INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: 24 HOUR	
RIVER COMPLEX		Date/Time From: 08/19/2021 0700	Date/Time To: 08/20/2021 0700
		THU	FRI
3. Objective(s):			
MANAGEMENT OBJECTIVES			
<ol style="list-style-type: none"> 1. Ensure Firefighter and public safety by using strategies and tactics based, on sound risk management, that mitigate known and anticipated hazards while providing for highest probability of success. 2. Elevate personnel awareness of current infectious disease control protocols, precautions, and best practices. 3. Minimize suppression impacts to wilderness characteristics by utilizing local cultural and natural resource specialist, appropriate Minimal Impact Suppression Tactics (MIST), natural barriers, trails, and existing fire scars, to the extent possible. 4. Protect and/or minimize the effects of the wildfire on cultural, heritage, and natural resources in the fire area including noxious weed control. 5. Maintain and enhance coordination and relationships with represented agencies, local tribal council stakeholders, local landowners, and the public by providing timely and accurate fire information. 6. Effectively manage cost by implementing strategies and tactics that have the highest probability of success. 			
CONTROL OBJECTIVES			
Keep fire:			
<ul style="list-style-type: none"> • North of Twin Lakes to Mumford Peak to Wedding Peak to Cabin Peak to Semore Gulch. • East of Semore Gulch to Hoteling Gulch to Dead Mule Gulch to Hellhole Ridge. • South of the Hellhole Ridge to Bear Willow Gulch. • West of the Hwy-3 corridor from the 2H01 Rd to Trinity Lake. 			
4. Operational Period Command Emphasis:			
General Situational Awareness:			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

FIRE WEATHER FORECAST

FORECAST NO: 15 **NAME OF FIRE:** River Complex
PREDICTION FOR: 0700 Thu – 0700 Fri **SHIFT UNIT:** CA-KNF-006385
SHIFT DATE: August 19-20, 2021 **SIGNED:** *Shane Eagan*
FORECAST ISSUED: 1930 Wednesday, August 18 **Incident Meteorologist – Shane Eagan**

WEATHER DISCUSSION: Breezy north-northeast winds, warmer temperatures, and dry air will result in another elevated fire weather day Thursday. Stronger winds aloft will support continued good ventilation of the fire and generally clear skies. Drift smoke from fires north of the Complex is likely to drift across the area throughout the day, although little impact is expected. With this clear air, expect ample sunshine to reach the surface along with good mixing – resulting in breezy winds on upper slopes and ridges. The Sawyer’s Bar RAWS location has been reporting enhanced winds the past few days, an example of good terrain-wind alignment. Similar conditions are likely in other open drainages where terrain and winds align. Poor overnight recoveries are expected on upper slopes and ridges, with elevated fire weather conditions continuing overnight Thursday.

WEATHER FORECAST FOR THURSDAY:

WEATHER: Sunny and breezy. Thin upper drift smoke possible from fires north of the Complex.

TEMPERATURES: Max Lower Elevations...85-92F;	Ridges...75-83F.	24 HR Trend: Up 4-5 deg
HUMIDITY: Min Lower Elevations...14-24%;	Ridges...22-35%.	24 HR Trend: Little change

Areas that see smoke linger can expect highs near 70F with RH 45-55%, warming and drying rapidly if smoke clears.

20-FOOT WIND:

SLOPE/VALLEY – Variable 4 to 6 mph in the morning becoming Upcanyon / Upslope 4 to 8 mph with gusts to 12 mph. Lighter winds in areas of smoke.

RIDGETOP – Northeast winds 5 to 10 mph gusts to 15 mph in the morning becoming 6 to 11 mph in the afternoon. Gusts 15 to 20 mph possible.

INVERSIONS/STABILITY: Smoke lingers into the afternoon in steeper drainages, especially south of the Haypress Fire.

WEATHER FORECAST FOR THURSDAY NIGHT:

WEATHER: Clear and cool; smoke settling into lower valleys.

TEMPERATURES: Min Lower slopes/valleys...45-54F;	Ridges...48-58F.	24 HR Trend: Up 2-3 deg
HUMIDITY: Max Lower slopes...45-60%;	Ridges...35-50%.	24 HR Trend: Little change

20-FOOT WIND:

SLOPE/VALLEY – Upslope 4 to 8 with gusts to 12 mph in the evening...becoming downcanyon/downslope to less than 5 mph after 2200.

RIDGETOP – Northeast winds 6 to 11 mph with gusts 15 to 20 mph in the evening...becoming 4 to 9 mph with gusts around 12 to 15 mph overnight.

INVERSIONS/STABILITY: Areas of smoke settling into drainages under a moderate inversion.

EXTENDED FORECAST:

FRIDAY... Mostly sunny. Max temps...78 to 93F. Min RH 15-30%. North-northwest winds 6 to 15 mph. Strongest over ridges and upper slopes.

IRAWS sites: **EDDY GULCH LOOKOUT IRAWS: Freq: 163.350; Tone: 0003 (Div H)**
COFFEE CREEK IRAWS: Freq: 163.350; Tone: 0016 (Div O)

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14	TYPE OF FIRE: Vegetation
FIRE NAME: River Complex	OPERATIONAL PERIOD: 0600-0600, 8/19-20/2021
DATE ISSUED: 8/18/2021	TIME ISSUED: 2000
UNIT: Klamath NF, Salmon/Scott RD	SIGNED:  Typed/printed: Nic Elmquist, FBAN

INPUTS

WEATHER SUMMARY:

See IMET Weather Forecast

Breezy north-northeast winds, warmer temperatures, and dry air will result in another elevated fire weather day Thursday. Stronger winds aloft will support continued good ventilation of the fire with generally clear skies.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

****Fuels and Fire Behavior Advisory Issued for northern California****

- Extended drought conditions have lowered live and dead fuel moistures to critically dry levels. 1000-hour dead fuel moisture are below 10% and live fuels are below 100%. Overstory vegetation is mixed conifer and surface fuels include shrubs and grass – fuel models best represented by TL8, TU5, SH7, and GS2.
- Topography is very steep where rugged mountains have been carved by multiple forks of the Salmon River. The elevation ranges from 3000' – 7500' with slopes over 100% (45°) in many places.
- Anticipate increased fire behavior if the inversion lifts and there is clear air over your portion of the fire. Potential exists for sustained crown runs and long-range spotting (1+ mile) with probability of ignitions above 90%.

SPECIFIC:

Another day of active fire across the complex – backing, flanking fires with group torching, uphill crown runs, and moderate range spotting are all expected. It is important to understand the specific conditions that are driving fire behavior in your working area. This is crucial on the KNF where the complex terrain creates numerous microclimates throughout the fire. Pay attention to the factors influencing fire behavior in your area and base your actions accordingly.

Haypress Fire: Anticipate another active burn day on the eastern flank of the Haypress. The run that occurred two days ago ignited spot fires 2+ miles ahead of the fire, east of Bullards Basin in Div. O. The dry, breezy conditions will continue to keep the crews holding the Cecilville/Callahan road actively engaged throughout the day. There are no immediate options for control lines northwest of this road, so keep up the strong work holding the line.

Summer Fire: The fire will remain active on the western portion of the fire on the piece west of the Cecil Creek and as the fire backs down to Summerville in Div. U. The southeast flank is actively burning in the area of Browns Meadow.

Cronan Fires: Continue to keep eyes on the heat in the two predominant drainages on the west-side; Big Creek and Union Creek. Big Creek is steeper with more continuous fuels, making it more likely to make a harder push to the Yellow Jacket Ridge if the fire gained a head of steam.

AIR OPERATIONS:

Sunrise 0624, Civil Twilight ends 2034

Clear air will allow for air support over the fires today. Be an extra set of eyes for the pilots and communicate hazards.

SAFETY

Review the Fuels and Fire Behavior Advisory in the IAP. Continue your risk-based decision making and ensure LCES is the foundation for all operations.

Fuels and Fire Behavior Advisory

Northern California

August 17, 2021 to August 31, 2021

Subject: Potential for extreme fire behavior due to critically low live and dead fuel moistures, very dry conditions resulting from persistent drought, minimal snowpack and spring precipitation, and elevated fire danger rating values across much of northern California.

Discussion: Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. Fire spread is fuel driven and does not depend on wind to spread. Surface fuels are very receptive to embers. Long range spotting, area ignition, and group torching is occurring on large fires frequently.

Difference from normal conditions: Northern California is in a drought; currently with 90% at Extreme to Exceptional levels. The drought is expected to persist or intensify throughout the fire season. Deficient rainfall and snowpack with early melt off has resulted in fuels that are below average in dryness, with record setting conditions for most areas.

Concerns to Firefighters and the Public:

- Energy Release Component (ERC) at numerous weather stations set record maximums already this year and are running at or above the 97th percentile in most cases. Expect increased fire intensity and spread rates in these areas. Early season extreme fire behavior has been observed in both light and heavy fuels. **Anticipate increased spread rates, spotting, and active nighttime burning.**
- The combination of persistent drought and record-low rainfall and snowpack amounts has led to very low live and dead fuel moistures. Low 1000-hour fuel moistures have been evidenced by complete consumption of dead fuels on recent fires. Live fuel moistures in grasses, shrubs and trees, have already reached critical levels in many areas of Northern California due to limited green-up this spring. **Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**
- Direct attack is often not feasible under regular diurnal wind conditions with ground resources. And aviation utilization is often insufficient in moderating rate of spread without immediate heavy ground resource response. **Anticipate higher resistance to control in all fuel types.**
- Already this year, Northern California has experienced large fire activity and multiple team deployments. California will likely experience an extended fire season. It is important to be mindful of and manage fatigue for all resources. **Everyone, every day, returns home safely.**

Mitigation Measures:

- Local and inbound fire personnel need to be aware that fire behavior across the state is exceeding normal expectations for this time of the year. **Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures.**
- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast and Bay Marine, west of Highway 101 in Mid-Coast to Mendocino and Diablo-Santa Cruz, and the north eastern portion of Far Eastside.

AIR OPERATIONS SUMMARY
DAY/NIGHT
ICS 220

Prepared By: Isi Soils AOB

Prepared Date: 8/18/2021

Prepared Time: 1700

1. INCIDENT NAME: River Complex		2. OPS PERIOD DATE: 8/19/21		START TIME: 07:00	END TIME: 21:00	SUNRISE: 06:25	SUNSET: 20:04
3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): NOTE: Give clear, concise direction when requesting missions: Location, contact and specifics Eg. 100 ft Long line. Hazards: Smoke, Visibility, non-incident aircraft, power lines and cables in drainage bottoms, snags. A30 and SIY main runway still open All GPS data to be collected in DEGREES, MINUTES, DECIMAL MINUTES format. Mail all costs to: 2021.river.finance@firenet.gov and Eleazar.martinez@usda.gov				4. Helibase Information: Scott Valley Helibase 41°33.40 122°51.20		5. Provide Tactical Aerial Support

Water dropping requested by Ops, Branch, Division or Air Attack

As requested. Coordinate requests with AOBD.

On request: Check application avoidance areas

MRB for helicopters available at Idlewild MRB 41° 19.628 X 123 ° 03.78
Contact on Air to Ground

Request through RIVER COMPLEX Communications on Command Repeater. Give location: lat/long if known, and current visibility. Check Medical Plan/IAP.

Provide IA Helitack and loan copters on request

HEALTH AND SAFETY MESSAGE

Sometimes it just not worth the risk...

INCIDENT: River Complex

DATE: Day/Night 8/19/2021

Major Hazard and Risk:

- **Hazardous Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Watch out!
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drinks, take frequent breaks, and pay attention to your body.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Infectious Disease/COVID-19:** Wash hands frequently, practice social distancing, wear face coverings when required, clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.
- **Firefighter Smoke Exposure:** IRPG Pg. 30. Rotate crews to cleaner air when possible.

Narrative: I don't need to tell anyone how difficult this terrain is to work in. The dangers become evident very quickly, either from your exhaustion or lack of focus. The term "Golden Hour" in wildland firefighting, was developed from the tragic death of Andy Palmer. In short summary you have 1 hour to get to advanced medical care if critically injured. On this incident we are challenged to meet this goal. Current transports on the River Complex are anywhere from 2 to 4 hours in duration. This is not acceptable, we need to do better. We must shave off time to ensure a positive result in the event of a serious accident. One way this can be done is by training with the 8 Line, on the back of your IAP. If you have an IRPG study it and if you don't, get one. The pocket guide contains information which will make you safer and proficient if a emergency arrives.

Life First

1. Life First - everyone goes home. We cannot accept any loss of life; while we are well aware of the challenges and the hazards our people face every day in the fire environment, together we can work to eliminate unnecessary exposure and increase the odds that everyone goes home in 2021.

- It means that knowing the dangers we face, we still expect that our personnel will not engage unless they can do so with the greatest margin of safety.
- We expect our emergency responders to refuse assignments where hazards cannot be satisfactorily addressed.
- We ask people to take risks in fire every day, sending them to work in environments that are known to be hazardous, but we should only do so where the values we have determined threatened justify the risks and the probability of success is high.
- The way to achieve our goal of zero fatalities is to train, to practice risk management, to think, to communicate, and to foster a learning environment to seek smarter ways to meet our objectives in every situation, and to learn and improve every day.

Incident Safety Officers: **Rick Bertram, Tom Zeulner, Brent Kaiser**

Heat Illness/Dehydration

Ensure you stay hydrated by drinking fluids consistently before, during and after your shift. Severe dehydration can cause Rhabdomyolysis in short period of time. This can be a life changing event.

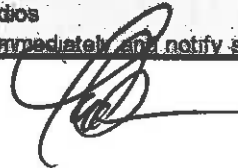

INCIDENT SAFETY ANALYSIS 215a

River Complex \ CA KNF 006385 - 8/19,20/2021

8. Location	9. Hazard	8. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Rotation, etc)
All	Air Operations	<ul style="list-style-type: none"> ~ Follow " Aviation Watch-Out Situations" on page 48, IRPG ~ Don't plan on air resources for medical transport or resupply ~ Refer to page 58, IRPG for directing bucket drops ~ Ensure positive communication with all air resources. ~ Ensure all resources on Div are aware of air ops ~ Use signal flash or flagging to help pilots ~ Stay away from trees as drops can bring them down
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> ~ Identify helispots and Lat/Longs, ensure they're known ~ Know 8 Line and remain organized and calm ~ Stay current on weather conditions that could effect Helicopter operations ~ Preplan extractions on your division and update as you go ~ Call for adjoining resources for assistance
All	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22,23. ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Don't park vehicles or take breaks in high concentrations of hazard trees. ~ Establish trigger points for disengagement during high wind events. ~ Remember that the hazard zone extends a minimum of 2 1/2 tree heights. ~ Aviation drops may bring down trees, burned or unburned
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. ~ Don't work directly above or below any personnel. ~ Be on the lookout for rolling rocks, debris, or burning material. ~ Shout out loudly any rock or log rolling down the hill ~ Evaluate necessity to send personnel in areas with limited access. ~ Post lookouts (IRPG pg 7).
All	Night Operations	<ul style="list-style-type: none"> ~ Stay alert for snags and other hazards not easily seen ~ Maintain high visibility in work area and wear vest while in roadway. ~ Use glow sticks to mark escape routes and hazards ~ Factor in that travel on foot and in vehicles will be slower at night ~ Ensure personnel have a personal light (headlamp) ~ Watch for signs of fatigue. ~ Take breaks away from areas of known hazards
All	Driving & Traffic	<ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters when backing. ~ Honk horn to alert personnel when backing. ~ Keep clutter off dash and inside cab. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs.
All	Fatigue & Over Exertion	<ul style="list-style-type: none"> ~ Drink 1 quart of water each hour during and after work ~ Rotate crews out of smoky areas. ~ Set a reasonable work pace and allow adequate rest breaks while on the project. ~ Stagger work crews start time to limit fatigue. ~ Use buddy system to monitor personnel of heat related and fatigue issues ~ Follow work / rest guidelines

INCIDENT SAFETY ANALYSIS 215a

All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> - Identify homes and structures with private parties remaining behind the evacuation. - Identify personnel responsible for contacting private parties. - Use warning lights and provide traffic control on roadways during smoky and night operations. - Rotate crews out of smoky areas during firing and mop-up operations. - Contact Communications when firing operations are initiated.
All	Heat Related Illness (HRI) & Dehydration	<ul style="list-style-type: none"> - Drink fluids throughout operational period (6-8 qts/shift) - Maintain water/electrolyte ratio of 3 to 1. - Carry extra water on line and cache water at drop points. - Take frequent breaks, minimum of 10 minutes every hour. - Allow out of area resources time to acclimatize before expecting peak performance. - Recognize symptoms of HEAT RELATED ILLNESS which include: <ul style="list-style-type: none"> o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating
All	Extreme Fire Behavior	<ul style="list-style-type: none"> - Share weather observations with all personnel assigned to division. - Establish "Trigger Points" to withdraw. - Ensure real safety zones and quality escape routes exist prior to engagement - Use "Risk Management" process prior to engaging in suppression actions, refer to page 1 IRPG. - Ensure awareness of thunderstorms and their effects in the area.
All	Heavy Equipment Operations	<ul style="list-style-type: none"> - Ensure communications are established with operators. - Use hand signals if other communications are unavailable. - Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. - Use a spotter when backing. - Avoid working below heavy equipment - Ensure operators know the plan and have an out
All	Firing Operations & Devices	<ul style="list-style-type: none"> - Only personnel trained in the use of each device will be authorized to use firing equipment. - Ensure all personnel are aware of firing operation that may affect them. - Wear appropriate PPE. - Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
All	Infectious Disease (COVID)	<ul style="list-style-type: none"> - Wash hands frequently / maintain good hygiene - Maintain 6' separation at all times in camp - Use module of one concept - Use technology as often as possible for meetings - Do not share phones/radios - If you feel sick isolate immediately and notify supervisor

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

ICS 205 Excel 3/2007

TEAM 15 COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings when appropriate, hand washing, cover your mouth and nose when coughing or sneezing and practicing good hygiene

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

¹ Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

***Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.**

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

RIVER COMPLEX FINANCE

Personnel Time and Comp/Claims 530-467-1506
Equipment Time 530-467-1504

2021.river.finance@firenet.gov

Finance is set up on Main Street at the ICP in Etna. Please continue to turn in your hard copy shift tickets and CTR's here or in the boxes set up at Cecilville Spike. OPS folk are also collecting times on the line to bring back here to the ICP for posting. Thanks to all for helping in this!

You also have the option of scanning and emailing your finance documents to the email address above. Following are instructions for creating a scan from your phone that is READABLE and PRINTABLE for us. You only need to scan the pink copy for shift tickets and the white copy for CTR's.

iPhone Users:

Open Notes and select a note or create a new one. 

1. Tap the Camera button , then tap Scan Documents 
2. Place your document in view of the camera.
3. If your device is in Auto mode, your document will automatically scan. If you need to manually capture a scan, tap the Shutter button  or one of the Volume buttons. Then drag the corners to adjust the scan to fit the page, then tap Keep Scan.
4. Tap Save or add additional scans to the document.

Android Users:

1. Open the Google Drive app 
2. In the bottom right, tap Add
3. Tap Scan 
4. Take a photo of the document you'd like to scan.
 - Adjust scan area: Tap Crop 
 - Take photo again: Tap Re-scan current page 
 - Scan another page: Tap Add 
5. To save the finished document, tap Done 

Human Resource Message

Personal Hygiene

The Importance of Personal Hygiene. Good personal hygiene is important for both health and social reasons. It entails keeping your hands, head and body clean to stop the spread of germs and illness. Your personal hygiene benefits your own health and impacts the lives of those around you, too.

ONE, WHO MAINTAINS CLEANLINESS KEEPS AWAY DISEASES

-Sam Veda

The Human Resources Specialists are here on assignment to help you and your teams manage the operational stress keeping your crews safe, positive, and productive increasing your situational awareness.

Human Resources Specialist – Tony Torres
505.239.0041 (call/text) or email @ Anthony.Torres@usda.gov

River Complex Public Information Message

We are located next to the briefing area entrance in the PIO yurt.

Public Fire Information Line is:

707-596-6075

If you need to have packages delivered to ICP, please have them shipped to:

For UPS/FEDEX...

124 Horn Lane

Etna, CA 96027

For USPS...

General Delivery

C/O Your Name - River Complex Fire

119 Diggles Street

Etna, CA 96027

Missing anything?? *Lost and Found* items will be stored at the PIO yurt!

We want your photos & videos!

2021.River@firenet.gov

Help us tell your story, and share the outstanding work you are doing with us! Everything from camp to suppression operations is accepted.

Prior to posting photos to personal social media accounts and/or the PIO shop, take a moment to review the *Pause Before Posting Guidelines*:

Consider agency guidelines and potential ramifications before posting pictures of:

- Fireline personnel NOT wearing full PPE
- Identifiable structures (ie. Addresses)
- Burning or destroyed structures
- Inmate crews
- Faces of children
- Accident/injury/fatality/investigation scenes
- Sensitive natural or cultural resources (or QR codes to maps that identify locations)
- Whiteboards/Flipcharts etc. with passwords/contacts or PII visible
- License plates

If you need additional info or have questions about what to and/or not to post, please stop by and see us!

TRAINING MESSAGE

Training Specialist Check-in – If you have a position task book (PTB), please scan the QR code below to initiate the check-in process with the Incident Training Specialist. Please complete the form in its entirety. Upon completion, at your earliest convenience, please email a copy of your qualification card and position task book cover (see below for email address).

For your convenience, an electronic ICS-225 or ICS-226 and Evaluation Record will be sent to you after you complete the check-in process.

RIVER COMPLEX FIRE TRAINEE CHECK-IN

Training Specialist Closeout – In order to receive credit for your assignment, you must close out with the Incident Training Specialist prior to demob.

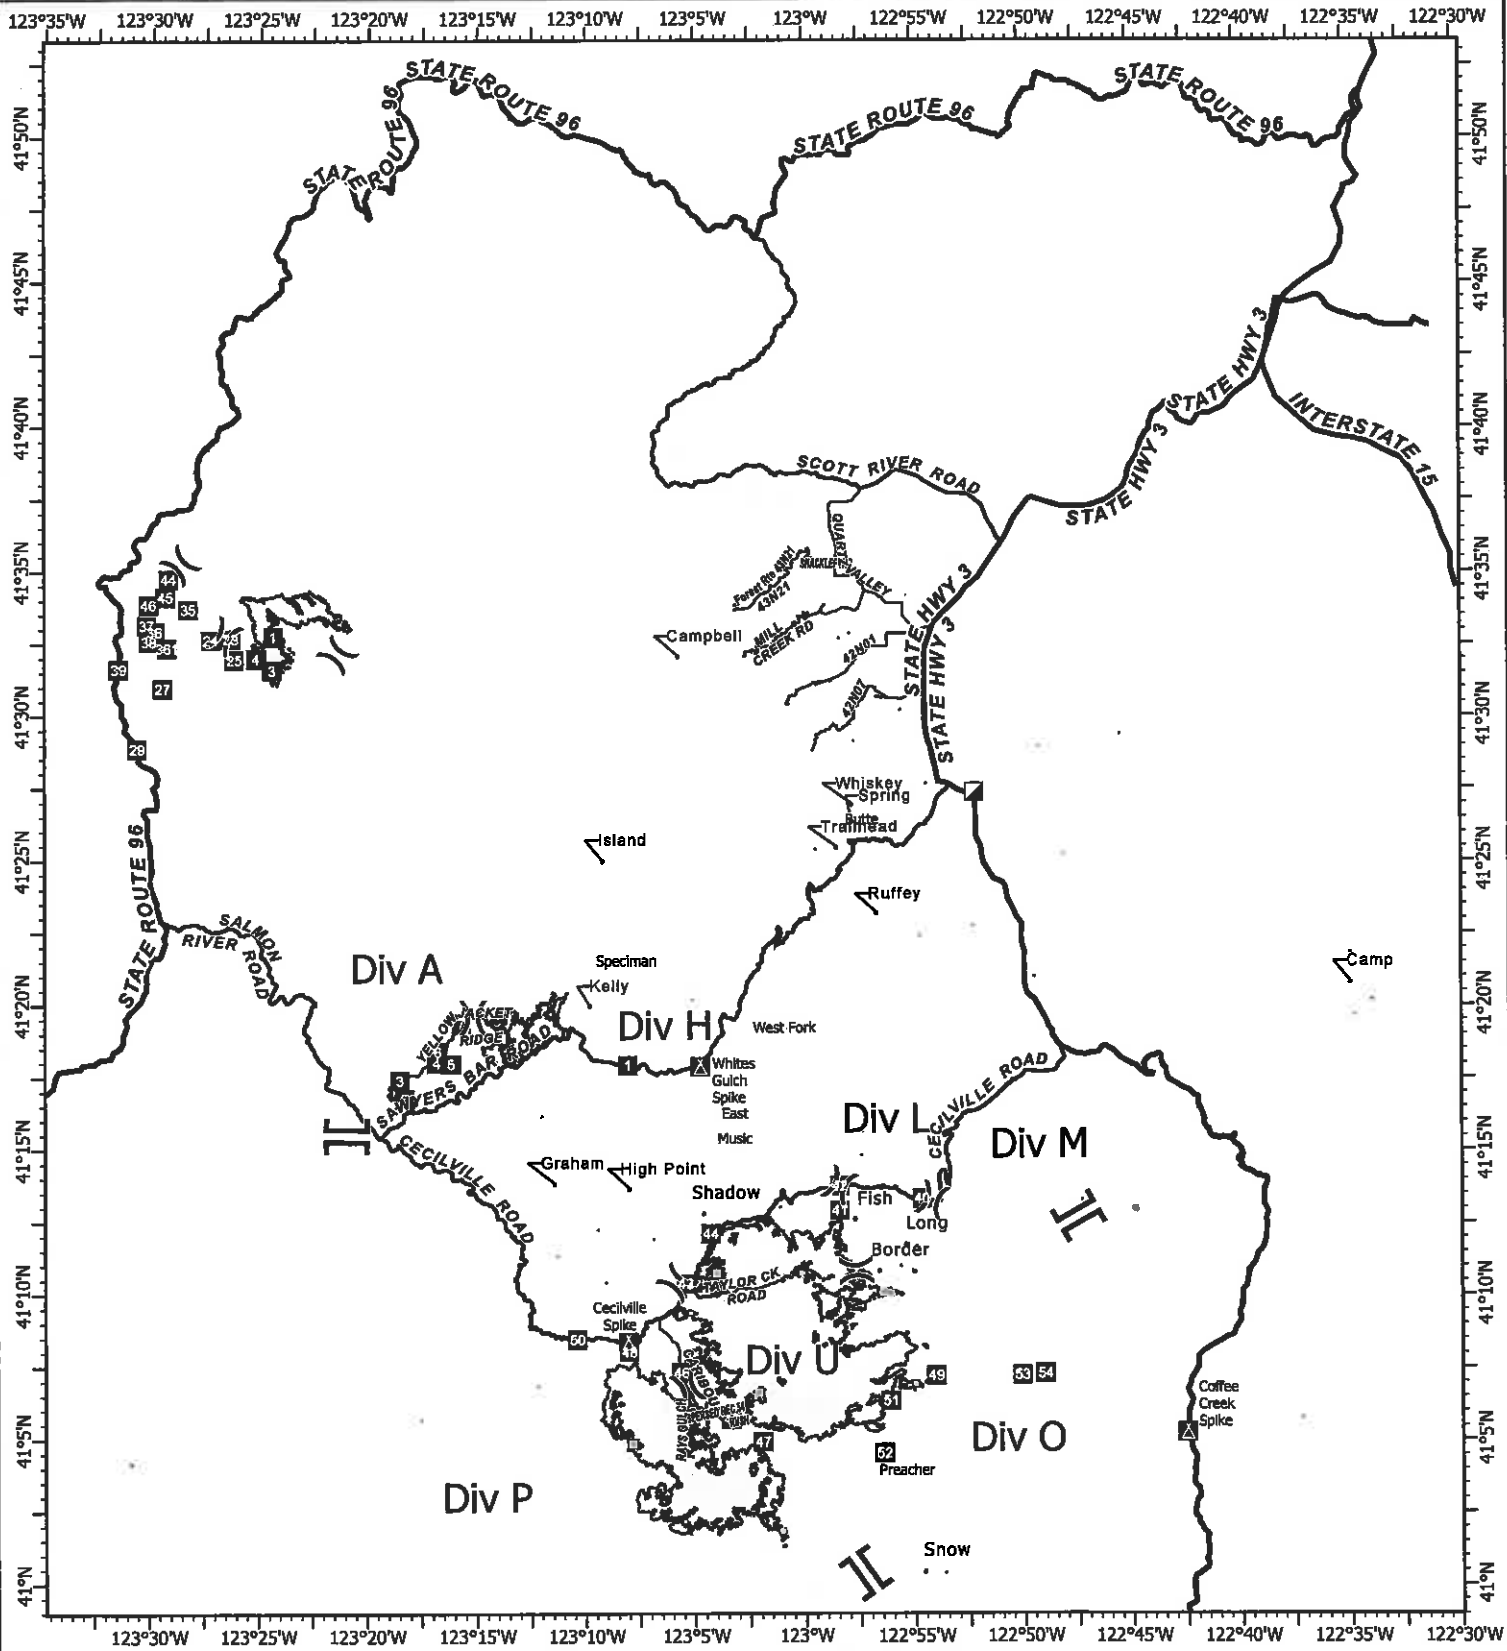

Close out requirements include:

1. Ensure your trainer(s)/evaluator(s) has/have initialed completed tasks in your PTB,
2. Obtain an Incident Performance Rating (please sign in the appropriate block at the bottom of the form),
3. Obtain an Evaluation Record,
4. If evaluator initialed #1 on your Evaluation Record, ensure he/she signs as final evaluator (located on the backside of your PTB cover page),
5. Email all documentation (including item #4), when appropriate.
6. Complete Exit Interview.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

Crew Supervisor to contact Division Supervisor/Operations with:

- Patient Complaint, Condition and Location via Tactical or Command frequency. **Priority 1/Red & 2/Yellow** patients
- Triggers Incident within Incident (IWI)

Division Supervisor/POC contacts River Communications:

- Division Supervisor or *POC will run "**Medical-Emergency**" on Command Frequency.
- Division Supervisor or *POC to use "**Medical Plan (ICS 206 WF)**" worksheet in the IAP or IRPG.
- Communications contacts Medical Unit Leader on the Command frequency or cell phone (909-559-5196)

*POC (Point of Contact)

LINE "NON-EMERGENCY INCIDENT" PLAN:

- **Crew Supervisor** to contact Division Supervisor with:

- Patient Complaint, Condition and Location via Tactical or Command frequency. **Priority 3/Green** Patients
- Does not trigger Incident within Incident (IWI).

Division Supervisor/POC contacts River Communications

- Division Supervisor or *POC will run "**Non-Emergency Incident**" on the Command frequency.
- Division Supervisor or *POC to use "**Medical Incident Report**" worksheet on back of this page or in IRPG.
- Communications contacts Medical Unit Leader on the Command frequency or cell phone (909-559-5196)

IN-CAMP - 24 HOUR MEDICAL
Contact River Communications with: Patient Complaint, Condition and Location via Phone (530) 467-1509 or Command frequency

ICS 206	9. PREPARED BY: (Medical Unit Leader) Josh Fudge MEDL 	10. REVIEWED BY: (Safety Officer) Brent Kaiser SOF2 
----------------	--	--

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2 ^o - 3 ^o burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2 ^o - 3 ^o burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
