INCIDENT ACTION PLAN RIVER COMPLEX

**CA-KNF-006385
P5N7CM**

OPERATIONAL PERIOD

**9/7/2021 0700
 to
9/8/2021 0700**

INCIDENT OBJECTIVES (ICS 202)

| | | | | |
|---|-------------------------------|---------------------|-------------------|--|
| 1. Incident Name: RIVER COMPLEX | 2. Operational Period: | Date From: 9/7/2021 | Date To: 9/8/2021 | |
| | | Time From: 0700 | Time To: 0700 | |

3. Objective(s):

- Management Objectives**
- Analyze incident risk at all times to identify and mitigate hazardous conditions to provide for responder and public safety.
 - Protect the communities of Summerville, Carrville, Coffee Creek, and Trinity Center from catastrophic fire damage.
 - Minimize suppression impacts to wilderness characteristics by utilizing local cultural and natural resource specialist, appropriate Minimal Impact Suppression Tactics (MIST), natural barriers, trails, and existing fire scars, to the extent possible.
 - Protect and/or minimize the effects of the wildfire on cultural, heritage, and natural resources in the fire area including noxious weed control.
 - Maintain and enhance coordination and relationships with represented agencies, local tribal council stakeholders, local landowners, and the public by providing timely and accurate fire information.
 - Maintain fiscal accountability at the incident and keep costs commensurate with values at risk.
 - Provide a safe environment to isolate and prevent pandemic spread by social distancing and mask wearing of all personnel at the incident.

- Control Objectives**
- Keep the fire north of the line from the Stuart Fork of Trinity Lake to the north side of the Monument Fire.
 - Keep the fire east of the line from the north end of the Monument Fire to Semore Gulch to Hoteling Gulch to Dead Mule Gulch to Hellhole Ridge.
 - Keep the fire south of the line from Hellhole Ridge to Bear Willow Gulch.
 - Keep the fire west of the Highway-3 corridor from the 2H01 Road to the Stuart Fork of Trinity Lake.

General Situational Awareness:

5. Site Safety Plan Required? NO

FIRE WEATHER FORECAST

FORECAST NO: 34
PREDICTION FOR: 0700 Tue – 0700 Wed
SHIFT DATE: September 7-8, 2021
FORECAST ISSUED: 1930 Monday, September 6

NAME OF FIRE: River Complex
SHIFT UNIT: CA-KNF-006385
SIGNED: *Jeff Tonkin*
Incident Meteorologist – Jeff Tonkin/Jason Straub (T)

.... Improved Mixing, Continued Low RH and Slightly Stronger Winds Today....

WEATHER DISCUSSION: Elevated fire weather conditions today and tomorrow as an upper trough and weak cold front pass the region. Main impacts will be significantly less smoke leading to better mixing and slightly stronger terrain driven winds during the afternoon. Upper slope and ridge top winds will also be a little stronger through Wednesday. In addition, the air mass remains very dry thus RH levels will be low again today...but better recovery is expected tonight.

WEATHER FORECAST FOR TODAY (TUESDAY):

SKY/WEATHER: Some smoke in drainages early...otherwise widespread decreasing smoke today.
TEMPERATURES: Max Lower Elevations...91-96. Ridges...77-82F. **24 HR Trend:** Even
HUMIDITY: Min Lower Elevations...15-20% Ridges...18-22%. **24 HR Trend:** Even

20-FOOT WIND:

SLOPE/VALLEY – South and Southeast or downslope 3 to 5 mph through late morning increasing to west southwest or Upslope 4 to 8 mph with gusts to 12 mph through sunset. Stronger gusts possible in alignment.
RIDGETOP – South wind 7 to 11 mph with gusts to 15 mph early...becoming southwest around midday 7 to 11 mph with Gusts 15 to 18 mph...diminishing slightly around sunset. Stronger gusts possible in alignment.

INVERSIONS/STABILITY: Good mixing expected by late morning.

WEATHER FORECAST FOR TONIGHT (TUESDAY NIGHT):

SKY/WEATHER: Decreasing smoke.
TEMPERATURES: Min Lower slopes/valleys...51-55F; Ridges...56-61F. **24 HR Trend:** Down 2-4
HUMIDITY: Max Lower slopes...40-45%; Ridges...35-40%. **24 HR Trend:** Up 2-4%

20-FOOT WIND:

SLOPE/VALLEY – West or upslope 4 to 8 mph with locally stronger gusts to 12 mph until dark. Then becoming downcanyon/downslope or east to less than 5 mph through sunrise.
RIDGETOP – Southwest 5 to 9 mph with gusts to 15 mph throughout the night and early morning.

WEDNESDAY...Mid and High Cloud cover at times. Max temps...84-89F. Min RH 17-22%. South winds increasing to 8 to 12 mph, with gusts to 18 mph in the afternoon. Valley/slope winds south 3 to 6 mph, with some gusts approaching 10 mph in the afternoon.

EXTENDED THURSDAY – SATURDAY (based on midslope 3000ft elevation)

| | Max T | Min RH | Max RH | Mid-slope Afternoon Winds | Sky/WX |
|-----|---------|--------|--------|---------------------------|-------------|
| THU | 81 – 86 | 21% | 35% | W 6-9 Gust 18 mph | High Clouds |
| FRI | 78 – 84 | 19% | 38% | W 4-6 mph | High Clouds |

FIRE BEHAVIOR FORECAST

| | |
|---|--|
| FORECAST NUMBER: 33 | TYPE OF FIRE: Wildfire |
| FIRE NAME: River Complex | OPERATIONAL PERIOD: 09/07/21, Day-Night Shifts |
| DATE ISSUED: 09/06/2021 | TIME ISSUED: 2000 |
| UNIT: Klamath NF & Shasta-Trinity NF | SIGNED:  Typed/printed: Oscar Vargas (FBAN) |

INPUTS

WEATHER SUMMARY:

- ELEVATED FIRE WEATHER DAY. It will be a Hot, Dry and Windy today.
---For Tonight: Decreasing smoke. Humidity recovery as low as 35%. Gusty ridgetop winds---
See Fire Weather Forecast for today's weather details

Scan to report
observed
fire behavior

FUELS SUMMARY: Dense mixed conifer, old-growth timber, heavy down/dead, mixed ground fuels
Fuel models best represented by TL8, TU5, SH7, and GS2.

OUTPUTS

FIRE BEHAVIOR

GENERAL: ****Fuels and Fire Behavior Advisory Issued for northern California****

- Critically low Live & Dead fuel moistures. 1000-hr. dead fuel moisture below 10% and live fuels way below 100%.
- Topography is very steep and rugged. Elevations from 3000' - 7500' with slopes over 100% (45°) in many places.
- Fire behavior will increase as smoke clears and will become much more active later in the day
- Heavy dead fuels/timber-litter/light-flashy fuels are highly receptive to spotting and active growth in all directions

SPECIFIC:

High potential for large fire growth. Intense & aggressive fire behavior with high intensity burning, rapid rates of spread, flare-ups, torching/crowning and long-range spotting is likely in many areas, especially areas in alignment with wind and/or slope. Areas covered by smoke will have moderate-high fire behavior and areas without smoke will have high-extreme intensity burning condition. Backing & flanking at moderate rates of spread with torching and spotting. Single and group torching with short, mid-range and long-range spotting will continue.

Fire behavior will remain very active at night due to moderate RH recovery and gusty winds, specially at higher elevations. Some areas will be more active at night due to heat insulation, gusty winds, or loss of wind influence. Roll-out and flare-ups will be a problem during the day & night.

--Probability of Ignition up to 100% in most areas during the day-- --ERCs above 97th percentile--

Haypress Fire: Fire will continue to spread towards Coffee Creek & Callahan communities at moderate to rapid rates of spread. High intensity burning, uphill runs, torching, spotting & active growth at higher elevations but also possible at mid to low levels. Fire continues backing towards the Cecilville rd in DIV-L at moderate rates of spread with occasional torching and spotting. Recent firing operations will actively burn and smolder. Significant growth to the east/northeast is possible in DIV-L/M along Saloon & Granite Creeks and northeast of the Pacific Crest Trail. The Parker spot will actively grow to the north until it runs out of fuel or reaches the main fire.

Summer Fire: On DIV-U, Fire continues backing and flanking the west across Plummer creek and will run into the 2020-Red Salmon Fire at moderate rates of spread with torching, spotting and occasional uphill runs. Recent firing operations will actively burn and smolder. DIV-S/T have many areas of intense heat that will continue to spread to the south at moderate to rapid rates of spread. Slope-reversal uphill runs will occur.

Cronan Fires: Scattered smoldering and smoking within containment lines will continue.

AIR OPERATIONS:

Smoke from these fires and other fires in the region will continue to limit the use of aircraft until smoke clears

SAFETY

Short, mid, and long-range spotting will occur. Always have an escape route and don't get cut off by the fire! LCES

CIIMT 13 COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings when appropriate, hand washing, cover your mouth and nose when coughing or sneezing and practicing good hygiene

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

| Symptom |
|---|
| Cough more than expected? |
| Shortness of breath or difficulty breathing? |
| Fever? Chills? |
| Muscle pain, outside your normal for firefighting? |
| Sore throat? |
| New loss of taste or smell? |
| Fatigue, outside your normal for firefighting? |
| Headache, outside your normal for firefighting? |
| Congestion or runny nose, outside your normal for firefighting? |
| Nausea or vomiting |
| Diarrhea |
| * Take temperature with no-touch thermometer, if available * |

¹ Symptoms of Coronavirus

<http://www.cdc.gov/coronavirus/2019-nCoV/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Mitigate smoke exposure whenever possible.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

Other Resources

- Centers for Disease Control and Prevention:
<https://www.cdc.gov/coronavirus/2019-ncov/>.
- National Wildfire Coordinating Group:
<https://www.nwcg.gov/committees/emergency-medical-committee/infectious-disease-guidance>.

HEALTH AND SAFETY MESSAGE

Sometimes it just not worth the risk...

INCIDENT: **River Complex** DATE: Day/Night 9/7/2021

Major Hazard and Risk:

- **Hazardous Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Watch out!
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drinks, take frequent breaks, and pay attention to your body.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Infectious Disease/COVID-19:** Wash hands frequently, practice social distancing, wear face coverings when required, clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.
- **Firefighter Smoke Exposure:** IRPG Pg. 30. Rotate crews to cleaner air when possible.

Narrative: Let's face it, we are in a battle. We are in a battle against the fires, we are in a battle to get enough resources to fight these fires and we are in a battle against an invisible enemy – COVID-19. As in any battle remember to plan for success, pick your fight, and have the right resources for the job. In the case of wildland fire, sometimes the right strategy is to disengage during extreme fire behavior or extreme weather conditions like thunderstorms. Nobody will blame you for doing the SAFE thing. As far as COVID-19 goes, let's do our best to follow the best practice precautions; Wearing masks when mandated, social distancing, washing of hands and self-monitoring.

A Safety Zone:

A location where the threatened firefighter can find adequate refuge from an approaching fire.

- What is the difference between a safety zone and a deployment site?
 - The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.
- How do you identify a good safety zone?
 - Consider the distance
 - The best locations
 - Location is scouted and marked well
 - Location has been reassessed
 - For radiant heat only, the distance separation between the firefighter and the flames must be at least four times the maximum flame height.
 - Take advantage of heat barriers
- What should you avoid in selecting a safety zone?
 - Avoid locations that are downwind from the fire.
 - Avoid locations that are in chimneys, saddles, or narrow canyons.
 - Avoid locations that require a steep escape route.

Keep your fires down

This picture is never a good outcome
This picture should make you slow down
This picture could be your vehicle:
Red, Yellow, Green or White

Daily Issues

Drive with your headlights on.
Don't drive distracted, keep eyes on road.
Long travel times, use rested drivers.
Clean your windshields.

Incident Safety Officers: **Terri Knauth, Ken Gordon, Larry Wright, Brian Phillips, Terrell Drew, Ray Franko**

INCIDENT SAFETY ANALYSIS 215a

River Complex / CA KNF 006385 - Tuesday, September 07, 2021

| 8. Location | 9. Hazard | 6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc) |
|-------------|-----------------------------------|--|
| All | Air Operations | <ul style="list-style-type: none"> ~ Follow " Aviation Watch-Out Situations" on page 46, IRPG. ~ Don't plan on air resources for medical transport or resupply. ~ Refer to page 58, IRPG for directing bucket drops. ~ Ensure positive communication with all air resources. ~ Ensure all resources on Div are aware of air ops. ~ Use signal flash or flagging to help pilots. ~ Stay away from trees as drops can bring them down. |
| All | Extended Medical Extraction Times | <ul style="list-style-type: none"> ~ Identify helispots and Lat/Longs, ensure they're known. ~ Know 8 Line and remain organized and calm. ~ Stay current on weather conditions that could effect Helicopter operations. ~ Preplan extractions on your division and update as you go. ~ Call for adjoining resources for assistance. |
| All | Hazard Trees | <ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22,23. ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Don't park vehicles or take breaks in high concentrations of hazard trees. ~ Establish trigger points for disengagement during high wind events. ~ Remember that the hazard zone extends a minimum of 2 1/2 tree heights. ~ Aviation drops may bring down trees, burned or unburned |
| All | Steep Terrain & Rolling Debris | <ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. ~ Don't work directly above or below any personnel. ~ Be on the lookout for rolling rocks, debris, or burning material. ~ Shout out loudly any rock or log rolling down the hill. ~ Evaluate necessity to send personnel in areas with limited access. ~ Post lookouts (IRPG pg 7). |
| All | Night Operations | <ul style="list-style-type: none"> ~ Stay alert for snags and other hazards not easily seen. ~ Maintain high visibility in work area and wear vest while in roadway. ~ Use glow sticks to mark escape routes and hazards. ~ Factor in that travel on foot and in vehicles will be slower at night. ~ Ensure personnel have a personal light (headlamp). ~ Watch for signs of fatigue. ~ Take breaks away from areas of known hazards. |
| All | Structure Protection & HAZMAT | <ul style="list-style-type: none"> ~ Review "Wildland Urban Interface" Watch outs, IRPG page 12. Have LCES in place. ~ Use "Structure Assessment" checklist, IRPG pages 13-16. ~ Follow "HAZMAT Incident Operations" on pages 36-38 in IRPG. |
| All | Driving & Traffic | <ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters when backing. ~ Honk horn to alert personnel when backing. ~ Keep clutter off dash and inside cab. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs. |
| All | Fatigue & Over Exertion | <ul style="list-style-type: none"> ~ Drink 1 quart of water each hour during and after work. ~ Rotate crews out of smoky areas. ~ Set a reasonable work pace and allow adequate rest breaks while on the project. ~ Stagger work crews start time to limit fatigue. ~ Use buddy system to monitor personnel of heat related and fatigue issues. ~ Follow work / rest guidelines. |

INCIDENT SAFETY ANALYSIS 215a

| | | |
|-----|---|---|
| All | Firefighter & Public Smoke Exposure | <ul style="list-style-type: none"> ~ Identify homes and structures with private parties remaining behind the evacuation. ~ Identify personnel responsible for contacting private parties. ~ Use warning lights and provide traffic control on roadways during smoky and night operations. ~ Rotate crews out of smoky areas during firing and mop-up operations. ~ Contact Communications when firing operations are initiated and stopped. |
| All | Chainsaw Operations | <ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22,23 ~ Look up, Look down, Look around for hazard tree indicators. ~ Only fell and buck trees within your expertise, and training. ~ Follow "Procedural Felling Operations" on page 85 in IRPG. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE. ~ Ensure chaps are tight and fitted correctly. |
| All | Heat Related Illness (HRI)& Dehydration | <ul style="list-style-type: none"> ~ Drink Fluids throughout operational period (6-8 qts/shift). ~ Maintain water/electrolyte ratio of 3 to 1. ~ Carry extra water on line and cache water at drop points. ~ Take Frequent breaks, minimum of 10 minutes every hour. ~ Allow out of area resources time to acclimatize before expecting peak performance. ~ Recognize symptoms of HEAT RELATED ILLNESS which include <ul style="list-style-type: none"> o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating |
| All | Extreme Fire Behavior | <ul style="list-style-type: none"> ~ Share weather observations with all personnel assigned to division. ~ Establish "Trigger Points" to withdraw. ~ Ensure real safety zones and quality escape routes exist prior to engagement. ~ Use "Risk Management" process prior to engaging in suppression actions, refer to page 1 IRPG. ~ Ensure awareness of thunderstorms and their effects in the area. |
| All | Heavy Equipment Operations | <ul style="list-style-type: none"> ~ Ensure operators know the plan and have an out. ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment. |
| All | Firing Operations & Devices | <ul style="list-style-type: none"> ~ Only personnel trained in the use of each device will be authorized to use firing equipment. ~ Ensure all personnel are aware of firing operation that may affect them. ~ Wear appropriate PPE. ~ Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed. |
| All | Infectious Disease\COVID | <ul style="list-style-type: none"> ~ Wash hands frequently / maintain good hygiene. ~ Maintain 6' separation at all times in camp. ~ Use module of one concept. ~ Use technology as often as possible for meetings. ~ Do not share phones\radios. ~ If you feel sick isolate immediately and notify supervisor. |

6. Work Assignments:
 Task - Identify control lines to the North of Coffee Creek Road and advance construction to support the strategy. Prepare lines to be defended as wildfire advances.
 Purpose - To keep fire away from values at risk in Coffee Creek and the Hwy 3 corridor. Protect private property and land to the North.
 End State - Lines are constructed and prepared and ready to be defended from approaching wildfire.

7. Special Instructions:
 Identify and collect equipment and trash for backhaul.
 SOF2 Ken Gordon will be a rover on all divisions.
 Continue to collaborate with READs. All natural and cultural resource concerns are flagged with orange/white candy-stripe flagging.
 SOFR Phillips will cover Coffee Creek Spike

6. Work Assignments: *FELB Johnson Logging* **E-511**
 Task - Defend the Callahan/Cecilville Road by advancing burnout to the East towards DIV M. Reinforce by mopping up any problem areas to keep fire from threatening control lines. *DOZ2 Log Contracting* **E-391**
 Purpose - To preserve and protect forest values and keep fire from advancing north towards Callahan and highway corridor values.
 End State - Fire was kept South of the Callahan/ Cecilville Road protecting and keeping safe the values to the North.

7. Special Instructions:
 Identify and collect equipment for backhaul.
 Continue to collaborate with READs. All natural and cultural resource concerns are flagged with orange/white candy-stripe flagging.
 SOF2 Ken Gordon will be a rover on all divisions.

CODE OF CONDUCT INCIDENT PERSONNEL

Each individual on this incident is responsible for:

- Being *ready and able* to perform their assigned duties effectively
- Conducting themselves in a manner that treats people with dignity, equality, courtesy, and respect
- Abiding by agency ethics and conduct regulations
- Reporting any harassment or other inappropriate behavior

Each individual on this incident has the right to:

- Work in an environment characterized by safe work practices
- Work in a fair and harassment free environment
- Say “No” to unwelcome advances or requests for favors
- File complaints or grievances through appropriate avenues

There is zero tolerance for inappropriate behavior while assigned to the incident, including

- Illegal drug use
- Alcohol use
- Unsafe work practices and activities
- Discrimination
- Sexual harassment
- Fighting, threatening and abusive behaviors
- Using social media and electronic communication devices for personal business while engaged in fire assignment duties
- Other violations of USDA and Forest Service standards of conduct

Failure to adhere to the Code of Conduct could result in dismissal from the incident, with notification to your home unit.

The public expects our best efforts; they see us as professionals in what we say and do. Let's continue to show them we are!

Human Resource Message

The following are some tips for a slow, safe withdrawal from fire line life.

- Your first evening at home, start a roaring fire in the fireplace, turn off all the lights, and read a book by flashlight. Partially shut the flue damper and have a little smoke back up into the house, enough that it stings your eyes a little bit.
- When it's time for bed, turn on all the lights in your room. Leave them on all night. Sprinkle some dirt and pine needles on your sheets. Put some rocks and your dirty socks beneath your pillow. When you get into bed, be sure you've still got your boots or shoes on. Wear the same clothes you've had on all day. If your bed is too comfortable, sleep in an old, dirty sleeping bag near the fireplace and/or as close to the kitchen as possible.
- Have a friend come over, have him use a bullhorn outside your bedroom all night, using phrases such as "Will the crew boss from Salmon-Creek #6 report to plans?", "Ground Support report to the Logistics Chief immediately", and the perfunctory "Ops Chief to Communications ASAP!" Have him blow into the bullhorn at least two times before making each announcement.
- Have a couple of people who don't know you and have not been in your house before, wander in between 2 and 3 a.m. with huge red packs, pull out their sleeping bags, and sleep on the floor. Have them leave a radio on, switched on to one of the incident's tac channels all night.
- Lock the bathroom door. Arrange to have a porta-potty placed in your driveway. Have it delivered full, after being used by at least a couple of hundred people. Make sure the latch on the door doesn't work. Have someone open the door a couple times while you are using it. Make sure the porta-potty is placed somewhere very dark, and forget to bring your flashlight when you use it.
- Ask the person who delivers your paper to honk the car horn for you as early as possible – preferably around 4 a.m.
- Acquire a taste for half melted 'energy bars', made mostly from sawdust.
- Wear a stuffed backpack all day at work; if it is too comfortable, put some rocks in it.
- At lunch time, take your sandwich outside and drop it in a flower bed. Retrieve it and stand beside a full garbage can while you eat it. Wash it down with a drink that's been in the car trunk all morning.
- Several times during the day, hit yourself in the shins with a hammer.
- During the day take a break by lying down in the dirt outside; if it is too comfortable, lay on a few rocks. Use your hard hat as a pillow by putting it in the crook of your neck, below the back of your head. It is preferable if you find a steep slope in the sun to lie down, steep enough that you must plant your feet on some downhill boulders to keep from slipping down the slope.

Need any more pointers, come talk to your neighborhood HRSP.

Ryan Voelkl – HRSP: 530-457-7276

Interagency Incident Management

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and the news media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the Information Office if there are any issues.

PHOTOGRAPHS AND VIDEOS OF INCIDENT – Please refrain from posting incident related videos to your personal social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness. When this happens it could reflect poorly on all that are attached to this incident.

Please email photo and video submissions to 2021.river@firenet.gov

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

| | | |
|---|--|--|
| Severity of Emergency / Transport Priority | <input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i> | |
| Nature of Injury or Illness & Mechanism of Injury | | Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i> |
| Transport Request | | Air Ambulance / Short Haul/Hoist Ground Ambulance / Other |
| Patient Location | | Descriptive Location & Lat. / Long. (WGS84) |
| Incident Name | | Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i> |
| On-Scene Incident Commander | | Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i> |
| Patient Care | | Name of Care Provider <i>(Ex: EMT Smith)</i> |

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

| Function | Channel Name/Number | Receive (RX) | Tone/NAC * | Transmit (TX) | Tone/NAC * |
|-------------|---------------------|--------------|------------|---------------|------------|
| COMMAND | | | | | |
| AIR-TO-GRND | | | | | |
| TACTICAL | | | | | |

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
