INCIDENT ACTION PLAN CALDOR FIRE INCIDENT

CA-ENF-024030 P5N8GM21

OPERATIONAL PERIOD

8/19/2021 0700

to

8/20/2021 0700

INCIDENT OBJECTIVES (ICS 202)

		JUSEC 114	20 (100	202)							
1. Incident Name:	2. Opera	ational Period:	Date From:	8/19/2021	Date To:	8/20/2021					
Caldor Fire			Time From:	0700	Time To:	0700					
3. Objective(s):					 						
Management Objectives											
- Provide for emergency personnel and public safe	•										
- Ensure COVID-19 precautions and best practices	es are met	t at all times.				9					
- Protect property, improvements, and infrastructur	ire.										
- Ensure coordinated, timely and accurate release	of public	information.									
- Foster and maintain relationships with all cooperators and stakeholders.											
- Protect economic, natural, cultural and heritage r	resources	S.									
- Maintain fiscal accountability and keep costs com	mmensura	ate with values at ris	ik.								
Control Objectives											
Keep the fire North of HWY 88 and Shake Ridge	e Rd										
Keep the fire South of Wentworth Springs Rd											
Keep the fire East of E16 and Fiddletown Rd											
Keep the fire West of Strawberry Creek											
,											
General Situational Awareness:											
Steep and rugged terrain, critically dry and recep	ptive fuel !	beds, active area fo	r fire history and	d drought stresse	ed trees.						
In the COVID-19 environment, high density popu	ulations o	r large groups are p	articularly at ris	k. To help protec	t yourself, y	our family					
and to ensure all employees return home safely,			•								
Enhanced hygiene (especially handwashing), PF	PE & mon	itoring practices he	lp limit the infec	tion rate of first r	esponders.

INCIDENT Weather Forecast

FORECAST NO:

PREDICTION FOR: 24 Hour Shift

SHIFT DATE: 08/19/21

FORECAST ISSUED: 08/18/21 1700

NAME OF FIRE: Caldor **UNIT: USFS Eldorado NF SIGNED: James Dudley**

Incident Meteorologist

WEATHER DISCUSSION: An area of low pressure will move across Nevada tonight and this will switch the winds to the east. This down sloping and drying wind flow will lower humidity over the fire area through Thursday morning and bring gusty winds. As the low moves away from the region during the day, the winds will become terrain driven from the southwest and west. Lighter winds will prevail on Friday with terrain driven conditions over the region. Another area of low pressure will move into Oregon and Northern California on Saturday bringing another increase in winds from the west and southwest.

...Red Flag Warning for Gusty Winds and Low Humidity through 1100...

. THURSDAY . . . Sky/weather......Mostly sunny. Areas of smoke. Max temperature.....78-83. Min humidity......15-20 percent. Wind (20 ft)..... Slope/valley.....East to southeast 5 to 10 mph with gusts to 15 mph through 0900 then becoming southwest to west 4 to 9 mph after 1200. Ridgetop.........Northeast to northwest 6 to 11 mph. Mixing height......Near surface in the morning increasing to around 6500 ft AGL. Transport winds....Northeast around 16 mph. .THURSDAY NIGHT... Sky/weather......Mostly clear. Areas of smoke. Min temperature.....66-72. Max humidity......30-35 percent. Wind (20 ft) Slope/valley.....Northwest 5 to 9 mph through 2000 then becoming east 3 to 6 mph through the night. Ridgetop.....Southeast 5 to 9 mph. Mixing height.....Lowering to near surface. Transport winds....East around 8 mph. .FRIDAY . . . Sky/weather......Mostly sunny. Areas of smoke.

Wind (20 ft).....

Max temperature....80-85.

Min humidity......17-22 percent.

Slope/valley.....East 3 to 6 mph through 1000 then southwest to west 5 to 10 mph. Ridgetop.....Southwest 8 to 12 mph.

Mixing height......Near surface increasing to around 9000 ft AGL.

Transport winds.....Northwest around 6 mph.

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 1 TYPE OF FIRE: WILDFIRE FIRE NAME: CALDOR CAENF-024030 OPERATIONAL PERIOD: 8/19-8/20/21 0700-0700 CAENF-024030 TIME ISSUED: 1900 UNIT: ELDORADO NATIONAL FOREST SIGNED: Typed/printed: Stephen Volmer FBAN INPUTS

WEATHER SUMMARY:

RED FLAG WARNING IN EFFECT UNTILL 11AM THURSDAY 8/19/21

Temperatures will be in the low 80's with minimum relative humidity 15-20%. Winds will be out of the southwest the morning, shifting to the West 4-9mph after 12. Ridgetop winds will vary from northeast to northwest 6-11mph. Inversion will begin lifting by 11am allow for more air movement and cleaner air.

Review the weather forecast for more details

OUTPUTS

FIRE BEHAVIOR

FUEL MODEL	RATE OF SPREAD FT/MIN	FLAME LENGTH FT	SPOTTING DISTANCE	PROBABILITY OF IGNITION
TIMBER	3-5	7	.50 miles	87%

GENERAL:

All the fuel in the area is extremely dry and receptive to ignition. A Fuels and Fire Behavior Advisory has been issued for the area by the Northern California Predictive Services for critical fire spread conditions. Current ERC's are at the 97th percentile, 100hr and 1000 hr fuels are below the 3rd percentile. Local live fuel moistures are above critical levels, but brush fields still maintain an abundant amount of dead material within them due to the prolonged drought. Heavy fuels and fire weakened trees will continue to smolder and be a source of deep-seated heat, very hot ash pits, and stump holes throughout the fire area. Expect tree release of fire weakened timber throughout the incident to continue fire spread into the steep drainages and across roadways.

SPECIFIC:

- Dead and down material is the main contributor to fire spread. This material is a very receptive fuel bed for ember cast to start new spot fires.
- Spot fires will be hidden from view due to dense timber stands and limited road systems. Use caution, where there is one spot, there are probably many more in the area.
- Multiple drainages containing heavy fuels are in alignment with the winds and topography and will produce moderate rates of spread.

AIR OPERATIONS:

Smoke will fill the low-lying areas throughout the early hours. The inversion will begin to lift by noon allowing for better visibility and increased fire activity. Transport winds out of the northeast 15mph. Ridgetop winds will shift from northeast 6-11mph shifting in the afternoon to northwest 6-11mph with a mixing height of 6,500' AGL.

EXPECT ERRATIC WINDS ACROSS ALL RIDGETOPS AND THROUGH THE DRAINAGES

Sunset 19:52 Sunrise 06:21

SAFETY:

- Know where your escape routes and safety zones are and have an alternate route to them if possible.
- Aircraft may not be available due to visibility. Have an additional plan that does not involve aircraft.
- Be alert. Keep calm. Think clearly. Act decisively.

Fuels and Fire Behavior Advisory

Northern California
August 17, 2021 to August 31, 2021

Subject: Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

Discussion: Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify thorough out the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this
 year and are running at or above the 97th percentile in most cases. Expect increased fire intensity and
 spread rates in these areas. Early season extreme fire behavior has been observed in both light and
 heavy fuels. Anticipate increased spread rates, spotting, and active nighttime burning.
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. Anticipate higher resistance to control in all fuel types.
- Already this year, Northern California has experienced large fire activity and multiple team
 deployments. California will likely experience an extended fire season. It is important to be mindful of
 and manage fatigue for all resources. Everyone, every day, returns home safely.

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding
 normal expectations for this time of the year. Local briefings need to be thorough and highlight
 specific fire environment conditions. These include but are not limited to local weather
 forecasts, Pocket Cards, ERC's, live and dead fuel moistures.
- Suppression actions need to be based on good anchor points, escape routes, and safety zones.
 Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

SAFETY MESSAGE CALDOR INCIDENT

Incident Name: CALDOR INCIDENT

2. Operational Period:

Date From: 08/19/21 Time From: 07:00 Date To: 08/20/21 Time To: 07:00

LCES - 10's - 18's: ALWAYS

WINDS ADD DANGER IN ALL OPERATIONS.

Anticipate Winds changing and increasing; monitor weather conditions/take weather.

No frontal assaults when combating wind-driven fire conditions.

Watch alignment and rates of spread.

HEALTH & WELLNESS: Take Care of Ourselves & Others.

Be cognizant of COVID-19 Best Practices – Wipe Surfaces & Door Handles.

MONITOR yourself and your assigned personnel for FATIGUE and DEHYDRATION.

Avoid Complacency; Maintain Good Work Rest Cycles.

Caution: Rattle Snakes are out

DEFENSIVE DRIVING REQUIREMENTS: Be the PROFESSIONAL.

Caution with smoke or blind corners; watch for civilian traffic.

EVALUATE your driving routes; monitor speed, gear selection, & brakes.

TURN ON headlights; prepare for the unexpected.

UTILIZE chocks, backers and spotters; when in doubt scout it out!

FIRE BEHAVIOR: Maintain Situational Awareness & Predict.

ALWAYS wear proper PPE for the potential fire behavior.

Drought & Fire Weakened trees all have accident potential; especially with wind.

Fuels: RECEPTIVE - Rates of Spread: Spotting – Watch for alignment!

Terrain & Drainages:

Steep, Footing Issues, Access Issues – Creates alignment and Safety Issues. WATCH OUT for fires establishing in River Bottoms; have look outs & Escape Routes.

Primary, Alternate, Contingency, Emergency Planning on all new assignments;
Calculate Risk and Take Appropriate Actions based on predicted extreme fire behavior and available resources; have them in-place prior to executing any plan.

REST when opportunity provides itself; Time to Think - Time to Drink! Stay Hydrated.

 4. Site Safety Plan 	Required? Yes[No X		/

STATUS							
Incident Start Date: August 14, 2021	Total Personnel						
Acreage:	Containment:						

Media Law

The <u>California State Penal Code Section 409.5(d)</u> allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media is not permitted on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.

CAL FIRE Social Media Policy (Social Media 0691)

Social Media is increasingly being used by public agencies, the media as well as the public. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. Therefore when on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, 0691. You can get further information about the CAL FIRE Social Media Policy from the incident Public Information Officer. While assigned to the incident, there will be **no** posting of:

Inappropriate information or materials, no opinions, no endorsements, inappropriate pictures or videos

Lost and Found

The Information Section will manage Lost and Found items for the incident. If you have lost an item leave your contact information and what you have lost at the Information Section. If you have found an item on the incident bring the item to the Information Section with your contact information as well.

Incident Base Camp Mailing Address

c/o Public Information Office/Trailer 102 Placerville Dr. Placerville, CA 95667

INCIDENT PEER SUPPORT:

Team members are available on the incident for any peer support related needs. The best way to get a hold of them is to call them directly or stop by the ESS Trailer
In addition, there is an onsite clinician available to meet on an individual and/or group basis

Jeremy Sanders 916-281-6472
John Kiszka 530-448-2402
or
CAL FIRE 24 Hr. Peer Support/Helpline
916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

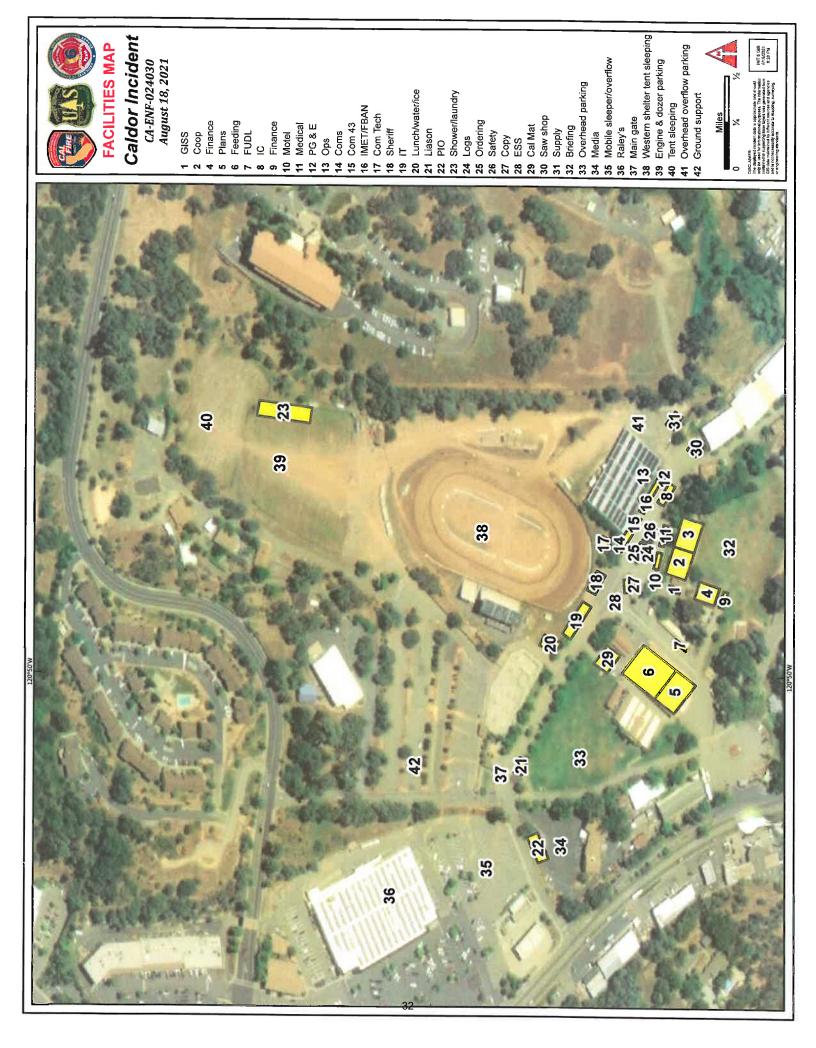

Tony Howard 916-224-1543
Mike Aiello 916-584-0548
Warren Parrish 916-823-6641
Nikole Schutz 916-709-0434
Amber Henderson 805-794-1690
Amy Head 916-956-3277

Chris Lomanto 916-247-6974 Connie Quarisa 916-213-8697 Noelle Bahnmiller 916-661-0011 Krissy Shaefer 619-592-6337 Shawna Powell 530-717-0667 Mike Deleo 916-661-0724

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

A message to our firefighters from ASHLEY IVERSON.
