

Management Action Point 1V2: Bear Country

Condition: Fire crosses the East Fork Salmon River and Cecilville Callahan Road and becomes established, threatening values at risk to the north of the East Fork Salmon River.

Values to Protect:

- Structures, infrastructure, and private property including but not limited to Godfrey Ranch, Blue Ridge Ranch, Black Bear Ranch, and Cecilville. May include structures on the North Fork Salmon River including the greater communities of Sawyers Bar and Forks of Salmon if fire crosses Blue Ridge.
- Eddy Gulch and Blue Ridge Lookouts. Includes RAWs and telecommunication sites in both locations.
- Campground infrastructure including but not limited to East Fork and Shadow Creek. Campground structures and infrastructure also exists on the Carter Meadows loop road including corrals, and campground structures to the east of the Haypress current fire perimeter.
- Municipal water supply to communities in the area.

Actions:

- Provide the best combination of direct, indirect, and point protection tactics to protect values at risk.
- Consider road or area closures along with evacuation warnings or orders based on current or expected fire behavior to identified communities.
- Implement a communication strategy to inform public, cooperators, and key stakeholders on current fire status and planned actions.
- Likely actions may include strategic firing from the top of the primary ridge systems to reduce fire intensity, and/or strategic firing around structures and infrastructure.

Contacts/Notifications:

- CALFIRE, Siskiyou County Sheriff's Office, Siskiyou County OES, Community Liaison, Red Cross, Tribal Liaison, and IMT Liaison Officer who will notify Agency Administrators.

Management Action Point 2V2: Callahan

Condition: Fire crosses and gets established outside of the Trinity Alps Wilderness east of Carter Meadows Summit.

Values to Protect:

- Structures, infrastructure, and private property including but not limited to the community of Callahan including homes up Cecilville Callahan Road and south of the South Fork Salmon River, includes structures and infrastructure west of Highway 3.
- Structures, infrastructure, and private property in Jackson Lake.
- Private timberlands
- Municipal water supply to communities in the area.

Actions:

- Provide the best combination of direct, indirect, and point protection to protect values at risk.
- Consider road or area closures along with evacuation warnings or orders based on current or expected fire behavior to identified communities.
- Protect private timberlands to the extent possible.
- Implement a communication strategy to inform public, cooperators, and key stakeholders on current fire status and planned actions.
- Likely actions may include strategic firing from the top of the primary ridge systems to reduce fire intensity, and/or strategic firing around structures and infrastructure.
- Utilize historic fires (2020 Fox Fire) and fire lines to assist suppression efforts.

Contacts/Notifications:

- CALFIRE, Siskiyou County Sheriff's Office, Siskiyou County OES, Community Liaison, Red Cross, Tribal Liaison, and IMT Liaison Officer who will notify Agency Administrators.

Management Action Point 4V2: Coffee Creek

Condition: The Coffee Creek drainage is currently under an evacuation order west of Sugar Pine Creek and Benson Gulch. If fire crosses and gets established east of Boulder Creek, Billy's Peak, Stoddard Lake, or Big Bear Lake additional evacuation orders or warnings may occur.

Values to Protect:

- Structures, infrastructure, and private property including but not limited to the community of Coffee Creek including the Coffee Creek drainage, Carrville, areas along Highway 3 such as Sunny Flat, Snowslide Gulch, Chinquapin Gulch, Alder Gulch, Enright Gulch, and Usher Gulch.
- Private timberlands to the extent possible
- Numerous campgrounds and associated structures/infrastructure exist in the area along Highway 3 and near Trinity Lake.
- Municipal water supply to communities in the area.

Actions:

- Provide the best combination of direct, indirect, and point protection tactics to protect values at risk.
- Consider road or area closures along with evacuation warnings or orders based on current or expected fire behavior to identified communities.
- Protect private timberlands to the extent possible.
- Implement a communication strategy to inform public, cooperators, and key stakeholders on current fire status and planned actions.
- Actions may include strategic firing from the top of the primary ridge systems to reduce fire intensity, and strategic firing around structures and infrastructure.

Contacts/Notifications:

- CALFIRE, Trinity County Sheriff's Office, Trinity County OES, Community Liaison, Red Cross, Tribal Liaison, and IMT Liaison Officer who will notify Agency Administrators.

Management Action Point 5V2: Trinity Center

Condition: The Coffee Creek drainage is currently under an evacuation order west of Sugar Pine Creek and Benson Gulch. Fire crosses, gets established and expected to leave the Trinity Alps Wilderness.

Values to Protect:

- Structures, infrastructure, and private property including but not limited to the communities of Carrville and Trinity Center. Numerous structures exist in this greater area.
- Private timberlands
- Numerous campgrounds and associated structures/infrastructure exist in the area along Highway 3 and near Trinity Lake.
- Municipal water supply to communities in the area.

Actions:

- Provide the best combination of direct, indirect, and point protection tactics to protect values at risk.
- Consider road or area closures along with evacuation warnings or orders based on current or expected fire behavior to identified communities.
- Protect private timberlands to the extent possible.
- Implement a communication strategy to inform public, cooperators, and key stakeholders on current fire status and planned actions.
- Actions may include strategic firing from the top of the primary ridge systems to reduce fire intensity, and strategic firing around structures and infrastructure.
- CALFIRE, Trinity County Sheriff's Office and OES, Community Liaison, Red Cross, Tribal Liaison, & IMT Liaison Officer who will notify Agency Administrators.

Contacts/Notifications:

- CALFIRE, Trinity County Sheriff's Office, Trinity County OES, Community Liaison, Red Cross, Tribal Liaison, and IMT Liaison Officer who will notify Agency Administrators.

Management Action Point 6: Blue Ridge

Condition: Fire crosses the North Fork Salmon River to the south. Fire gets established threatening identified values at risk.

Values to Protect:

- Structures, infrastructure, and private property including but not limited to: Sawyer Bar, Forks of Salmon, Godfrey Ranch, Blue Ridge Ranch, Black Bear Ranch. May include structures along the South and East Fork of the Salmon River near the community of Cecilville if fire crosses Blue Ridge.
- Numerous campgrounds and associated structures/infrastructure exist in the area along Highway 3 and near Trinity Lake
- Municipal water supply to communities in the area.

Actions:

- Provide the best combination of direct, indirect, and point protection tactics to protect values at risk.
- Consider road or area closures along with evacuation warnings or orders based on current or expected fire behavior to identified communities.
- Implement a communication strategy to inform public, cooperators, and key stakeholders on current fire status and planned actions.
- Likely actions may include strategic firing from the top of the primary ridge systems to reduce fire intensity, and/or strategic firing around structures and infrastructure.

Contacts/Notifications:

- CALFIRE, Siskiyou County Sheriff's Office, Siskiyou County OES, Community Liaison, Red Cross, Tribal Liaison, and IMT Liaison Officer who will notify Agency Administrators.

Management Action Point 7V2: Forks of Salmon

Condition: Fire spread threatens the greater community of Forks of Salmon. Note that if the fire gets near Forks of Salmon, the river influenced winds from the confluence of the North Fork and Main Stem may become problematic.

Values to Protect:

- Structures, infrastructure, and private property along the North Fork and Main Stem of the Salmon River in and around the community of Forks of Salmon.
- Municipal water supply to communities in the area.

Actions:

- Provide the best combination of direct, indirect, and point protection to protect values at risk.
- Consider road or area closures along with evacuation warnings or orders based on current or expected fire behavior to identified communities.
- Implement a communication strategy to inform public, cooperators, and key stakeholders on current fire status and planned actions.
- Likely actions may include strategic firing from the top of the primary ridge systems to reduce fire intensity, and/or strategic firing around structures and infrastructure.

Contacts/Notifications:

- CALFIRE, Siskiyou County Sheriff's Office, Siskiyou County OES, Community Liaison, Red Cross, Tribal Liaison, and IMT Liaison Officer who will notify Agency Administrators.
