## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>		<b>2. Operational Period:</b> 24 HOUR	
RIVER COMPLEX		Date/Time From: 08/15/2021 0600      SUN	Date/Time To: 08/16/2021 0600      MON
<b>3. Objective(s):</b>			
<b>Management Objectives</b> 1. Ensure firefighter and public safety by using strategies and tactics that mitigate known and anticipated hazards while providing for highest probability of success. 2. Elevate personnel awareness of current COVID-19 precautions and best practices by adhering to Infectious Disease Control protocols. 3. Minimize suppression impacts to wilderness characteristics by using natural barriers, trails, and existing fire scars, to the extent possible. 4. Protect and/or minimize the effects of the wildfire on cultural, heritage, and natural resources in the fire area. 5. Maintain and enhance relationships with represented agencies, local tribal council stakeholders, local landowners, and the public by providing timely and accurate fire information. 6. Effectively manage cost by implementing strategies and tactics that have the highest probability of success.			
<b>Control Objectives</b> Keep fire: North of Mumford Peak to Wedding Peak to Cabin Peak. East of Cabin Peak to Limestone Ridge to the South Fork of the Salmon River to Forks of the Salmon River to Hellhole Ridge. South of the Hellhole Ridge to Big Meadow Trail to Grizzly Peak. West of Grizzly Peak to Highway 93 to Carter Meadow Trailhead to Mumford Peak.			
<b>4. Operational Period Command Emphasis:</b>			
Pay attention to detail, take your time, and make sure that you have a good plan in place - for all operations.

# FIRE WEATHER FORECAST

**FORECAST NO:** 11 **NAME OF FIRE:** River Complex  
**PREDICTION FOR:** 0600 Sun – 0600 Mon **SHIFT UNIT:** CA-KNF-006385  
**SHIFT DATE:** August 15-16, 2021 **SIGNED:** *Matt Mehle Shane Eagan*  
**FORECAST ISSUED:** 1930 Saturday, August 14 **Incident Meteorologist-Matt Mehle & Shane Eagan(T)**

**WEATHER DISCUSSION:** Hot, dry, and continued unstable conditions persist Sunday, resulting in a near-critical fire weather environment. The biggest issue of the day will be smoke and its impact on heating and drying. It's expected that many areas will remain blanketed in smoke, with little relief expected today. These areas are expected to stay cooler and more humid under the influence of the smoke. However, some thinning of the upper drift smoke is expected late afternoon. The thinning of smoke coupled with increased ventilation could result in an uptick in winds along with warming and drying this afternoon. Expect stronger winds today at ridgetop ahead of a weak weather system.

### **WEATHER FORECAST FOR SUNDAY:**

**WEATHER:** Partly cloudy and smoky. Some clearing of upper-level smoke possible by late afternoon.

<b>TEMPERATURES:</b> Max Lower Elevations...90-99F;	Ridges...81-91F.	<b>24 HR Trend:</b> Little change
<b>HUMIDITY:</b> Min Lower Elevations...20-28%;	Ridges...25-35%.	<b>24 HR Trend:</b> Little change

*Areas that are socked in thick smoke can expect highs only in the 70s to near 80 with RH 45 to 65%.*

### **20-FOOT WIND:**

**SLOPE/VALLEY** – Variable less than 5 mph in the morning becoming Upcanyon / Upslope 4 to 8 mph with gusts to 10 mph. Lighter winds in areas of smoke.

**RIDGETOP** – East-southeast 4 to 6 mph gusts to 10 mph in the morning becoming west to northwest 6 to 12 mph in the afternoon. Occasional gusts to 15 to 18 mph possible.

**INVERSIONS/STABILITY:** Smoke in the valleys likely to linger into the afternoon.

### **WEATHER FORECAST FOR SUNDAY NIGHT:**

**WEATHER:** Partly cloudy; smoke settling into lower valleys.

<b>TEMPERATURES:</b> Min Lower slopes/valleys...55-62F;	Ridges...59-67F.	<b>24 HR Trend:</b> Down 2-4 deg
<b>HUMIDITY:</b> Max Lower slopes...50-60%;	Ridges...35-45%.	<b>24 HR Trend:</b> Up 3-6%

*Areas that are socked in thick smoke can expect higher RH recoveries into the 60-70s.*

### **20-FOOT WIND:**

**SLOPE/VALLEY** – Upslope 4 to 8 with gusts to 10 mph in the evening...becoming downcanyon/downslope to less than 4 mph after 2100.

**RIDGETOP** – West to northwest winds 7 to 12 mph with gusts up to 15 to 18 mph in the evening...becoming east-northeast 4 to 6 mph gusts up to 12 mph overnight.

**INVERSIONS/STABILITY:** Areas of smoke settling into drainages overnight with weak to moderate inversion.

### **EXTENDED FORECAST:**

**MONDAY...** Partly sunny, better ventilation will result in some relief from smoke. Max temps...80 to 94F. Min RH 18-30%. North-northwest winds 10 to 25 mph. Strongest over ridges and upper slopes.

**WEATHER SAFETY MESSAGE:** Smoke will continue to reduce visibility and create hazardous air quality. Hot, dry, and unstable conditions expected where smoke is thinner (Watch Out #14).

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 10	TYPE OF FIRE: Wildfire
FIRE NAME: River Complex, CA-KNF-006385	OPERATIONAL PERIOD: 0600-0600, 8/14/21
DATE ISSUED: August 14, 2021	TIME ISSUED: 2000
UNIT: Klamath NF, Salmon/Scott River RD	SIGNED: <i>Is [Signature]</i> Nic Elmquist, FBAN

## INPUTS

### WEATHER SUMMARY

*Thick smoke will once again impact fire weather and fire behavior conditions on the River Complex. See IMET Forecast for more details.*

## FIRE BEHAVIOR

### GENERAL:

***\*Historically High ERC of 77\****

- Expect extremely active fire behavior when inversion lifts with potential for sustained crown fire runs and long-range spotting with a high probability of ignition.
- Live and dead fuels are critically dry due to severe drought. 1000-hour dead fuel moisture is well below 10% and live fuels are below 100%. Overstory vegetation is mixed conifer and surface fuels include shrubs and grass - Scott and Burgan fuel models TL8, TU5, SH7 and GS2. The fire is burning proximate to numerous past 'fire footprints'.
- Topography is very steep and rugged mountains carved by multiple forks of the Salmon River and its tributaries. The elevation ranges from 3000 - 7500' with all aspects represented and slopes ranging from 5 to over 100% (45°).

### SPECIFIC FIRE BEHAVIOR:

Expect mostly low to moderate fire behavior until the inversion lifts each day – smoldering, creeping, and flaming with isolated and group tree torching. Fire behavior expected to increase under a combination of the following factors: thunderstorms, daytime heating, increasing/sustained winds, warming/drying, rollout, flanking and slope reversal.

Potential daytime *maximum head fire* behavior. Reduce these numbers by less than half for flanking/night time fire behavior.

- Understory
  - Shrub: 7 - 12' flame lengths, 10 - 75 chains/hr. rate of spread.
  - Mixed Conifer: 4 - 7' flame lengths, 10 - 22 chains/hr. rate of spread.
- Crown Fire
  - Shrub: 15 - 75' flame lengths, 12 - 144 chains/hr. rate of spread
  - Mixed Conifer: 30 - 150' flame lengths, 6 - 90 chains/hr. rate of spread

**Haypress:** Fire behavior will be moderated with a mostly backing and flanking fire as it continues to move towards Cecilville road on the western perimeter and Summerville to the south. Try to get eyes on the position of the fire as it relates to the canyon bottoms and be prepared for rapid rates of spread if/when it gets established on the opposite side of a drainage where slope and fuel are aligned. There is plenty of opportunity for this to occur on the eastern side of the fire in the coming days. Be prepared for active nighttime fire behavior in the upper elevation inversion layers.

**Summer:** Fire expected to continue backing and flanking into Summerville with mostly low to moderate fire behavior with potential threats to multiple structures. Stay in close communications with adjoining resources as the gap closes between the Summer and Haypress fires.

**Cronan:** Fire expected to continue to back south into the North Fork Salmon River and west toward Forks of the Salmon with moderate fire behavior and potential for short to moderate crown fire runs along the western perimeter within the Kanake Gulch.

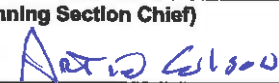

## AIR OPERATIONS

- Expect smoky conditions to persist over much of the fire, but opportunities may exist early in the op period.

## SAFETY

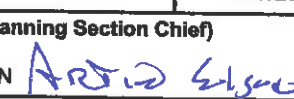

- Stay heads up on the steep slopes for overhead hazards. Communicate hazards to those working around you.

August 15-16, 2021

INCIDENT: River Complex

Shift: Day/Night 8/15-16,2021

## **Major Hazard and Risk:**

- **Hazardous Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Watch out!
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drinks, take frequent breaks, and pay attention to your body.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Infectious Disease/COVID-19:** Wash hands frequently, practice social distancing, wear face coverings when required, clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.
- **Firefighter Smoke Exposure:** IRPG Pg. 30. Rotate crews to cleaner air when possible.

**Standard Firefighting Order #9:** Maintain control of your forces at all times.

**Watch Out Situation #9:** Building fireline downhill with fire below.

## **Human Factors Barriers to Situation Awareness and Decision Making**

### **Hazardous Attitudes:**

- Invulnerable – This can't happen to us
- Anti-authority – Disregard of the team effort
- Impulsive- Do something even if its wrong
- Macho- Trying to impress or prove something
- Complacent-Just another routine fire
- Resigned-We can't make a difference
- Group Think-Afraid to speak up or disagree

"And that's the hand that fed me."

## **LOOKOUTS**

For more information look at your IRPG page 6.

- Experienced, competent and trusted
- Enough lookouts at good vantage points
- Knowledge of crew locations
- Knowledge of escape and safety locations
- Knowledge of trigger points

"What did I say, Boris? ... These new uniforms are a crock!"

**Thanks from your Safety Team!!**

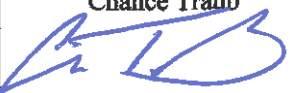

Greg Marfil, Terry Knauth, Cougan Carothers

**DUTY.....**Be proficient in your task

**RESPECT.....** Look out for the safety of others

**INTEGRITY.....**Seek and accept responsibility

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

# FINANCE MESSAGE

Finance is set up on Main Street at the ICP in Etna. Please continue to turn in your hard copy shift tickets and CTR's at ICP or in the boxes set up at Cecilville Spike. OPS folk are also collecting times on the line to bring back to the ICP for posting.

Thanks to all for helping in this!

You also have the option of scanning and emailing your finance documents to the email address listed below. You only need to scan the pink copy for shift tickets and the white copy for CTR's.

## Human Resource Message

*August 15, 2021.*

### FIRE

- Fatigue.....** Be aware of fatigue having a negative impact on your conduct and speech
- Integrity.....** Integrity and Honesty are vital on a fire. If you mess up, fess up, whatever you did can most likely be fixed if you report it as soon as you are aware of it.
- Respect.....** Treat others as you would like to be treated
- Example.....** Set an example. Realize you influence others around you, therefore, always conduct yourself in a professional and competent manner, but still have fun!

**Quote of the Day - An optimist is a person who sees a green light everywhere. The pessimist sees only the red light. But the truly wise person is color blind.**

**Dr. Albert Schweitzer**

The Human Resources Specialists are here on assignment to help you and your teams manage the operational stress keeping your crews safe, positive, and productive increasing your situational awareness.

## River Complex Incident: Resource Advisor Message

### Dust Abatement

Dust abatement is necessary to provide for the health and safety of fire personnel in vehicles, on the fireline, and in incident camps. Dust abatement also alleviates excessive road repair after the fire is out. Increased use of unpaved roads during fire suppression and repair often leads to loss of fines from the gravel surface. The stone and sand-size particles that remain create loose surface conditions like washboarding and reduced skid resistance, which present driving hazards. Dust emitted into the atmosphere by vehicles moving on unpaved roads leads to suspension soil particles which also pose health hazards such as reduced visibility while driving and fine particulate inhalation. Generation of dust can also alter roadside vegetation by promoting invasive plant species establishment.

#### Benefits of Dust Abatement

- Soil and surface stability
- Maintenance of natural roadside vegetation
- Increased driving visibility and handling
- Reduced particulates in the air we breathe
- Reduced need for road repair and maintenance

**WHAT WE CAN DO:** Ensure that dust abatement via light watering of the road surface is provided regularly 😊

#### **REMEMBER:**

- **Fish Screens:** Ensure that Mark 3 and Engine/Tender suction hoses have the appropriate size screen attached when drafting. Talk to a READ if you think you need a screen. PLEASE LEAVE SCREEN AT THE DRAFTING SITE!
- **Invasive Plant Species:** To help protect sensitive places, avoid areas flagged in orange weed flagging.
- **Cultural Resources:** Don't disturb site, document site, Work with your division to notify a resource advisor. Avoid areas flagged with orange/white strip should be avoided.
