INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: RIVER COMPLEX		2. Operational Period: 24 HOUR	
Date/Time From: 08/17/2021 0600		TUE	Date/Time To: 08/18/2021 0600 WED
3. Objective(s):			
<u>MANAGEMENT OBJECTIVES</u>			
1. Ensure firefighter and public safety by using strategies and tactics that mitigate known and anticipated hazards while providing for highest probability of success.			
2. Elevate personnel awareness of current COVID-19 precautions and best practices by adhering to Infectious Disease Control protocols.			
3. Minimize suppression impacts to wilderness characteristics by using natural barriers, trails, and existing fire scars, to the extent possible.			
4. Protect and/or minimize the effects of the wildfire on cultural, heritage, and natural resources in the fire area.			
5. Maintain and enhance relationships with represented agencies, local tribal council stakeholders, local landowners, and the public by providing timely and accurate fire information.			
6. Effectively manage cost by implementing strategies and tactics that have the highest probability of success.			
<u>CONTROL OBJECTIVES</u>			
Keep fire:			
North of Twin Lakes to Mumford Peak to Wedding Peak to Cabin Peak to Semore Gulch.			
East of Semore Gulch to Hoteling Gulch to Dead Mule Gulch to Hellhole Ridge.			
South of the Hellhole Ridge to Bear Wallow Gulch.			
West of Bear Wallow Gulch to Russian Peak to Wolford Gulch to Twin Lakes.			
4. Operational Period Command Emphasis:			
General Situational Awareness:			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 12	TYPE OF FIRE: Vegetation
FIRE NAME: River Complex	OPERATIONAL PERIOD: 0600-0600, 8/17-18/2021
DATE ISSUED: 8/16/2021	TIME ISSUED: 2000
UNIT: Klamath NF, Salmon/Scott RD	SIGNED:  Typed/printed: Nic Elmquist, FBAN

INPUTS

WEATHER SUMMARY:

See IMET Weather Forecast

A weather system continues to push through the region with a very dry air mass filtering in from the northwest. Stronger winds aloft will overspread the fire area today, and when coupled with the dry air, will result in near critical fire weather conditions.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Extended drought conditions have lowered live and dead fuel moistures to critically dry levels. 1000-hour dead fuel moisture are below 10% and live fuels are below 100%. Overstory vegetation is mixed conifer and surface fuels include shrubs and grass – fuel models best represented by TL8, TU5, SH7, and GS2.
- Topography is very steep where rugged mountains have been carved by multiple forks of the Salmon River. The elevation ranges from 3000' – 7500' with slopes over 100% (45°) in many places.
- Anticipate increased fire behavior if the inversion lifts and there is clear air over your portion of the fire. Potential exists for sustained crown runs and long-range spotting with probability of ignitions above 80%.

SPECIFIC:

Expect low to moderate fire behavior unless the smoke clears – smoldering, creeping, with occasional group torching and short-range spotting. Fire behavior expected to increase today along the upper elevations exposed to the afternoon northwesterly winds.

Haypress Fire: The dry conditions and afternoon northwesterly winds will continue to adversely affect the east side of the fire in Div. L near Fish Lake Dip and in Div. O on the spot fires across Coffee Creek Road as they have slope and fuel aligned up to Grouse Ridge. Continue to look for opportunities to keep the fire as even as possible as it backs down towards Summerville to limit potential for uphill runs in Div. U.

Summer Fire: Fire activity will be focused in the areas west of Cecil Creek and on the upper elevations on the very south end of the fire in Div. P.

Cronan Fires: Fire activity is isolated to the western flank as the fire back into Olsen creek. Continue to monitor the fire within the drainage to ensure there is enough time to complete firing operations along Yellowjacket Ride to ensure the fire stays south of the ridge control line. Conditions should be conducive for nighttime firing operations, especially in the upper elevations, if needed.

AIR OPERATIONS:

Sunrise 0622, Civil Twilight ends 2037

Aircraft should be able to provide support starting early in the afternoon for the upper elevations of the complex. Smoke will adversely impact the lower portions of the fire (i.e. Cecilville Spike, Summerville) for the entire shift.

SAFETY

Continue to post good lookouts and communicate any changes you are experiencing. The complex topography and smoke conditions makes for a complex fire environment. Get to know the factors influencing fire behavior in your area, watch out for each other, and keep up the good work.

Division/Group Assignment List (ICS 204 WF)

Controlled Unclassified Information//Basic

1. Incident Name: RIVER COMPLEX		3.	
		Branch: I	Division/Group A
2. Operational Period: 24 HOUR			
Date/Time From: 08/17/2021 0600	TUE	Date/Time To: 08/18/2021 0600	WED

4. Operations Personnel			
BRANCH DIRECTOR		OPERATIONS CHIEF	STEPHEN FILLMORE JON TEUTRINE
DIVISION/GROUP SUPERVISOR	ERICK D'AMICO DAREK PEPPE (T)	FIELD SAFETY	STEVEN DAVIS GREG TOOLEY (T)

5. Resources Assigned this Period

HEALTH AND SAFETY MESSAGE

Sometimes it just not worth the risk...

INCIDENT: **River Complex**

DATE: Day/Night 8/17/2021

Major Hazard and Risk:

- **Hazardous Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Watch out!
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drinks, take frequent breaks, and pay attention to your body.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Infectious Disease/COVID-19:** Wash hands frequently, practice social distancing, wear face coverings when required, clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.
- **Firefighter Smoke Exposure:** IRPG Pg. 30. Rotate crews to cleaner air when possible.

Narrative: Let's face it, we are in a battle. We are in a battle against the fires, we are in a battle to get enough resources to fight these fires and we are in a battle against an invisible enemy – COVID-19. As in any battle remember to plan for success, pick your fight, and have the right resources for the job. In the case of wildland fire, sometimes the right strategy is to disengage during extreme fire behavior or extreme weather conditions like thunderstorms. Nobody will blame you for doing the SAFE thing. As far as COVID-19 goes, let's do our best to follow the best practice precautions; Wearing masks when mandated, social distancing, washing of hands and self-monitoring.

A Safety Zone:

A location where the threatened firefighter can find adequate refuge from an approaching fire.

- What is the difference between a safety zone and a deployment site?
 - The safety zone is the area where a firefighter can survive without using a fire shelter. The deployment site is used when fire conditions are such that escape routes and safety zones have been compromised.
- How do you identify a good safety zone?
 - Consider the distance
 - The best locations
 - Location is scouted and marked well
 - Location has been reassessed
 - For radiant heat only, the distance separation between the firefighter and the flames must be at least four times the maximum flame height.
 - Take advantage of heat barriers
- What should you avoid in selecting a safety zone?
 - Avoid locations that are downwind from the fire.
 - Avoid locations that are in chimneys, saddles, or narrow canyons.
 - Avoid locations that require a steep escape route.

Keep your tires down

This picture is never a good outcome
This picture should make you slow down
This picture could be your vehicle:
Red, Yellow, Green or White

Daily Issues

Drive with your headlights on.
Don't drive distracted, keep eyes on road.
Long travel times, use rested drivers.
Clean your windshields.

Incident Safety Officers: **Rick Bertram, Tom Zeulner,**
Brent Kaiser *BK*

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	Air Operations	<ul style="list-style-type: none"> • Only take necessary flights. • Follow "Aviation Watch-Out Situations" on page 46, IRPG. • Don't plan on air resources for medical transport or resupply. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Ensure Drone Operations are coordinated with air resources.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> • Identify helispots and communicate Lats/Longs to DIVS. • Be familiar with the Medical Plan and communicate 8 line promptly. • Use the risk assessment process prior to sending personnel into areas with limited access. • Be aware of weather conditions (i.e. smoke inversions, high wind, etc.), that could affect the ability of helicopters to reach you. • Preplan medical extrication for resources. • Don't rely on helicopters exclusively.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> • Maintain 8-10' spacing when working and walking. • Don't work above any personnel. • Scout areas of concern prior to engaging work force.
All	Hazard Trees	<ul style="list-style-type: none"> • Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. • Avoid snag patches. Use the risk management process when around hazard trees. • Don't park vehicles or take breaks in high concentrations of hazard trees. • Establish trigger points for disengagement during high wind events. • Remember that the hazard zone extends a minimum of 2 1/2 tree heights. • Post lookouts when appropriate.
All	Driving & Traffic	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques traveling on all roads and city streets. • Use spotters and honk horn when backing. • Always use headlights and obey posted speed limits. . • Use chock blocks, turn wheels into hill. • Avoid distractions (eating, & cell phones etc.) and use the 3 second rule. • Watch for wildlife on roadways.
All	Firing Operations	<ul style="list-style-type: none"> • Follow the chain of command when undertaking burning operations. • Ensure that aerial/ground ignition plans have been well briefed including LCES and drought related fire behavior considerations. • Initiate burning after ensuring the plan is authorized and understood by all. • Ensure all personnel are aware of firing operation that may affect them.
All	Firefighter Smoke Exposure	<ul style="list-style-type: none"> • Refer to "Smoke Hazards and Mitigation" IRPG Pg. 30. • Use warning lights and provide traffic control on roadways during smoky and night operations. • Rotate crews out of smoky areas during firing and mop-up operations. • Contact Communications when firing operations are initiated.
All	Night Operations	<ul style="list-style-type: none"> • Maintain high visibility in work area and wear vest while in roadway. • Use glow sticks to mark hazards. • Ensure personnel have a personal light (headlamp). • Watch for signs of fatigue. • Take breaks away from areas of known hazard.
All	Infectious Disease Control/ COVID-19	<ul style="list-style-type: none"> • Utilize social distancing (6 feet). Wear a facemask if you can't social distance. • Maintain the "module of one" concept. • Disinfect vehicle interiors, and commonly touched surfaces frequently. • Do not share devices (i.e. cellphones, laptops, radios etc.). • Utilize technology to communicate while maintaining social distance. • Wash your hands frequently.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

Other Resources

- Centers for Disease Control and Prevention:
<https://www.cdc.gov/coronavirus/2019-ncov/>.
- National Wildfire Coordinating Group:
<https://www.nwccg.gov/committees/emergency-medical-committee/infectious-disease-guidance>.

Human Resource Message

Working smarter, not harder,' the saying goes. Here on the incident, working smarter includes:

- encouraging one another in our individual assignments,
- maintaining the collective energy and focus of the team, and
- supporting each other in times of adversity, challenge and change.

Remember that we are all here for a common purpose and each of us is making a valuable contribution to our mission.

Tony Torres - HRSP

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
