# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 25	TYPE OF FIRE: Wildfire
FIRE NAME: River Complex	OPERATIONAL PERIOD: 08/30/21, Day-Night Shifts
DATE ISSUED: 8/29/2021	TIME ISSUED: 2000
UNIT: Klamath NF, Shasta-Trinity NF	SIGNED:  Typed/printed: Oscar Vargas (FBAN)

## INPUTS

### WEATHER SUMMARY:

- It will be a Warm and Dry day. A lot more sunshine today with much less smoke than previous days.  
- ERCs at the 97<sup>th</sup> percentile / Haines Index- 5 (moderate potential of plume dominated activity)  
---For Tonight: Less smoke overnight. Humidity recovery at 50-60%. Light winds w/ some ridgetop gusts--  
\*\*See Fire Weather Forecast for today's weather details\*\*

Scan to report  
observed  
fire behavior

**FUELS SUMMARY:** Dense mixed conifer, old-growth timber, heavy down/dead, mixed ground fuels  
Fuel models best represented by TL8, TU5, SH7, and GS2.

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** \*\*Fuels and Fire Behavior Advisory Issued for northern California\*\*

- Critically low Live & Dead fuel moistures. 1000-hour dead fuel moisture below 10% and live fuels below 100%.
- Topography is very steep and rugged. Elevations from 3000' - 7500' with slopes over 100% (45°) in many places.
- Fire behavior will increase as inversions start lifting around noon
- Increased fire intensity and rates of spread today as more ventilation and solar radiation influence all fires

### SPECIFIC:

Firelines with intense fire-heat will start to get more active and spread faster than the previous few days. Increased rates of spread, higher intensity burning, and torching with moderate potential for short range spotting is expected along uncontained firelines. Backing and flanking fires will spread at moderate rates and uphill runs will be rapid when aligned with slope, wind and available fuels. Slope-reversals in fire spread will trigger significant growth. Fire activity will remain active with at night in heavy dead fuels and timber litter.

--Probability of Ignition around 90% in most areas during the day--

**Haypress Fire:** Firelines in DIV-Q around Coffee Creek/Three Sisters will continue to actively back to the East & South at moderate rates of spread and some torching. Contained lines along Cecilville/Callahan Rd will continue to smolder/smoke and the fire will continue to actively back to the road in DIV-L. The Parker spot will remain active and grow to the north in uncontained firelines.

**Summer Fire:** Areas of intense heat on the west-end (DIV-U) will continue to spread to the West and into Plummer creek and will also back towards the Cecilville road at slow to moderate rates of spread. DIV-S/T have many areas of intense heat that will continue to spread to the south. Higher elevation barriers will limit fire growth.

**Cronan Fires:** Unburned islands will continue to actively burn in pockets of intense heat. Rollout is still a threat to containment lines, but mop-up and patrolling will minimize the risk as the days go by.

### AIR OPERATIONS:

Smoke from these fires and other fires in the region will limit the use of aircraft until smoke clears around noon

### SAFETY

Fire weakened trees and snags are a high-risk hazard. Identify, mitigate and communicate hazard trees to others in the area in order to prevent tree-strikes.

# CIIMT 13 COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings when appropriate, hand washing, cover your mouth and nose when coughing or sneezing and practicing good hygiene

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

<sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-nCoV/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

# Prevention and Management of COVID-19 During Wildland Fire Operations

*Keep yourself and your peers safe by practicing these measures whenever possible*

## Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

## Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

## Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

## Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

## Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

#### HUMAN FACTOR BARRIERS TO SITUATIONAL AWARENESS

**Fatigue**

- Carbon Monoxide
- Dehydration
- Heat Stress
- Fitness Level

**Hazardous Attitude**

- Invulnerability
- Anti-Authority
- Impulsive
- Overconfident

**PREPARED: Terri Knauth, Brent Kaiser, Larry Wright, Brian Phillips (SOFR-T)**

#### FIRE BEHAVIOR

Extreme fire behavior has always been present in cases of shelter deployment. It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions as well as predicted and current weather conditions. As fire behavior changes, it is critical to act decisively to the changing situation.

#### ENVIRONMENTAL/OPERATIONAL CONDITIONS

- Smoke
- Weather
- Steep Slopes
- Helicopter bucket drops and rotor down drafts
- Retardant drops
- Vibrations from heavy equipment and motor vehicles operating nearby

#### **WHEN ALL ELSE FAILS REMEMBER OUR LEADERS INTENT**

**Purpose:** *ENSURE ALL FIREFIGHTERS RETURN TO CAMP WITH NO INJURIES*

**End State:** *ALL FIREFIGHTERS RETURN HOME SAFELY TO FAMILY AND FRIENDS*

#### **Leaders Set The Example**

All leaders of firefighters have the responsibility to provide a model their subordinates will emulate and follow. You should:

- Share the hazards and hardships with your Subordinates.
- A positive attitude is infectious.
- Don't show discouragement when facing setbacks.

*Thank you for all you do to be successful*

**Our time is getting shorter...  
How about our Tempers???**

We can see the end in sight, although this has been an uncertainty for a while. Some are ready to leave; some are wishing it was longer.

With the hard work and especially the changes taking place, it is easy to get on edge and "on the edge" with each other. Let's guard against that, and try to help each other out.

Take care and be safe.

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and the news media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the Information Office if there are any issues.

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – Please refrain from posting incident related videos to your personal social media.
