## FIRE WEATHER FORECAST

**FORECAST NO:** 14  
**PREDICTION FOR:** 0700 Wed – 0700 Thu  
**SHIFT DATE:** August 18-19, 2021  
**FORECAST ISSUED:** 1930 Tuesday, August 17

**NAME OF FIRE:** River Complex  
**SHIFT UNIT:** CA-KNF-006385  
**SIGNED:** *Shane Egan Matt Mehle*  
**Incident Meteorologist-Shane Egan & Matt Mehle**

**WEATHER DISCUSSION:** A weather system continues to drop through the Western US over the next couple of days. Stronger winds aloft will result in excellent smoke dispersion and ventilation of the fire. With this clearer air, expect another dry and breezy day. While winds will be slightly less than the yesterday (Tuesday) and humidity will be slightly higher, elevated fire weather conditions will persist across the region. The strongest winds are expected on exposed ridges and upper slopes; areas where smoke lingers or drifts in from the fire can expect lighter winds and muted fire weather potential. Poor overnight recoveries are forecast Wednesday night, with thermal belts forming on the upper slopes – resulting in elevated fire weather potential overnight.

### **WEATHER FORECAST FOR WEDNESDAY:**

**WEATHER:** Sunny and breezy. Pockets of smoke in steeper terrain, especially southern portions of the fire area.

<b>TEMPERATURES:</b> Max Lower Elevations...80-89F;	Ridges...70-80F.	<b>24 HR Trend:</b> Little change
<b>HUMIDITY:</b> Min Lower Elevations...15-25%;	Ridges...24-35%.	<b>24 HR Trend:</b> Up 3-6%

*Areas that see smoke linger can expect highs near 70F with RH 40-50%, warming and drying rapidly if smoke clears.*

#### **20-FOOT WIND:**

**SLOPE/VALLEY** – Variable 4 to 7 mph in the morning becoming Upcanyon / Upslope 5 to 9 mph with gusts to 12 mph. Lighter winds in areas of smoke.

**RIDGETOP** – Northeast winds 5 to 11 mph gusts to 15 to 22 mph in the morning becoming 6 to 14 mph in the afternoon. Gusts 20 to 25 mph possible.

**INVERSIONS/STABILITY:** Smoke lingers into the afternoon in steeper drainages, especially south of the Haypress Fire.

### **WEATHER FORECAST FOR WEDNESDAY NIGHT:**

**WEATHER:** Clear and cool; smoke settling into lower valleys.

<b>TEMPERATURES:</b> Min Lower slopes/valleys...45-55F;	Ridges...53-59F.	<b>24 HR Trend:</b> Up 2-3 deg
<b>HUMIDITY:</b> Max Lower slopes...45-60%;	Ridges...38-50%.	<b>24 HR Trend:</b> Down 10-15%

#### **20-FOOT WIND:**

**SLOPE/VALLEY** – Upslope 5 to 9 with gusts to 12 mph in the evening...becoming downcanyon/downslope to less than 6 mph after 2100.

**RIDGETOP** – Northeast winds 6 to 14 mph with gusts 20 to 25 mph in the evening...becoming 5 to 10 mph with gusts around 15 mph overnight.

**INVERSIONS/STABILITY:** Areas of smoke settling into drainages under a moderate inversion.

### **EXTENDED FORECAST:**

**THURSDAY...** Mostly sunny. Dry and breezy; will result in elevated fire weather conditions. Max temps...76 to 90F. Min RH 15-28%. Northeast, becoming northwest winds 6 to 15 mph. Strongest over ridges and upper slopes.

**IRAWS sites:** **EDDY GULCH LOOKOUT IRAWS: Freq: 163.350; Tone: 0003 (Div H)**  
**COFFEE CREEK IRAWS: Freq: 163.350; Tone: 0016 (Div O)**

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 13	TYPE OF FIRE: Vegetation
FIRE NAME: River Complex	OPERATIONAL PERIOD: 0600-0600, 8/18-19/2021
DATE ISSUED: 8/17/2021	TIME ISSUED: 2000

## INPUTS

### WEATHER SUMMARY:

#### See IMET Weather Forecast

A weather system will continue to drop through the Western US over the next couple of days. Stronger winds aloft will result in excellent smoke dispersion and ventilation of the fire. With this clear air, expect another dry and breezy day.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

- Extended drought conditions have lowered live and dead fuel moistures to critically dry levels. 1000-hour dead fuel moisture are below 10% and live fuels are below 100%. Overstory vegetation is mixed conifer and surface fuels include shrubs and grass – fuel models best represented by TL8, TU5, SH7, and GS2.
- Topography is very steep where rugged mountains have been carved by multiple forks of the Salmon River. The elevation ranges from 3000' – 7500' with slopes over 100% (45°) in many places.
- Anticipate increased fire behavior if the inversion lifts and there is clear air over your portion of the fire. Potential exists for sustained crown runs and long-range spotting with probability of ignitions above 80%.

#### SPECIFIC:

Expect increased fire behavior with the clearer air– backing and flanking fires with occasional group torching and short to moderate range spotting. Fire behavior expected to increase again today along the upper elevations exposed to the afternoon northerly winds.

**Haypress Fire:** Anticipate another active burn day on the eastern flank of the Haypress. There are several north/south aligned drainages along this portion of the fire, notably Coffee Creek and Union Creek in Div. O, which will be aligned with the predominant northerly flow. The southeast flank continues to actively back down towards Summerville. Continue the strong work in your structure protection efforts and holding the Cecilville/Calahan road as this is a critical piece of the overall strategy.

**Summer Fire:** The fire will remain active on the western portion of the fire on the piece west of the Cecil Creek. The southern portion of the fire is exposed to the afternoon northerly winds and will continue to push towards the Grizzly Meadows area.

**Cronan Fires:** The northerly flow will be beneficial for the operations along the Yellowjacket Ridge in Div. A. Continue the strong work... containing this fire will free-up needed resources on the other two fires.

#### AIR OPERATIONS:

Sunrise 0623, Civil Twilight ends 2036

Clearer air will allow for air support over most of the complex today. Don't assume pilots are aware of hazards...if you see it, say it.

#### SAFETY

Be heads up when working in and around the timber, especially on the steep slopes. Look up, down, and around for hazards in your parking, working, and resting areas.

## HEALTH AND SAFETY MESSAGE

### Safety First, Last and Always

INCIDENT: **River Complex**

DATE: Day/Night 8/18/2021

#### **Major Hazard and Risk:**

- **Hazardous Trees & Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Heads up, always look out for hazard trees around your work area.
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drinks, take frequent breaks, and pay attention to your body.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Infectious Disease/COVID-19:** Wash hands frequently, practice social distancing, wear face coverings when required, clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.
- **Firefighter Smoke Exposure:** IRPG Pg. 30. Rotate crews to cleaner air when possible.

**Narrative:** As time moves on with this incident, so does our risk. With each passing day the very roots that secure the trees around you are burning away or the tree itself is burning from within just waiting for the right opportunity to come down on you.

**Never stop looking at the environment around you!**

#### Defensive Driving

- **Be a defensive driver at all times.**
- **Drive like other drivers don't see you.**
- **Be courteous to all vehicle traffic to and from the fire area(s).**
- **Don't have side bar conversations on the roads....provide the margin of SAFETY for all road users.**

**Don't let this be you and your crew!**

#### HAZARD TREE SAFETY

- ✓ **Trees that have burned**
- ✓ **Shallow tree root systems**
- ✓ **Dead & broken top trees**
- ✓ **Leaning or hung up trees**

**Get the picture?**

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

# Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

## Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

## Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

## Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

## Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

## Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

## Human Resource Message

### Listen More

A wise man once told me that we have 2 ears and 1 mouth for a reason – to listen twice as much as we speak; and if you notice, our ears always stay open, while our mouths have a hinge so it can be closed.

Also, note that “listen” and “silent” are spelled with the same letters. Is that just a coincidence, or is it that you need to be silent in order to be able to really listen? Check that out and think about it!

Let's try really listening to each other more and see if we can resolve our issues and/or concerns that we may have much faster.

#### **Take Home Message:**

**Good listening allows us to demonstrate that we are paying attention to the thoughts, feelings and behaviors of the other person (seeing the world through their eyes). This is crucial to maintaining productive relationships, and sometimes the only way to establish communication**

The Human Resources Specialist is here on assignment to help you and your teams manage the operational stress keeping your crews safe, positive, and productive increasing your situational awareness.
