3. Objective(s):

Leader's Intent

Implement a full suppression strategy on the fires within the River Complex. Values at risk include human safety, communities, private timberlands, critical infrastructure, associated improvements, and wilderness resources. Apply tactics that offer the highest probability of success commensurate with resource availability.

Management Objectives

Provide for firefighter and public safety through hazard recognition and application of the risk management process.

Continue to provide timely information to all affected agency partners, cooperators, and to the public.

Coordinate suppression and repair activities with incident Resource Advisors to minimize impacts to wilderness, natural and cultural resources, and to work towards meeting suppression repair standards for turnover to local districts.

Reduce risk and limit exposure to infectious diseases by minimizing large group settings, reinforcing social distancing, wearing face coverings, and handwashing.

Control Objectives

Keep the Cronan Fire within existing control lines.

Keep the Haypress Fire within existing control lines.

Work towards meeting 100% completion of suppression repair guidelines.

Training Message

TRAINEES:

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob. When as much work (as possible) has been completed in your PTB for this incident – Conduct the “close-out” process w the TNSP to save you time at DMOB

**** (THIS INCLUDES ASSIGNMENTS ENDING WITH TRANSITION) ****

Submit/Upload the following during the “exit interview”

If your trainer has left I need your new Trainer info Name/Home Unit/contact phone and email

You must submit copies from each trainer of the following:

- A completed and signed ICS 225 or 226 Performance Evaluation
 - A completed Exit Interview Form
 - A completed Task Book Evaluation

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fire line, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for waterbars on fire lines.

Fire line slope %	Degrees	Maximum Distance Apart (feet)
1-5flat-3°.....	200
6-204-11°.....	125
21-4011-22°.....	60
41-6023-31°.....	40
>60	25

Waterbars should be at least two pulaskis (4-6 inches) wide and 12-24 inches high for handlines. For dozer lines, waterbars may be 2-3' high and the 5-6' across. They should survive the heaviest rain storm...think 6" rain in 36 hours.

HEALTH AND SAFETY MESSAGE

Safety First, Last and Always

INCIDENT: **River Complex**

DATE: 10/12/2021

Major Hazard and Risk:

- **Hazardous Trees & Roads:** Narrow roads, steep drop offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. Heads up, always look out for hazard trees around your work area.
- **Fatigue:** Stay hydrated, eat properly, get good sleep, take frequent breaks, and pay attention to your body.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Infectious Disease/COVID-19:** Wash hands frequently, practice social distancing, wear face coverings when required, clean and disinfect frequently touched surfaces, don't share cell phones, radios etc.
- **Cold Weather:** Reduce speeds on all roads, paved and dirt roads will become slippery.

Narrative: As time moves on with this incident, so does our risk. With each passing day the very roots that secure the trees around you are burning away or the tree itself is burning from within just waiting for the right opportunity to come down on you.

Never stop looking at the environment around you!

Defensive Driving

- **Be a defensive driver at all times.**
- **Drive like other drivers don't see you.**
- **Be courteous to all vehicle traffic to and from the fire area(s).**
- **Don't have side bar conversations on the roads....provide the margin of SAFETY for all road users.**

Don't let this be you and your crew!

Incident Safety: Brent Kaiser SOF2

HAZARD TREE SAFETY

- ✓ **Trees that have burned**
- ✓ **Shallow tree root systems**
- ✓ **Dead & broken top trees**
- ✓ **Leaning or hung up trees**

USDA Forest Service

Free COVID-19 tests are available for
wildland fire personnel!!!

Not just for Forest Service personnel! Anyone associated with wildland fire work is welcome.

To get tested for free, go to the

Klamath National Forest Headquarters (aka "Klamath Supervisor's Office")

**1711 South Main St, Yreka, CA 96097 - 6:30 AM to
8:30 PM every day!**

Please use the QR code to the right to register (either before or on-site) for the test administered by Emergency Response Logistics, Inc. That QR code will take you to a form.

In the interest of protecting each other and our families, we encourage testing early and often! Please contact testing.klamath1@gmail.com if you have questions or comments.

All USFS employees and non-USFS personnel assigned to fires in the Klamath NF area or passing through Yreka en route to or from fire assignments are encouraged to stop to be tested prior to reporting to the assignment or traveling to another site or home.

A core value of the Forest Service is safety. This testing availability is an additional step in safeguarding human life and protecting our most valuable resources. Our Code and Commitments include being trusted to "do right" by each other and the communities we serve.
