to

8/27/2021 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operation	nal Period:	Date Fi	rom:	8/26/2021	Date To:	8/27/2021
Caldor Incident			Time F	rom:	0700	Time To:	0700
3. Objective(s):							
Management Objectives							
- Provide for emergency personnel and public safe	ety at all times	S.					
- Ensure COVID-19 precautions and best practice	s are met at a	II times.					
- Protect property, improvements, and infrastructu	re.						
- Ensure coordinated, timely and accurate release	of public info	mation.					
- Foster and maintain relationships with all cooper	ators and sta	keholders.					
- Protect economic, natural, cultural and heritage	resources.						
- Maintain fiscal accountability and keep costs cor	nmensurate v	rith values at risk	ζ.				
Control Objectives							
Keep the fire North of HWY 88 and Shake Ridge	Rd						
Keep the fire South of Wentworth Springs Rd							
Keep the fire East of E16 and Fiddletown Rd							
Keep the fire West of HWY 89							
General Situational Awareness:							
- Steep and rugged terrain, critically dry and recep	tive fuel hade	active area for	fire histo	ny and di	ought stress	nd trees	
- Steep and rugged terrain, childany dry and recep	tive fuel beus	, active area for	ine mate	ny ana a	ought stresse	o trees.	
In the COVID-19 environment, high density populand to ensure all employees return home safely,	lations or larg	e groups are pa	rticularly	at risk. T	o help protec	t yourself, y	our family
- Enhanced hygiene (especially handwashing), PF					rate of first re	esponders.

PREDICTION FOR: 24 Hour Shift

FORECAST ISSUED: 08/25/21 1700

SHIFT DATE: 08/26/21

INCIDENT Weather Forecast

NAME OF FIRE: Caldor

SIGNED: James Dudley

Incident Meteorologist

UNIT: USFS Eldorado NF

WEATHER DISCUSSION: High pressure will build over the fire area today through Sunday. Winds aloft will be much lighter with normal slope and canyon winds prevailing through the next few days. Inversion conditions will trap smoke in and near the fire area. Temperatures will trend higher with relative humidity trending lower. Nighttime humidity recoveries will also lessen as the air mass dries out.

. THURSDAY . . . Sky/weather.....Areas of smoke with inversion breaking by 1300 otherwise sunny. Max temperature....77-87. Min humidity......16-21 percent. Wind (20 ft) Slope/valley......Downcanyon 2-6 mph through 0900 then becoming upslope/upcanyon 4-8 mph with gusts to 13 mph through the afternoon. Ridgetop.....Southwest to west 5-8 mph. Mixing height......Near surface increasing to around 6000 ft AGL. Transport winds.....West around 5 mph .THURSDAY NIGHT... Sky/weather......Mostly clear. Areas of smoke. Min temperature....57-67. Max humidity......33-42 percent. Wind (20 ft)..... Slope/valley.....Downslope/downcanyon 3-7 mph. Ridgetop.....South 4-7 mph. Mixing height.....Lowering to near surface.

Transport winds.....East around 6 mph.

.FRIDAY . . .

Sky/weather.....Areas of smoke with inversion breaking by 1300 otherwise sunny.

Max temperature....81-91.

Min humidity......13-18 percent.

Wind (20 ft).....

Slope/valley.....Downcanyon 2-6 mph through 0900 then becoming

upslope/upcanyon 5-9 mph with gusts to 15 mph through

the afternoon.

Ridgetop.....Southwest 5-9 mph.

Mixing height......Near surface increasing to around 4500 ft AGL.

Transport winds.....South around 7 mph.

FIRE BEHAVIOR FORECAST										
FORECAST NUMBER: 8	TYPE OF FIRE: WILDFIRE									
FIRE NAME: CALDOR CAENF-024030	OPERATIONAL PERIOD: 8/26-8/27/21 0700-0700									
DATE ISSUED: 8/25/2021	TIME ISSUED: 1900									
UNIT: ELDORADO NATIONAL FOREST	SIGNED: Typed/printed: Stephen Volmer FBAN									
	INPUTS									

WEATHER SUMMARY:

Temperatures will be in the mid 80's with humidity levels between 16-21%. Morning winds will be down-canyon, shifting to up-canyon by 9am 4-8mph with gusts to 13mph. Afternoon ridgetop winds will from the southwest to west 5-8mph. Nighttime temperature will be in the mid 60's with humidity averaging between 33-42% across the entire fire area. Winds will slow overnight returning to the up-canyon flow 2-6mph in the early morning and decreasing over the next few days.

Review the weather forecast for more details and QR for RAWS unit information

OUTPUTS

FIRE BEHAVIOR

FUEL MODEL	RATE OF SPREAD FT/MIN	FLAME LENGTH FT	SPOTTING DISTANCE	PROBABILITY OF IGNITION
TIMBER	10	7	.6 miles	87%
UNDERSTORY	23	12	.6 miles	87%
BRUSH	68	10	.5 miles	88%

GENERAL:

Group tree torching is expected with rates of spread up to 68 ft/min

Single and group tree torching will occur due to the abundant low ladder fuels and tight canopies. Active and passive crown fire runs will be possible in areas where the drainages are in alignment with the winds. Expect increased amounts of spotting at the top-ends of those areas. Fuels in the area is extremely dry and receptive to ignition. Current ERC's and Bl's are above the 90th percentile, 1000 hr fuels are below the 3rd percentile. Local live fuel moistures are above critical levels, but brush fields still maintain an abundant amount of dead material within them due to the prolonged drought and will produce moderate rates of spread.

SPECIFIC:

- Erratic winds and fire behavior will be found in all the drainages, especially those along the Hwy 50 corridor.
- Fire activity will moderate overnight allowing for good windows of opportunity to conduct firing operations and direct line control tactics.
- Rates of spread will increase in the dense brush fields found in Div A, Div D, and Div W where they are in alignment with the drainages and up-canyon winds.

AIR OPERATIONS:

Smoke clearing in the early morning, with increased visibility and increased fire activity by 13:00. Transport winds out of the west 5mph with a mixing height of 6,000' AGL. Expect erratic winds across the ridgetops. Air resources may be limited or ineffective due to erratic winds and reduced visibility.

Sunset 19:41

Sunrise 06:28

SAFETY:

- Extremely hot deep ash pits will be found in all areas. Watch where you are walking and working.
- Be alert. Keep calm. Think clearly. Act decisively.
- Spotting can block your escape routes, always have an alternate plan.

Fuels and Fire Behavior Advisory

Northern California

August 17, 2021 to August 31, 2021

Subject: Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

Discussion: Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify thorough out the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year and are running at or above the 97th percentile in most cases. Expect increased fire intensity and spread rates in these areas. Early season extreme fire behavior has been observed in both light and heavy fuels. Anticipate increased spread rates, spotting, and active nighttime burning.
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. Anticipate higher resistance to control in all fuel types.
- Already this year, Northern California has experienced large fire activity and multiple team deployments. California will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. Everyone, every day, returns home safely.

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding
 normal expectations for this time of the year. Local briefings need to be thorough and highlight
 specific fire environment conditions. These include but are not limited to local weather
 forecasts, Pocket Cards, ERC's, live and dead fuel moistures.
- Suppression actions need to be based on good anchor points, escape routes, and safety zones.
 Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

SAFETY MESSAGE CALDOR INCIDENT

Date To: 8/27/21

1. Incident Name: CALDOR

2. Operational Period: Date From: 8/26/21

Time From: 07:00 Time To: 07:00

HAZARD TREES:

Pay Close Attention to Where You Are Parking, Working or Taking a Break.

Review the Safety Communication with your crews.

HIGHER TEMPERATURES FORECASTED.

MONITOR yourself and your assigned personnel for <u>FATIGUE</u> and <u>DEHYDRATION</u>.

Use cooling stations throughout the day.

Avoid Complacency.

Maintain Good Work Rest Cycles.

When Moving Apparatus Utilize backers and spotters When in Doubt Scout It Out.

RECEPTIVE FUEL BEDS – Critical Rates of Spread: Long Range Spotting
The Wind Goes Where the Water Flows, Watch for Alignment.

ENSURE ALL PERSONNEL ARE IN PROPER PPE PRIOR TO STARTING ANY OPERATIONS, There Won't Be Time to Adjust If Conditions Change.

Adhere to COVID-19 Best Practices – Masks must be worn indoors and when social distancing can't be maintained (i.e. Morning Operational Briefing)

Don't Let Pressure Alter Your Decision-Making Process

PLAN = Primary Alternate Contingency Emergency

SAFETY COMMUNICATION HAZARD TREE / TREE MORTALITY AWARENESS

Standing dead trees (snags) and green trees remain a constant threat to responder safety. Due to extended drought conditions, there are millions of dead and dying trees in California, and many more that are stressed due to unhealthy forests or fire damage. The combination of epidemic levels of bark beetle infestations and years of drought conditions has created an extreme hazard throughout California. Conifer and Oak trees that have recently died are identified as "Red Trees". Once the

needles or leaves have fallen, the dead tree enters the "Gray Phase" where continued decay and decomposition may be occurring internally with few visual indicators of its extent.

Aside from over 9 million acres of standing dead trees that pose an extreme life safety hazard for firefighters and civilians, the hazard trees are everywhere we operate carrying out our mission. Educating and training our personnel on "Hazard Tree" awareness as well as the appropriate actions for identification and mitigation of safety concerns while working, training, and responding to ALL AREAS IS CRITICAL. Operating in a known tree mortality area brings awareness to responders, we need to ensure we are taking precautions in ALL areas.

- Personnel should identify the "Hazard Tree" or "Tree Mortality" locations in their local response areas, fire line assignments and the locations of active fuel reduction projects that they could possibly encounter.
- ☐ Recognize when responding to identified "Tree Mortality" areas and provide safety briefings to all responding resources.
- Incidents should be focused on responder safety and hazard tree considerations.
- ☐ Be prepared for extreme fire behavior and dangerous rates of spread:
 - o Delay or withdraw until the fire can be engaged.
 - Provide appropriate clearance for staged or parked vehicles.

Recognize the potential for:

- o Green trees falling without warning.
- o Ground fire rapidly reaching the crowns of large dead stands of trees
- o Trees and limbs falling during air operations or windy conditions
- With advancing decay of trees watch for bark slide, falling limbs or multiple trees falling together if they are in

contact with each other

Personnel performing work on fuel reduction projects in ALL areas, need to ensure applicable IIPP documents reflect the work being performed and are updated throughout the project's life span.

Lookout – When working around fire weakened, stressed or decaying trees

Communicate – Brief personnel when working near fire weakened or hazard tree areas

Escape Routes - May be compromised by falling trees

Safety Zones - Are identified and large enough for a "Hazard Tree" or "Tree Mortality" area

For Tree Mortality Area Responder Briefing Packets, click here

CAL FIRE / Incident Management Team 6

COVID-19 Response Algorithm

Employee Response Action Plan

COVID-19 Positive Test or COVID-19 Positive Clinical Symptoms Presentation

- COVID 19 Symptoms: Cough, SOB, Fever or afebrile, Chills, Muscle Pain, Sore throat, Loss of taste/smell
- Employee informs Company Officer and Strike Team Leader of presumed/confirmed COVID-19 symptoms.
- Employee advised to seek evaluation by Medical Unit and CAL MAT or base camp medical unit.
- · Crew initiates cleaning measures. Mask, safety glasses, gloves worn. (If needed, LOGS will assist)
- Medical Unit to notified IC, Liaison, Safety and Logistics ASAP. Medical Unit will notify COVID-19 Public Health Officer and determine need for testing and locations.

Incident Action Plan

- Company Officer / Strike Team Leader notified of personnel with COVID-19 positive test or symptom.
- Medical Unit evaluates individual(s) and need for care and evaluation.
- IC, Liaison, Safety and Logistics notification made to determine course of incident evaluation and response.
- Line Chief, Agency Administrator, and Region Office updated upon notification

Facilities Response

- Medical and Safety notified
- Incident Notification
- Disinfection plan initiated.
- · Resource Status Evaluated

Medical Evaluation & Contact Tracing

- Personnel interviewed by Medical Unit. List of Positive contacts made in the last 5 days acquired. All Exposed are required to wear surgical mask, self monitor for Fever/Resp symptoms for up to 14 days (exposed personnel are subject to COVID-19 testing)
- Home Unit / Department utilized and retrospective tracking of Positive COVID-19 personnel inter-actions are identified within the last 5 days.
- Home Unit / Department updated by Company Officer / Strike Team Leader.
- Public Health Department is contacted and updated by IC or Designated Representative.
- Positive COVID-19 Employees w/symptoms will need to be evaluated by Health Department conducting testing, prior to returning to assignment.
- Positive COVID-19 Employees w/o symptoms may be required to be evaluated and resource status will be reviewed prior to returning to assignment.

DEMOBILIZATION PLAN - SUMMARY CALDOR FIRE INCIDENT CA-ENF-024030

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. By definition, surplus personnel are available for release if they have rested for a minimum of 8 hours, are cleaned up, outfitted and have a vehicle ready to depart to their next destination.

GENERAL GUIDELINES

- NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.
- o Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- All Resources will arrive at the Demobilizations Unit at their scheduled time Only.
- All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000
 miles of a "B" service, it is the responsibility of the resource to contact Ground Support and have an oil change prior
 to their scheduled demobilization time.
- o All Rental Vehicles will receive a safety inspection prior to leaving the incident.
- All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- All strike team leaders are responsible to call North Ops at 1-530-224-2466 immediately upon being released from the incident

RESPONSIBILITIES

Unit Leaders will declare resources excess to their Section Chief. Section Chiefs will declare excess resources to the Planning Section Chief through the Resource Unit Leader. This should be done 36 hours in advance of anticipated release. Use the Declaration of Excess Resources sheet or General Message Form (ICS-213) to list all excess resources. Include the resource name, request number, name of person, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the RESOURCE UNIT where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the DEMOB UNIT, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment. Resources are not to contact South Ops or the expanded dispatch center unless instructed to do so by the Demobilization Unit.

RELEASE PRIORITIES

- 1. Organized fire departments
- 2. OES engines
- 3. Hired personnel and equipment
- 4. Other agencies (USFS, BLM, etc.)
- 5. Out of region CAL FIRE forces
- 6. Within Region CAL FIRE Forces
- 7. Unit CAL FIRE Forces

TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24 hour off shift. In addition, they must use the following complete 24 hour period as reset time before they depart from the incident.

FINANCE MESSAGE

FEDERAL RESOURCES

• Refer to Caldor Federal Finance Procedures

CAL FIRE TIME UNIT (Personnel and Hired Equipment)

- CAL FIRE PERSONNEL Ensure you have started your eFC-33's and update after each shift. Please make sure Epay schedules are up to date.
- HIRED EQUIPMENT SUPPLIERS Check-in with the TIME Unit and drop off your agreements.

DIVISION / GROUP - LINE SUPERVISORS

- Please turn in hired equipment shift tickets at the end of each shift.
- SHIFT TICKET BOOKS Available in the TIME Unit for agency line supervisors only.

COMP / CLAIMS

- Damage Claims (suppression, property, vehicle)
 - ICS-213. We will need location, description of damages, and your contact information.

CALDOR FEDERAL FINANCE PROCEDURES

Finance Email: 2021.caldor.finance@firenet.gov

Finance Hotline: 530-330-5450

Directions for emailing Documents:

Federal Contract Resources	Federal Overhead and Crews
end To: 2021.caldor.finance@firenet.gov	Send To: 2021.caldor.finance@firenet.gov
UBJECT: Include Key Word: Equipment	SUBJECT: Include Key Word: Time

DOCUMENTS TO EMAIL TO FINANCE

Federal Overhead and Crews	Regular Government Personnel & ADs attachments: @Check-In: Crew Manifests, MOUs, or Cooperative Agreement (if applies), AD Casual Hire Sheet/RO Daily: Crew Time Report (CTR), Shift Ticket (when applies), receipts (fuel issues, travel receipts, etc.) @Demob: Signed OF288, Final Equipment Use Invoice
Federal Contract Resources	Private: Contractor Attachments: @Check-In: Resource Order, Full Contract/Agreement, Certifications (if required), Pre-Inspection Daily: SHIFT Tickets, receipts (fuel issues, claims, etc.) @Demob: Contractor Evaluations, Final Shift Tickets and receipt forAddition/Deductions, Post-Inspection, Final Signed Invoices

FEDERAL FINANCE DEMOB PROCEDURES

All Resources will be sent their DRAFT OF-288/OF-286's via the Finance email. 12 hours will be provided to allow the resource to review their document and reply back to Finance with the statement "No Corrections Necessary" or a description of any issues. After Finance receives the email, any discrepancies will be resolved. Next, the resource is sent the FINAL DOCUMENT for signature. They will then email the signed document back to Finance, if able. Finance will then sign the FINAL DOCUMENT and email it back to the resource. This completes the process.

INCIDENT PEER SUPPORT:

Team members are available on the incident for any peer support related needs. The best way to get a hold of them is to call them directly or stop by the ESS Trailer

In addition, there is an onsite clinician available to meet on an individual and/or group basis

Jeremy Sanders 916-281-6472 John Kiszka 530-448-2402 or

CAL FIRE 24 Hr. Peer Support/Helpline

916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543
Mike Aiello 916-584-0548
Warren Parrish 916-823-6641
Nikole Schutz 916-709-0434
Amber Henderson 805-794-1690
Amy Head 916-956-3277

Chris Lomanto 916-247-6974
Connie Quarisa 916-213-8697
Noelle Bahnmiller 916-661-0011
Krissy Shaefer 619-592-6337
Shawna Powell 530-717-0667
Mike Deleo 916-661-0724

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

A message to our firefighters from ASHLEY IVERSON.

Stay Healthy, Stay Alert and Stay Strong!

Media Law

The <u>California State Penal Code Section 409.5(d)</u> allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media is not permitted on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.

CAL FIRE Social Media Policy (Social Media 0691)

Social Media is increasingly being used by public agencies, the media as well as the public. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. Therefore when on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, 0691. You can get further information about the CAL FIRE Social Media Policy from the incident Public Information Officer. While assigned to the incident, there will be **no** posting of:

• Inappropriate information or materials, no opinions, no endorsements, inappropriate pictures or videos

Lost and Found

The Information Section will manage Lost and Found items for the incident. If you have lost an item leave your contact information and what you have lost at the Information Section. If you have found an item on the incident bring the item to the Information Section with your contact information as well.
