INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	
CALDOR	Date/Time From: 10/26/2021 0700 TUE	Date/Time To: 10/29/2021 1900 FRI
3. Objective(s):		
<p><u>Management Objectives:</u></p> <ul style="list-style-type: none"> - Analyze incident risk at all times to identify and mitigate hazardous conditions and to provide for responder and public safety - Ensure timely and accurate information is coordinated and disseminated to cooperators, stakeholders, and the public - Reduce the potential for impacts to natural and cultural resources by limiting the effects of fire and fire suppression - Provide a safe environment to isolate and prevent the pandemic spread by social distancing and mask wearing of all personnel on the incident - Maintain fiscal accountability on the incident and keep costs commensurate with values at risk - Implement the Caldor Fire Suppression Repair Plan and provide a detailed summary of efforts to host agency and incoming organization <p><u>Control Objectives:</u></p> <ul style="list-style-type: none"> - Keep the fire within its currently identified perimeter - Reprioritize suppression resources to boost suppression repair efforts while maintaining focus on remaining containment goals - Place areas disturbed by fire suppression activities into a condition that will not negatively affect natural and cultural resources and will not contribute to excessive erosion and sedimentation on the landscape <p><u>Desired End State:</u></p> <p>The fire was managed and values at risk protected using the appropriate resources to implement tactics in locations with reasonable probabilities of success. Operations were conducted using risk-based decision-making processes to reduce the likelihood of accidents and injuries. Suppression damage is identified and repaired. Cooperator and public relationships are enhanced during incident management.</p>		
4. Operational Period Command Emphasis:		
Recognize performance, discuss challenges, and utilize these experiences in the future.

General Weather Forecast

FORECAST NO: 68
PREDICTION FOR: Tuesday-Saturday
DATE: October 26th, 2021
FORECAST ISSUED: 1600 October 25th, 2021

Fire: Caldor
UNIT: USFS Eldorado NF
Incident Meteorologist: Derek Williams
Signed: *Derek Williams*

WEEKEND WEATHER SUMMARY: The historic rainfall event brought 7 to 9 inches of rain from the night of October 23rd through the afternoon of October 25th. Rainfall east of Christmas Valley was around 5.5-6". Snow accumulations above 6500 feet were 10 to 20 inches with higher amounts above 8000 feet. Some locations around the area received their all-time one day record daily precipitation.

WEATHER DISCUSSION: Conditions will be much improved for the next several days as high pressure builds into the region. The next chance for rain and snow is expected Saturday as a weak weather disturbance moves through the area although certainly nothing like what was experienced over the weekend. Winds will be light and primarily diurnally driven with southwest during the afternoon and northeast at night. Temperatures will warm considerably into the 60s by Thursday and Friday but overnight lows in east valleys where snow lingers will be below freezing through the week. Humidity will remain rather high with residual surface moisture through the week.

TUESDAY:

SKY/WEATHER: Mostly cloudy.

TEMP: **Highs:** 36-51° **MIN RH:** 60-70% **CHANCE OF RAIN:** 0%
 Lows: 20-30° **MAX RH:** 90-100% **LAL:** 1

WINDS: **Slope/Valley:** Upslope 4-7 mph in the afternoon. Downslope 2-4 mph overnight.

(20 feet) **Ridgetop:** Southwest around 15 mph.

HAINES: 2 (Low). **MAX MIXING HEIGHT:** 7600 feet. **INVERSION:** Little to no inversion.

WEDNESDAY:

SKY/WEATHER: Mostly sunny west of the Sierra Crest. Lingering clouds east.

TEMP: **Highs:** 48-63° **MIN RH:** 55-65% **CHANCE OF RAIN:** 0%
 Lows: 30-40° **MAX RH:** 85-100% **LAL:** 1

WINDS: **Slope/Valley:** Upslope 4-7 mph in the afternoon. Downslope 2-4 mph overnight.

(20 feet) **Ridgetop:** East-northeast less than 10 mph.

HAINES: 2 (Low). **MAX MIXING HEIGHT:** 8400 feet. **INVERSION:** Little to no inversion.

THURSDAY:

SKY/WEATHER: Mostly sunny west of the Sierra Crest. Lingering clouds east.

TEMP: **Highs:** 50-69° **MIN RH:** 47-60% **CHANCE OF RAIN:** 0%
 Lows: 32-45° **MAX RH:** 70-80% **LAL:** 1

WINDS: **Slope/Valley:** Upslope 4-7 mph in the afternoon. Downslope 2-4 mph overnight.

(20 feet) **Ridgetop:** East-northeast less than 10 mph.

HAINES: 3 (Low). **MAX MIXING HEIGHT:** 7000 feet. **INVERSION:** Little to no inversion.

FRIDAY:

SKY/WEATHER: Mostly sunny west of the Sierra Crest. Lingering clouds east.

TEMP: **Highs:** 49-68° **MIN RH:** 48-63% **CHANCE OF RAIN:** 0%
 Lows: 33-46° **MAX RH:** 70-80% **LAL:** 1

WINDS: **Slope/Valley:** Upslope 4-7 mph in the afternoon. Downslope 2-4 mph overnight.

(20 feet) **Ridgetop:** Southwest less than 10 mph.

HAINES: 3 (Low). **MAX MIXING HEIGHT:** 7000 feet. **INVERSION:** Little to no inversion.

EXTENDED OUTLOOK: Saturday and Sunday: A weather disturbance is expected to bring increasing clouds, southwest winds along with chances for light rain showers Saturday into Sunday. Temperatures will decrease a bit into the 50s and lower 60s.

FIRE BEHAVIOR

TYPE OF FIRE: Wildfire

FIRE NAME: Caldor

OPERATIONAL PERIOD: October 25-28, 2021

DATE ISSUED: 10/24/2021

TIME ISSUED: 2000

UNIT: Eldorado NF USFS

Prepared by:/s/ Ryan Shannahan PSC3

INPUTS

Fuels Conditions:

All fuels have taken on moisture and the ERCs are maintaining around the 11th percentile. Rain and snow Sunday and Monday will keep (or continue to lower) the ERCs low and add moisture to the fuels. The 1hrs will be at moisture of extinction as well as some of the smaller woody fuels. Fuels may dry out somewhat over the next several days but will not present a concern for fire spread.

GENERAL FIRE BEHAVIOR

Fire activity will be constrained to the larger fuels that could shelter the heat from the precipitation event occurring Sunday through Monday.

SPECIFIC:

All Divisions: minimal fire behavior with remaining heat confined to heavy fuels.

Initial Attack: only possibility of IA will be in the lowest elevations that received the least amount of rain. Fire behavior will be minimal. Ignitions will be difficult.

AIR OPERATIONS:

No inversion but showers will create low ceiling and poor visibility Monday. Clear skies should be common after Monday.

SAFETY

Stump holes and snags may still be burning and not be visible.

6. Control Operations/Work Assignments:						
TASK: Perform priority suppression repair work. Finish dozer rehab line south of Leek Springs Rd while continuing hazard tree removal along MET Rd and North/South Rd.						
PURPOSE: Minimize any near-term environmental resource impacts as a result of fire suppression efforts.						
END STATE: Watershed and areas adjacent to values at risk are protected using the approved standard.						
7. Special Instructions:						
Placerville ICP is located at 4260 8 Mile Road, Camino CA						
Backhaul trash, excess supplies and provide a location for accountable property. Identify and coordinate the removal of hazard trees.

HEALTH AND SAFETY MESSAGE

Firefighter & Public Safety Is The # 1 Priority

INCIDENT: Caldor Fire

DATE: **October 26th-29th**

Transition

Transitions are always a time when the hair on the back of your neck should be standing up.

Ensure you keep your head on straight and stay focused.

Make sure you and your crew knows the new command structure.

Continue to maintain good communications with all of your personnel.

Remain flexible, look out for each other and continue to adhere to

Lookouts; Communication; Escape Routes; Safety Zones.

Covid 19

Wear masks: When in public and while around others. Protect yourself and others!

Social distancing: 6 ft distancing is the recommended minimum, it's ok to do more!

Wash hands: CDC recommends 20 seconds with soap and clean water.

Medical Emergencies and Transport

- Review and brief all personnel the Medical Plan.
- Know where the closest medical personnel and equipment are.
- Ask yourself; how long will it take to stabilize and package an injured person?
- Ask yourself; how long will it take to move them to the closest medevac site?
- Ask yourself; how many people will it take to carry them out, are they available?
- Ask yourself; is the risk worth the gain?
- Be familiar with the MIR (Medical Incident Report) pg. 118 in your IRPG.

Communications

- Review the Communications Plan.
- Ensure all of your radios are correctly programmed.
- Test the new frequencies to ensure adequate coverage.
- If coverage is not adequate ensure mitigations are in place before committing to assignment.
- Give good feedback to ensure problem areas can be addressed.

Human Resources Message

Rights and Responsibilities

Rights:

- ✓ To work in a harassment-free environment where people treat one another with dignity, equity, courtesy, and respect.
- ✓ To say “no” to unwelcome advances or unwelcome requests for favors.
- ✓ To file complaints or grievances through appropriate avenues.

Responsibilities:

- ✓ To behave in a manner that treats people with dignity, equity, courtesy and respect.
- ✓ To abide by agency/incident ethics and conduct regulations including zero tolerance for non-prescription drugs and alcohol in the work environment.
- ✓ To report any harassment or other inappropriate behavior you observe or experience.

Per the Forest Service Anti-Harassment Policy, officials who receive a report of harassment are required to notify the Harassment Reporting Center (HRC) via the HRC Hotline at **(844) 815-8943**. Sexual assault/violence are required to be reported to law enforcement within 24 hours.

Check-In and Demob

Check-In process: All new check-ins, crew swaps and R&Rs should see the Plans Section at Amador County Fairgrounds.

Demob process:

1. All Federal employees and Federal contractors must get a COVID test before demobing from the incident.
2. For contractors, get final inspection at Ground Support.
3. Go through weed wash
4. Turn in any supplies or radios
5. Close out with Finance
6. Call Demob at 916-508-6113 and give estimated travel time home

California Wildland Fire Coordinating Group

Framework for Mandatory COVID Testing on Federal Fire Incidents in California

Due to the risk of spread of COVID-19 to individual fire personnel and modules, as well as the overall impact on firefighting capacity, the federal leadership of the California Wildland Fire Coordinating Group (CWCG) have decided to move forward with the intent of mandatory testing on all federal fire incidents in California, specifically type 1 and 2 wildfire incidents when logistically possible (e.g. personnel to support, testing available). This intention applies to all federal employees and federal contractors regardless of vaccination status and will be voluntary for partners and cooperators involved in a federal fire incident.

To date, the Department of Agriculture, Forest Service, Pacific Southwest Region, COVID-19 Emergency Response Team (CERT) implemented two mandatory pilot testing programs in California. The first pilot program was during the McFarland Fire on the Shasta-Trinity National Forest. The testing service was provided through a contract. The second pilot program was on the French Fire during unified command between the Bureau of Land Management and the Sequoia National Forest. Cal OES provided the testing service. These pilot programs provided many lessons to assist with more effective implementation on other fire incidents.

To implement this intent the CERT and a Point of Contact (POC) from each of the following Department of the Interior (DOI) agencies: Bureau of Indian Affairs, Bureau of Land Management, Fish and Wildlife Service and the National Park Service will coordinate and collaborate.

It is recognized that testing in and of itself is not a silver bullet, but it is an important tool in the suite of COVID mitigations to protect fire personnel, modules, and their families and friends when personnel return home from fire incidents. With increasing COVID cases over the past few months, and continued fire activity expected in the weeks and months ahead, we have decided this is a necessary tool until vaccine requirements for the federal workforce are fully implemented.

Mandatory Testing Intent & Framework

- Applies to all federal employees and federal contractors on type 1 and 2 wildfire incidents in California, regardless of vaccination status.
- Testing will be provided for partners and cooperators that volunteer or request testing, if testing capacity is available.
- The requirement for testing will be included in the resource order for those resources identified as available to fill orders.
- Refusal of COVID testing on incidents will be handled on a case-by-case basis by the employee's agency or the hiring agency of the federal contractor with participation on the incident not occurring until a resolution is identified.
- If there are logistical challenges (e.g. personnel support, testing availability) the CERT and DOI POCs will attempt to implement this intent in the following priority order: (1) test individuals upon arrival to an incident, (2) test individuals upon demobilization from an incident, (3) test individuals that are already assigned to an ongoing incident at frequencies recommended by the Centers for Disease Control and Prevention (CDC).

Hazard Tree Mitigation Guidelines(Fire Fighter patrol and response)

Safety Objective: Reducing hazard tree danger along key identified roads for Firefighter Safety during patrol of the Caldor incident. Mitigating the risks for crews on route to new responses.

Leaders Intent: Follow the fire organization chain of command while providing guidance, oversight and management to the logging operations.

Priority Roads:

1. Highway 88: MET to Kirkwood
2. Sierra at Tahoe access road
3. MET: Intersection of 88 west to Jenkinson Lake
4. Wrights Lake rd. and Wrights Tie rd.
5. Grizzly Flat fire station parcel
6. Silver Fork RD: Hwy 50 to MET
7. North South Rd: MET to Big Mountain rd.
8. Capps Crossing Rd: Grizzly Flat to North South rd.
9. Leoni Meadows Rd: Grizzly Flat to North South rd.
10. Grizzly Flat: Property boundary adjacent to homes

Work Objectives

- Cut dead, unstable live hazardous trees which are leaning towards or are otherwise hazardous to a road, and are sufficiently tall to reach the roadbed
- use a combination of feller buncher and falling modules
- Skid Whole trees to landings
- Process logs into specified lengths and deck (Appendix I)
- Chip and spread un-utilizable material at landing (1-3 inch---max depth 12 inches)
- Avoid flagged areas (property boundary, other avoidance areas, Appendix I)
- Do not cut hazard trees on Sierra Pacific Industry Property or other private property parcels
- Minimize walking equipment across chip sealed or asphalt surface. Use rubber mats or tires when crossings are required.
- Do not walk equipment across private property unless given permission from the landowner.
- Treat skid trails as dozer lines follow rehab guidelines (back blading and water baring).
- Any woody material generated by the falling of Hazard Trees with a diameter greater than 1" and longer than 1 foot, or equivalent dimensions, that becomes deposited in ditches or on the road surface shall be disposed of by scattering outside of the road surface and outside of ditches.

Ground equipment limitations

- **High** severity burn Area
 - Max slope 50%
 - Riparian Buffer 25 feet on all stream courses (ephemeral, intermittent, perennial)
- **Low to Medium** severity burn area
 - Max Slope 35%
 - Riparian Buffer 82 feet (intermittent and perennial), 25 feet (ephemeral)

Hazard tree cutting SPECS

- Along Silver fork, MET and North South roads cut hazard trees 1.5 tree height distance from the centerline of the road up to a **200' approximate distance**. All other roads cut hazard trees 1 tree height distance from the centerline of the road up to a **200' approximate distance**. Use your professional judgment for trees greater than 200' from centerline.
- Small un-utilizable trees that impede operations will be cut and left in place. The trees can also be placed in the skid trail and run over. The purpose is to leave them where they have been cut to provide soil cover.
- Trees that are shorter than 1.5 tree height from Silver fork, MET and North South roads will not be cut unless it impedes operations i.e. a tree in a skid trail. Similarly, trees that are shorter than 1 tree height from all other roads will not be cut unless it impedes operations. The result is not expected to be a clear cut adjacent to the road. The focus is mitigating the hazards.

Appendix

Sort Sheet for Caldor Fire Roadside Hazard Tree Mitigation

1. Pile all Lodgepole pine for chipping
1. Process logs in the landing to the following lengths.
 - All Fir species 41 feet with a 2-foot multiple.
 - All Pine species 33 feet with an 2-foot multiple.
 - Incense Cedar 37 feet with a 6-foot multiple.
2. Deck all sawlog material a minimum 6 inches diameter on the small end and 10 feet long or longer. Chip remaining material and broadcast around the landing area to a depth of no greater than 6 inches.
3. Pile all limbs and tops generated from processing for chipping/grinding
4. Log specs are the same for burned timber as green timber as long as the log isn't burned beyond use

Flagging colors

- Red-Property boundary
- Pink and Black Checkered- Avoidance area (No operations permitted within areas posted)
 - Exceptions: work with Timber Sale Administrator for special circumstances
- Blue and White candy Stripe: Stream-course Protection Area (No operations permitted within areas posted)
 - Exceptions: work with Timber Sale Administrator for special circumstances

Hotel Acquisition Process

Due to continuing bear issues at the ICP as well as inclement weather, the incident is requiring individual procurement of hotel accommodations. This is for lodging only. The process below discusses financial procedure and documentation.

If you are a **local agency dispatched through CFAA**, you will need to acquire an S# prior to demob. This number will also be entered on your F-42 form.

Federal resources with a travel card will be processed through your agency's travel reimbursement process. Finance will provide a 213 with approval statement upon demob, if required by your agency.

All other non-federal resources, or federal resources that do not have purchasing capability, complete the following:

ADs who are able to pay and get reimbursed for travel will need to pay for lodging and get reimbursed through your normal reimbursement process. You will be given a 213 with authorization statement from the finance section during demob.

ADs and Seasonal Federal Employees who are unable to pay for lodging, the buying team may be able to assist with purchasing your accommodations. Inquire with the incident finance section. Federal resources who have the crew boss card option should use this as a first option.

In accordance with each individual contract, contractors shall pay for lodging and submit receipts for additions to your invoice (OF-286). Itemized receipts are required by the finance section during demob. Copies may also be submitted electronically or hard copy during assignment to save time at demob. Please be sure to write your resource order number on the document. Also, please note that double occupancy may be required on many contracts.

If you're not in one of these categories or uncertain, finance can help you check. Please use the hotline number: 530-330-5450 or email: 2021.Caldor.finance@firenet.gov If emailing include your resource number, type of resource and contact phone number.

West Side, Amador Base Camp: Hotel and Dinners

Resources working the west side of the incident and briefing at the Amador Base Camp are expected to be self-sufficient for dinners and hotel accommodations. Since lodging is limited in the area, there is a list of nearby hotels on the next page. You will be expected to procure your own hotel room and stay within the per diem of a \$135 nightly lodging rate before taxes and the dinner per diem rate of \$34 including taxes and tip. Breakfast, sack lunches, and hydration products will be provided at briefing through Thursday October 21, 2021. Starting at dinner on Thursday October 21, 2021, all resources on the fire will be on full per diem, which allows for \$17 for breakfast, \$18 for lunch, and \$34 for dinner. Operations will advise if you need to return to the Base Camp in the evening.

East Side, Heavenly ICP: Hotels

You will be responsible to acquire your own lodging. You must assure all nights are within the \$135 per diem rate. All meals are provided by the incident through lunch on Thursday October 21, 2021. Starting at dinner on Thursday October 21, 2021, all resources on the fire will be on full per diem, which allows for \$17 for breakfast, \$18 for lunch, and \$34 for dinner.

Incident within an Incident Plan

The **Incident Commander** is responsible for overall action in case of a serious accident.

ON SCENE

Upon occurrence of a “Medical Emergency” involving significant injury (Yellow or Red Only) or fatality within the incident, the highest qualified person on scene shall take control of the situation until the nearest **Division /Group Supervisor** arrives to assume control. Immediate and clear communication must be established between Operations and Division/Group Supervisors to determine who can arrive at the scene quickest and assume control of the situation. In the event of such an incident in camp or on incident roads, on-site personnel shall take control until an **Operations Chief** or **Division/Group Supervisor** arrive or **Local Law Enforcement** and/or **Medical personnel** have assumed control as the **On-Scene Incident Commander**.

Incident Communications or the **On-Scene Incident Commander** will take immediate action to clear all radio traffic on the incident “Command Channel” by broadcasting *“Emergency Traffic Only”*. This will assist in quick and proper coordination for managing the IWI.

At no time during the incident will the name of the subject(s) be used over the radio.

Upon arrival at the incident scene, whoever has been designated to manage the incident (Operations Chief or Division/Group Supervisor) should take immediate actions to:

- Identify and mobilize medical personnel to the scene – notify them you are in charge.
- Coordinate appropriate transportation for injured personnel.
- Restrict unnecessary personnel from the accident scene.
- Secure the scene area and identify witnesses for investigation.

The nearest **Safety Officer** will respond immediately to the scene and assist the **On-Scene Incident Commander** and shall be responsible for initiating the proper investigation and documentation.

ICP

Specific processes for C&G notification, day and night, will be determined upon arrival at each incident.

Immediately upon notification of a serious incident requiring emergency action the communications unit will make radio and group text notification to the **Medical Unit Leader**, **Planning Operations**, **Safety Officer**, **COMP Claims** and **Air Operations**. All will respond to the incident communications facility in order to support the IWI. The **Medical Unit Leader or other appropriate C&G** will normally physically operate the radio during the patient assessment/care portion of the incident, the **RADO** will be responsible for documentation. In the absence of the **Incident Commander**, The **Plans Chief** will assume the supervisory role. For non-serious (Green) incidents, the **Safety Officer** or **Medical Unit Leader** will notify the appropriate overhead as necessary. **COMP Claims** will contact dispatch to initiate Hospital Liaison.

Plans Chief, **Logistics Chief**, **Finance Chief**, **Information Officer** and **Situation Unit Leader** shall be notified and may be requested to respond to incident communications as dictated by specific emergency needs.

Information Officer is responsible for managing external communication. All information released from the incident shall be through the **Information Officer** with the approval of the **Incident Commander**.

The **Incident Commander** will contact the **Agency Administrator** who will in turn contact appropriate officials of the agency. If the accident involves a fatality, the **Agency Administrator** will be responsible for implementing Agency specific protocols for dealing with the incident.

Stay Alert, Stay Warm

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
