# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 26	TYPE OF FIRE: Wildfire
FIRE NAME: River Complex	OPERATIONAL PERIOD: 08/31/21, Day-Night Shifts
DATE ISSUED: 8/30/2021	TIME ISSUED: 2000
UNIT: Klamath NF, Shasta-Trinity NF	SIGNED:  Typed/printed: Oscar Vargas (FBAN)

## INPUTS

### WEATHER SUMMARY:

- It will be a Warm and Dry day. Sunshine today with much less smoke than previous days.  
---For Tonight: Clear skies, lingering smoke in drainages. Humidity recovery at 30-50%. Light ENE winds --  
\*\*See Fire Weather Forecast for today's weather details\*\*

Scan to report  
observed  
fire behavior

**FUELS SUMMARY:** Dense mixed conifer, old-growth timber, heavy down/dead, mixed ground fuels  
Fuel models best represented by TL8, TU5, SH7, and GS2.

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL: \*\*Fuels and Fire Behavior Advisory Issued for northern California\*\***

- Critically low Live & Dead fuel moistures. 1000-hour dead fuel moisture below 10% and live fuels below 100%.
- Topography is very steep and rugged. Elevations from 3000' - 7500' with slopes over 100% (45°) in many places.
- Fire behavior will increase as inversions lift around noon and will become much more active later in the day
- Increased fire intensity and rates of spread today as more ventilation and solar radiation influence all fires

### SPECIFIC:

There are many areas of intense and active fire behavior that will continue to be very active today. Moderate to rapid rates of spread, higher intensity burning, and torching with short-range spotting is expected along uncontained/active firelines. Backing and flanking fires will spread at moderate rates and uphill runs will be rapid when aligned with slope, wind or available fuels. Slope-reversals in fire spread will trigger significant growth. Fire activity will remain active at night in heavy dead fuels and timber litter. Some areas will be more active at night due to heat insulation and loss of wind influence. Roll-out will be a problem during the day and night.

--Probability of Ignition up to 90% in most areas during the day-- --ERCs at the 97th percentile--

**Haypress Fire:** Firelines in around Coffee Creek/Three Sisters will continue to actively back, flank and run uphill to the East & South at moderate to rapid rates of spread with torching and short-range spotting. Contained lines along Cecilville/Callahan Rd will continue to smolder/smoke and the fire will continue to actively back to the road in DIV-L. The Parker spot will remain active and grow to the north in uncontained firelines.

**Summer Fire:** Areas of intense heat in DIV-U will continue to spread to the West into Plummer creek and will also actively back and roll-out towards the Cecilville road at moderate rates of spread. DIV-S/T have many areas of intense heat that will continue to spread to the south at moderate to rapid rates of spread. Slope-reversal uphill runs will occur.

**Cronan Fires:** Unburned islands will continue to burn in pockets of intense heat. Rollout is still a threat to containment lines, but mop-up and patrolling will minimize the risk as the days go by.

### AIR OPERATIONS:

Smoke from these fires and other fires in the region will continue to limit the use of aircraft until smoke clears

### SAFETY

There are many areas with high intensity fire and unburned fuel that can't be seen by ground units, this is a big watch-out. Use aviation to provide intel when possible, mitigate this as best you can and always have a valid Escape Route.

# CIIMT 13 COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings when appropriate, hand washing, cover your mouth and nose when coughing or sneezing and practicing good hygiene

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<sup>2</sup> Take temperature with no-touch thermometer, if available *

<sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

# Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

## Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.

- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.

- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

## Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

## Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

## Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

## Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

**NARRATIVE:**

### Managing for Cumulative Fatigue

The Cougar/Surprise Fires have been going for many days and many of you are on your second, third and fourth tours this season. We still have a couple of months of fire season left. Will you still be physically able to do this through September, maybe October? Not if you don't manage fatigue. Consider the following points for fatigue management so that you are able to finish fire season in good shape:

- The first step toward becoming a good decision maker on the fire line is to recognize that fatigue hampers your ability to make appropriate decisions - fatigue affects everyone. Fatigue has an impact on risk taking.
- Studies that focus on how lack of sleep affects work performance during long shifts agree for people to perform well they should average one hour of sleep for every 2 hours of work.
- Fatigue prevention includes hydration and temperature control. It is recommended for a person to drink at least two gallons of water per shift.
- Breaks are a hedge against fatigue. For example, without frequent 10 to 30 second rest breaks between work operations, fatigue can rapidly overtake you. Breaks of 10 minutes or more keep performance from declining. The number and length of breaks should increase after 8 hours, because fatigue builds through-out a shift.
- Smoke and carbon monoxide are present on the typical wildfire. Some exposure is unavoidable. Your objective must be to limit exposure. Too much exposure causes headaches, fatigue, drowsiness, some impaired motor performance, decision making, and cognitive functions.
- Pace yourself on the job. Heat tolerance differs among personnel. If you push too hard to keep up with others, you may not last the shift.
