FIRE BEHAVIOR FORECAST								
FORECAST NUMBER: 3	TYPE OF FIRE: Vegetation							
FIRE NAME: Caldor	OPERATIONAL PERIOD: Sept 19th 24 Hour							
DATE ISSUED: Sept 18 th	TIME ISSUED: 2000							
UNIT: CA El Dorado National Forest/Lake Tahoe Basin	SIGNED: Dan O'Connor							
Management Unit	Fire Behavior Analyst (FBAN)							

WEATHER SUMMARY: See detailed Fire Weather Forecast in IAP

FUELS:

Fire areas include a range of conifer systems with Ponderosa, Jeffrey Pine, Incense Cedar, and manzanita in the lower elevations towards the west, transitioning up into an Upper Montane forest of Ponderosa, Lodgepole Pine and Red Fir closer to Lake Tahoe. Anticipate heavy fuel loading, drought stress, overstocked timber stands, and a lack of fire history to both the north and south of the current fire footprint. The El Dorado National Forest is currently classified as 'Extreme to Exceptional' drought by the US Drought Monitor, with Energy Release Components exceeding the 90th percentile, not far off all time high levels. Heavy dead and down fuels will likely burn completely, holding heat and actively consuming through all hours of the day. Fine dead fuel moisture is calculated at 4% or less.

EXPECTED FIRE BEHAVIOR: Based on the Warmest, Driest, Windiest Conditions Forecasted

Maximum Spotting Distance	Fuel Type/Model	Maximum Rate of Spread (chains/hour)	Maximum Flame Length (feet)	
%1 mile Probability of Ignition 65 %	Timber understory (TU5- Overstocked and/or dense reprod)	Head 40-45 ch/hr Flank 25-30 ch/hr	Head 14-18 ft Flank 8-10 ft	
	Timber litter (TL6-closed canopy, ground fuels)	Head 5-7 ch/hr Flank 3-5 ch/hr	Head 3-5 ft Flank 2-4 ft	

General: Another round of Increased wind speeds will assist the fire in moving from the ground up into the crowns, especially on wind/slope aligned runs. The primary spread model is torching/spotting, so any fire that is able to elevate into the canopies has the potential to loft embers and create spot fires outside current containment lines.

SPECIFIC

Branch 1 Division Gulf will likely see the gusty SW winds along the river corridor, threatening to loft holdover heat source embers to the north where slope, aspect, and wind will support rapid fire growth. Low probability due to all the good work from ground crews, but high consequence area for spotting.

Branch 3

<u>Divisions India and Mike</u> do have scattered heat with smoldering and smoke production interior as well as in rocked out areas along the northern perimeters. These areas may see some wind blockage and will not be in alignment, but looking out ahead could be impacted by strong winds from the east after the system passes early next week. Communities along the Highway 50 corridor are another low probability/high consequence area if stubborn heat sources are able to find a path into the crowns with increased winds in the river corridor.

Divisions Quebec and Romeo have widespread scattered heat along the fire edge, with potential for ground fire to elevate into the crowns with support from gusty SW winds today. Fire that does become established with group torching or crown runs will likely cause long range spotting downwind.

Divisions Oscar and Papa do have high severity fire areas in the interior, but the edges are more mosaic severity so reburning and flare ups with threats to containment lines and adjacent communities are still possible. Areas closer to Christmas Valley may be more exposed to SW winds due to terrain enhancement.

Night Operations: Change in wind direction for the night shift tonight, with gusty winds from the NE testing lines along the southern end of the fire. Potential for reburn in the dirty burn areas due to drought conditions.

AIR OPERATIONS:

Potential turbulent winds may limit ability for aircraft to support missions again today.

SAFETY:

The El Dorado NF has a history of fires coming back to life during drought years. Keep your guard up and communicate any increases in fire behavior near values at risk and containment lines.

FIVE MISTAKES HUMANS MAKE

- 1. The delusion that personal gain is made by crushing others.
- 2. Refusing to set aside trivial preferences.
- 3. Insisting that something is impossible because you have not accomplished it yet.
- 4. The tendency to worry about things that cannot be changed.
- 5. Attempting to compel others to believe and live as we do.

Don't be the person dragging your feet...

- 5. CHECK IN WITH ORDERING IN THE EVENING FOR STATUS OF HOTEL ROOM(S).

INSTRUCTIONS FOR LODGING (CALDOR FIRE)

LODGING is at **HARVEY**'s which is on the lake side of Highway 50. **CHECK-IN** is at **HARRAH**'s which is directly across the street from Harvey's.

PARKING FOR LARGE VEHICLES (Engines and Crew Transports)

Parking for large vehicles will be behind **HARRAH's** in the parking lot closest to Lake Parkway. You will see a motorhome and boat currently in this lot. Collect the parking ticket, but your room key will be used to enter and exit the parking lot.

PARKING FOR SMALL VEHICLES (Car, Pickup, etc)

Parking for small vehicles is in the Harvey's Parking Garage. Near Stateline you will see the entrance for Harvey's. Turn into Harvey's and the Parking Garage is to your right. Collect the parking ticket, but your room key will be used to enter and exit the parking lot.

REGISTRATION (HARRAH's)

All registration (check-in) will be at Harrah's Registration Desk. If you filled out your paperwork on 9/18, Harrah's should have your reservation and be ready to check you in.

If you parked at Harrah's, enter Harrah's from the parking lot, and follow signs to the Registration Desk

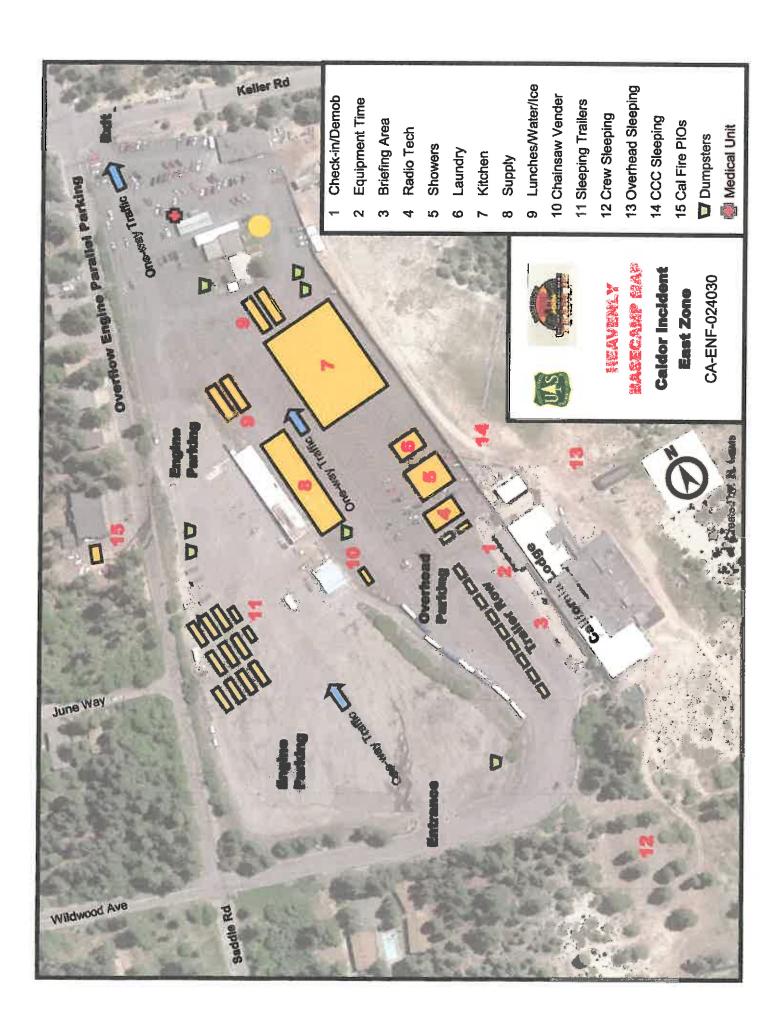

If you park at Harvey's, take the underground tunnel to Harrah's, or at street level, cross at the light, enter Harrah's and follow signs to the Registration Desk.

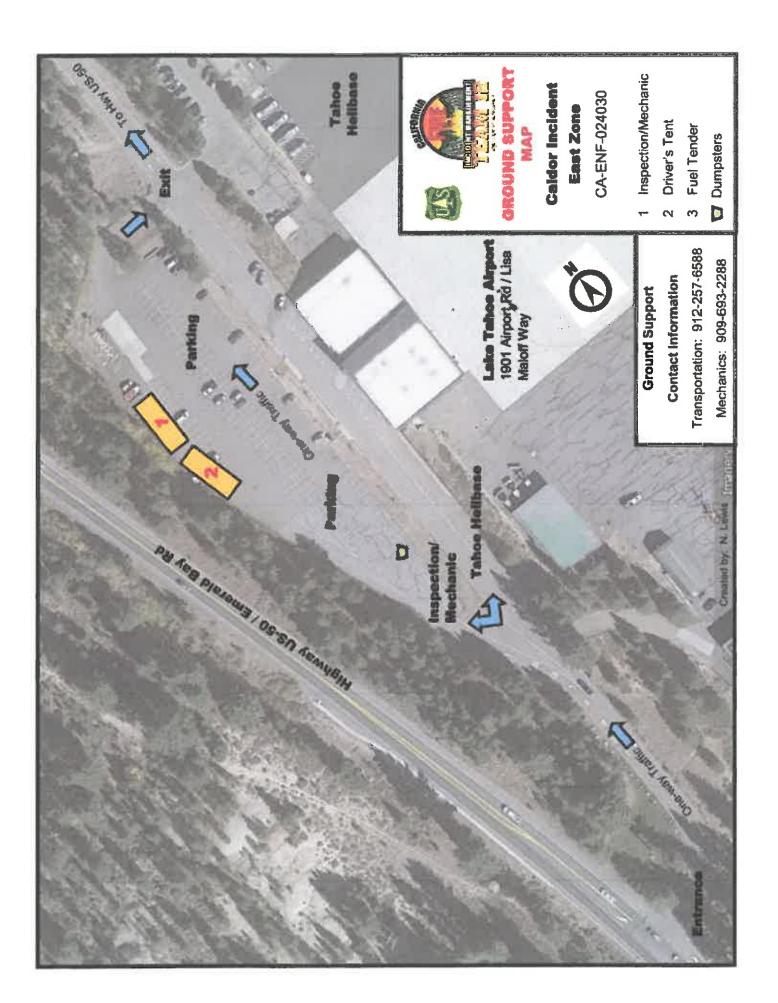

REGISTRATION (keys to your room)

Remember you will be checking in at Harrahs, but your lodging is in Harvey's across the street. From Harrahs, proceed through the underground tunnel to Harvey's, or cross the street at the light and find the elevator to your room.

NEW RESERVATIONS

Call 1-800-Harrahs (1-800-427-7247). This is a general reservation line for Caesar's Entertainment. You will need to tell them you are booking a reservation at **HARVEYS LAKE TAHOE** with the **CALDOR** group reservation. It is important they give you the government rate for the Caldor group reservation. Rooms are double occupancy unless you are a single resource.
