INCIDENT ACTION PLAN RIVER COMPLEX

CA-KNF-006385 P5N7CM

OPERATIONAL PERIOD

August 24-25, 2021

Day Shift: 0700 - 1900 Night Shift: 1900 - 0700

INC	DENT OBJEC	TIVES (ICS 202)	
1. Incident Name:	2. Operational Perio	d: 24 HOUR	
RIVER COMPLEX	Date/Time Fron	n:	Date/Time To:
	08/24/2021 070	0 TUE	08/25/2021 0700 WED
3. Objective(s):	<u> </u>		
MANAGEMENT OBJECTIVES			
1. Ensure Firefighter and public safety by using	strategies and tac	tics based, on sound	d risk management, that mitigate known
and anticipated hazards while providing for high	est probability of s	uccess.	
2. Elevate personnel awareness of current infect			
3. Minimize suppression impacts to wilderness of			
appropriate Minimal Impact Suppression Tactics 4. Protect and/or minimize the effects of the wild	fire on cultural, be	arriers, trails, and ex critage, and natural r	usting tire scars, to the extent possible.
weed control.	mo on outural, no	mago, and natara i	cooding in the life area including hoxidus
5. Maintain and enhance coordination and relation			cal tribal council stakeholders, local
landowners, and the public by providing timely a			
6. Effectively manage cost by implementing stra	tegies and tactics	that have the higher	st probability of success.
CONTROL OBJECTIVES			
Keep fire:			
North of Twin Lakes to Mumford Peak to Wedd			ulch.
 East of Semore Guich to Hoteling Guich to Dea South of the Hellhole Ridge to Bear Willow Gui 		Hellnole Riage.	
· West of the Hwy-3 corridor from the 2H01 Rd t			
	,

FIRE WEATHER FORECAST

FORECAST NO:

20

NAME OF FIRE: River Complex

PREDICTION FOR:

0700 Tue - 0700 Wed

SHIFT UNIT:

CA-KNF-006385

SHIFT DATE:

August 24-25, 2021

SIGNED:

FORECAST ISSUED: 1930 Monday, August 23

Incident Meteorologist - Shane Eagan

WEATHER DISCUSSION: Smoke continues to drive the fire weather today across the River Complex. Slightly better smoke dispersal is expected today (like what we saw Monday), which may result in pockets of thinning or clearing of smoke. These clearer areas are likely to see elevated fire weather conditions as warmer, drier, and breezier conditions arise. Despite the potential for some clearing, lingering smoke will continue to moderate fire weather potential across the River Complex at-large, especially near active burning and in steeper drainages. Wind gust potential at ridgetops in clear air could push 15 to 20 mph during peak heating Tuesday afternoon. Also, watch for terrain enhancement of winds, especially in wind-terrain aligned drainages such as along Sawyers Bar Road (Div D) and along Callahan-Cecilville Road (near DP 50 in Div U).

WEATHER FORECAST FOR TUESDAY:

SKY/WEATHER: Mostly sunny and smoky; increasing high clouds late. Watch out for thinning of smoke.

TEMPERATURES: Max Lower Elevations...84-93F;

Ridges...71-80F.

24 HR Trend: Little change

HUMIDITY:

Min Lower Elevations...15-25%;

Ridges...25-35%.

24 HR Trend: Little change

Areas in smoke can expect highs 5-10 dea F cooler and RH 10-20% higher, warming & drying rapidly if smoke clears.

20-FOOT WIND:

SLOPE/VALLEY – Variable 3 to 6 mph in the morning becoming Upcanyon / Upslope 4 to 9 mph with gusts to 12 mph. Lighter winds in areas of smoke.

RIDGETOP - East-southeast winds 3 to 8 mph gusts to 10 mph in the morning becoming west-southwest 6 to 12 mph after 1000. Gusts 15 to 20 mph possible, especially in clear air.

INVERSIONS/STABILITY: Smoke lingers into the afternoon, especially in steeper drainages.

WEATHER FORECAST FOR TUESDAY NIGHT:

SKY/WEATHER: Partly cloudy and cool; smoke settling into lower valleys.

TEMPERATURES:

Min Lower slopes/valleys...46-53F;

Ridges...48-56F.

24 HR Trend: Little change

HUMIDITY:

Max Lower slopes...55-65%;

Ridges...38-48%.

24 HR Trend: Little change

20-FOOT WIND:

SLOPE/VALLEY - Upslope 4 to 8 with gusts to 10 mph in the evening...becoming downcanyon/downslope to less than 5 mph after 2100.

RIDGETOP - West-southwest winds 6 to 12 mph with gusts 15 to 20 mph in the evening...becoming east-southeast 4 to 8 mph with gusts around 12 mph overnight after 2100.

INVERSIONS/STABILITY: Areas of smoke settling into drainages under the inversion.

EXTENDED FORECAST:

WEDNESDAY... Mostly sunny and smoky. Max temps...74 to 93F. Min RH 15-30%. Easterly winds becoming west-southwest 5 to 15 mph. Strongest over ridges and upper slopes.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 19 TYPE OF FIRE: Vegetation
FIRE NAME: River Complex OPERATIONAL PERIOD: 0700-0700, 8/24-25/2021

DATE ISSUED: 8/23/2021 TIME ISSUED: 2000

UNIT: Klamath NF, Shasta-Trinity NF SIGNED: No. Classes

Typed/printed: Nic Elmquist, FBAN

INPUTS

WEATHER SUMMARY:

See IMET Weather Forecast

Slightly better smoke dispersal is expected today, resulting in pockets of thinning smoke. Higher elevations are expected to see clearer skies, resulting in slightly warmer, drier, and breezier conditions.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fuels and Fire Behavior Advisory Issued for northern California

- Extended drought conditions have lowered live and dead fuel moistures to critically dry levels. 1000-hour dead fuel moisture are below 10% and live fuels are below 100%. Overstory vegetation is a mixed conifer and surface fuels include shrubs and grass – fuel models best represented by TL8, TU5, SH7, and GS2.
- Topography is very steep where rugged mountains have been carved by multiple forks of the Salmon and Trinity Rivers. The elevation ranges from 3000' – 7500' with slopes over 100% (45°) in many places.
- Anticipate increased fire behavior if the inversion lifts and there is clear air over your portion of the fire. Potential
 exists for sustained crown runs and long-range spotting (1+ mile) with probability of ignitions above 80%.

SPECIFIC:

There is less smoke being produced from the local fires, resulting in a greater chance of clearing. This should cause a slight increase in fire behavior today, especially in the higher elevations. Expect drier conditions later into the evening again, extending the burn window to around midnight if there is a need to conduct firing operations.

It is important to understand the specific conditions that are driving fire behavior in your working area. This is crucial when working in the Klamath Mtns, where complex terrain creates numerous microclimates throughout the fire. Pay attention to the factors influencing fire behavior in your area and base your actions accordingly. If needed, request a spot weather forecast through the IMET to provide better intel to identify your burn window.

Haypress Fire: The fire will continue to back down from 'I Am Up Ridge' towards the east fork of the Salmon River. The heavier fuels, combined with the terrain influenced winds, cause spotting concerns near Hazel Gulch at the Div. K/L break. If the fire were to spot north of the Cecillville/Callahan Road, it will find a heavy fuelbed and topography causing a high resistance to control. The Div. Q spot fire became more active yesterday and was estimated at 300-acres. Growth will continue as the fire backs down off the ridge in receptive fuels on the south, east, and westerly flanks.

Summer Fire: Most growth will continue to occur on the southwest flank, as the fire backs down towards the North Fork Trinity River and Rattlesnake Creek. This portion is in the 2006 Bake Oven fire perimeter and producing good fire effects.

Cronan Fires: Continue to hold and secure the control lines. If able, use the UAS to burn out interior islands to limit spotting concerns moving forward.

AIR OPERATIONS:

Sunrise 0629, Civil Twilight ends 2026 (Day Length – 13 hours, 29 minutes)

There is a better possibility of thinning smoke in the afternoon to support air operations.

SAFETY

Falling trees continue to come down within the fire. Make sure to thoroughly scout your work area, mitigate hazard trees with the appropriately qualified sawyer, or flag the hazard and communicate it to adjoining resources.

Updated: March 2002

AIR OPERATIONS SUMMARY DAY/NIGHT

ICS 220

Prepared By: Chris Schenck AOBD

INCIDENT SAFETY ANALYSIS 215a

River Complex / CA KNF 006385 - Day Night Tuesday August 24, 2021

& Location	9. Manued	t. Control or Ahatemast Action (Engineering, Administrative, PPE; Avoidance, Education, etc)
ΑĬI	Air Operations	- Follow "Aviation Watch-Out Situations" on page 46, IRPG - Don't plan on air resources for medical transport or resupply - Refer to page 58, IRPG for directing bucket drops - Ensure positive communication with all air resources - Ensure all resources on Div are aware of air ops - Use signal flash or flagging to help pilots - Stay away from trees as drops can bring them down.
All	Extended Medical Extraction Times	 Identify helispots and Lat/Longs, ensure they're known. Know 8 Line and remain organized and calm. Stay current on weather conditions that could effect Helicopter operations. Preplan extractions on your division and update as you go. Call for adjoining resources for assistance.
All	Hazard Trees	- Follow "Hazard Tree Safety" guidelines, IRPG page 22.23 - Pest lookouts, or use a spotter in mop-up areas with personnel - Don't park vehicles or take breaks in high concentrations of hazard trees - Establish trigger points for disengagement during high wind events - Remember that the hazard zone extends a minimum of 2 1/2 free heights - Aviation drops may bring down trees, burned or unburned
All	Steep Terrain & Rolling Debris	Maintain 8'-10' spacing when working & walking. ~ Don't work directly above or below any personnel. ~ Be on the lookout for rolling rocks, debris, or burning material. ~ Shout out loudly any rock or log rolling down the hill. ~ Evaluate necessity to send personnel in areas with limited access. ~ Post lookouts (IRPG pg 7).
Alt	Night Operations	- Stay alert for snags and other hazards not easily seen Maintain high visibility in work area and wear vest while in roadway Use glow sticks to mark escape routes and hazards Factor in that travel on feot and in vehicles will be slower at night Ensure personnel have a personal light (headlamp) Watch for signs of fatigue Take breaks away from areas of known hazards.
All	Structure Protection & HAZMAT	 Review "Wildland Urban Interface" Watch outs, IRPG page 12. Have LCES in place. Use "Structure Assessment" checklist, IRPG pages 13-16. Follow "HAZMAT Incident Operations" on pages 36-38 in IRPG.
All	Driving & Traffic	- Practice "Defensive Driving" techniques traveling on all roads and city streets - Use spetters when backing - Honk horn to alert personnel when backing - Keep clutter off dash and inside pab - Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts - Always use headlights - Yield to pedestrians and bicycles - Observe posted speed limits
		 Use the 3 second rule for following distance when driving: Use chock blocks, turn wheels into hill Avoid distractions (eating, cell phones, radio). Ensure that windshields are kept clean of dust and bugs.
All	Fatigue & Over Exertion	 Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.

INCIDENT SAFETY ANALYSIS 215a

All	Firefighter & Public Smoke Exposure	 Identify homes and structures with private parties remaining behind the evacuation. Identify personnel responsible for contacting private parties. Use warning lights and provide traffic control on readways during smoky and night operations. Rotate crews out of smoky areas during firing and mop-up operations. Contact Communications when firing operations are initiated and stopped.
Ali	Heat Related Illness (HRI)& Dehydration	 Drink Fluids throughout operational period (6-8 qts/shift). Maintain water/electrolyte ratio of 3 to 1. Carry extra water on line and cache water at drop points. Take Frequent breaks, minimum of 10 minutes every hour. Allow out of area resources time to acclimatize before expecting peak performance. Recognize symptoms of HEAT RELATED ILLNESS which include. Lack of energy Headaches, dizziness Lack of rest No hunger, poor eating habits Hot skin, and lack of sweating
All	Extreme Fire Behavior	- Share weather observations with all personnel assigned to division Establish "Trigger Points" to withdraw Ensure real safety zones and quality escape routes exist prior to engagement Use "Risk Management" process prior to engaging in suppression actions, refer to page 1 IRPG Ensure awareness of thunderstorms and their effects in the area.
All	Heavy Equipment Operations	~ Ensure operators know the plan and have an out. ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment.
Alt	Firing Operations & Devices	 Only personnel trained in the use of each device will be authorized to use firing equipment Ensure all personnel are aware of firing operation that may affect them Wear appropriate PPE Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed
All	Infectious Disease\COVID	~ Wash hands frequently / maintain good hygene. ~ Maintain 6' separation at all times in camp. ~ Use module of one concept. ~ Use technology as often as possible for meetings. ~ Do not share phones\radios. ~ If you feel sick isolate immediately and notify supervisor.

311 / 8/23/2/

RIVER COMPLEX SAFETY MESSAGE DAY / NIGHT 8-24

DEMOB

One of the best moments of an incident is being demobilized. The thoughts of friends and loved ones brings excitement to the trip home. It is a time when our minds are home way before our bodies get there. This is a big Watch Out in my opinion. Getting home can take hours, a full day or multiple days. These time frames deserve our full attention and require a sharp focus. Countless serious injuries and deaths occur every year getting from a fire to a home. Please don't become a statistic, get at least 8 quality hours of rest, eat well and ensure your vehicle is ready to go. If you get tired on the road pull over, get out and stretch. You may even need to get a hotel.

INVERSION

We will be in this inversion for a period of time. With the lack of winds and our terrain the smoke is just sitting in the drainages. A couple of big concerns are the inability to see the tree or roll out hazards as you near. The other is the lack of good breathing air and exposure to carbon monoxide from the smoke. There are no easy answers to the second issue. You should know the signs of carbon monoxide poisoning.

- Dull headache
- Weakness \ Fatigue
- Nausea
- Shortness of breath
- Confusion
- Blurred vision

Don't wait until you have a real problem until you seek help. You need to move to cleaner air. If that means you and your crew come into camp for a night just do it.

X

The convention calls for frequency lists to show four digits attended beginned by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

TEAM 15 COVID-19 Best Practices / Mitigation

Minimize risk and limit exposure to COVID-19 by daily screening, minimizing large group settings, social distancing, wearing face coverings when appropriate, hand washing, cover your mouth and nose when coughing or sneezing and practicing good hygiene

At the beginning of the shift, <u>supervisors</u> should remind their personnel to self-screen for symptoms.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms 1?

Symptom

Cough more than expected?

Shortness of breath or difficulty breathing?

Fever? Chills?

Muscle pain, outside your normal for firefighting?

Sore throat?

New loss of taste or smell?

Fatigue, outside your normal for firefighting?

Headache, outside your normal for firefighting?

Congestion or runny nose, outside your normal for firefighting?

Nausea or vomiting

Diarrhea

* Take temperature with no-touch thermometer, if available *

1 Symptoms of Coronavirus

https://www.cdc.gov/coronavirus/2019-neov/symptoms-testing/symptoms.html

Do your part to minimize your risk of exposure and limit the spread COVID-19.

Public Considerations

- ⇒ Wear a face covering when in public.
- ⇒ Wash your hands often.
- ⇒ Use hand sanitizer after pumping gas.
- ⇒ Use hand sanitizer prior to getting into your vehicle after visiting the grocery store or a restaurant.
- ⇒ Set the example while in the public eye.
- *Keep in mind that fire camp is in a city with a populous and the potential for the COVID virus to be present is greater.

If you answered Yes to these symptoms, report it to your supervisor immediately, self-isolate away from other people until given direction and call **MEDICAL**.

Prevention and Management of COVID-19 During Wildland Fire Operations Keep yourself and your peers safe by practicing these measures whenever possible

Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet.
- · Use radios, remote units, and virtual technology for communications as much as possible.

- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.

Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.

Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/ sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

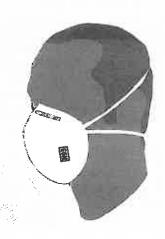

00000

Understand Different Face Coverings

- Cloth face coverings over the mouth and nose are not PPE and should be washed with soap and water after each use.
- Disposable face and surgical masks covering the mouth and nose are not PPE and should be discarded after one use.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

Other Resources

- Centers for Disease Control and Prevention: https://www.cdc.gov/coronavirus/2019-ncov/.
- National Wildfire Coordinating Group: https://www.nwcg.gov/committees/ emergency-medical-committee/ infectious-disease-guidance.

Human Resource Message

Integrity means following your moral or ethical convictions and doing the right thing in all circumstances, even if no one is watching you. Having integrity means you are true to yourself and would do nothing that demeans or dishonors you, your employer, your crew, your friends and family.

One aspect of integrity is not being part of the rumor mill.

A lie can run around the world before the truth puts its boots on.

Let's get our boots on straight and fight fire, not start rumors.

TONY TORRES 505-239-0041 Anthony.torres@usda.gov

FINANCE River Complex Equipment Issues

Help Finance help you! The following resources please contact Finance 530-467-1506, to correct the following issues:

- → S-16 Hanna Bros: Wrong Agreement turned in
- → Scott Valley Fire Dept : Does F42 ; no need to turn in shift tickets
- → E-121 Criddle Contracting : turning in wrong shift tickets ; verify fire name. Unable to post.
- → H and H Feeders : Please put the correct E# on respected shift tickets.
- → E-175 Yoder: need clarification on shift tickets for 8/12/21. See Finance or call @ 530-467-1506
- → E-96 Billy Wycoff: 8/20/2021 "mileage" written but not with no miles shown. Need clarity. See Finance or call @ 530-467-1506

TRAINING MESSAGE

<u>Training Specialist Check-in</u> – If you have a position task book (PTB), please scan the QR code below to initiate the check-in process with the Incident Training Specialist. Please complete the form in its entirety. Upon completion, at your earliest convenience, please email a copy of your qualification card and position task book cover (see below for email address).

For your convenience, an electronic ICS-225 or ICS-226 and Evaluation Record with be sent to you after you complete the check-in process.

RIVER COMPLEX FIRE TRAINEE CHECK-IN

<u>Training Specialist Closeout</u> – In order to receive credit for your assignment, you must close out with the Incident Training Specialist prior to demob.

Close out requirements include:

- 1. Ensure your trainer(s)/evaluator(s) has/have initialed completed tasks in your PTB,
- 2. Obtain an Incident Performance Rating (please sign in the appropriate block at the bottom of the form),
- 3. Obtain an Evaluation Record,
- 4. If evaluator initialed #1 on your Evaluation Record, ensure he/she signs as final evaluator (located on the backside of your PTB cover page),
- 5. Email all documentation (including item #4), when appropriate.
- 6. Complete Exit Interview.

RIVER COMPLEX FIRE TRAINEE EXIT INTERVIEW

Debra Burgos, Incident Training Specialist

Email: debra.burgos@usda.gov

River Complex Public Information Message

Stop by and visit us at the PIO yurt located next to the briefing area entrance.

Public Fire Information Line is: 707-596-6075

Would you like to send a Thank You?

Please complete this form to submit a Thank You request from the team to cooperators.

Please fill out the google form at:

https://bit.ly/RiverComplexThankYou

If you need to have packages delivered to ICP, please have them shipped to:

For Fedex/UPS:

124 Horn Lane, Etna, CA 96027

For USPS:

General Delivery, River Complex C/O Your Name 119 Diggles St., Etna, CA 96027

Photos Wanted!

The River Complex PIO shop would like you to submit photos of your operations on the fire. We would love to share your story and highlight your hard work.

E-mail Photos to 2021.River@firenet.gov

Pause before you post!

Prior to posting photos to personal social media accounts, please submit photos to the PIO Shop, and take a moment to review the *Pause Before*Posting Guidelines:

Consider agency guidelines and potential ramifications before posting pictures of:

- Fireline personnel NOT wearing full PPE
- Identifiable structures (ie. Addresses)
- Burning or destroyed structures
- Inmate crews
- Faces of children
- Accident/injury/fatality/investigation scenes
- Sensitive natural or cultural resources (or QR codes to maps that identify locations)
- Whiteboards/Flipcharts etc. with passwords/contacts or PII visible
- License plates

If you need additional info or have questions about what to and not to post, please stop by and see us!

Missing anything? Lost and Found items will be stored at the PIO yurt.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

Crew Supervisor to contact Division Supervisor/Operations with:

- Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red & 2/Yellow patients
- Triggers Incident within Incident (IWI)

(Level 1 Trauma & Burn Center)

Division Supervisor/POC contacts River Communications:

- Division Supervisor or *POC will run "Medical-Emergency" on Command Frequency.
- Division Supervisor or *POC to use "Medical Plan (ICS 206 WF)" worksheet in the IAP or IRPG.
- Communications contacts Medical Unit Leader on the Command frequency or cell phone (909-559-5196)

*PQC (Point of Contact)

LINE "NON-EMERGENCY INCIDENT" PLAN:

Long: 121 27.28

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green Patients

3CL0

Does not trigger Incident within Incident (IWI).

Division Supervisor/POC contacts River Communications

- Division Supervisor or *POC will run "Non-Emergency Incident" on the Command frequency.
- Division Supervisor or *POC to use "Medical Incident Report" worksheet on back of this page or in IRPG.
- Communications contacts Medical Unit Leader on the Command frequency or cell phone (909-559-5196)

IN-CAMP - 24 HOUR MEDICAL

Contact River Communications with: Patient Complaint, Condition and Location via Phone (530) 467-1509 or Command frequency

ICS 206

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.							
Use the following items to communicate situation to communications/dispatch. 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."							
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulence to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."							
Severity of Emergency / Transport Priority RED / PRIORITY 1 Life or limb threatening injury or liness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. YELLOW / PRIORITY 2 Serious Injury or liness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or liness. Non-Emergency transport Ex: Sprains, strains, minor heat-related liness.							
	injury or Illness & ism of Injury					Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)	
Transp	ort Request					Air Ambulance / Short Haul/Hoist Ground Ambulance / Other	
Patier	t Location					Descriptive Location & Lat. / Long. (WGS84)	
Incide	ent Name					Geographic Name + "Medical" (Ex: Trout Meadow Medical)	
On-Scene Inc	ident Commander					Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)	
Patie	ent Care					Name of Care Provider (Ex: EMT Smith)
