, fine, heavy) continue to be very dry despite the recent moisture events and will remain near historic lows for the remainder of the incident or until a significant precipitation event occurs.

OUTPUT

GENERAL:

- Rain and snow may reduce chance of rapid rates of spread, <u>HOWEVER</u> the winds could over come the effects of moisture and cause unexpected spread rates and potential for spotting.
- Recently fallen fine fuels will carry fire across containment lines that have not been raked in recent days.
- Large heavy fuels and snags continue to burn down, and heat may be hidden beneath the deep ash. High winds could reveal hidden smokes and become more visible as the day progresses.
- Spotting potential increases as wind speeds increase. POI up to 60% is possible with spotting distances up to ½ mile when winds are above 30 mph.

SPECIFIC:

Branch 1- Surface fire spread should be confined to exposed areas on the west side of branch. Burn down heavy fuels is possible.

Branch 3 – Pockets of interior heat could flare up in the winds. Be on lookout for spotting. This will be more pronounced on the western side of the branch in the higher elevations.

Divisions India and Mike: Isolated smoke and burn down of fuels will continue. Active burning may increase in the highest winds, with potential for spotting, but should stay within the rocky barrier.

Division Quebec and Romeo: Burn down of interior islands will continue. Active burning may increase in the highest winds, with potential for spotting up to $\frac{1}{2}$ mile in winds above 30 mph and closer to $\frac{1}{4}$ mile in winds less than 25 mph.

Divisions Oscar and Papa: Isolated smokes from ground fire could show with increased winds.

Nightshift: Potential for increased fire behavior in the overnight hours due to high winds. These winds could overcome the RH expected during the overnight hours. Fire that was smoldering may become active with some torching.

AIR OPERATIONS: Adverse weather and increased winds may impact aviation operations.

SAFETY

Fuels, weather, and topography all play a role in fire behavior. Consider the risk of a given tactic weighed against possible fire behavior.

Fire and COVID-19 Briefing Checklist								
1. Incident Name:	2. Operational Period: Date From:	10/11/2021	Date To:	10/12/2021				
CALDOR	Time From:	0700	Time To:	0700				

FIRE and COVID-19 Briefing Checklist

FIRE at	id COVID-19 Brieffing Checklist
Self-Awareness	/ Screening
Immediately sep	arate yourself from others.
o Cough more th	an expected
o Shortness of b	reath or difficulty breathing
o New loss of tas	ste or smell
o Fever	o Sore throat
o Chills	o Muscle pain
Review and follo	w crew and division plans to isolate, triage, and
transport sympto	matic personnel.
Hygiene on the	Fireline
Properly wash or	sanitize your hands often, especially before and after
eating or entering	g a public place, and after coughing or sneezing.
Avoid handshake	es and communal use items.
Maintain a suppl	y of hand sanitizer and hand wipes. Inform supervisor
of needed resup	ply.
Disinfect high too	uch surfaces often:
o Radios, phone	s, doors, pumps, fuel cans, etc.
Social Distancin	g and Protective Equipment
Initiate, practice,	and remind others of social distancing.
Conduct briefing	s and conversations outdoors and at least 6 feet apart.
	rings as a tool when practical.
 	dirty face coverings, equipment, and PPE.
Communication	S
Face coverings a	and social distancing complicate communications.
	ness sender/receiver messaging.
Protect vourself	, your crew, and your camp!
	on: https://www.nwcg.gov/coronavirus.
NFES 002646 (06/2	020)
5 55_5 15 (56/2	 /

KEY COVID-19 MESSAGES

- We continue to see positive COVID-19 cases every week.
- Masks are required in all workspaces and common areas. This includes buildings, trailers, chow line (even for line lunches), laundry, showers, supply cache, and any other areas that require masks (indoors or outdoors).

HOW COVID-19 SPREADS

- Covid-19 is transmitted primarily by respiratory droplets or mucous. When not wearing a
 mask, coughs, sneezes, speaking, and laughing create considerable unseen droplets in the
 air that can harbor the virus. The primary method of spread is by inhaling or having these
 droplets settle in the mucous membranes of the nose or eyes.
- The chances of spread via air droplets can be reduced in the outdoors depending on wind and humidity.
- Smoke poses an increased risk of infection. Exposure to smoke irritates the airway and lungs, changing the body's immune response, and can result in more severe illness in persons infected by COVID-19.
- Virus particles on surfaces are far less likely to cause infection unless a person is in a confined space and in immediate contact with an infected person for an extended time.
 Outdoors, the virus cannot survive long on surfaces due to sun exposure, air currents and changing humidity levels.

HOW TO STOP COVID-19

- Complete your COVID-19 self-assessment questionnaire at the start of your shift
- Properly wear a mask over both your nose and mouth
- Social distance by staying 6 ft or more apart
- Wash your hands often and/or use hand sanitizer
- Clean surfaces shared by others (tables, computers, etc.)
- Recommended testing for COVID-19 every 72 hours
- Get vaccinated. Vaccines are safe, effective and prevent infection and/or severe disease.

Any questions? Contact the COVID Advisors: East side: Tchelet Segev - Ph: 907-240-8414 West side: Michael Wydysh - Ph: 716-430-8004 Or @ covidadvisoreastcaldor@gmail.com

California Wildland Fire Coordinating Group

Framework for Mandatory COVID Testing on Federal Fire Incidents in California

Due to the risk of spread of COVID-19 to individual fire personnel and modules, as well as the overall impact on firefighting capacity, the federal leadership of the California Wildland Fire Coordinating Group (CWCG) have decided to move forward with the intent of mandatory testing on all federal fire incidents in California, specifically type 1 and 2 wildfire incidents when logistically possible (e.g. personnel to support, testing available). This intention applies to all federal employees and federal contractors regardless of vaccination status and will be voluntary for partners and cooperators involved in a federal fire incident.

To date, the Department of Agriculture, Forest Service, Pacific Southwest Region, COVID-19 Emergency Response Team (CERT) implemented two mandatory pilot testing programs in California. The first pilot program was during the McFarland Fire on the Shasta-Trinity National Forest. The testing service was provided through a contract. The second pilot program was on the French Fire during unified command between the Bureau of Land Management and the Sequoia National Forest. Cal OES provided the testing service. These pilot programs provided many lessons to assist with more effective implementation on other fire incidents.

To implement this intent the CERT and a Point of Contact (POC) from each of the following Department of the Interior (DOI) agencies: Bureau of Indian Affairs, Bureau of Land Management, Fish and Wildlife Service and the National Park Service will coordinate and collaborate.

It is recognized that testing in and of itself is not a silver bullet, but it is an important tool in the suite of COVID mitigations to protect fire personnel, modules, and their families and friends when personnel return home from fire incidents. With increasing COVID cases over the past few months, and continued fire activity expected in the weeks and months ahead, we have decided this is a necessary tool until vaccine requirements for the federal workforce are fully implemented.

Mandatory Testing Intent & Framework

- Applies to all federal employees and federal contractors on type 1 and 2 wildfire incidents in California, regardless of vaccination status.
- Testing will be provided for partners and cooperators that volunteer or request testing, if testing capacity is available.
- The requirement for testing will be included in the resource order for those resources identified as available to fill orders.
- Refusal of COVID testing on incidents will be handled on a case-by-case basis by the
 employee's agency or the hiring agency of the federal contractor with participation on the
 incident not occurring until a resolution is identified.
- If there are logistical challenges (e.g. personnel support, testing availability) the CERT and DOI POCs will attempt to implement this intent in the following priority order: (1) test individuals upon arrival to an incident, (2) test individuals upon demobilization from an incident, (3) test individuals that are already assigned to an ongoing incident at frequencies recommended by the Centers for Disease Control and Prevention (CDC).

HEALTH AND SAFETY MESSAGE

INCIDENT: CALDOR FIRE DATE: 10/11-12/2021 TIME: 0700-0700

Major Hazards and Risks: Driving in SNOW, Vehicle Traffic, Hazard Trees, Cold Weather, Personal Hygiene, Bears, and Complacency!

Fire Order of the Day- Keep informed on Fire Weather Conditions and Forecasts

HYPOTHERMIA

Symptoms of Hypothermia include:

- Slurred speech.
- Weakness and loss of coordination.
- Confusion.
- Irrational behavior.
- Uncontrollable shivering (although, at extremely low body temperatures, shivering may stop).
- Pale and cold skin.
- Drowsiness especially in more severe stages.
- Slowed breathing or heart rate.

Go to

https://www.nwcg.gov/committee/6mfs/hypothermia for more info.

WATCH OUT SITUATION: BLACK ICE & SNOW

Safety Tips for Driving on Black Ice

- Drive Steadily and Slowly
- Don't Use Your Brakes
- Don't Panic, Don't jerk your steering wheel.
- Understand What to Do During a Skid
- Be Aware of What Will Not Help

If you recognize hypothermia, take the following steps:

- Move the patient to shelter.
- Remove wet clothes and replace them with warm, dry garments.
- If the victim is alert, give them food and warm liquids to drink.

INCIDENT SAFETY ANALYSIS 215a

Caldor Fire / CA-ENF-024030 - Monday, October 11, 2021

O Leastin	0 Herend	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance,
8. Location	9. Hazard	Education, etc)
All	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters & Honk horn to alert personnel when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs. ~ Refer to "Smoke and Transportation Safety" IRPG Pg 31 ~ Refer to "Roadside Response Safety" IRPG Pg 26
All	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG Pg 22 Follow "Procedural Felling Operations" IRPG Pg 85. Look up, Look down, Look around for hazard tree indicators. Only fell and buck trees within your expertise, and training. Do not fall trees during high wind events. Ensure proper use of all required PPE.
All	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots.
All	Fireline Hazards	 Refer to "Fireline Location" considerations, IRPG Pg 84 Do not work directly above or below personnel during firing and mop-up operations. Watch for falling and rolling debris on steep slopes. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Avoid stepping over debris that could roll by walking around object. Avoid radiant heat by wearing appropriate PPE correctly. Use correct tool for task assigned. Flag and isolate all HAZMAT and alert all personnel working in Division. Follow WUI recommendations, IRPG Pg 12.
All	Mop-up & Rehab	 Do not work above or below personnel during rehab/mop-up operations. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Wear eye protection.
All	Helicopter Operations	 Ensure positive communication with all air resources. Don't plan on air resources for medical transport or resupply. Follow "Aviation Watch-Out Situations" IRPG Pg 46. Refer to "Directing Bucket or Retardant Drops" IRPG Pg 58. Refer to "Aircraft Mishap Response Procedure" IRPG Pg 62. Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to reentry. Monitor A-G communications.

INCIDENT SAFETY ANALYSIS 215a

All	Heat Related Illness (HRI)& Dehydration	 Refer to Heat Ralated Illness information, IRPG Pg 109 Drink Fluids throughout operational period (6-8 qts/shift). Maintain water/electrolyte ratio of 3 to 1. Carry extra water on line and cache water at drop points. Take Frequent breaks, minimum of 10 minutes every hour. Allow out of area resources time to acclimatize before expecting peak performance. Recognize symptoms of HEAT RELATED ILLNESS which include. Lack of energy Headaches, dizziness Lack of rest No hunger, poor eating habits Hot skin, and lack of sweating
AII	Heavy Equipment Operations	~ Refer to "Working with Heavy Equipment" IRPG Pg 86 ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment.
All	Personal Hygiene	 COVID-19 is on the rise. Don't share personal items such as water bottles communication devices and utensils. Wash hands before meals, and after use of rest room facilities.
All	Injury & Medical Emergency	~ COVID-19 is on the rise. ~ Conduct daily COVID screening, report any symptoms to Medical immediately, and issolate those that have been exposed. ~ Assist injured employee appropriate medical care. ~ Use EMT's on Division for initial care. ~ Follow "Emergency Medical Care" IRPG Pgs 105-118 ~ Follow procedures in Medical Plan, ICS 206 ~ Refer to "Planning for Medical Emergencies" IRPG Pg 2
All	Vehicle Operations in Inclement Weather	COLD FRONT EXPECTED! ~ Be alert for potential icy and muddy road surfaces. ~ Stay off secondary roads in icy/snowy/wet conditions. ~ Postpone nonemergent operations when roads are covered with snow or ice. ~ Send a scout to evaluate roads and work area prior to personnel engagement. ~ Avoid parking on soft shoulders along roads. ~ Increase following distance on slick road surfaces.
All	Unburned Area/Reburn Potential	 Monitor weather. Base actions upon observed and predicted fire behavior. LCES Checklist IRPG Pg 7. Refer to "Look Up, Down and Around" IRPG Pg 3
All	Cold Weather	 Carry extra clothing to prevent hypothermia following shift. Dry out gear each night for next day. Watch footing on frozen ground. Maintain personal hydration. Monitor wind-chill and establish trigger points for disengagement. Monitor personnel for indications of hypothermia. (refer to www.nwcg.gov/committee/6mfs/hypothermia)
All	ATV/UTV use	 Ensure equipment is inspected and safe to use. Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook and/or operator's agency requirements. Question if it is mission critical.

INCIDENT SAFETY ANALYSIS 215a

All	Night Operations	 Maintain high visibility in work area and wear vest while in roadway. Use glow sticks to mark hazards. Ensure personnel have a personal light (headlamp). Watch for signs of fatigue. Take breaks away from areas of known hazard.
All	Power Utilities	~ Refer to the IRPG page 24 for Power Line Safety. Notify all personnel of down electrical lines. Always treat downed wires as energized. Identify and avoid high tension transmission lines. Identify and avoid high pressure natural gas lines. Identify and avoid damaged gas service near structures. Be aware of utility restoration in your work area.
All	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts IRPG Pg 7
All	Unplanned Public Interaction	 Be alert to non-fire personnel in areas with suppression personnel. All non-fire personnel will be escorted while on fireline. Post lookouts to in areas with public to avoid conflicts with mission tasks. Ensure sufficient security to restrict access to exclusion area.
All	Wildlife & Livestock	~ Bear Habitat - on the line, in camp, and in town. ~ Refer to: USFS "Be Bear Aware". ~ Never approach bears or cubs - KEEP A SAFE DISTANCE - do not impose for sightseeing or photo taking purposes. ~ Bears are wild animals and can be unpredictable even dangerous. ~ While bears are attracted to any edible food, they also might try to feast on items we might not consider edible. ~ Prevent vehicle break-ins - ALWAYS REMOVE SCENTED ITEMS FROM YOUR VEHICLE - including items such as food wrappers, sunscreen, lip balm, hand lotion and air fresheners. ~ Be sure to always lock your vehicle and close the windows. ~ Keep in mind eating in the car leaves lingering food odors that attract bears. ~ Watch out for wildlife inside fire area and along roadways. ~ Clean up all food debris and BACKHAUL trash during each operational period.

6. Work Assignments:					1	<u> </u>	ı	

6. Work Assignments:

TASK: Secure perimeter utilizing existing natural barriers and take suppression action around Echo Lake and upper Forni Meadows.

PURPOSE: Minimize any fire progression and ensure the safety of those working north of Hwy 50; coordinate with Suppression Repair for accountability and safety of those working along Wright Lake Road

END STATE: Fires edge in the division is controlled and escape is improbable

7. Special Instructions:

Backhaul trash, excess supplies and provide a location for accountable property

Identify and coordinate the removal of hazard trees

Resources need to report to Heavenly ICP (3860 Saddle Rd., South Lake Tahoe, CA 96150) for briefing and end of shift

6 Work Assignments										

6. Work Assignments:

TASK: Perform priority suppression repair work within Branch 1. Repair contingency line along Peavine Ridge and Granite Springs Rd while continuing Hazard Tree Removal along Mormon Emigrant Trail and Sierra at Tahoe

PURPOSE: Minimize any near-term environmental resource impacts as a result of fire suppression efforts

END STATE: Watershed and areas adjacent to values at risk are protected using the approved standard

7. Special Instructions:

Backhaul trash, excess supplies, and provide a location for accountable property.

Identify and coordinate the removal of hazard trees

Resources need to report to El Dorado County Fairgrounds (100 Placerville Dr, Placerville, CA 95667) for briefing

6. Work Assignments:								
								_

TASK: Coordinate with REAFs for standard suppression repairs to stream crossings and meadow repair in and around the Cody Meadow and Lake area, clearing culverts, dozer line repair as well as slash dispersal and removal.

PURPOSE: Minimize any near-term environmental resource impacts as a result of fire suppression efforts.

END STATE: Watershed and areas adjacent to values at risk are protected using the approved standard.

7. Special Instructions:

Backhaul trash, excess supplies and provide a location for accountable property

Identify and coordinate the removal of hazard trees

Resources need to report to Heavenly ICP (3860 Saddle Rd., South Lake Tahoe, CA 96150) for briefing and end of shift

6. Work Assignments:	-1	-		Ļ	1	1	

TASK: Engage in perimeter control efforts north of Caples Lake to Scout Peak, perform tactical patrol along highway corridors,

respond to service calls, and mitigate any isolated heat sources within the fire perimeter where safe to do so

PURPOSE: Minimize any fire progression, keeping the fire within its current footprint

END STATE: Fires edge is controlled and escape is improbable

7. Special Instructions:

Resources denoted with * is identified as I/A resources within the TFR.

Resources need to report to Heavenly ICP (3860 Saddle Rd., South Lake Tahoe, CA 96150) for briefing and end of shift

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

2. INCIDENT STATUS: Provide inci	dent sum d priority p	patient, unconscious, struck l	*		Forest Road 1 at (Lat./Long.) This will be the Trout
Severity of Emergency / Transpor Priority	EX EX	c: Unconscious, difficulty brea	athing, bleeding sever rious Injury or illne to walk, 2° – 3° burns i or Injury or illness.	ely, 2° – 3° burns more t ess. Evacuation ma not more than 1-3 palm s	
Nature of Injury or Illness					
& Mechanism of Injury					Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request					Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location					Descriptive Location & Lat. / Long. (WGS84)
Incident Name					Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander					Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care					Name of Care Provider (Ex: EMT Smith)
3. INITIAL PATIENT ASSESSMEN	IT: Comp	lete this section for each patier	nt as applicable (start wi	th the most severe patien	t)
Patient Assessment: See IRPG pa	ge 106				
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (<i>if different</i>): (I	Descripti	ve Location (drop point, i	intersection, etc.) or	Lat. / Long.) Patien	t's ETA to Evacuation Location:

Caldor Suppression Repair Guidelines

Frequently coordinate repair efforts with REAFs on repair priorities and specific guidelines. The following standards are to be met during suppression repair operations:

Handlines, Dozer Lines, and Safety Zones

- Construct waterbars, rolling dips, or chunk/waffle all fire lines on slopes >10%.
- Pull outside berms back into the control line and distribute topsoil evening. Recontour the surface to allow for drainage. If line follows ridge, divert water equally to both sides of the ridge. Pull slash back over line.
- Chunking involves using an excavator to decompact and roughen surfaces of control lines by creating up to 1ft x ft divets in a continuous egg carton pattern. Coordinate with REAFs for guidelines.
- Water-bars will be constructed at a $35 40^{\circ}$ angle across slope. Downslope end must be open and should discharge into vegetated or protected surface.
- Water bar depths for **dozer lines** should be at least 6 inches; total height from bottom of ditch to the top of the waterbar should average at least 18 inches and not exceed 24 inches.
- Water bar depths for hand lines should be at least 4 inches; total height from bottom of ditch to top of water bar should average at least 8 inches and not exceed 12 inches. Higher water bars do not necessarily mean better water bars.

Fire Line % Slope)	Maximum distance apart (feet)
1 - 10	Every 100
10 - 30	Every 75 - 100
30 - 50	Every 50 – 75
>50	Every 50

- Conceal or hide points of access using the landscape and available materials. In high OHV use areas, block the first 50 100ft of the dozer line with boulders or chunk if not covered by logs, brush, or other veg. Downed trees should be dirty to prevent cutting/collection.
- Remove deposited or perched soil and suppression debris from streams, watercourses, swales, or draws. Do not remove more than necessary to prevent damaging watercourse. Restore impacted channel shape to adjacent channel shape. Spread removed soil across fire line. Contact REAF before starting stream, drainage, wetland, or meadow repair.
 - Do not remove woody debris that was in the channel prior to the fire.

Roads

- Install waterbars where waterbars previously existed.
- Install or maintain rolling dips where a rolling dip previously existed.
- Clean culverts plugged with soil and rock resulting from fire suppression actions.
- Remove all slash and debris from culvert inlets\outlets resulting from suppression actions.
- Clean and grade ditch lines and lead off ditches as necessary.
- Water roads for dust abatement.
- Remove sediment from watercourse crossing locations and stabilize watercourse crossing approaches as appropriate for pre-existing road use.

Caldor Suppression Repair Guidelines

Vegetative Debris (activity fuels) Treatment

- Concentrations of slash created by fire suppression activities along roadways and among structures should be treated to reduce fire hazard. Treatments include mastication, lopping and scattering, and chipping. Where feasible, vegetation treated by mastication or lopping and scattering should not exceed 18 inches in height. Chipped material should be spread across the cleared area. Chip piles should not exceed 6" in depth on the ENF or 3" in depth on the TMU.
- Concentrations of slash within 100 feet of habitable structures should be removed or chipped.

Fences

• Repair fences damaged during fire suppression operations. Intent of fence repair is to prevent livestock or other animals from escaping.

Compensation Claims

• For all other property damage beyond the scope of the Suppression Repair Plan, please document the damage on an ICS 213 and submit it to the Incident Management Team Compensation Claims Unit.

Housekeeping

- Remove and dispose of trash or litter from all fire lines, camps, parking and staging areas.
- Remove flagging from line and trail.
- Close gates that were opened and repair any fences and gates cut or damaged by fire suppression resources.

Thank you for your safe and diligent work repairing your National Forest lands!

Interagency Incident Management

CODE OF CONDUCT INCIDENT PERSONNEL

Each individual on this incident is responsible for:

- ➤ Being *ready and able* to perform their assigned duties effectively
- Conducting themselves in a manner that treats people with dignity, equality, courtesy, and respect
- ➤ Abiding by agency ethics and conduct regulations
- > Reporting any harassment or other inappropriate behavior

Each individual on this incident has the right to:

- ➤ Work in an environment characterized by safe work practices
- Work in a fair and harassment free environment
- ➤ Say "No" to unwelcome advances or requests for favors
- File complaints or grievances through appropriate avenues

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- ➤ Illegal drug use
- ➤ Alcohol use
- > Unsafe work practices and activities
- Discrimination
- > Sexual harassment
- Fighting, threatening and abusive behaviors
- Using social media and electronic communication devices for personal business while engaged in fire assignment duties
- > Other violations of USDA and Forest Service standards of conduct

Failure to adhere to the Code of Conduct could result in dismissal from the incident, with notification to your home unit.

The public expects our best efforts; they see us as professionals in what we say and do. Let's continue to show them we are!

HUMAN RESOURCES MESSAGE October 11, 2021

YOUR RIGHTS AND RESPONSIBILITIES

Rights:

To work in a harassment-free environment where people treat one another with dignity, equity, courtesy and respect.

To say "no" to unwelcome advances or requests for favors.

To file complaints or grievances through appropriate avenues.

Responsibilities:

To behave in a manner that treats people with dignity, equity, courtesy and respect.

To abide by agency and incident ethics and conduct regulations.

To report any harassment or other inappropriate behavior you observe or experience

HR staff is here to assist in creating a positive work environment for all. If issues arise please don't hesitate to contact me via the information below or in HR Office trailer.

Human Resources Specialist—Jon Tipton
971.347.7314 (call/text) or email @_jonathan.tipton@usda.gov

Interagency Incident Management

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and the news media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the Information Office if there are any issues.

PHOTOGRAPHS AND VIDEOS OF INCIDENT – Please refrain from posting incident related videos to your personal social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness. When this happens it could reflect poorly on all that are attached to this incident.

Please email photo and video submissions to 2021.Caldor@firenet.gov

MAIL – If you need to send or receive mail, please see the mailing address below. Sending letters, cards to your loved ones, or mailing bills. Please stamp your mail and it will be taken to the post office for you. If you don't have a stamp, we will provide one.

Mailing address for the Caldor Fire:

Caldor Fire Camp Attention :(Your name &RO/Crew Name) 3860 Saddle Road South Lake Tahoe, CA 96150

Fire Information Resources for the Public:

Please feel free to share the following Inciweb, Facebook, Twitter, email updates, information line and QR code with the public. These are updated regularly and are the best links for current Caldor Fire information on both the Eldorado and Lake Tahoe National Forests.

FINANCE MESSAGE

Fire Name: Caldor Fire

Fire Number: CA-ENF-024030
Accounting Code: P5N8GM21

Email: 2021.caldor.finance@firenet.gov

Hotline: 530-330-5450

If you were originally ordered on a CALFIRE contract and have not submitted a VIPR contract and RO or received an EERA (Fed contract) – CONTACT FINANCE TODAY you might not get paid.

Finance Documents Needed upon "Check In" (If Not Already Submitted):

Please email these documents or scan the QR Code below, attach & submit.									
Agency Equipment/	Overhead:	Contract Equipment/	Cooperator:						
Crews:	AD/Casual Hire Form	Contract Crews:	Cooperative						
Manifest - showing	If regular Agency These answer "CS" or	AgreementManifest	Agreement						
employment type (GS or WG) or AD	please ensure "GS" or "WG" is written on	Resource Order	Resource Order						
rates if applicable	your first CTR	• Inspections							

Please submit your CTR/Shift Tickets using the QR code or email address below:

<u>Don't Forget to put your RO # on your CTR/Shift Ticket – final travel CTR's must be signed by supervisor on</u> incident - Thank You

Please Include the Word "Equipment" for Federal Contract Equipment or "Time" for Federal Overhead & Crews in the Subject Line of the Email

Local Government Resources on CFAA If you are demobing and there is no OES AREP there:

- ➤ Have the FSC or IC review and sign your 42s
 ➤ You give the incident the pink copy
 ➤ You keep the gold copy
- ➤ You mail the white and green (if it has a green) to OES Headquarters per the instructions on the 42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Your OES Fire & Rescue Assistant Chief
Kit Bailey
530-307-1307

Replacement of Government Property Loss or Damage

Email ALL documentation to COMP/CLMS at 2021.caldor.finance@firenet.gov. For questions contact Lisa Spahr (T) at 530-708-2587 or Pearl Cowan (virtual) at 541-969-2396

COMP/CLMS is located at the Caldor ICP.

- Complete OF-289-Property Loss or Damage Report (2 pages)
- Pictures of damaged equipment.
- Keep damaged equipment for turn in.
- Repair or replacement order/invoice or receipt if applicable; OR an estimated cost to repair or replace damaged equipment.
- Copy of your Resource Order.
- If applicable and other than a Federal employee, copy of your state agreement or contract.
- ANY additional information dealing with the claim, i.e., general message(s), hand-written notes, letters, etc. The more information you provide the better.
- Ensure you have all applicable signatures

Hotel Acquisition Process

Due to continuing bear issues at the ICP as well as predicted inclement weather, the incident is **requiring** individual procurement of hotel accommodations. This is for lodging only. The process below discusses financial procedure and documentation:

If you are a **local agency dispatched through CFAA**, you will need to acquire an S# prior to demob. This number will also be entered on your F-42 form.

Federal resources with a travel card will be processed through your agency's travel reimbursement process. Finance will provide a 213 with approval statement upon demob, if required by your agency.

All other non-federal resources, or federal resources that do not have purchasing capability, complete the following:

ADs who are able to pay and get reimbursed for travel will need to pay for lodging and get reimbursed through your normal reimbursement process. You will be given a 213 with authorization statement from the finance section during demob.

ADs and Seasonal Federal Employees who are unable to pay for lodging, the buying team may be able to assist with purchasing your accommodations. Inquire with the incident finance section. Federal resources who have the crew boss card option should use this as a first option.

In accordance with each individual contract, contractors shall pay for lodging and submit receipts for additions to your invoice (OF-286). Itemized receipts are required by the finance section during demob. Copies may also be submitted electronically or hard copy during assignment to save time at demob. Please be sure to write your resource order number on the document. Also, please note that double occupancy may be required on many contracts.

If you're not in one of these categories or uncertain, finance can help you check. Please use the hotline number: 530-330-5450 or email: 2021.Caldor.finance@firenet.gov If emailing include your resource number, type of resource and contact phone number.

West Side, Branch 1: Hotel and Dinners

Resources working the West side of the incident and briefing at the El Dorado fairgrounds are expected to be self-sufficient for dinners and hotel accommodations. You will be expected to procure your own hotel and remain within the per diem rates of \$135 a night before tax and \$28 for dinner after tax and tip. Breakfast, sack lunches, and hydration products will be provided at briefing. Branch 1 will advise if you need to return to the fairgrounds in the evening.

East side Branch 3 Hotels

All meals are provided by the incident. You will be responsible to acquire your own lodging. You must assure all nights are within the \$135 per diem rate. The following hotel options are available within per diem rates. To avoid rate changes, book your rooms for the anticipated duration of your assignment. If you demob early cancel any remaining nights.

Hard Rock Hotel. Promo code "USFOREST"

Lake Tahoe Resort Hotel (Large Vehicle parking is limited)

Harveys Lake Tahoe (large vehicle parking lot is at large parking lot at Harrahs)
