RIVER COMPLEX

CA-KNF-006385 P5N7CM

INCIDENT ACTION PLAN

Operational Period

09/12/2021 to 09/13/2021 0700-1900 hrs and 1900-0700 hrs

			a.

INCIDENT OBJECTIVES (ICS 202)

RIVER COMPLEX

9/11/2021

3. TIME: 1800

- 4. OPERATIONAL PERIOD (DATE/TIME): 9/12/2021 to 9/13/2021, Day 0700-1900 / Night 1900-0700
- 5. OBJECTIVES:

Strategic Framework

Implement a full suppression strategy on the fires within the River Complex. Values at risk include human safety, communities, private timberlands, critical infrastructure, associated improvements, and wilderness values. Apply tactics that offer the highest probability of success commensurate with resource availability.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted by the River Complex. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Professional behavior, conduct, and timely/effective communication.
- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by minimizing large group settings, social distancing, wearing face coverings, and handwashing.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information with Monument fire and other local fires to provide timely and continuous information to affected agency partners, cooperators, and to the public.
- Coordinate suppression activities with assigned incident Resource Advisors to minimize impacts to wilderness, natural and cultural resources.

Control Objectives

Keep the Cronan fire within existing control lines.

To prevent the Haypress fire from spreading to private property, surrounding communities, and impacting values at risk, keep the fire:

- South of Cecilville Road.
- West of the Hwy 3.
- North of Long Valley Road.

 East of the 2020 Red Sal 	mon fire footprint.

FIRE WEATHER FORECAST

FORECAST NO:

39

PREDICTION FOR: 0700 Sun - 0700 Mon

SHIFT DATE:

September 12-13, 2021

FORECAST ISSUED: 1930 Saturday, September 11

NAME OF FIRE: River Complex

SHIFT UNIT:

CA-KNF-006385

SIGNED: Terry Lebo

Incident Meteorologist - Terry Lebo/Jason Straub (T)

WEATHER DISCUSSION: High pressure will remain in control of the region today. Temperatures will reach the mid 80s for lower elevations, and into the upper 70s along higher ridgetops. As fine fuels continue to dry, humidity levels will continue to decrease, falling to 20 to 25%. Winds will be slightly higher during the afternoon, especially on ridgetops, with gusts of 10 to 20 mph possible.

WEATHER FORECAST FOR TODAY (SUNDAY):

SKY/WEATHER: Mostly clear and warmer.

TEMPERATURES: Max Lower Elevations...86-90.

Min Lower Elevations...16-20%

Ridges...70-74F.

24 HR Trend: Up 2

Ridges...23-27%.

24 HR Trend: Down 5%

20-FOOT WIND:

HUMIDITY:

SLOPE/VALLEY - East winds 3 to 5 mph, becoming west 2 to 5 mph with a few gusts to 10 mph after 1500. RIDGETOP - West-northwest winds 7 to 10 mph, with gusts 15 to 20 mph after 1400.

WEATHER FORECAST FOR TONIGHT (SUNDAY NIGHT):

SKY/WEATHER: Clearing skies.

TEMPERATURES: Min Lower slopes/valleys...47-50F;

Ridges...50-55F.

24 HR Trend: Even

HUMIDITY:

Max Lower slopes...80-90%;

Ridges...70-80%.

24 HR Trend: Even

20-FOOT WIND:

SLOPE/VALLEY - Downcanyon/downslope or west to less than 5 mph after 2100.

RIDGETOP - Northeast 4 to 7 mph with occasional gusts to 10.

MONDAY...Northerly flow continues Monday, with wind gusts at higher elevations reaching 10 to 15 mph. Humidity will continue to decrease, with a wider area falling below 20% during the afternoon. Temperatures reach the low 80s to low 90s.

THREE DAY EXTENDED MONDAY - WEDNESDAY (based on midslope 3000ft elevation)

	Max T	Min RH	Max RH	Mid-slope Afternoon Winds	Sky/WX
TUE WED	82 – 91	13%	65%	N 3 to 6	Incr. Smoke
THU	79 – 88 77 – 83	15% 18%	50% 50%	N 5-8 mph gust 11 W 5-9 mph gust 12	Smoke Smoke

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 39 TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: September 12, 2021 24hr DATE ISSUED: 9/11/21 UNIT: CA-KNF, CA-SHF SIGNED: Typed/printed: Dennis Burns/s/ Dave Duran (T)/s/

INPUTS

WEATHER SUMMARY:

- Seasonable temps. Scattered cloud cover. Gradual warming and drying continuing. Light Westerly Winds flow early, increasing in the afternoon. Light Upslopes in the afternoon.
- For Tonight: Clear skies. Good humidity recovery, beginning to trend lower. West Winds becoming downslope/down valley after 2100. Light East Winds on the ridgetops.

FUELS SUMMARY: Dense mixed conifer, old-growth timber, heavy down/dead, mixed ground fuelsFuel models best represented by TL8, TU3, TU5, SH7, and GS2.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fuels advisory active for Northern California

- Critically low Live & Dead fuel moistures. All fuels are available and receptive to burn.
- Fire behavior will increase as smoke clears and will become more active later in the day.
- Heavy dead fuels/timber-litter/light-flashy fuels are highly receptive to spotting and active growth in all directions.

ERC's values for the fire area are near or exceeding the 97th percentile. Probability of ignition 80% in the afternoon.

SPECIFIC:

Branch X: Fire will continue to progress to the North and East. Spread rates will be moderate, heavy fuels will produce intense heat. Single and group tree torching is probable as we dry out in the afternoon. Expect rapid rates of spread when fire aligns with slope. Pockets of heavy dead and down will hold heat for long periods and produce intense heat. Structure threat exists in the Callahan area.

Branch V: Fire is mostly in a backing and flanking alignment and will continue to spread to the South and East. Spread rates will be slow to moderate. Single and group tree torching is probable as we dry out in the afternoon. Expect rapid rates of spread when fire aligns with slope. Structure threat to the Coffee Creek area still exists. Many natural barriers to fire spread exist throughout the branch, however, do not let your guard down as all fuels will encourage continued fire growth. ***DIV N, fire will continue to back into Minnehaha Creek***

Cronan Fire: Existing containment lines are expected to hold. Patrol and mop-up is necessary to mitigate spotting outside the line.

All Areas: Spotting from rollout and torching will continue to be problematic. Slope-reversals are probable from any fire burning in drainage bottoms. Mop-up is extensive. Smoke will continue to limit aircraft operations. Fire activity will moderate when it reaches the Red Salmon burn scar.

AIR OPERATIONS: Smoke will impact visibility and effect aircraft availability.

SAFETY

- Make sure Lookouts are posted in places where they can see potential spotting.
- Fire weakened timber poses a threat to personnel working in timber areas.
- Unburned fuel between you and the fire.

^{**}See Fire Weather Forecast for today's weather details**

Fuels and Fire Behavior Advisory

Northern California

September 1, 2021 to September 15, 2021

Subject: Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

Discussion: Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Events with wind have led to extreme rates of spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify thorough out the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this
 year and are running at or above the 97th percentile in most cases. Expect increased fire intensity and
 spread rates in these areas. Early season extreme fire behavior has been observed in both light and
 heavy fuels. Anticipate increased spread rates, spotting, and active nighttime burning.
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. Anticipate higher resistance to control in all fuel types.
- Already this year, Northern California has experienced large fire activity and multiple team deployments. California will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. Everyone, every day, returns home safely.

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures.
- Suppression actions need to be based on good anchor points, escape routes, and safety zones.
 Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates.

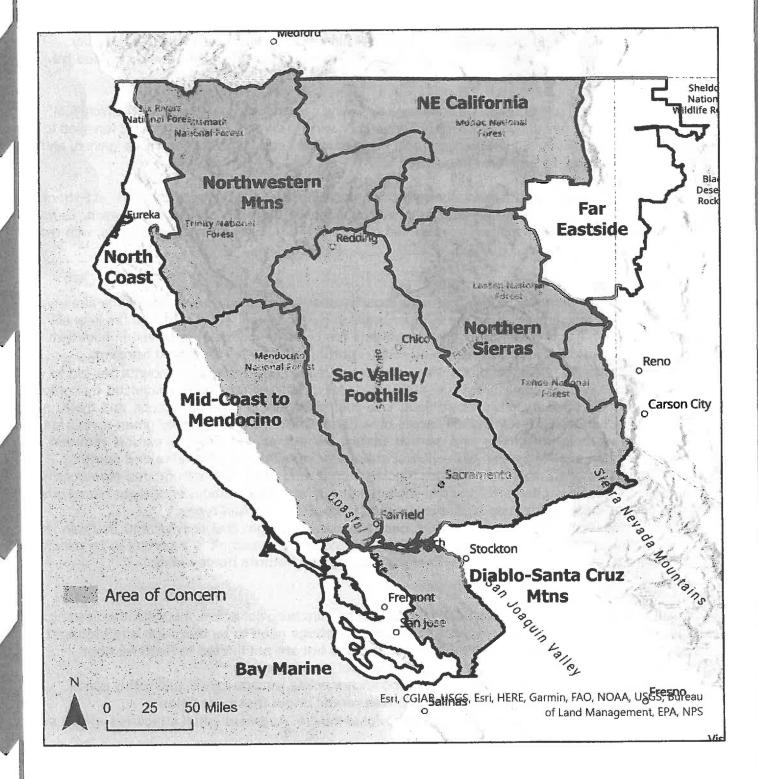

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

Fuels and Fire Behavior Advisory

Northern California

September 1, 2021 to September 15, 2021

Safety Message River Complex

September 12_13,2012 Operational Period: 0700-0700

Managing for Cumulative Fatigue

Fires in the River Complex have been burning 30 plus days. Are you on your third or fourth 14-day tour? Fire season still has a long time left. Will you still be physically able to do this into October?

Not, if you don't begin managing fatigue now!

Consider the following points to management fatigue so that you can finish healthy & safe

- The first step toward becoming a good decision maker on the fire line is to recognize that fatigue hampers your ability to make appropriate decisions - fatigue affects everyone. <u>Fatigue has an</u> <u>impact on risk taking.</u>
- Studies that focus on how lack of sleep affects work performance during long shifts agree, for people to perform well they should average one hour of sleep for every 2 hours of work.
- Fatigue prevention includes hydration and temperature control. It is recommended for a person to drink at least two gallons of water per shift.
- Breaks are a hedge against fatigue. For example, without frequent 10-to-30-minute rest breaks between work operations, fatigue can rapidly overtake you. Breaks of 10 minutes or more keep performance from declining. The number and length of breaks should increase after 8 hours, because fatigue builds through-out a shift.
- Smoke and carbon monoxide are present on the typical wildfire. Some exposure is unavoidable.
 Your objective must be to limit exposure. Too much exposure causes headaches, fatigue, drowsiness, some impaired motor performance, decision making, and cognitive functions.
- Pace yourself on the job. Heat tolerance differs among personnel. If you push too hard to keep up with others, you may not last the shift.

Go slow to Go fast!

If you must stop to fix something or treat an injury you never get ahead.

CIIMT2 Safety Officers: Paul Leusch SOF1, Ron Bertsch SOF1

6. Work Assignments:

Task - Identify control lines to the South of Coffee Creek Road and advance construction to support the strategy. Prepare lines to be defended as wildfire advances.

Purpose - Defend the communities of Coffee Creek and Trinity Center and keep them safe from wildfire.

End State - Lines are constructed and prepared and ready to be defended from approaching wildfire. Fire was suppressed as small as possible, and the communities were not affected by spot fire.

7. Special Instructions:

Identify and collect equipment for backhaul.

READS will check in and out and with DIVS. Continue to collaborate with READs. All natural and cultural resource concerns are flagged with orange/white candy-stripe flagging.

Mountain Medics AMBU #1 assigned to Divisions Q.

6. Work Assignments:	<u> </u>	L	1		<u> </u>	L		

6. Work Assignments:

Task - Identify control lines and advance construction to support the strategy. Prepare lines to be defended as wildfire advances.

Purpose - To keep fire away from values at risk in Callahan and Hwy 3 corridor and protect private property and land to the North.

End State - Lines are constructed and prepared and ready to be defended from approaching wildfire.

7. Special Instructions:

Identify and collect equipment for backhaul.

READS will check in and out and with DIVS. Continue to collaborate with READs. All natural and cultural resource concerns are flagged with orange/white candy-stripe flagging.

Etna Ambulance is available to all DIVS in Branch X.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow Patients trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Communications/Dispatch:
 - Division Supervisor or POC* will run "Medical –Emergency" on the Command frequency.
 - Division Supervisor or POC* to use "Medical Incident Report" worksheet on back of this page or back of IRPG.
 - Communication contacts Medical Unit Leader on the Command frequency or cell phone (562) 252-2168 (Medical Emergencies Only).

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green, (Minor) Patients do not trigger Incident within Incident (IWI).
- **Division Supervisor** to contact Communications/dispatch:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on the back of this page or back of IRPG.
 - Communications contacts Medical Unit Leader on the Command frequency or cell phone (562) 252-2168 (For medical related incidents only).

IN-CAMP - 24 HOUR MEDICAL

- Contact 911 and Medical Unit (562) 252-2168 with:
 - Patient Complaint, Condition and Location

9. PREPARED BY Andy Branson MEDL (T) 10. REVIEWED BY Safety Officer

26

BY MAN AND SOME OF THE PARTY OF

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat/Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

		□RED / PRi		limb threatening injury or i		Is IMMEDIATE

Human Resource Message September 12, 2021

Hello! I am the Human Resource Specialist assigned to the incident. I am available to all incident personnel to provide work environment information, assist with conflict resolution, or any other problems, work or personal, that may be negatively affecting your assignment.

If I can be of assistance to you, please let me know. I can be found in the green trailers at ICP, or you can contact me by calling or texting 720-512-7591 (anonymously if needed), or by emailing julie.nelson@usda.gov.

As a reminder, we have a zero tolerance for illegal drugs, alcohol, sexual harassment, and any other type of inappropriate behavior. We expect all incident personnel to treat each other with dignity and respect, and to work as a team to support a positive work environment.

Please help us make this assignment a positive experience for everyone!

Julie Nelson, HRSP 720-512-7591

Training Specialist Message

An Incident Training Specialist is assigned to this incident and will be performing the duties "Remotely".

To assure proper documentation for your assignment:

- 1. Scan the Incident QR Code, located on the front cover of the IAP
 - 2. Click on Trainee Check-In
 - 3. Complete the Trainee Registration Form & submit

At the end of your assignment:

- 1. Trainee: Scan the incident QR code. Click on the Trainee Exit Interview, complete the form and submit.
- 2. Trainer: Fill in the Position Task Book as completely as possible for this incident.
- 3. **Trainer**: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's <u>signed</u> by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to <u>imt2training@gmail.com</u>

The Training Specialist will send the training documents to the email address you provided.

For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

"I have never let my schooling interfere with my education." - Mark Twain
