FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: Vegetation
FIRE NAME: Caldor	OPERATIONAL PERIOD: Sept 21 st 24 Hour
DATE ISSUED: Sept 20 th	TIME ISSUED: 2000
UNIT: CA El Dorado National Forest/Lake Tahoe Basin Management Unit	SIGNED: Dan O'Connor Fire Behavior Analyst (FBAN)

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

Fire areas include a range of conifer systems with Ponderosa, Jeffrey Pine, Incense Cedar, and manzanita in the lower elevations towards the west, transitioning up into an Upper Montane forest of Ponderosa, Lodgepole Pine and Red Fir closer to Lake Tahoe. Anticipate heavy fuel loading, drought stress, overstocked timber stands, and a lack of fire history to both the north and south of the current fire footprint. The El Dorado National Forest is currently classified as 'Extreme to Exceptional' drought by the US Drought Monitor, with Energy Release Components exceeding the 90th percentile, not far off all time high levels. Heavy dead and down fuels will likely burn completely, holding heat and actively consuming through all hours of the day. Fine dead fuel moisture is calculated at 4% or less.

EXPECTED FIRE BEHAVIOR: *Based on the Warmest, Driest, Windiest Conditions Forecasted*

<u>Maximum Spotting Distance</u> ¼ mile <u>Probability of Ignition</u> 75%	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)
	Timber understory (TU5-Overstocked and/or dense reprod)	Head 12-16 ch/hr Flank 8-10 ch/hr	Head 8-10 ft Flank 4-6 ft
	Timber litter (TL6-closed canopy, ground fuels)	Head 5-7 ch/hr Flank 2-4 ch/hr	Head 2-4 ft Flank 1-3 ft

General: Red Flag Warning expires at 1100 this morning, then very dry with lighter winds turning upslope. The mix of brush, reprod, and overstocked timber stringers will continue to hold heat, especially in rocky areas where access is difficult. Short runs with torching/spotting will continue to cause containment challenges.

SPECIFIC

Branch 1 SW flow will be mostly favorable for the western side of the fire. Potential for increased smoke production from needle cast burning interior, but should not pose threats to containment lines.

Branch 3

Divisions India and Mike have scattered heat that will produce smoke across the interiors, with more persistence in working through rocked out areas adjacent to the Desolation Wilderness. Repopulation in the Highway 50 corridor may bring an increase in service calls; potential for reburn remains in the green islands.

Divisions Quebec and Romeo fire will attempt to work all the angles to find ways to come back to life; drought stressed fuels and just enough vegetation will open up pockets of travel with low RH and shifty winds. Low probability of spread out but increased winds tomorrow will push harder for increased torching, spotting, and growth to the NE.

Divisions Oscar and Papa do have high severity fire areas in the interior, but the edges are more mosaic severity so reburning and flare ups with threats to containment lines and adjacent communities are still possible. Low relative humidity will likely have heavies and root wads burning again, producing smoke visible to residents.

Night Operations: Anticipate continuation of service calls with residents back in their homes down Highway 50. Stay vigilant with the potential for reburn in the dirty burn areas due to drought conditions.

AIR OPERATIONS:

Minimal smoke impacts to restrict air support today

SAFETY:

Very dry air with RH values in the low teens today, much stronger SW flow on Wednesday.

Health & Safety Message

Incident: CALDOR Fire CA-ENF- 024030	Date/Op Period: Day/Night Shift 9/21 - 22/21

Hazards & Risks

The Distracted Firefighter: Radios, cell phones, texting, conversations, eating, drinking, reading maps, looking at the fire.....the list goes on. It is easy to get distracted from the very task you are supposed to be focused on. Make every attempt to avoid these distractions whether you're driving or engaged in the fire fight; a brief nano-second of distraction can have disastrous results.

Wildlife & Livestock Encounters: Watch for wildlife and livestock within the fire area and along roadways. Bears are in the area, especially in the upper elevations. Avoid leaving food and trash in sleeping areas, along the fireline or at drop points. Secure your vehicles with windows up when parked in the field. Animals tend to be most active during the dawn and dusk hours when visibility is reduced on the road. Drive at "deer speed".

Air Operations: With air operations over the fire; both fixed and rotary wing aircraft, comes a unique set of hazards and risks. Reference the blue pages in your IRPG. Consider mission need and aviation risk factors. Establish good communications with the aircraft and ensure ground personnel are aware of sling loads (and sites), retardant and water dropping operations.

Review Aviation Watch Out Situations!

Firefighter Health: With multiple days of working on the fireline; cuts, abrasions, rashes and blisters are accumulating on your body. Prevent infections by washing your hands often, take daily showers, wash or change your clothes frequently and care for minor wounds each shift. Treatment early-on will help prevent larger medical problems later!

Acquiring lodging at the Harvey's hotel

Harvey's hotel is associated with Harrah's. They are across the street from each other and are joined by a tunnel under Hwy 50 on the Nevada side, just at the state line. They have opened the Harvey's hotel specifically for firefighters battling the Caldor fire. No public is staying at that property. **Hotel support and check in for Harvey's Hotel, including front desk services is located at the Harrah's property.** This includes check-in and any maintenance service. Large vehicle parking is at the large parking lot at Harrah's accessible off Lake Parkway. Small vehicles can access the parking structure at Harvey's. At both locations, collect the parking stub to go through the gate. There is no charge for parking. Exit gates will open from 0500 to 0700. You may still use your hotel card or ring for attendant to open the exit gate if needed.

To reserve a room, scan this code (or click here) to make your reservation. Be sure to have your purchase card and crew manifest ready to enter the names of the personnel for each room configuration purchased with that card:

After reserving, go to the Harrah's front desk and complete registration.

They are very understaffed, so please make every attempt to use the web link above to reserve, though you may also call the hotel desk at 775-691-0416 to reserve your room under "Caldor Fire".

Once you check in to the hotel on the Harrah's side, you will then proceed to Harvey's either through the underground tunnel or drive to the Harvey's parking structure. Note: the elevator bank closest to the (currently closed) Harvey's front desk is not in service. You will need to use the Mountain Tower elevator bank by the arcade.

The hotel asks that if you would like trash pickup, please place your trash bags in the hallway and call the front desk to let them know where it is. They don't have enough staff to patrol the halls. They are also available to clean rooms and deliver towels and other items, but you will need to call the front desk for that as well.

Hotel Acquisition Process

The Caldor incident has authorized the individual procurement of hotel accommodations. This is for lodging only. The process below discusses financial procedure and documentation:

If you are a **local agency dispatched through CFAA**, you will need to acquire an S# prior to demob. This number will also be entered on your F42 form.

Federal resources with a travel card will be processed through your agency's travel reimbursement process. Finance will provide a 213 with approval statement upon demob, if required by your agency.

All other non-federal resources, or federal resources that do not have purchasing capability, complete the following:

AD's who are able to pay and get reimbursed for travel will need to pay lodging and get reimbursed through your normal reimbursement process. You will be given a 213 with authorization statement from the finance section during demob.

For AD's and Seasonal Federal Employees who are unable to pay for lodging, the buying team may be able to assist with purchasing your accommodations. Inquire with the incident Finance Section. Federal resources who have the crew boss card option should use this as a first option.

In accordance with each individual contract, **contractors** shall pay for lodging and submit receipts for additions to your invoice (OF-286). Itemized receipts ARE required by the finance section during demob. Also, please note that double occupancy may be required on many contracts.

The finance section will provide S#'s during your demob or sooner.

If you're not in one of these categories or uncertain, finance can help you check. Please use the hotline number: 530-330-5450 or email 2021.Caldor.finance@firenet.gov. If emailing include your resource number, type of resource and contact phone number.
