WILDLAND FIRE COVID-19 SCREENING TOOL

Symptoms

Today or in the past 24 hours, have you had any of the following symptoms? Use the QR Code to do the daily COVID-19 Self-Assessment Questionnaire.

- If you don't feel well, get a COVID test!
- Cough more than expected?
- Shortness of breath or difficulty breathing?
- Fever? Chills?
- Muscle pain, outside your normal for firefighting?
- Sore throat?
- New loss of taste or smell?
- Fatigue, outside your normal for firefighting?
- Headache, outside your normal for firefighting?
- Congestion or runny nose, outside your normal for firefighting?
- Diarrhea
- Nausea or vomiting
- Take temperature with no-touch thermometer, if available

Prevention

- Masks are required in all workspaces and common areas. This includes buildings, trailers, chow line (even for line lunches), laundry, showers, supply cache, and any other areas that require masks (indoors or outdoors).
- Properly wear a mask over both your nose and mouth
- Social distance by staying 6 ft or more apart
- Wash your hands often and/or use hand sanitizer
- Clean surfaces shared by others (tables, computers, etc.)
- Recommended testing for COVID-19 every 72 hours

General Message

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY	
CALDOR	Date/Time From: 11/03/2021 0700	WED	Date/Time To: 11/04/2021 1900
3. Objective(s):			
<p><u>Management Objectives:</u></p> <ul style="list-style-type: none"> - Analyze incident risk at all times to identify and mitigate hazardous conditions and to provide for responder and public safety - Ensure timely and accurate information is coordinated and disseminated to cooperators, stakeholders, and the public - Reduce the potential for impacts to natural and cultural resources by limiting the effects of fire and fire suppression - Provide a safe environment to isolate and prevent the pandemic spread by social distancing and mask wearing of all personnel on the incident - Maintain fiscal accountability on the incident and keep costs commensurate with values at risk - Implement the Caldor Fire Suppression Repair Plan and provide a detailed summary of efforts to host agency and incoming organization <p><u>Control Objectives:</u></p> <ul style="list-style-type: none"> - Keep the fire within its currently identified perimeter - Reprioritize suppression resources to boost suppression repair efforts while maintaining focus on remaining containment goals - Place areas disturbed by fire suppression activities into a condition that will not negatively affect natural and cultural resources and will not contribute to excessive erosion and sedimentation on the landscape <p><u>Desired End State:</u></p> <p>The fire was managed and values at risk protected using the appropriate resources to implement tactics in locations with reasonable probabilities of success. Operations were conducted using risk-based decision-making processes to reduce the likelihood of accidents and injuries. Suppression damage is identified and repaired. Cooperator and public relationships are enhanced during incident management.</p>			
4. Operational Period Command Emphasis:

Discussion

407 AM PDT Tue Nov 2 2021

A ridge of high pressure will bring dry conditions with light winds and some warming through Wednesday, then weak fast moving weather systems bring chances for light showers and increasing winds for Thursday across NE California. The weather pattern is looking more active next week with increased probability for stronger and wetter storm systems. Each system will bring an increase to ridge winds, with gusty winds possible Monday and

Eldorado NF West of the Sierra Crest

206 PM PDT Tue Nov 2 2021

WEDNESDAY:

Sky/Weather: Mostly sunny

Max Temperature: 62-68 lower elevations, except 54-64 higher elevations.

Min Humidity: 43-55 percent.

20-Foot Winds:

Valleys/Lower Slopes: Upslope winds up to 5 mph becoming SW up to 8 mph in the afternoon.

Ridges/Upper Slopes: SE winds 4 to 9 mph shifting to the southwest 5 to 11 mph in the afternoon.

LAL: 1

CWR: 0 percent.

WEDNESDAY NIGHT:

Sky/Weather: Mostly clear until early morning then becoming mostly cloudy. A chance of showers after midnight.

Min Temperature: 45-50 lower elevations, except 34-42 higher elevations.

Max Humidity: 78-93 percent.

20-Foot Winds:

Valleys/Lower Slopes: SE winds 6 to 12 mph.

Ridges/Upper Slopes: S winds 11 to 17 mph with local gusts up to 30 mph.

LA: 1

CWR: 10 percent.

THURSDAY:

Sky/Weather: Mostly cloudy until late afternoon then clearing. Rain showers likely in the morning. At higher elevations, a slight chance of rain showers in the afternoon.

Max Temperature: 53-59 lower elevations, except 43-53 higher elevations.

Min Humidity: 49-64 percent.

20-Foot Winds:

Valleys/Lower Slopes: S winds 8 to 14 mph. Local gusts up to 25 mph in the morning.

Ridges/Upper Slopes: S winds 16 to 22 mph with local gusts up to 35 mph.

LAL: 1

CWR: 20 percent

EXTENDED...

THURSDAY NIGHT: Mostly clear. Lows 33 to 43. East winds up to 13 mph.

FRIDAY: Partly cloudy. Highs 54 to 64. South winds up to 13 mph.

SPECIAL INSTRUCTIONS:

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

For Day Operations: November 3-4, 2021

INCIDENT: Caldor

DATE: November 3-4

TIME: 0700-1900

Major Hazards and Risks:

- **DRIVING:** Drive defensively, be aware of all traffic on roadways Heads-up it is LABOR DAY WEEKEND Please have good situational awareness. Remember, roads become very slippery with little moisture, plan ahead for predicted thunderstorms and showers.
- **Heat Related Illness (HRI):** Take care to monitor the health and welfare of yourself and crew, drink plenty of water/fluids, take frequent breaks, get 8 hours of sleep, and get enough food to support your task of the day.
- **HAZARD TREES:** Look up, Look down, Look around for signs of fire weakened trees.

Transitions are always a time when the hair on the back of your neck should be standing up.

- Ensure you keep your head straight and stay focused.
- Make sure you and your crew know the new command structure.
- Continue to maintain good communications with all of your personnel.
- Remain flexible, look-out for each other and continue to adhere to:

Lookouts Communication Escape Routes Safety Zones

Hazard Trees

- Follow "Hazard Tree Safety" guidelines IRPG page 22
- Post lookouts or spotters in mop-up areas.
- Don't take breaks in high concentrations of hazard trees
- Consider the effect of wind on hazard trees
- Remember the hazard zone is 2 ½ times the tree height
- Use qualified fallers to mitigate snags

- Keep it at or below the Speed Limit.
- Closed roads still have speed limits.
- Share the roads.
- It is our job to Expect the Unexpected!!!!

**Safety is an Outcome
Of Doing Things Right!!**

California Wildland Fire Coordinating Group

Framework for Mandatory COVID Testing on Federal Fire Incidents in California

Due to the risk of spread of COVID-19 to individual fire personnel and modules, as well as the overall impact on firefighting capacity, the federal leadership of the California Wildland Fire Coordinating Group (CWCG) have decided to move forward with the intent of mandatory testing on all federal fire incidents in California, specifically type 1 and 2 wildfire incidents when logistically possible (e.g. personnel to support, testing available). This intention applies to all federal employees and federal contractors regardless of vaccination status and will be voluntary for partners and cooperators involved in a federal fire incident.

To date, the Department of Agriculture, Forest Service, Pacific Southwest Region, COVID-19 Emergency Response Team (CERT) implemented two mandatory pilot testing programs in California. The first pilot program was during the McFarland Fire on the Shasta-Trinity National Forest. The testing service was provided through a contract. The second pilot program was on the French Fire during unified command between the Bureau of Land Management and the Sequoia National Forest. Cal OES provided the testing service. These pilot programs provided many lessons to assist with more effective implementation on other fire incidents.

To implement this intent the CERT and a Point of Contact (POC) from each of the following Department of the Interior (DOI) agencies: Bureau of Indian Affairs, Bureau of Land Management, Fish and Wildlife Service and the National Park Service will coordinate and collaborate.

It is recognized that testing in and of itself is not a silver bullet, but it is an important tool in the suite of COVID mitigations to protect fire personnel, modules, and their families and friends when personnel return home from fire incidents. With increasing COVID cases over the past few months, and continued fire activity expected in the weeks and months ahead, we have decided this is a necessary tool until vaccine requirements for the federal workforce are fully implemented.

Mandatory Testing Intent & Framework

- Applies to all federal employees and federal contractors on type 1 and 2 wildfire incidents in California, regardless of vaccination status.
- Testing will be provided for partners and cooperators that volunteer or request testing, if testing capacity is available.
- The requirement for testing will be included in the resource order for those resources identified as available to fill orders.
- Refusal of COVID testing on incidents will be handled on a case-by-case basis by the employee's agency or the hiring agency of the federal contractor with participation on the incident not occurring until a resolution is identified.
- If there are logistical challenges (e.g. personnel support, testing availability) the CERT and DOI POCs will attempt to implement this intent in the following priority order: (1) test individuals upon arrival to an incident, (2) test individuals upon demobilization from an incident, (3) test individuals that are already assigned to an ongoing incident at frequencies recommended by the Centers for Disease Control and Prevention (CDC).

Updated 10/10/21
Hazard Tree Mitigation Guidelines

Safety Objective: Reducing hazard tree danger along key identified roads for Firefighter Safety during patrol of the Caldor incident. Mitigating the risks for crews on route to new responses.

Leaders Intent: Follow the fire organization chain of command while providing guidance, oversight, and management to the logging operations.

Priority Roads

1. Highway 88: MET to Kirkwood
2. Sierra at Tahoe access road
3. MET: Intersection of 88 west to Jenkinson Lake
4. Wrights Lake rd. and Wrights Tie rd.
5. Grizzly Flat fire station parcel
6. Silver Fork RD: Hwy 50 to MET
7. North South Rd: MET to Big Mountain rd.
8. Capps Crossing Rd: Grizzly Flat to North South rd.
9. Leoni Meadows Rd: Grizzly Flat to North South rd.
10. Grizzly Flat: Property boundary adjacent to homes

Work Objectives

- Cut dead, unstable live hazardous trees which are leaning towards or are otherwise hazardous to a road, and are sufficiently tall to reach the roadbed
- use a combination of feller buncher and falling modules
- Skid Whole trees to landings
- Process logs into specified lengths and deck (Appendix I)
- Chip and spread un-utilizable material at landing (1-3 inch---max depth 12 inches)
- Avoid flagged areas (property boundary, other avoidance areas, Appendix I)
- Do not cut hazard trees on Sierra Pacific Industry Property or other private property parcels
- Minimize walking equipment across chip sealed or asphalt surface. Use rubber mats or tires when crossings are required.
- Do not walk equipment across private property unless given permission from the landowner.
- Treat skid trails as dozer lines follow rehab guidelines (back blading and water baring).
- Any woody material generated by the falling of Hazard Trees with a diameter greater than 1" and longer than 1 foot, or equivalent dimensions, that becomes deposited in ditches or on the road surface shall be disposed of by scattering outside of the road surface and outside of ditches.

Ground equipment limitations

- High severity burn Area
 - Max slope 50%

Riparian Buffer 25 feet on all stream courses (ephemeral, intermittent, perennial)

- Low to Medium severity burn area
 - Max Slope 35%
 - Riparian Buffer 82 feet (intermittent and perennial), 25 feet (ephemeral)

Hazard Tree Cutting SPECS

- Along Silver fork, MET and North South roads cut hazard trees 1.5 tree height distance from the centerline of the road up to a **200' approximate distance**. All other roads cut hazard trees 1 tree height distance from the centerline of the road up to a **200' approximate distance**. Use your professional judgment for trees greater than 200' from centerline.
- Small un-utilizable trees that impede operations will be cut and left in place. The trees can also be placed in the skid trail and run over. The purpose is to leave them where they have been cut to provide soil cover.
- Trees that are shorter than 1.5 tree height from Silver fork, MET and North South roads will not be cut unless it impedes operations i.e. a tree in a skid trail. Similarly, trees that are shorter than 1 tree height from all other roads will not be cut unless it impedes operations. The result is not expected to be a clear cut adjacent to the road. The focus is mitigating the hazards.

Appendix

Sort Sheet for Caldor Fire Roadside Hazard Tree Mitigation

1. Pile all Lodgepole pine for chipping
1. Process logs in the landing to the following lengths.
 - All Fir species 41 feet with a 2-foot multiple.
 - All Pine species 33 feet with an 2-foot multiple.
 - Incense Cedar 37 feet with a 6-foot multiple.
2. Deck all sawlog material a minimum 6 inches diameter on the small end and 10 feet long or longer. Chip remaining material and broadcast around the landing area to a depth of no greater than 6 inches.
3. Pile all limbs and tops generated from processing for chipping/grinding
4. Log specs are the same for burned timber as green timber as long as the log isn't burned beyond use

Flagging colors

- Red-Property boundary
 - Pink and Black Checkered- Avoidance area (No operations permitted within areas posted)
 - Exceptions: work with Timber Sale Administrator for special circumstances
 - Blue and White candy Stripe: Stream-course Protection Area (No operations permitted within areas posted)
 - Exceptions: work with Timber Sale Administrator for special circumstances
-
-

Incident within an Incident Plan
IWI will be run through Camino Dispatch (contact 911 after 19:00)

The **Incident Commander** is responsible for overall action in case of a serious accident.

ON SCENE

Upon occurrence of a "Medical Emergency" involving significant injury (Yellow or Red Only) or fatality within the incident, the highest qualified person on scene shall take control of the situation until the nearest **Division/Group Supervisor or Task Force Leader** arrives to assume control. Immediate and clear communication must be established between Operations and DIV/TFLD to determine who can arrive at the scene quickest and assume control of the situation. In the event of such an incident in ICP or on incident roads, on-site personnel shall take control until an **Operations Chief** or **Division/Group Supervisor/Task Force Leader** arrive or **Local Law Enforcement** and/or **Medical personnel** have assumed control as the **On-Scene Incident Commander**.

On-Scene Incident Commander will take immediate action to contact **Camino Dispatch** on "ForestNet" announcing "**Emergency Traffic**". Incident commander will identify nature of injury, patient location, number of patients and desired transportation. **Camino Dispatch** will run incident according to policy and procedures. This will assist in quick and proper coordination for managing the IWI. Camino Dispatch or 911 (after 19:00) will start appropriate response.

At no time during the incident will the name of the subject(s) be used over the radio.

Upon arrival at the incident scene, whoever has been designated to manage the incident (Operations Chief or Division/Group Supervisor or Task Force Leader) should take immediate actions to:

- Identify and mobilize medical personnel to the scene – notify them you are in charge.
- Coordinate appropriate transportation for injured personnel.
- Restrict unnecessary personnel from the accident scene.
- Secure the scene area and identify witnesses for investigation.

The nearest **Safety Officer** will respond immediately to the scene and assist the **On-Scene Incident Commander** and shall be responsible for initiating the proper investigation and documentation.

ICP

Specific processes for C&G notification, day and night, will be determined upon arrival at each incident.

Immediately upon notification of a serious incident requiring emergency action Camino Dispatch will make radio and/ or phone notification to the **Safety Officer** and **Air Operations**. **Appropriate C&G** will monitor the radio during the patient assessment/care portion of the incident. For non-serious (Green) incidents, the **Safety Officer** or **Division/Task Force Leader** will notify the appropriate overhead as necessary. **Caldor IC or Agency Administrator** will contact dispatch to initiate Hospital Liaison and initiate appropriate medical forms.

Appropriate **C&G** shall be notified and may be requested to respond to incident as dictated by specific emergency needs.

Agency PIO is responsible for managing external communication. All information released from the incident shall be through the **Information Officer** with the approval of the **Incident Commander**.

The **Incident Commander** will contact the **Agency Administrator** who will in turn contact appropriate officials of the agency. If the accident involves a fatality, the **Agency Administrator** will be responsible for implementing Agency specific protocols for dealing with the incident.

ill provide Camino Dispatch with a list of contacts and phone numbers and will update Camino Dispatch any time the list is updated.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Caldor Fire Semi-Virtual DEMOB Process

The demobilization process (DEMOB) will be facilitated by the Plans and Finance Sections. DEMOB will be initiated after approval from the IC. No equipment or personnel are to leave the Caldor Fire until authorized to do so by section chiefs or unit leaders.

How to prepare for an efficient DEMOB from the Caldor Fire:

1. Section Chiefs and/or Unit Leaders initiates tentative DEMOB requests for all excess resources.
2. After the DEMOB request is submitted, the resource will need to contact Finance to ensure that all documentation has been received.
3. For all resources who will be traveling by air, you must contact Plans or Finance to supply:
 - a. Name as it appears on picture ID
 - b. Date of birth
 - c. Destination
 - d. Departing airport
4. Resource will need to contact the following (as instructed):
 - a. Communications
 - b. Logistics
 - c. Ground Support
5. Finance:
 - a. Submit remaining shift tickets, CTRs and other documentation to 2021.caldor.finance@firenet.gov with your name and resource order number.
 - b. You will be sent a draft of your times to review.
 - c. Reply with corrections or confirm that your times are correct.
 - d. You will be sent a final 288/286 for your signature.
6. When the above process is complete you will need to contact Plans or Finance with the following information:
 - a. Travel information – Where you will RON (if needed)
 - b. Date and time you will begin your travel
 - c. ETA home
