# FIRE WEATHER FORECAST

**FORECAST NO:** 21 **NAME OF FIRE:** River Complex  
**PREDICTION FOR:** 0700 Wed – 0700 Thu **SHIFT UNIT:** CA-KNF-006385  
**SHIFT DATE:** August 25-26, 2021 **SIGNED:** *Shane Eagan*  
**FORECAST ISSUED:** 1930 Tuesday, August 24 **Incident Meteorologist – Shane Eagan**

**WEATHER DISCUSSION:** Modest transport winds will continue to push the upper-level drift smoke off to the northeast today, resulting in another day with areas of clearing. High clouds will stream through the area, which could moderate fire weather conditions at times when coupled with thicker smoke. Overall, expect another similar day like Tuesday – pockets of clearing will result in increased fire weather potential, but yield windows of opportunity for Air Ops. Winds across Div Q into Trinity Center will remain out of the south, with winds turning west-southwest at ridgetop across the rest of the complex. Expect terrain-driven winds at lower slope with significant terrain influence across the River Complex, particularly where wind and terrain align. Modest RH recovery expected overnight Wednesday, with thermal belts forming on upper slopes.

### WEATHER FORECAST FOR WEDNESDAY:

**SKY/WEATHER:** Partly cloudy with areas of smoke. Watch out for thinning of smoke.

<b>TEMPERATURES:</b> Max Lower Elevations...82-90F;	Ridges...67-76F.	<b>24 HR Trend:</b> Down 3-5 deg
<b>HUMIDITY:</b> Min Lower Elevations...15-25%;	Ridges...25-35%.	<b>24 HR Trend:</b> Little change

*Areas in smoke can expect highs 5-10 deg F cooler and RH 10-20% higher, warming & drying rapidly if smoke clears.*

### **20-FOOT WIND:**

**SLOPE/VALLEY** – Variable 3 to 6 mph in the morning becoming Upcanyon / Upslope 4 to 9 mph with gusts to 12 mph after 0900. Lighter winds in areas of smoke.

**RIDGETOP** – East-southeast winds 4 to 8 mph gusts to 10 mph in the morning becoming west-southwest 6 to 12 mph after 1000. Gusts 15 to 20 mph possible, especially in clear air.

**INVERSIONS/STABILITY:** Smoke lingers into the afternoon, especially in steeper drainages.

### WEATHER FORECAST FOR WEDNESDAY NIGHT:

**SKY/WEATHER:** Partly cloudy and cool; smoke settling into lower valleys.

<b>TEMPERATURES:</b> Min Lower slopes/valleys...45-55F;	Ridges...49-58F.	<b>24 HR Trend:</b> Little change
<b>HUMIDITY:</b> Max Lower slopes...50-65%;	Ridges...42-55%.	<b>24 HR Trend:</b> Little change

### **20-FOOT WIND:**

**SLOPE/VALLEY** – Upslope 4 to 8 with gusts to 10 mph in the evening...becoming downcanyon/downslope to less than 5 mph after 2100.

**RIDGETOP** – West-southwest winds 6 to 12 mph with gusts 15 to 20 mph in the evening...becoming east-southeast 4 to 8 mph with gusts around 10 mph overnight after 2100.

**INVERSIONS/STABILITY:** Areas of smoke settling into drainages under the inversion.

### EXTENDED FORECAST:

**THURSDAY...** Mostly sunny and smoky. Max temps...74 to 91F. Min RH 15-25%. Easterly winds becoming west-northwest 5 to 15 mph. Strongest over ridges and upper slopes.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 20	TYPE OF FIRE: Vegetation
FIRE NAME: River Complex	OPERATIONAL PERIOD: 0700-0700, 8/25-26/2021
DATE ISSUED: 8/24/2021	TIME ISSUED: 2000
UNIT: Klamath NF, Shasta-Trinity NF	SIGNED:  Typed/printed: Clint Isbell, FBAN(t)

## INPUTS

### WEATHER SUMMARY:

#### See IMET Weather Forecast

Expect similar smoke dispersal today with pockets of thinning smoke across the fire area especially in southern portions of the Haypress and Summer fires. High clouds will stream through the area slightly moderating fire behavior.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

#### **\*\*Fuels and Fire Behavior Advisory Issued for northern California\*\***

- Extended drought conditions have lowered live and dead fuel moistures to critically dry levels. 1000-hour dead fuel moisture are below 10% and live fuels are below 100%. Overstory vegetation is a mixed conifer and surface fuels include shrubs and grass – fuel models best represented by TL8, TU5, SH7, and GS2.
- Topography is very steep where rugged mountains have been carved by multiple forks of the Salmon and Trinity Rivers. The elevation ranges from 3000' – 7500' with slopes over 100% (45°) in many places.
- Anticipate increased fire behavior if the inversion lifts and there is clear air over your portion of the fire. Potential exists for sustained crown runs and long-range spotting (1+ mile) with probability of ignitions above 80%.

#### SPECIFIC:

Small fire growth from the local fires resulted in another day of less spoke production in the area, resulting in a greater chance of clearing. This should lead to a slight increase in fire behavior today, especially in the higher elevations and areas to the south and southwest where smoke is expected to clear more readily. Modest RH recovery is expected overnight Wednesday, with thermal belts forming on the upper slopes.

It is important to understand the specific conditions that are driving fire behavior in your working area. This is crucial when working in the Klamath Mtns, where complex terrain creates numerous microclimates throughout the fire. Pay attention to the factors influencing fire behavior in your area and base your actions accordingly. *If needed, request a spot weather forecast through the IMET to provide better intel to identify your burn window.*

**Haypress Fire:** The fire will continue to back down from 'I Am Up Ridge' towards the east fork of the Salmon River, especially in areas where firing was used to slowly bring the fire down to control lines. The heavier fuels, combined with the terrain influenced winds, cause spotting concerns near Hazel and Dog Paw Gulch at the Div. K/L break. If the fire were to spot north of the Cecillville/Callahan Road, it will find a heavy fuelbed and topography causing a high resistance to control. The Parker Meadow Spot in Div. Q showed minimal growth yesterday. Primary growth will be to the northwest with backing fire in all other directions until the perimeter is lined or it reaches natural barriers.

**Summer Fire:** Most growth will continue to occur on the southwest flank, as the fire backs down towards the North Fork Trinity River and Rattlesnake Creek. This portion is consuming dead and down fuels left from the 2006 Bake Oven fire.

**Cronan Fires:** Continue to hold and secure the control lines. If able, use the UAS to burn out interior islands to limit spotting concerns moving forward.

#### AIR OPERATIONS:

Sunrise 0630, Civil Twilight ends 2024 (Day Length – 13 hours, 27 minutes)

There is a better possibility of thinning smoke in the afternoon to support air operations. Air should clean out earlier to the south and southwest of the complex.

#### SAFETY

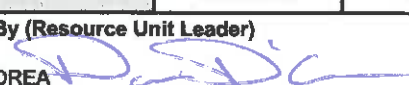

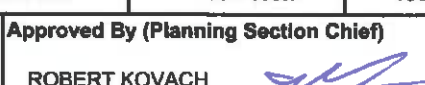

Frequent spot fires across the control lines have been observed. Ensure spot fires are properly communicated, flagged, and checked to limit the chances of a rekindle.

## How do I get this injured firefighter off the line?

There is no hard and fast answer to this. Your preparation means everything to the outcome of any line emergency. Getting your fellow injured firefighter off the mountain will probably be one of the most important tasks you will ever be charged with. To do this you need to plan accordingly through out the day. Know your resource's capabilities and don't expect a helicopter to be available. Train for it and make sure the other resources are in the loop if they are in your plan. Use GPS- WGS 84 for emergency coordinates

## Think about it

Yes you may have been raised on motorcycles and ATV's \ UTV's but these incidents are called accidents for a reason. Please take extra caution if you are using one of these vehicles and use your experience to keep you safe and not overconfident.

FINAL

# TEAM 15 COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings when appropriate, hand washing, cover your mouth and nose when coughing or sneezing and practicing good hygiene

At the beginning of the shift, supervisors should remind their personnel to self-screen for symptoms.

## WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

<sup>1</sup> Symptoms of Coronavirus

<https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>

*Do your part to minimize your risk of exposure and limit the spread COVID-19.*

## Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.

*\*Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.*

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

# Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

## Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

## Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

## Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Mitigate smoke exposure whenever possible.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

## Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

## Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

## Human Resources Message

August 25, 2021

Communication is an issue that affects every aspect of our lives. How can we communicate better?

- **Find the Right Time.** Find a time when you are calm and not distracted, stressed or in a rush. Schedule time if you have to.
- **Talk Face to Face.** Put down the phone! Talk about serious matters or issues in person. Texts and emails can be misinterpreted.
- **Do Not Attack.** Using “you” can sound like you’re attacking. Instead, try using “I” or “we” statements.
- **Check Your Body Language.** Sit up, face them and make eye contact when speaking. Don’t take a phone call, text or browse the internet when you’re talking.

**10% OF CONFLICT  
IS DUE TO A  
DIFFERENCE IN  
OPINION.  
90% IS DUE TO  
THE WRONG TONE  
OF VOICE.**

## YOU could be held fiscally responsible...

Unless you are a contracting officer (or work directly with a Contracting Officer), you have no authority to obligate the government to any expenses. This includes:

- Utilizing equipment that is not under an agreement (i.e., VIPR, EERA, etc.)
- Placing equipment and/or resources on land that is not covered under a Land Use Agreement (LUA).
- Purchasing items without prior, appropriate authorization (i.e., S#)

You CAN be held financially responsible (yes...out of your own pocket!) for any obligations/expenses that you incur and/or approve without the proper authority to do so.

Know before you obligate the government to any expense. Ask questions! Finance is here to keep you on the right path with the regulations. The days of "just do and ask for forgiveness later" have come to an end and the Agency auditing authorities are serious about this subject.

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)  
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> Ex: Unconscious, difficulty breathing, bleeding severely, 2 <sup>o</sup> - 3 <sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. Ex: Significant trauma, unable to walk, 2 <sup>o</sup> - 3 <sup>o</sup> burns not more than 1-3 palm sizes. <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
