FIRE WEATHER FORECAST

FORECAST NO: 22 **NAME OF FIRE:** River Complex
PREDICTION FOR: 0700 Thu – 0700 Fri **SHIFT UNIT:** CA-KNF-006385
SHIFT DATE: August 26-27, 2021 **SIGNED:** *Shane Eagan*
FORECAST ISSUED: 1930 Wednesday, August 25 **Incident Meteorologist –** Shane Eagan

WEATHER DISCUSSION: A weak upper system will bring a shift in winds out of the northwest across the River Complex today. Transport winds will also shift out of the northwest, pushing smoke off to the southeast. Expect another day with clearing skies after the inversion begins to lift by late morning. Watch out for elevated fire weather conditions as temperatures warm, humidity falls, and winds increase. Gusts to 20 mph are possible on ridges and in areas where terrain and wind align. There is potential for pockets of enhanced northwesterly, downslope winds across Divisions Q and M Thursday evening into the overnight hours. Sustained winds 6-10 mph and occasional gusts up to 15-20 mph are possible through early Friday morning, the highest probability of stronger winds on upper slopes and ridges.

WEATHER FORECAST FOR THURSDAY:

SKY/WEATHER: Partly cloudy with areas of smoke. Watch out for thinning of smoke.

| | | |
|---|------------------|-----------------------------------|
| TEMPERATURES: Max Lower Elevations...84-92F; | Ridges...70-79F. | 24 HR Trend: Up 3-6 deg |
| HUMIDITY: Min Lower Elevations...18-28%; | Ridges...25-35%. | 24 HR Trend: Little change |

Areas in smoke can expect highs 5-10 deg F cooler and RH 10-20% higher, warming & drying rapidly if smoke clears.

20-FOOT WIND:

SLOPE/VALLEY – Variable 3 to 6 mph in the morning becoming Upcanyon / Upslope 4 to 9 mph with gusts to 15 mph after 0900. Lighter winds in areas of smoke.

RIDGETOP – ESE winds 4 to 8 mph gusts to 10 mph in the morning becoming WNW 6 to 12 after 1100. Gusts 15 to 22 mph possible in the afternoon, strongest on exposed ridges.

INVERSIONS/STABILITY: Smoke lingers into the afternoon, especially in steeper drainages.

WEATHER FORECAST FOR THURSDAY NIGHT:

SKY/WEATHER: Mostly cloudy; smoke settling into lower valleys.

| | | |
|---|------------------|-----------------------------------|
| TEMPERATURES: Min Lower slopes/valleys...47-55F; | Ridges...50-59F. | 24 HR Trend: Little change |
| HUMIDITY: Max Lower slopes...60-75%; | Ridges...50-60%. | 24 HR Trend: Up 5-10% |

20-FOOT WIND:

SLOPE/VALLEY – Upslope 4 to 8 with gusts to 10 mph in the evening...becoming downcanyon/downslope to less than 6 mph after 2100.

RIDGETOP – WNW winds 6 to 12 mph with gusts 15 to 22 mph in the evening...becoming 5 to 10 mph with occasional gusts around 12 to 20 mph overnight after 2000.

INVERSIONS/STABILITY: Areas of smoke settling into drainages under the inversion.

EXTENDED FORECAST:

FRIDAY... Mostly sunny and smoky. Max temps...75 to 92F. Min RH 18-30%. Easterly winds becoming west-northwest 5 to 15 mph. Strongest over ridges and upper slopes.

Divs Q & M – Watching potential for elevated NW winds from Thu night; sustained 6-10 mph with gusts 15-20 mph. Will follow up with Spot Forecast

FIRE BEHAVIOR FORECAST

| FORECAST NUMBER: 21 | TYPE OF FIRE: Vegetation |
| FIRE NAME: River Complex | OPERATIONAL PERIOD: 0700-0700, 8/26-27/2021 |

INPUTS

WEATHER SUMMARY:

See IMET Weather Forecast

A shift in winds out of the northwest will lift the inversion by late morning. This will cause elevated fire behavior across the complex especially on ridges and in places where wind and slope align.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

****Fuels and Fire Behavior Advisory Issued for northern California****

- Extended drought conditions have lowered live and dead fuel moistures to critically dry levels. 1000-hour dead fuel moisture are below 10% and live fuels are below 100%. Overstory vegetation is a mixed conifer and surface fuels include shrubs and grass – fuel models best represented by TL8, TU5, SH7, and GS2.
- Topography is very steep where rugged mountains have been carved by multiple forks of the Salmon and Trinity Rivers. The elevation ranges from 3000' – 7500' with slopes over 100% (45°) in many places.
- Anticipate increased fire behavior if the inversion lifts and there is clear air over your portion of the fire. Potential exists for sustained crown runs and long-range spotting (1+ mile) with probability of ignitions above 80%.

SPECIFIC:

Small fire growth from the local fires resulted in another day of less spoke production in the area, resulting in a greater chance of clearing. Increased temperatures, a decrease in RH, and stronger northwest winds in the afternoon and night will elevate fire behavior potential.

It is important to understand the specific conditions that are driving fire behavior in your working area. This is crucial when working in the Klamath Mtns, where complex terrain creates numerous microclimates throughout the fire. Pay attention to the factors influencing fire behavior in your area and base your actions accordingly. *If needed, request a spot weather forecast through the IMET to provide better intel to identify your burn window.*

Haypress Fire: The firing operation continues to stay even with the slope as fire backs off 'I Am Up Ridge' in Division L. Dark Gulch had increased fire behavior yesterday which may force burning operations to continue to the east toward Carter Meadows. The Coffee Creek drainage has heat well established on both sides of the creek. Pay attention to the portion in Hickory Creek near Three Gulch that can be adversely impacted by the afternoon northerly winds. The Parker Spot in Div. Q showed little growth yesterday. Although winds may be sheltered in the spot location, the wind direction is in alignment with Swift Creek. Expect increased fire behavior in this drainage, especially if strong winds surface.

Summer Fire: Increased fire activity is expected in Saint Claire Creek south of the 16 road. Fire growth will continue as fire backs down towards the North Fork Trinity River and Rattlesnake Creek. This portion is consuming dead and down fuels left from the 2006 Bake Oven fire.

Cronan Fires: A spot/rollout was observed yesterday in Daugherty Bluffs. Continue to hold and secure the control lines. If able, use the UAS to burn out interior islands to limit spotting concerns moving forward.

AIR OPERATIONS:

Sunrise 0629, Civil Twilight ends 2024 (Day Length – 13 hours, 26 minutes)

Smoke should move out by mid-morning across the complex providing clearer air supporting air operations when needed.

SAFETY

Thermal belts often occur in the Klamath Mountains. Be aware of these conditions as the increase in overnight fire activity in the belts can cause more perimeter heat for the day shift.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are **ALL** accountable for **SAFE** behaviors
For Day/Night Operations: August 26, 2021

INCIDENT: River Complex

Shift: Day/Night 8/26, 2021

Major Hazard and Risk:

- **Hazardous Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Watch out!
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drinks, take frequent breaks, and pay attention to your body.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Infectious Disease/COVID-19:** Wash hands frequently, practice social distancing, wear face coverings when required, clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.
- **Firefighter Smoke Exposure:** IRPG Pg. 30. Rotate crews to cleaner air when possible.

Standard Firefighting Order #8: Give clear instructions and be sure they are understood.

Watch Out Situation #8: Constructing line without safe anchor point.

- Typically a shrub with leaves of three, similar to poison ivy
- Pacific poison oak may be vine-like
- May have yellow or green flowers and clusters of green-yellow or white berries

When your skin touches poison ivy, poison oak or poison sumac, you develop an itchy rash. The rash is actually an allergic reaction to urushiol, a plant oil. You can also develop a rash from **touching oil-contaminated objects**, such as gardening tools, clothes or a pet's fur.

Thanks from your Safety Team!

TEAM 15 COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings when appropriate, hand washing, cover your mouth and nose when coughing or sneezing and practicing good hygiene

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

| Symptom |
|---|
| Cough more than expected? |
| Shortness of breath or difficulty breathing? |
| Fever? Chills? |
| Muscle pain, outside your normal for firefighting? |
| Sore throat? |
| New loss of taste or smell? |
| Fatigue, outside your normal for firefighting? |
| Headache, outside your normal for firefighting? |
| Congestion or runny nose, outside your normal for firefighting? |
| Nausea or vomiting |
| Diarrhea |

** Take temperature with no-touch thermometer, if available **

¹ Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

**Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.*

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

Human Resource Message

Employee Advocate

Everyone here today is playing a critical role in fighting the River Complex fire. We all have our assignments that must be met in order to achieve our mission of protecting life, resources and property. Of course, we cannot accomplish our mission when one of our fellow team members may be experiencing a work and/or personal matter that is impacting their ability to keep focused and remain positive.

If we witness a team member who is having a rough go at it, become their advocate. Ask them how things are going. See if they want to take a break to talk about what's going on. Give them the opportunity to vent and to share with you their concern. You may be the person that brings them back to where we need them to be to help meet our objectives.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."
